NAIRN INLAID LINOLEUM

"Not so fast, young man"—

"YOU can't go hiking without mother, just yet, or you'll bump that pink little nose of yours. Goodness, but I'm glad there are no rugs here for you to stumble over!"

That's the delightful thing about a nursery floor of *Belflor* Inlaid—the new Nairn flooring. Its soft, dappled colors are so lovely, the patterns so decorative, that there's no need for rugs as with cheerless wooden floors.

On the other hand, there's nothing like *Belflor* to set off the beauty of rugs in your dining-room, living-room and bedrooms. Even conservative housewives are taking up this new idea of having floors that harmonize with the hangings and upholstery. It gives any room such an air of luxury and individuality.

Floors of *Belflor* Inlaid wear marvelously. They are easier to clean and more hygienic than dust-collecting floor-covering. And unlike wood, *Belflor* never needs refinishing—the patterns go clear through to the burlap base. An occasional waxing is all the attention *Belflor* requires.

When you see *Belflor* at your dealer's you will realize that it is something entirely new and distinct in inlaid linoleum. And its moderate cost will surprise you.

A Wealth of Patterns

You've no idea how wonderfully *Belflor* Inlaid flooring can beautify until you've seen the range of *Belflor* patterns. Send for the folder showing 31 *Belflor* designs in their actual colorings.

This Three Thistle trade mark is on the back of every yard of
NAIRN LINOLEUM

Belflor Inlaid—a new line of 46 marble- and pattern effects of rare beauty. Made in light and heavy weights.
Straight Line Inlaid—clear-cut inlaid tile patterns, machine inlaid.
Dutch Tile and Moulded Inlaid—the mottled colors merge slightly to produce softened outlines.
Marf Inlaid—a rich two-tone, all-over effect.
Granite and Marble Inlaid—popular all-over mottled effects.

The edge shows you that the inlaid patterns are permanent, the colors go through to the burlap back.

Battleship Linoleum—heavyweight plain linoleum—made to meet U. S. Gov't specifications. In five colors.
Plain Linoleum—lighter weights of Battleship Linoleum. In six colors.
Cork Carpet—an extra resilient and quiet plain-colored flooring.
Printed Linoleum—beautiful designs printed in oil paints on genuine linoleum. Has a tough, glossy surface.
Linoleum Rugs—linoleum printed in handsome rug designs.
Pro-Lino—attractive patterns printed on a felt base.

This Belfor Inlaid Pattern No. 7008 is shaded gray, blue and ivory makes a colorful and sanitary floor for the nursery.
The all-over pattern in the bedroom is Modern Inlaid No. 1/4136.

"Say! *This Is a Conklin!*"

The thrill of possessing something inexpressibly fine comes to the boy or girl who gets a Conklin to take along on the memorable "first day of school".

The Conklin Student's Special is made for boys and girls in the grades or in the universities. All the excellence that over 20 years of fountain pen building can put into a $3.50 writing tool goes into this wonderful pen. Compare it with anything anywhere near the price and superior value sticks out all over it. Pencils to match at $2.50. At most good places where pens and pencils are sold.

THE CONKLIN PEN MFG. CO. · TOLEDO, OHIO

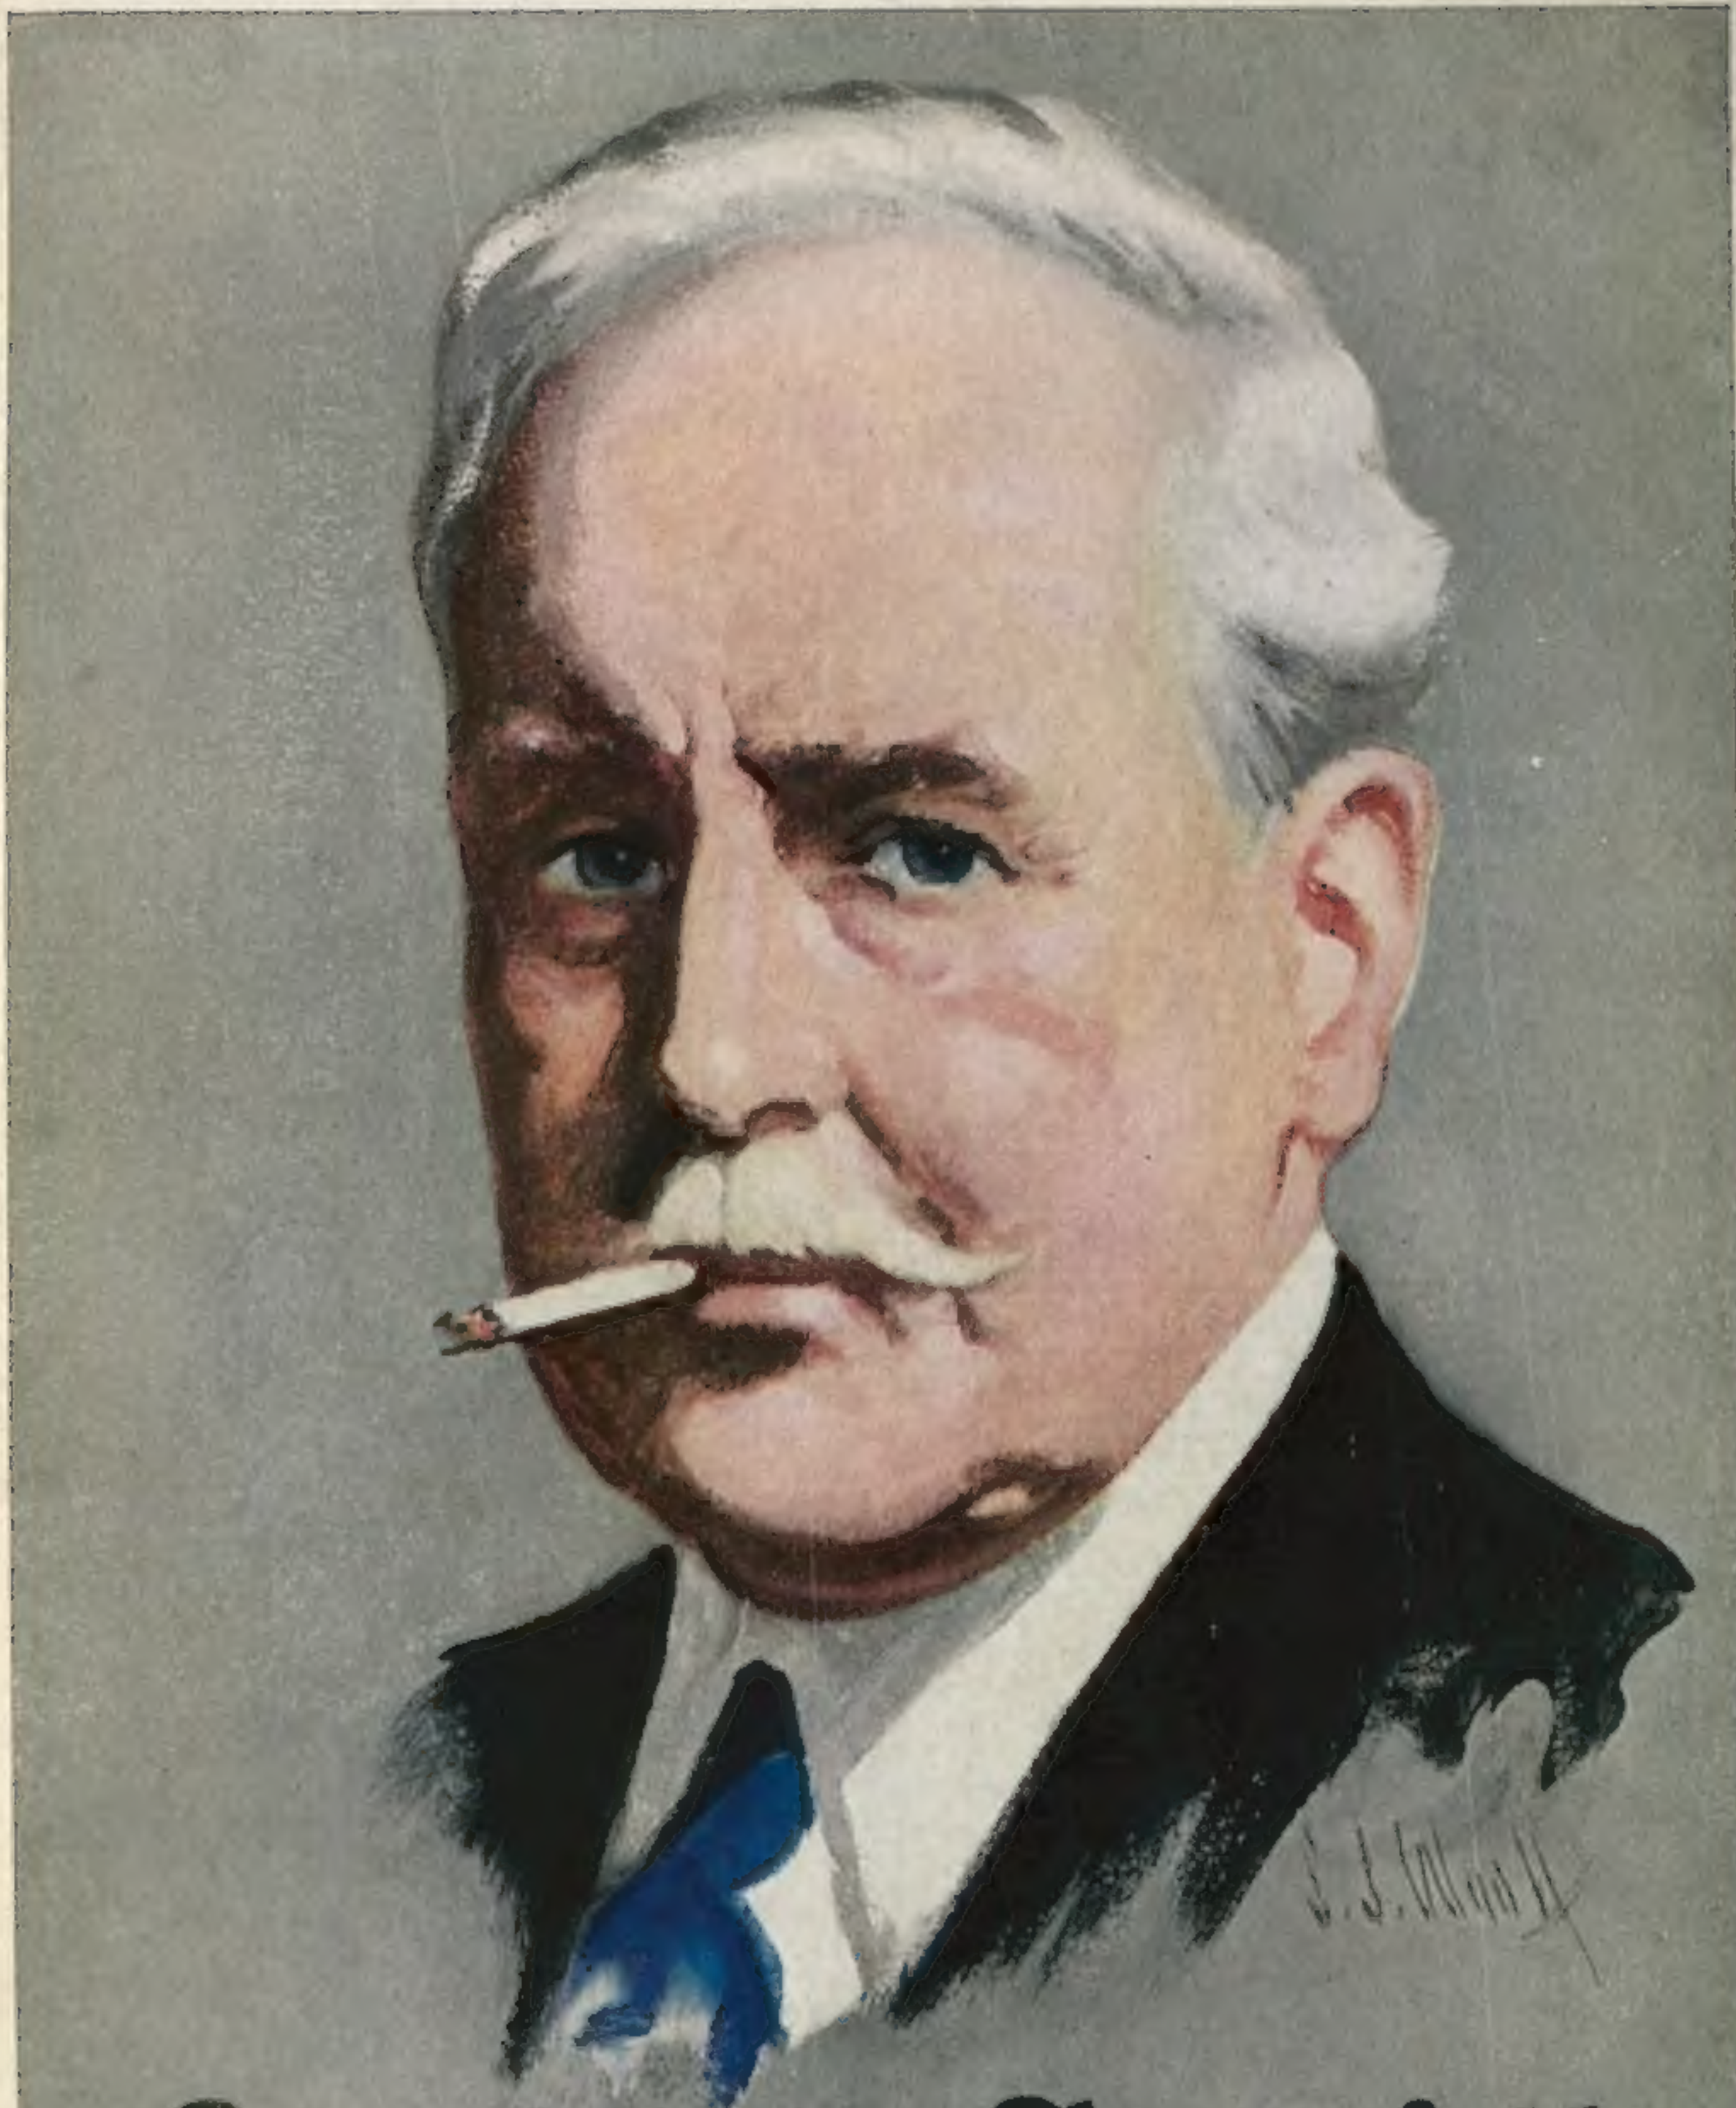
CHICAGO LONDON SAN FRANCISCO BARCELONA BOSTON

The Student's Special pen and pencil are fitted with the Conklin "clip that can't slip" or a gold ring for ribbon, as desired. Replaceable points are standard equipment on "the pencil with the long lead".

Conklin

Pens-Pencils-Sets

The finest pen that Conklin makes—the ultra-pen of all time—is the Conklin Endura. It carries an unlimited guarantee of perpetual free service. The first cost is the only cost no matter how or when the pen might be broken or worn. In red, black, and mahogany—fitted with the famous Conklin "clip that can't slip" or gold ring for ribbon—$5 and $7.



On taste alone, Chesterfield has won the endorsement of men in every walk of life

The up-to-date trains for up-to-date boys

IVES Trains have all the 1925 improvements. They are the *only* trains with electric locomotives (Series R) that you can stop and reverse by a touch of your finger on the control switch, located away from the track.

You boys will get a wonderful "kick" out of this reversing device—making the locomotive stop and back just like a real engineer. A mere touch of the finger does it! This year you can have an Ives Electric Reversing Locomotive on either O-gauge or 2¼-gauge track.

Both in action and appearance Ives Trains are exactly like the modern equipment of famous railroads. There is an almost endless variety of passenger and freight cars, electric target signals and semaphore signals with electrically-operated arms, bridges, tunnels, stations, and the efficient Ives Transformer. Prices range from the $1.50 mechanical train to the big complete $50 electric outfit. Sold by toy, department, electrical, hardware and sporting goods stores.

Send for the Ives Railroad Book

THE 32-page book of Ives Trains and Accessories contains illustrations in colors of the full line and tells all about the new 1925 features exclusive with Ives. Mail the coupon today with 10 cents. THE IVES MANUFACTURING CORPORATION, Dept. D1, 198 Holland Ave. Bridgeport, Conn.

WATER COOLERS

"XXTH" CENTURY

Fibre.

The body or ice container is seamless. Made of fibre moulded in one piece; absolutely water-proof and rust proof, and being a non-conductor, is a great ice saver. The cooling jar is a sanitary white crock, carafe shape. The cover of the cooler is entirely removable for icing, being in two interchangeable halves. The body rests on a tray which serves to catch any moisture collecting on the cooler body.

The push faucet is an improved form of self-closing, simple strong and reliable. It has a ½ inch flow, filling an 8 oz. glass in three seconds.

COOLERS ONLY

Price does not include bottle.

Holds 3 or 5 gallon bottle. Rests on a flat tray. For use on table or counter. Height without bottle 11½ ins; diam 14½ ins; ice capacity about 15 lbs.

One in blue velvet lined box; wt each about ¼ lb.

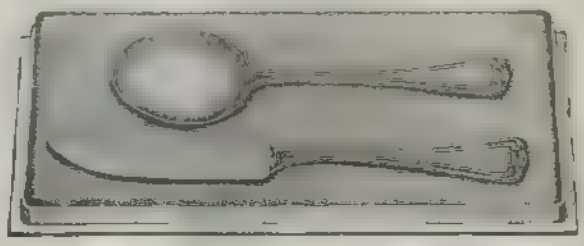
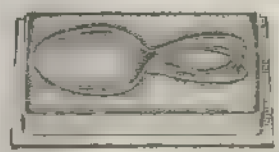
BUTTER KNIFE AND SUGAR SHELL SET



Per Set

No. 79301 (Old No. 604C)—Length sugar shell 6 ins; length butter knife 7¼ ins $5 31
One set in blue velvet lined box; wt per set ½ lb.

BABY SPOONS



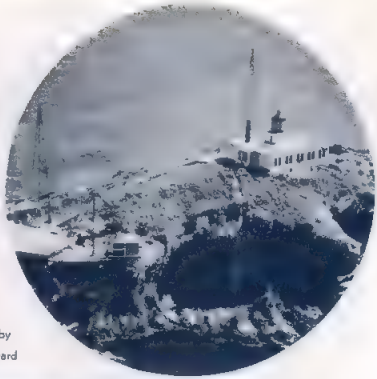
Each

No. 79001 (Old No. 725C)—Length 3½ ins..... $1 89
One in blue velvet lined box; wt per doz 1¼ lbs

CHEST ASSORTMENTS

For chest assortments in Cromwell pattern see pages 2004 to 2006.

LIGHTHOUSES



Right: Isolated Cape Spencer Lighthouse, 150 miles from a town, marks the northern entrance from the Pacific into the Inside Passages of Southeastern Alaska. It is a primary light, fog signal and radiobeacon station

Photographs by U. S. Coast Guard

Above: Ponce de Leon Lighthouse, six miles below Daytona Beach, Fla., guards the long section of coast between the lights at St. Augustine and Cape Canaveral

Below: Biloxi Light (Miss.), a cast iron tower on a brick foundation, has withstood many hurricanes. It was built originally in 1848 to guide small trading sailing vessels. In 1867 it leaned two feet out of perpendicular, but this was corrected

Left: Tillamook Rock Lighthouse, standing a mile offshore at Tillamook Head, Oregon, is one of the most exposed stations on the Pacific Coast. The protecting glass of the light, 133 feet above sea level, has been smashed several times by stones driven by great storm waves. Landing at this station is often difficult, if not impossible

Right: Jupiter Inlet Lighthouse lights the northern approach to the passage around the Florida Reefs. The station is equipped with radiobeacon and a million candlepower light. Construction, in 1860, was beset with many difficulties

Left. The skeleton iron structures of the lighthouses of the Florida Reefs between Miami and Key West are practically hurricane-proof. Six of them, similar in appearance, are located at Fowey Rocks, Carysfort Reef, Alligator Reef, Sombrero Key, American Shoal, and Sand Key. Each is manned by four keepers

AMERICAN

SAFEGUARDS OF

COASTAL NAVIGATION

Left: Split Rock Lighthouse, standing on a rocky cliff in Minnesota on Lake Superior, is one of the most frequently visited. Its incandescent oil vapor lamp, in a third order lens, produces 370,000 candlepower. The light stands 168 feet above the lake and is visible 22 miles

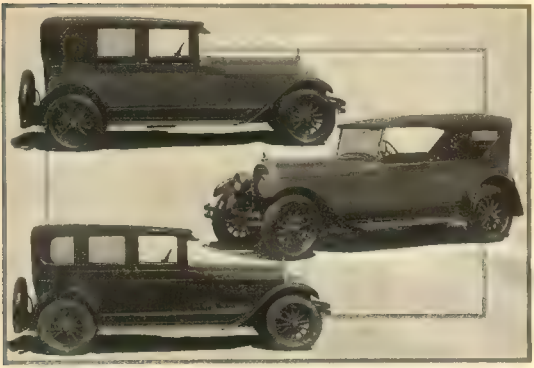
Left: Fire Island Lighthouse rises 167 feet above the low south shore of Long Island (N. Y.). This is one of the most important navigational aids to ships bound for New York Harbor. First erected in 1827, the present tower of brick was built in 1858

Right: Portland Head Lighthouse at South Portland, Me. The original station went into commission in 1791, construction having been started a year earlier by the Colony of Massachusetts. The present light is 32,000 candlepower

Extreme right: Navesink, the first primary seacoast light to be electrically lighted, overlooks New York Lower Bay from the Highlands of Navesink, N. J. Its 9,000,000 candlepower beam, visible 22 miles, is the most powerful maritime light in the U.S.

Left: Old and new lighthouses at Cape Henry, Va., marking the entrance to Chesapeake Bay. The original lighthouse (1791) was the first to be built by the Federal Government. The new tower is of cast iron plates. The old tower is not used as a lighthouse

Right: Eastern Point Lighthouse (Mass.) has guided Gloucestermen for more than a century. The present white brick tower built in 1890, replaces one built in 1832



Upper left: Locomobile junior eight brougham. Center, the touring car. Lower left, the sedan

Locomobile Now in Production on Junior Eight

ALL details of the design of the new Junior Eight exhibited by the Locomobile Co. have been settled upon and production is now under way. Changes have been made in some important particulars and will receive mention in this description. The wheelbase is 124 in. and the various body models available are as follows: The touring car lists at $1785 and the roadster at $2150. The two closed models produced are a sedan at $2185 and a brougham at $2285.

The eight-in-line engine is of the small bore, overhead valve, high speed type. It has a bore of 2 13/16 in. and a stroke of 4 in., making the piston displacement 198.8 cu. in. At a speed of 3,000 r.p.m. it develops between 66 and 70 h. p., which, in view of the moderate weight of the car gives unusual speed and acceleration.

All of the cylinders and the greater part of the crankcase are in a single casting, while the cylinder heads form two castings.

Both the inlet and exhaust valves are made of Silerome steel. The valves have a clear diameter of 1 3/16 in. (about 65 per cent of the bore) and the lift is 5/16 in. Cam followers are of the round nose type giving the same cam action as roller followers. There are two cast aluminum valve covers over the cylinder heads, which are held in place by two thumb screws each. Camshaft and accessories drive is by silent chain with the Link-Belt Co.'s patented method of automatic tensioning.

The pistons are of cast-iron and held very light. They are fitted with four ⅛ in. rings with diagonal joints, all above the piston bosses, the lower most ring being a Teetor oil control ring. The piston pins float in both the piston bosses and the top end of the rod. The connecting rods are the usual I-section drop forgings.

The crankshaft is of the inherently balanced type, consisting of a four-cylinder crankshaft in the middle and a half of a four-cylinder crankshaft at either end. Individual sections of the crank are partially counterbalanced, and torsional vibration is guarded against by the use of Lanchester vibration damper.

Fuel is carried in a 16½ gal. tank at the

rear and is fed to the carburetor by means of a Stewart vacuum tank of the larger size. The carburetor is the Stromberg, of 1½ in. diameter. A combined inlet and exhaust manifold is used of such design that the part of the inlet manifold directly above the carburetor flange is completely surrounded by an exhaust jacket.

Lubrication is by pressure from a pump located in the oil sump and driven from the camshaft through helical gearing and a vertical shaft. A feature in connection with the lubrication system is that the oil can be drained from the crankcase by pressing on the stem of a poppet type drain valve which projects through the side of the crankcase in an accessible place.

Forced Water Circulation

Pump circulation is employed for the cooling water, the centrifugal type of pump being bolted against the engine block about two-thirds the way back, is driven through the generator by means of a hose type coupling The radiator is a Fedders cellular type, with 2¼ in. core and the usual pressed steel, nickeled shell

The electrical equipment, including the generator, starter and ignition unit, is of DeJon make. The generator is mounted on the left side of the engine and has the ignition unit mounted on it. Control of generator output is by the third brush system

The clutch is of the single plate type and is contained within the flywheel. The spinning weight of this clutch is very small and this greatly facilitates gear shifting.

The transmission is a three-speed and reverse combination. All the gears which are in mesh continuously, including the constant mesh set and the reverse gears, have ground teeth. The gear case, which is of cast-iron, is bolted against a deep cross member of the frame at the front.

The rear axle is of the semi-floating, built-up type and the final drive is by spiral bevel gears. On the roadster a reduction ratio of 4 7/9 to 1 is used and on all other models a ratio of 5 1/9 to 1.

Bendix four-wheel mechanical brakes are standard equipment. These are of the three shoe type which give a servo effect, so that the application of the brakes requires comparatively little effort. For service braking all four brakes are applied by the brake pedal, while for emergency use the rear brakes alone are applied by the lever.

Semi-elliptic springs are used all around and are provided with the Mack rubber shock insulator, this constituting apparently the first application of these devices to private passenger cars. The front springs are 36½ by 2 in. and the rear springs 54½ by 2 in. The rear springs are underslung and they take both the driving thrust and the torque reaction, the so-called Hotchkiss drive being used.

The front axle is of the usual drop-forged type with inverted Elliott type steering heads. A Ross-Warner steering gear is used with a mahogany finish all wood wheel, 17 in. in diameter.

Natural Wood Wheels

Artillery type wheels are fitted, finished in the natural wood and equipped with 30 x 5.77 in. balloon tires with all weather tread.

The bodies are of the wood frame, steel shell construction and are roomy, having deep seats well inclined for comfort. A single piece fixed type of windshield is used on the closed models and a single piece movable type on the closed models.

Nordyke & Marmon announces new club phaeton.

The new Marmon five passenger Club Phaeton is available in three color options of Duco finish and is equipped with a variety of detail extras as: Complete set of khaki seat covers and top boot, nickel-plated band around the cowl in back of the hood with brackets to cowl lamps, nickel-plated windshield and windshield wiper, nickeled hardware on windshield side wings as well as nickeled rear view mirror on fenders. The Club Touring Car for seven passengers has the same specifications and both models are priced at $3,490 f.o.b. Indianapolis, Ind.

TRIPLE STITCHED BOSS MECHANIC OVERALLS

245 White Back Blue Denim

4 3½ yds. of denim to the dozen. **Triple stitched**, and made with continuous 2 button fly, and side openings to prevent rigging. All have 6 roomy pockets and 2 seam legs. Brass buttons, loops and castoffs. Good heavy pocketing, red bar tacked at all vital points. Fast color indigo blue dye, of course.

Century BICYCLES

With the Best of Standard Equipment

You can sell more bicycles when you push this strong "Century" line. Look it over. We carry stock for you. Moreover, we ship within 24 hours from receipt of order. Think how that helps you to turn your stock.

Construction of all "Centurys"

Seven reasons why "Century" Bicycles are so easy to sell and are trouble-proof:

Frame—20 gauge seamless tubing.

Joints—Flush reinforced fishtail.

Crank Hanger—Drop forged, 1 piece.

Sprocket—Special design, machined and polished.

Spokes—Standard Co's best.

Chain—Roller, ½ in. pitch, easy riding.

Cups and Cones—Lathe turned from solid bar, polished.

Guarantee

Every part is guaranteed for 12 months from date of purchase against defects in workmanship or materials. Any parts will be replaced without charge when sent direct to us, transportation charges prepaid. Returns must come through the merchant not the rider. We make no allowance for repairs made locally. Tires are guaranteed for the season in which they are purchased. Tires are not guaranteed against punctures or blowouts.

"SCOUT" MODEL

Finished in a rich blue with a white outlined spearhead. 1 in crate.

BOYS'

1K1465—17 in. at seat post, 5½ in. crank hanger, 26 in. U. S. red Stud tires, Troxel's Strut saddle. Fits 24 in. inseam measurement. Each **$26.00**

5 or more, Each **24.50**

WOMEN'S

1K1462—26 in. frame, Troxel's comfort saddle, U. S. chain tires. Complete with chain guard and mud guard with lacing. Each **$30.00**

5 or more, Each **28.50**

➡10 or more, F. O. B. Fact. in Northern Ill., Each **$27.00**

Quantity prices apply on all orders for specified quantities—one model or assrtd. models

Equipment of all "Centurys"

Equipment plays a big part in selecting a bicycle. "Century" bicycles have the best of standard equipment.

Coaster Brake—"New Departure."

Front Hub—"New Departure."

Tires—
Adult—U. S. Giant Chain.
Juvenile—U. S. Red Stud.

Mud Guards—All models fitted with deep side motorcycle type.

Saddle—"Troxel."

Handle Bars—"Kelly" triple plated, motorcycle rubber grips.

Pedals—Ball bearing, rubber tread.

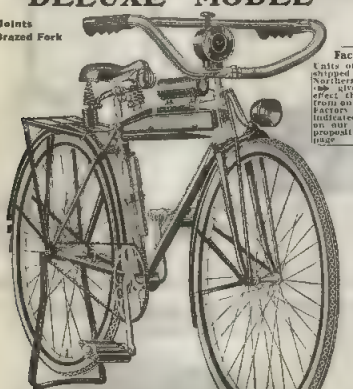
Stand—Channel iron, latches to mud guard.

Finish

The famous "Century" finish is obtained from anti-rust and primary coats hand rubbed and sanded and then finished with deep rich enamels applied with air brush and then oven-baked to a hard china-like surface. Steel braced enameled mudguards match the color schemes of the frame

"DELUXE" MODEL

Flush Joints
Solid Brazed Fork



Note these special features on this bike only: Braced handle bars, electric lamp, luggage carrier, autotone horn and large frame tank.

Factory Shipments

Units of 10 bicycles will be shipped F. O. B. Factory in Northern Illinois. Our prices ➡ give you every saving we effect through direct service from our factory. Factory shipment purchases indicated by ➡ do not apply on our "Free Deal" bicycle proposition listed on nearby page.

For men and youths motorbike frame with steel tank, shock-proof, double brazed fork, 26 in. U. S. cable brake, white trim finish, braced motorbike handle bars with rubber grips, deep side guards, enameled to match frame, leather splasher, "Troxel" No. 2 motorbike saddle, leather upholstered, double coil springs, channel iron stand, folding and latching pedal bearing pedals, rubber tread.

CORRECT SERVICE PIECES

Gasoline

"The World's Best Visible"
—S. B. BECHTEL
HERE is Bowser's masterpiece—the "Square Visible," worthy to share in the fame and prestige of "Square Sentry," the sturdy piston-type pump so highly regarded by service stations and garages the world over.
22% faster—square to the eye—square to the pocketbook—and a real attention-getter and trade-holder, because of the arrow that tells the motorist where the gas goes when it rushes out of the visible bowl. This new, and patented, feature makes "Square Visible" the best business-getter among all visible pumps today—Bowser says so, and Bowser knows.
Write today for pictures and detailed descriptions. "Square Visible" is Bowser-built throughout—dependable, sturdy and good looking. Write for these new folders, or ask any Bowser man—there are 300 of them ready to help you sell more gas and oil!

Genuine mahogany or walnut 5 ply veneer hand rubbed polish piano hinged cover, 3 ply wood tone chamber with cast iron back tone reproducer as used on phonographs selling at much higher prices. Universal three-back tone arm—plays all records without extra attachments. Highest grade tapered worm gear motor plays four 10 inch records with one winding. Nickel plated fittings, tone modifier speed control and indicator brake, automatic stop.

—here's what we will do:

WE want to interest you in selling Grand Opera phonographs. If you can spare a small space in a prominent location, and are willing to use a few moments each day in pushing the sale of a big unit item carrying a long profit, our proposition should net enough *extra* money to be worth your while.

Many of your customers are in the market for a phonograph of Grand Opera quality at the Grand Opera price. A demonstration often is the only salesmanship needed to close a sale. When a prospective buyer once listens to the marvelous tone of the Grand Opera, critically examines its superb quality, finds the price *many dollars less than expected*, a sale is quickly made.

For your own satisfaction we ask you to compare the Grand Opera with any make; in *construction*, in quality of *materials* and *workmanship*, in *finish*, in *volume* of pure clear tone, Grand Operas *give everything you can expect* in a phonograph.

Your Sample—FREE

Here is our proposition: Send us your order for either the console or upright model shown above, and your order will be recorded on our ledger as due NET Nov. 1, 1925. If by that date you have purchased 5 other phonographs—any numbers from the Grand Opera line—and paid for them according to our regular terms, we will send you a credit memorandum *for the full amount of the original sample.*

All you need do to take advantage of this offer is to write FREE SAMPLE PLAN on your order and specify the model you wish.

ADVERTISING HELPS

We supply FREE a quantity of Phonograph folders showing our complete line. These folders are made up with retail prices only so you can use them in taking orders. We carry the stock of phonographs and make prompt shipments as orders are received.

Order Your Sample Phonograph Today

Grand Opera PHONOGRAPHS

Grand Opera Phonographs are high grade instruments with a rich, mellow, resonant tone resulting from a highly developed tone chamber. They have all recent improvements and at these low prices are exceptional values. The cabinets are strongly built of beautifully grained woods. In tone, appearance and size they will compare favorably with any Phonographs on the market, regardless of name or price. Extra well finished and packed.

PITTSBURGH REFLECTORS

DIRECT OR INDIRECT

"Pittsburgh" Reflectors for direct and indirect lighting are made in the same manner as the show-window reflectors. They are especially designed, one-piece, glass, silver plated reflectors. This plating is protected by a coat of copper and new silver colored satin finish. The direct reflectors are especially adapted for localized lighting, individual machines, bench and work tables. The larger units are most economical and highly efficient for general lighting factories, garages and such parts of stores where opaque reflectors can be used.

"PITTSBURGH" REFLECTORS

FOR SHOW WINDOW LIGHTING

"Pittsburgh" Show-Window Reflectors are superior to any other similar line. Their special design gives the utmost in results for the particular purpose for which they are designed. The plating of silver is covered and protected with an electro plating of copper (an exclusive process used by us in place of shellac used by other lines which will ultimately crack and peel from the intense heat of the gas-filled lamp.) This is covered with a new silver colored satin finish and baked at a high temperature. It is impossible for the backing to crack, check or peel

The silver color makes the reflectors less conspicuous when not concealed by valance or sign; harmonizes more universally with the variety of colors found in show window ceilings and backgrounds, is suggestive of light silver and glass, and, unlike the enamel heretofore used for reflector backings, this silver color will not darken under the heat of the type "C" lamps

Last—but by no means least—this new finish adds even greater durability to the backing.

The reflectors are absolutely and unconditionally guaranteed in this respect for five years' service. The reflectors are designed for use with the ordinary 2¼-in. holders. No unusual holders needed. The 200-watt lamp may be used with the 100-watt reflectors, maintaining the same light distribution by substituting form "H" holder in place of form "O." It can be so used with no other line. "Pittsburgh" Show-Window Reflectors are the most reasonable in price of any similar line.

No. 50

No. 50

Holder, 2¼ inches. Form "O."

Designed for high shallow windows, for island windows, or for windows with the upper part of the background made of glass. Concentrating in type. Light cut off on the fifty-five degree line.

No	Size lamp, watts	Width	Height	Std. pkg	Wt. lbs. std pkg.	Each
50	100, 200	10¼ in.	9⅝ in.	32	100	$7.00

No. 75

No. 61

No. 70

No. 100

No. 75

Holder, 2¼ inches. Form "H."

Designed for windows like those described above, but where 75-watt lamps are used in place of 100 or 150. This reflector should never be used with 100-watt lamps. The distance from contact to filament in the 100-watt is 1/16-inch greater than in the 75-watt lamp. Using the 100-watt lamp the filament will therefore be this distance below the "focul point" of the reflector and the light curve will be entirely different from that which the reflector is designed to produce.

No.	Size lamp, watts	Width	Height	Std pkg.	Wt. lbs. std pkg	Ea
75	75	7½ in.	6 in.	32	67	$5.50

No. 51

Holder, 2¼ inches. Form "O."

No.	Size lamp, watts	Width	Height	Std pkg.	Wt. lbs. std. pkg.	Ea.
51	100, 130	9⅜ in.	8⅛ in.	32	96	$6.80

No. 70

Holder, 2¼ inches. Form "H."

This reflector is designed for wall-case lighting and may be used with 40, 50 or 60-watt lamps by using form "O," 2¼-in. holder, and with the 75-watt "C" lamp when form "H" holder is used. It is most important that the proper holder be used with any certain lamp.

No.	Size lamp, watts	Width	Height	Std pkg.	Wt. lbs. std. pkg.	Ea.
70	75	6¼ in.	5 3/16 in.	40	65	$4.50

No. 100

Holder, 2¼ inches. Form "O."

Designed for use in windows where the depth of the window is ⅓ to ¾ of the height, and where it is desired to light the entire background. A general all round reflector. Contractors can use it with good results in the majority of windows. Receptacles for this reflector should be placed at least four inches from the glass line.

No.	Size lamp, watts	Width	Height	Std. pkg	Wt. lbs. std pkg.	Ea.
100	100, 150	8 in.	8 7/16 in.	40	98	$6.25

The new RAYFIELD CARBURETOR IS WONDERFUL!

YOU know the engine troubles of the average motorist. He says his motor is hard to start—or its pick-up is slow, or it runs poorly, lacks power, dies in traffic or wastes gas.

You also know that you can't make any engine run sweet if the carburetor isn't *right.* And when you go and sell your customer a new carburetor, heaven help you if it doesn't vastly improve the car's performance!

Now comes Rayfield with this new carburetor—thoroughly tried and tested—built to meet every demand

THE BENEKE MFG. CO. · CHICAGO

and priced at only $21.50 retail for the 1¼ in. size!

Simple in construction. Only two moving units, only two adjustments. Rayfield carburetor outfits have been designed for many of the popular cars and these outfits are packed complete to the last cotter pin, ready to install.

The New Rayfield Carburetor is a worthy successor to the early Rayfields of racing fame.

You can slap a Rayfield on a manifold—set the two adjustment screws—and send your customer on his way rejoicing.

Let the marvelous performance of this new carburetor help you increase your business. If your jobber can't supply you write us for prices and give us his name.

The New

RAYFIELD

CARBURETOR

STORE LADDERS

RELIABLE—OVERHEAD

For use with unusually high shelving where side ladders will not meet the requirements.

Each ladder step is grooved in the stiles and fastened with four steel screws, and at every fourth step a stay-rod is bolted through both stiles for additional strength.

Upper fixture has four steel cased wheels with fibre tread. Floor wheels also have fibre tread.

Made of selected kiln-dried oak rubbed and varnished fixtures made of malleable iron and steel japanned finish; track wheels run smoothly with no side friction and cannot jump the track; track and brackets finished in black enamel finish.

FOR STRAIGHT TRACK

Each

No. **95**—Ladder Complete with Fixtures; Weight per Foot, 4 Lbs. **$19.00**

Note—If Distance from Floor to Ceiling Exceeds 12 Feet Add $1.00 to List Price of Ladder for Each Additional Foot or Fraction Thereof.

Per 100 Feet

No. **11L**—Round Steel Track for Overhead Ladder, Complete with Brackets; Weight per 100 Ft. 175 Lbs. **$25.00**

FOR CURVED TRACK

Each

No. **100**—Overhead Ladder for Curved Track Requirements, with Trolley Track Fixtures, Weight per Ft. 4 Lbs. **$19.00**

Note—If distance from Floor to Ceiling Exceeds 12 Feet Add $1.00 to List Price of Ladder for Each Additional Foot or Fraction Thereof.

Per 100 Feet

No. **60X**—Trolley Track without Brackets per 100 Ft., Weight 150 Lbs. **$18.00**

For each curve add **3.00**

Per 100

No. **60**-C. O.—Centre Overhead Cross Ear Brackets; Weight per 100, 150 Lbs. **$20.00**

No. **60EO**.—End Overhead Cross Ear Brackets; Weight per 100, 158 Lbs. **20.00**

No. **60CQ**.—Centre Overhead Parallel Ear Brackets, Weight per 100, 150 Lbs. **20.00**

No. **60EQ**.—End Overhead Parallel Ear Brackets; Weight per 100, 158 Lbs. **20.00**

Per Set

No. **99**—Track Fixtures; Upper Trolley **$4.00**

No. **98**—Lower Track Fixtures, Weight per Set, 3¼ Lbs. **2.00**

STORE LADDERS

RELIABLE—BENT SIDE

Made of selected kiln-dried oak rubbed and varnished. Each ladder step is grooved in the stiles and fastened with four steel screws and at every fourth step a stay-rod is bolted through both stiles for additional strength. This style is intended for use where projection of the base shelf is too great to take a straight ladder.

For best operation of ladder, track should be attached to the shelving about three feet below the highest point at which goods are stored.

Brackets are regularly furnished for three foot spacing. Track should have about 12 inches of clear space above, but may be reduced to 7 inches if necessary. If headroom is less than 12 inches, mention same when ordering. Track is regularly furnished in four, six, eight and ten foot lengths.

Each

No. **85**—Bent Side Ladder, Complete with Fixtures, Weight per Ft., 4½ Lbs. **$24.00**

Note—If Distance from Floor to Centre of Track Exceeds 10 Feet, Add $1.00 to List Price Per Foot, to the Price of the Ladder for Each Additional Foot or Fraction Thereof.

Per 100 Feet

No. **1**-L—Round Steel Track, Complete with Brackets, Weight per 100 Ft., 75 Lbs. **$12.00**

Note—If Curved Track is Desired, Allowing the Ladder to run along two Sections of Shelving at Right Angles to Each Other, Add to the Price of the Track an Extra Charge of $3 00 for such Curving.

Per Set

No. **82**—Upper Fixtures, Weight per Set, 6 Lbs. **$5.00**

No. **87**—Upper Fixtures for Operation on Curved Track, Weight per Set, 15 Lbs. **13.00**

No. **83**—Lower Fixtures, Weight per Set, 7 Lbs. **5.00**

Per Pair

No. **84**—Rubber Tires for Floor Wheels, Weight per Pair ⅗ Lbs. **$1.00**

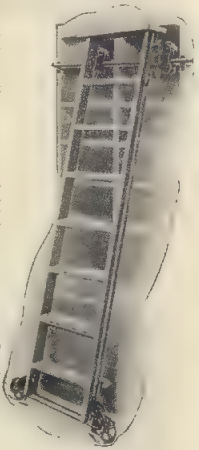
STORE LADDERS

RELIABLE—STRAIGHT SIDE

Most popular style, recommended wherever shelving will permit. Occupies less floor space than any other style. Durable, strong and safe.

Top fixture is self-adjusting, with a perfect bearing on the track, allowing the ladder to roll easily whether perpendicular or at an angle.

Can be placed close to the shelving when not in use. Floor wheels are rubber tired making the ladder perfectly noiseless and easy running.



Made of selected kiln-dried oak, rubbed and varnished, fixtures made of malleable iron and steel; japanned finish; track wheels run smoothly with no side friction; track and brackets finished in black enamel.

	Each
No. **80**—Ladder complete with Fixtures, Weight per Ft., 4½ Lbs.	**$22.00**
No. **86**—Ladder complete with upper fixtures for operation on curved track, Weight per Ft., 5¼ Lbs.	**30.00**

Note: If distance from floor to centre of track exceeds 10 feet, add $1.00 to list price of the ladder for each additional foot or fraction thereof.

	Per 100 Feet
No. **1L**—Round track, complete with brackets, Weight per 100 Ft., 75 Lbs.	**$12.00**

Note: If curved track is desired, allowing the ladder to run along two sections of shelving at right angles to each other, add to the price of the track an extra charge of $3.00 for such curving.

	Per Set
No. **82**—Upper fixtures, Weight per set, 6 Lbs.	**$5.00**
No. **87**—Upper fixtures for operation on curved track, Weight per set, 15 Lbs.	**13.00**
No. **83**—Lower fixtures, Weight per set, 7 Lbs.	**5.00**
No. **84**—Rubber tires for floor wheels, Weight per Set, ¾ Lbs.	**1.00**

STORE LADDERS

RELIABLE—BASE AND SHELF

This style intended particularly for special conditions which require that the ladder operate independently of both floor and ceiling. Made with extra strong fixtures, as all the weight is carried by the track.

Made of selected kiln-dried oak, rubbed and varnished, each ladder step is grooved in the stiles and fastened with four steel screws, and at every fourth step a stay-rod is bolted through both stiles for additional strength.

Wheels on upper and lower fixtures are steel cased, with hard fibre tread, noiseless in operation and will run freely with the minimum of friction.

	Each
No. **90**—Oak Base Shelf Ladder, complete with fixtures, Weight per Foot, 4 Lbs.	**$20.00**

Note: If distance from floor to centre of track exceeds 10 feet, add $1.00 to list price per foot to the price of the ladder for each additional foot or fraction thereof.

	Per 100 Feet
No. **2L**—Round steel track for base shelf ladder, complete with brackets, Weight per 100 Ft., 125 Lbs.	**$16.00**

	Per Set
No. **92**—Upper Fixtures for Base Shelf Ladder, Weight per set, 5½ Lbs.	**$4.00**
No. **93**—Lower Fixtures for Base Shelf Ladder, Weight per set, 3 Lbs.	**2.00**

LADDER HOOKS

SELF-ADJUSTING

Hook fixture for use on non-rolling ladders for convenience in transferring from one shelving to another. Permits the safe use of a single ladder on different sections. For use with No. 80 or No. 85 ladders only. Self adjusting.

	Each
No. **89**	**$4.00**

BICYCLES

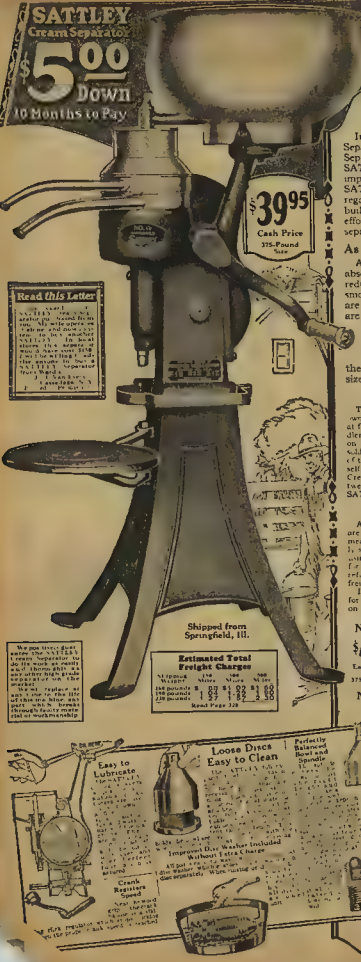
The Best Separators Ward's Ever Built

SATTLEY Cream Separator
$5.00 Down
10 Months to Pay



Now Sold at New Low Prices

In all the years we have been building high grade Cream Separators, we never before have been able to offer you a Separator as nearly perfect in every way as the new 1925 SATTLEY. We feel no hesitation in saying that with the improvements in design made in our new 1925 models the SATTLEY is equal in every way to the best separators made regardless of price. Experts guided by years of experience in building and operating separators have put their very best efforts into this machine. We believe it is positively the best separator value ever offered.

As Near Perfection as Experts Can Make Them

A sturdy square base holds the SATTLEY Cream Separator absolutely steady. Clean cut gears and positive lubrication reduce friction to a minimum and make the separator so smooth, quiet and light running a child can operate it. There are no sharp corners nor crevices in supply can nor bowl that are hard to get at for cleaning.

The splashproof Supply Can is low enough to be filled easily. Swinging shelf permits placing the cream can in any position. Speed indicator on the handle tells when the separator is being turned at correct speed. Thickness of the cream can easily be regulated. The sturdy frame of each size is painted red.

No Middleman's Profits in Ward's Low Price

The SATTLEY is made in our own factory and sold direct to you at factory prices. You pay no middleman's profit. Compare the prices on machines of the same capacity sold by your local dealer with those of the SATTLEY and see for yourself that in buying a SATTLEY Cream Separator you save from twenty to forty per cent. Every SATTLEY Cream Separator is furnished complete with bowl brush, tinware brush, disc washing rack, all purpose wrench, cream screw wrench which can also be used as rubber bowl ring cutting screws and Book of Instructions.

We suggest that you take advantage of these astounding low prices and select a cream separator that is large enough to take care of your future increased needs.

Take Advantage of This 30-Day Trial Offer

All SATTLEY Cream Separators are sold on a 30 day trial. This means that if you are not thoroughly satisfied with your machine after using it 30 days, you can write us for shipping instructions and we will refund all your money, including freight charges both ways.

It is easy for you to buy and pay for a SATTLEY Cream Separator on our Easy Payment Plan of $5 down and the balance in 10 equal monthly installments. Once a month after the 30 day trial send us payment until the machine is paid for.

Fill out our Easy Payment Order Blank No. ... on Page 329 and send it to us with your deposit of $5.

Remember that Ward's guarantee always protects you against defects in material or workmanship.

SHEEP AND GRASS SHEARS

FULL POLISHED SHEEP SHEARS

Full hollow ground blades with heavy beveled edges, full polished; bows are extra strong with double springs.
No. V63—6 in. blades, weight per dozen 11 lbs. ..... Per dozen **$54.00**
One half dozen in a box.

CHEROKEE

Forged from bars of selected analysis crucible steel, half polished, swaged bent blades
Cherokee—6½ inch blades, weight per dozen 11 lbs. ..... Per dozen **$12.00**
One half dozen in a box.

TROWEL SHANK

Swaged steel blades, half polished; trowel shank; large full pattern bow.
No. 020—5⅛ inch blades, weight per dozen 11 lbs. ..... Per dozen **$24.00**
One half dozen in a box.

GRASS SHEARS

Forged steel blades with full polished edges; green enameled handle and spring
No. V2—6 in. blades, weight per dozen 8½ lbs... ..... Per dozen **$18.00**
One half dozen in a box.

Cutlery steel blades with trowel shank; green enameled spring, polished handle and edge
No. V52—6 in blades, weight per dozen 10 lbs... ..... Per dozen **$21 75**
No. V31—6 in. blades, with red enameled spring and inside of blades finished in blued steel, top of blades with wale edge full polished, weight per dozen 9 lbs..... Per dozen **19.50**
One half dozen in a box.

CLIPPING MACHINE HEADS

As Supplied on All Stewart Horse Clipping Machines Since Jan. 1, 1915

This clipping head can be used only on a horse clipping machine with square hole in 3 inch ferrule of flexible shaft.
No. B1—Cutting handle and knife, weight 16 oz... ..... Each **$4.50**
No. B2—Clipping knife, without handle, weight 5 oz... ..... Each **3.50**
No. B3—Clipping handle only, weight 11 oz. Each **1.50**

HORSE CLIPPING MACHINES

STEWART NO. 1 BALL BEARING ENCLOSED TYPE

Has a rigid base tubular upright; gears all cut from solid metal and enclosed in dustproof metal box, all wearing parts are of hardened steel, latest style, light, easy running flexible shaft, 6 feet long, and the famous Stewart single tension clipping head; compact –can be carried in a satchel or handled as shelf goods. Size of shipping box only 6x11x12½ inches.

No. 1 Stewart—Weight 36 lbs., complete....Each **$14.00**

*SHEEP SHEARING MACHINES

STEWART NO. 9 BALL BEARING

Has substantial tripod base, tubular upright, strong crank and handle, tubular shaft, ball bearing universal joints in shearing shaft, ball bearing No 7 Stewart clipping head, enclosed gear box, gears cut from tool steel, hardened; four sets of knives. These features assist in making a fast, easy running, easily operated machine that will pay owners of even a dozen sheep to use.

No. 9 Stewart—Weight 50 lbs., complete....Each **$24.00**

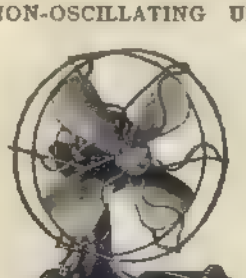
WESTERN ELECTRIC FANS

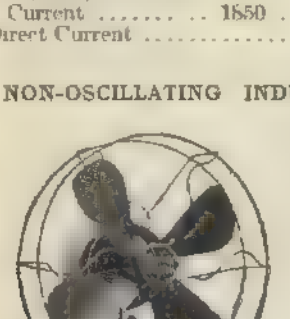
EIGHT-INCH NON-OSCILLATING UNIVERSAL FAN



Eight-Inch Non-Oscillating Universal Fan. Alternating and direct current. Four blades, cast iron frame 110-120 volt universal motor, hinge joint for desk or bracket position, switch in base for starting and stopping, giving operating positions for AC and DC. Will operate on any DC circuit 100 to 120 volts and any AC circuit 100 to 120 volts on 25 to 60 cycles. A low-priced fan for homes and small offices, but of standard Western Electric Quality throughout, and should not be confused with the many low-priced cheaply constructed small fans on the market. Price includes separable plug and 8 feet of black new code reinforced cord attached to base of fan. The fan as listed for 110 volts will operate on all of the circuits mentioned without any appreciable variation in speed. Watts: 110 volts on A.C. position, 35; 110 volts on D.C. position, 35; 32 volts D. C., 35.

No.	Volts	Circuits on which Fan will operate	Speeds R.P.M. Switch Position A.C.	D.C.	Each
7704	110	25, 30, 40, 50 and 60 Cycles Alternating Current, and Direct Current	1850	1950	$10 00
7707	32	Direct Current		1950	10 00

EIGHT-INCH NON-OSCILLATING INDUCTION FAN



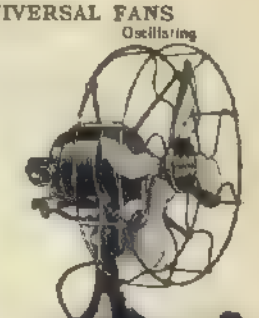
Eight-Inch Non-Oscillating Induction Fan. The alternating current induction type fan has pressed steel motor body and base, the latter felt covered and of large diameter, self starting single speed induction type motor, rigid six arm walnut guard, wick oilers, front and rear pressed steel one-piece blades. Motor body, base and guard are finished in black enamel; blades are black satin finish. This fan is built in only one size, for operation on 110 volt, 60 cycle alternating current circuit. Price includes separable plug and 8 feet of black new code reinforced cord attached to base of fan. Watts on 110 volts, 60 cycle, A. C., 30.

No.	Volts	Circuits on which Fan will operate	Speeds R. P. M.	Each
8100	110	60 Cycles Alternating Current	1550	$10 00

NINE-INCH UNIVERSAL FANS

Non-Oscillating

Oscillating



Nine-Inch Universal Fan. Alternating and direct current. Series type, 100-120 volt universal motor, hinge joint for desk or bracket position, switch in base. 110-volt fans will operate on any D. C. circuit 100 to 120 volts, and any A. C. circuit 25 to 60 cycles, 100 to 120 volts. The fans as listed for 110 volts will operate on all circuits mentioned without appreciable variation in speed. Watts on A. C.—High speed, 35; second speed, 30; low speed, 27. Watts on D. C.—High speed, 45; second speed, 35; low speed, 40.

Non-Oscillating Fans

No.	Volts	Circuits on which Fan will operate	Speeds R. P. M. 1	2	3	Each
6000	110	25, 30, 40, 50 and 60 Cycle A. C. and Direct Current	1850 A.C. to 2200 D.C.	1500 A.C. to 1750 D.C.	1100 A.C. to 1400 D.C.	$15 00
6002	220	60 Cycles A.C.	1850	1500	1100	17 00

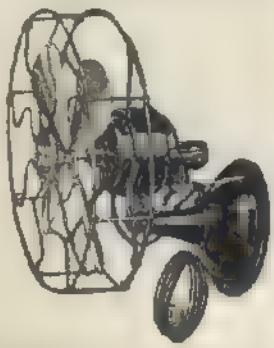
TWELVE AND SIXTEEN-INCH OSCILLATING FANS

Desk Position

Wall Bracket Position



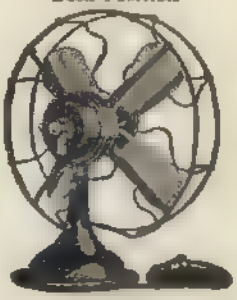
Twelve and Sixteen-Inch Oscillating Fan. Induction type. Standard oscillating mechanism. Similar in design to 12-inch Non-Oscillating fans. The watts are as follows for high, second and low speeds respectively: 12-inch, 25-30 cycles—55, 47, 40; 12-inch, 110 volt, 60 cycles—48, 38, 34; 220 volt, 60 cycles—48, 38, 34; 16-inch, 25-30 cycles—75, 65, 55; 16-inch, 110 volt, 60 cycles—78, 66, 60; 220 volt, 60 cycles—78, 66, 60. All 115 volt, 40 cycle fans are the same price as 110 volt, 25-30 cycle fans.

No.	Volts	Cycles	Speeds R. P. M. 1	2	3	Each
7800	100–120	*25–30	1175	1250	1100	$31 00
7804	110	60	1550	1350	1250	30 00
7805	220	60	1550	1350	1250	31 50
	Sixteen-Inch Oscillating Fan					
7850	100–120	*25–30	1450	1225	1100	$36 00
7854	110	60	1500	1250	1075	35 00
7855	220	60	1500	1250	1075	36 50

*The 25-30 cycle fans are series type.

TWELVE-INCH NON-OSCILLATING FANS

Desk Position



Wall Bracket Position

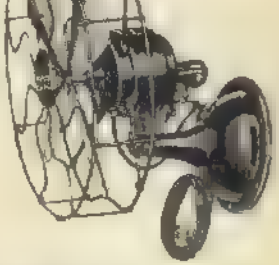
Twelve-Inch Non-Oscillating Fan. Direct current. Four blades, three speeds, drawn steel frame, series type, trunnion joint for desk or bracket mounting, swivel to turn blades in any horizontal direction, base felt covered and of large diameter to prevent tipping. Similar to 12-inch Alternating Current fans, and bearings, oil cups, switch base, blades, guard and other important parts are interchangeable. Through the use of drawn steel parts, the fan is very light in weight; 15 pounds for 12-inch size, yet is easily portable but very rugged. Price includes a separable plug and 8 feet of black new code reinforced cord attached to base of fan. The watts are as follows for high, second and low speeds respectively: 12-inch, 32, 110 and 220 volts—44, 38, 34.

No.	Volts	Speeds R. P. M. 1	2	3	Each
6400	32	1550	1300	1100	$23 50
6401	110	1550	1300	1100	23 50
6402	220	1550	1300	1100	26 00

TWELVE AND SIXTEEN-INCH OSCILLATING FANS

Desk Position

Wall Bracket Position



Twelve and Sixteen-Inch Oscillating Fan. Standard oscillating mechanism. Similar in design to 12-inch Direct Current Non-Oscillating fans and to Alternating Current Oscillating and Non-Oscillating fans. The watts are as follows for high, second and low speeds respectively: 12-inch, 110 volts—46, 40, 35; 32 and 220 volts—46, 40, 35; 16-inch, 110 volts—59, 52, 47; 32 and 220 volts—59, 52, 47.

Twelve-Inch Oscillating Fan

No.	Volts	Speeds R. P. M. 1	2	3	Each
7900	32	1550	1300	1100	$30 00
7901	110	1550	1300	1100	30 00
7902	220	1550	1300	1100	32 50
	Sixteen-Inch Oscillating Fan				
7950	32	1500	1250	1075	$35 00
7951	110	1500	1250	1075	35 00
7952	220	1500	1250	1075	37 50

Add $1 00 to price of 110 volts for any voltage between 20 and 110 volts (except 32).

Add $1.00 to price of 220 volts for 235 or 250 volts. Special voltages between 110 and 220 volts same price as 220 volts.

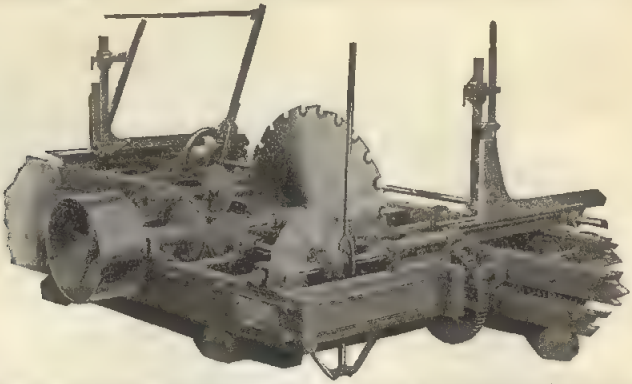
"American" Improved Variable Friction Feed Saw Mills



These mills are light running, easy to install, and do not easily get out of order. The latest improved features are embodied in their design, which enables them to cut more timber than other mills using same power.

Variable Feed—Bevel frictions are used as drivers, insuring positive motion, reducing end and lateral thrust, and maintaining a wide range of feed variation. The "gig back" is also positive and will start on highest speed without any slipping; it is many times faster than the feed.

Husk Frames are made of selected timber, well bolted together and thoroughly braced. All shafts are turned and ground perfectly true, and run in self-oiling bearings throughout.

Carriages are of sufficient strength to withstand any reasonable load and hard usage to which saw mill carriages are usually subjected.

Trucks—On all carriages trucks are large diameter, fitted with steel axles running in self-oiling babbitted boxes, with ample provision for taking up all lost motion, and accurately turned to perfectly fit guide track.

Track furnished is rolled steel in 12-foot sections and furnished with suitable holding down spikes.

Set Works—We usually furnish patented combination set works and quick receder, which are accurate and possess many advantages. Two or three pulls of lever will recede the blocks as far as is usually required. We can also furnish the larger mills with double acting set works and spring or foot receder as may be ordered.

Carriage Drives—All standard mills are furnished with rack and pinion carriage drive, but manila or wire rope drive will be supplied, if preferred, with small additional cost.

Equipped with board roll spreader wheel and saw guide.

Standard mill is furnished with rack and pinion carriage drive. Wire cable drive furnished at additional price.

Number of mill	1	2	3
Length of husk, feet	7	7½	8
Width of husk, feet	3	3½	4
Size of husk timbers, inches	3½x7½	3½x9½	4½x11½

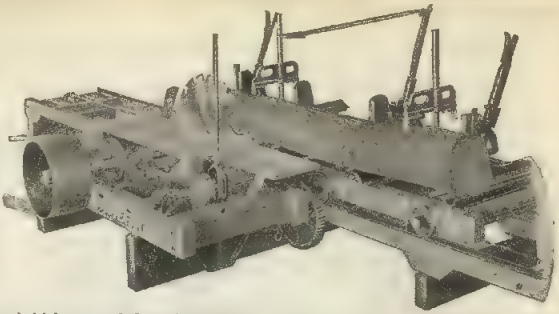
Length of feed rack, feet	22	26	32
Size of truck wheels, inches	6	7	8
Number of trucks	4	6	6
Head of blocks, open, inches	34	38	44
Length of set shaft, feet	14	16	18
Length of steel track, feet	40	56	56
Horse power required	6 to 15	6 to 20	10 to 30
Approximate capacity feet per day	2,000 to 7,000	2,000 to 10,000	5,000 to 15,000
Weight complete, pounds	2550	3550	4530
Price standard mill, complete, except without saw, with cable drive	$475.00	$580.00	$685.00

Larger mills quoted on application. Right hand mills furnished unless otherwise ordered. Mandrel pulleys of any size up to 24 inches in diameter furnished without extra charge if ordered with mill. Mills can all be furnished mounted on trucks. Prices quoted on application.

American Short Saw Mill and Boiler



With variable friction feed, which is light running, admits of wide variation and adapts the mill for light or heavy power.

Any kind of short log sawing, mine or railroad ties, fence posts, handle stock, shooks, slats, etc., can be handled on this machine.

By flitching a log into cuts of desired thickness and then placing several of these, one on top of the other, on the carriage, thin slats, laths, etc., may be made, several at one cut and very rapidly.

Regularly furnished with manila rope drive which is strong, quick in operation and allows carriage to travel the full length of the track. Wire rope drive furnished at extra cost.

Built regularly in two sizes as per specifications below.

No. 1½ Mill

Husk frame 7x3 feet, timbers 3½x7½ inches.
Mandrel 2⅞ inches with pulley 20x10 inches.
Carriage 8 feet by 30 inches, timbers 3½x5½ inches.
Trucks 3 with 7-inch wheels 1¼-inch axles.
Track and ways complete, 28 feet long.
Floor space required 28x10 feet.
Weight of mill complete, 3,000 lbs.
Weight of track ways only, 350 lbs.
Weight of foundation timbers, 450 lbs.
Weight of truck, if wanted, 1,000 lbs.
Weight of Mill complete, boxed for export, gross, 3,500 lbs.; net, 3,000 lbs.
Carriage..... 10 feet
No. 1½ mill complete.....$445.00

No. 2½ Mill

Husk frame 7½x3½ feet, timbers 3½x9½ inches.
Mandrel 2⅞ inches with pulley 20x10 inches.
Carriage 8 feet by 36 inches, timbers 4½x6½ inches.
Trucks 3 with 8-inch wheels, 1⅞-inch axles.
Track and ways complete, 28 feet long.
Floor space required 28x11 feet.
Weight of mill complete, 3,700 lbs.
Weight of track ways only, 400 lbs.
Weight of foundation timbers, 500 lbs.
Weight of truck, if wanted, 1,000 lbs.
Weight of mill complete, boxed for export, gross, 4,500 lbs.; net, 3,700 lbs.
Carriage..... 10 feet
No. 2½ mill complete.....$885.00

Mounting on four-wheel truck, $155 00 extra. Foundation timbers, if not wanted, deduct $12.00. Track way timbers, if not wanted, deduct $17 50. Pulleys of any size furnished to suit speed of engine and size of saw. Extra charge made for pulleys over 24-inch diameter.

Power Wood Saw Frames

No. 44 Wood Frame

Frame of seasoned timber, securely bolted and braced. Bearings are cast on a solid iron beam extending entire length of the frame which holds them in alignment at all times.

Table is of the swing type, pivoted at bottom on a cast bearing.

This frame can be used with saws 20 to 30-inch diameter. Speeds 1000 to 1500 R. P. M. Pulley 6x6 inches. Weight 250 lbs.

Price.....$30.00

Price does not include saw blade.

No. 40 Steel Frame

Frame of steel and cast iron securely riveted and bolted together and strongly braced in every direction. Balance wheel is placed on an independent shaft directly under saw arbor, so that poles and long sticks can be sawed to best advantage.

Fly wheel shaft has adjustable bearings.

Frame can be used with saws 20 to 30-inch diameter. Speeds 1000 to 1500 R. P. M. Pulley 6x6 inches. Weight 360 lbs.

Price.....$40.00

Price does not include saw blade.

One Set in a Case.

Remington Game Loads

Remington Game Loads are scientifically loaded to a uniform standard of velocity, pattern and penetration —with moderate recoil. They will outshoot shell for shell any make or brand of specified loads on the market. Shoot out the Facts!

Remington Heavy Duck Loads possess remarkable long range shooting qualities. They are fast, close shooting, hard hitting, and will pull the ducks down when they're wild and flying high. Fine for "pass" shooting

Remington Game Loads are thoroughly Weiproof—top wad, crimp and body—another Remington exclusive, patented feature. The crimp remains hard and firm, does not get fuzzy, break down, flatten, swell or mushroom.

12 Ga. Recommended for Duck, Brant, Jack Rabbit

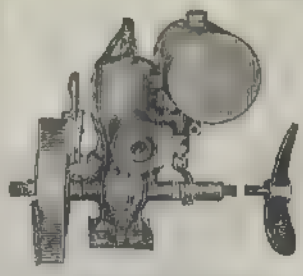
+F. O. B. Ohio Factory Only.

CANOE GASOLINE MOTOR ATTACHMENTS

CAILLE—Bantam.



Ideal for canoes because of its light weight and occupies a space of only 9x13 inches. It is so light and so compact that it will not affect the stability of the most cranky canoe.

Also suitable installation for rowboats and tenders, especially good for the latter because its light weight permits swinging the tender on davits without danger from weight of the equipment.

Will drive a 17 foot canoe at a speed of 9 to 12 miles an hour. Rowboat 6 to 8 miles an hour

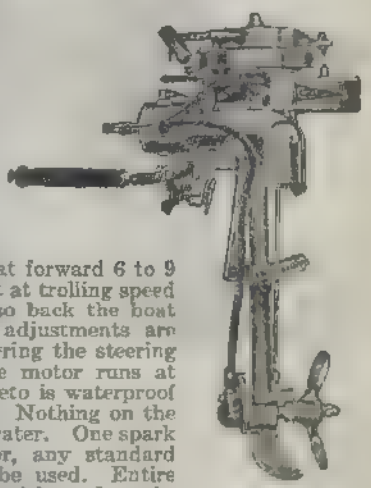
Complete with fuel tank, shaft propeller, muffler and everything but exhaust piping.

	Each
No. 1B—With battery ignition	+$210 45
No. 2B—With magneto in fly-wheel ignition	+ 266 55
Salt Water Fittings Extra	+ 5 10

One in box; wt each 40 lbs.

ROWBOAT GASOLINE MOTOR ATTACHMENTS

CAILLE-FIVE-SPEED MOTOR



This motor represents the last word in rowboat motor design in every detail. It is the only rowboat motor that enables control of the boat like a big launch.

Has five speeds, two forward, two backward and neutral. When set at neutral can leave motor run while boat stands still. Will drive boat forward 6 to 9 miles an hour or can be set at trolling speed of one mile an hour. Also back the boat fast or slow. All speed adjustments are secured by raising or lowering the steering handle in a ratchet while motor runs at normal speed. The magneto is waterproof and wetting wont hurt it. Nothing on the motor will be affected by water. One spark plug goes with the motor, any standard S A E ⅝ inch plug may be used. Entire motor embodies best materials and workmanship. Beautifully finished.

To start motor have it in neutral, then shift from first to second speed so the motor gradually receives the load. This saves quite a strain on the motor and is not possible on any other motor.

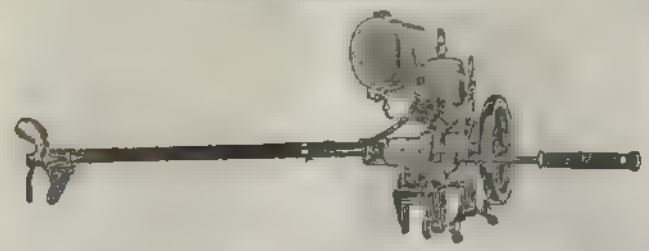
	Each
No. 1FS—With magneto in fly-wheel ignition, **without starting device**	+$308 55
No. 2FS—With magneto in fly-wheel, **with starting device**	+331 50
No. 3FS—With battery ignition, **no starting device**	+252 45

One in box; wt each 85 lbs.

+F. O. B. Michigan Factory Only.

ROWBOAT GASOLINE MOTOR ATTACHMENTS

CAILLE—LIBERTY DRIVE



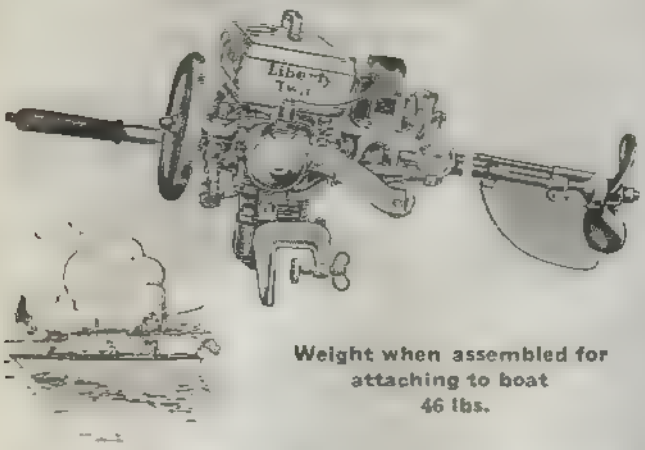
Made with the same high grade materials and workmanship as the famous Five-Speed Motor but it does not embody the five-speed feature nor has it a starter. This motor has made a big hit with sportsmen because of its ability to go through weeds like an eel. It pivots on the stern of the boat in both an up-and-down and sidewise movement. It rises over stones, sunken logs and other obstructions and enables one to motor in very shallow water.

Will drive a boat 7 to 9 mile an hour, or the speed can be reduced to less than 2 miles an hour. One spark plug with each motor, any standard S.A.E. ⅜ inch plug may be used.

	Each
No. 1LO—With battery ignition	+$229 50
No. 2LO—With magneto ignition	+ 255 45
Salt Water Fittings Extra	+ 13 50

One in box; wt each 72 lbs

CAILLE—LIBERTY TWIN



Weight when assembled for attaching to boat 46 lbs.

This motor is a refinement of the single cylinder Liberty drive a motor without gears and with a direct drive from crank shaft to propeller wheel and equipped with rope starter. Motor pivoted so that shaft and wheel will rise and fall when striking and passing over obstructions. Can be used in fresh or salt water without change of equipment. Chrome nickel steel crank shaft ¾ inch in diameter; phospher bronze main bearings, 2½ inches long; solid phospher bronze connecting rods. Shaft easily detachable and telescopic measuring closed 29 inches; extended 43 inches. Cylinders are water jacketed, plunger pump keeps flow of water circulating around cylinders, water cooled exhaust and silencer. Special Bosch H. T. Magneto ignition and Zenith carburetor. Rubber cushion steering handle with speed, steering, ignition and shut-off switch all in one hand control.

Pressed aluminum gasoline tank highly polished, capacity 2 gallons sufficient for 4 hours running.

	Each

GASOLINE LAMPS

COLEMAN QUICK-LITE

The Coleman Principle—In just a few seconds the Coleman Quick-Lite generates into a full brilliance from the heat of common matches. No torch or alcohol required. Gives 300 candle power of pure white light, which is more light than 20 old style oil lamps.

The fount holds three pints of gasoline—enough for eighteen hours continuous service, or 2 or 3 hours every night for an entire week on one filling.

White Opal Shade

Match lighting burner, no alcohol torch required.

The Quick-Lite Lamp is the Match-Lighting Air-O-Lite. It gives a 300 candle-power light of a wonderfully soft and eye-restful quality. It makes and burns its own gas from common gasoline—costs less than half a cent per hour to operate. Has no wicks to trim, no chimney to wash. Can't spill fuel or explode even if upset. Can't be filled while lighted. Burns 18 hours on one filling. Complete with shade, mantles, pump, wrench, hanger cleaning pick and extra generator.

Uses two No. 41 Coleman Junior mantles.

No. CQ329—Made of Brass, nickel plated; white opal glass shade; 300 candle power, diameter of fount 8 inches, capacity 3 pints; height over all 20 inches; shipping weight 10 pounds.....Each **$13.00**

One in a carton.

LAMP SHADES

COLEMAN QUICK-LITE

No. 329—Opal glass, paneled; designed especially for Quick Lite Lamps; diameter 10 inches; weight each 1¾ pounds.....Each **$1.50**

Open stock.

LAMP SCREENS

COLEMAN QUICK-LITE

White Asbestos Coated Wire

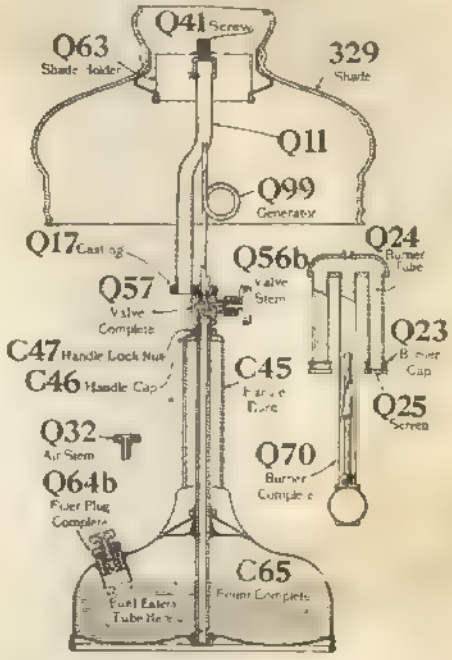
Protects mantels from damage by flying insects. Is held in place by set screw and lowers easily for lighting the lamp. Very popular in the summer time

No. 333—For No. CQ329 Lamp; weight each about ¾ pound .....Each **$1.50**

Open stock.

GASOLINE LAMP PARTS

REPAIRS FOR COLEMAN QUICK-LITE



The "CQ" Quick-Lite lamps are sold with a large variety of shades, the letters designating the kind of lamp and the numbers the style of shade.

The "C" indicates the shape of the fount, the "Q" the Quick-Lite burner, and the numerals the Coleman number of the shade used.

The repair parts except the shade are the same on all "CQ" lamps

Unless otherwise ordered, all parts are furnished in regular nickel finish. If parts are wanted for fancy lamps with colored founts, be sure to specify color of finish required, as: (1) Flemish brass, which is black and brushed brass, (2) Antique gold, which is orange tan; (3) Roman bronze, which is chocolate brown.

Parts listed as "Q" are interchangeable on CQ, BQ or PQ Quick-Lite lamps

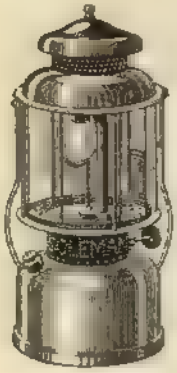
Half dozen in a box

GASOLINE LANTERNS

COLEMAN QUICK-LITE

Note—No. LQ327 is the regular Quick-Lite lantern which is rapidly replacing all other styles. It is intended for gasoline and when this fuel is used lights easily with common matches.



Mica Chimney

For watchmen, warehousemen, janitors, dockmen, plumbers, builders, station men, etc. On the farm, for camping, night fishing, automobile trips, and a thousand other uses, it fills a great need

It can't blow out as it is wind-proof and rainproof. Can't spill fuel even if tipped over. Can't be filled while lighted. It burns perfectly in any wind, at any temperature. It gives a brilliant light in hundreds of places where the oil lantern is useless.

Burns 12 hours on a single filling, or more than 40 hours per gallon of fuel used. Uses two No. 41 Coleman Junior mantles.

A regular daylight maker. It gives a brilliant light of 300 candle power. It is far brighter than the ordinary electric bulb and gives a light equal to twenty old style oil lanterns

The Quick-Lite generates into full brilliance from the heat of common matches. There is no hunting around for an alcohol torch. Just use two matches and in a few seconds you have a wonderful light

No. LQ327—Brass, nickel plated; capacity of fount 3 pints; height of lantern 14 inches; diameter of fount 6 inches; mica chimney and reflector; complete with chimney, mantels, pump wrench, cleaning pick and extra generator; shipping weight each about 6 pounds .....Each $11 00

One in a box.

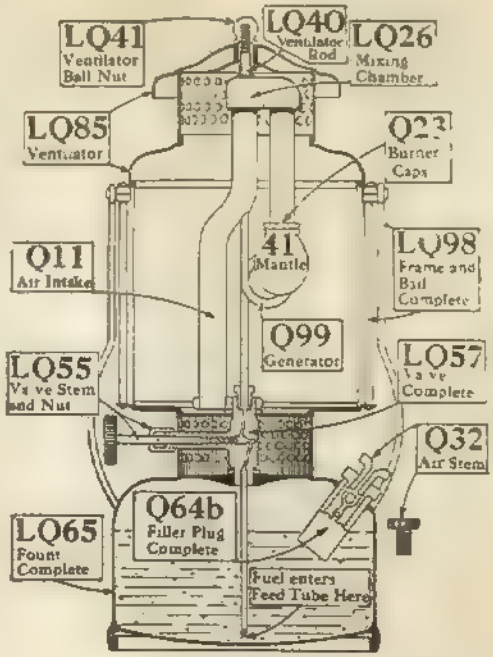
One in a box.

GASOLINE LANTERN PARTS

REPAIRS FOR COLEMAN QUICK-LITE



Under the new system of numbering the Quick-lite lantern has been changed from QL327 to LQ327 the "L" indicating the fount, the "Q" the burner and the number, the style of mica chimney used

Orders for repair parts for this lantern will be properly filled whether specified QL or LQ.

Note—On all 1922 Quick-Lite lanterns, a new feature will be noted in the LQ baffle plate which attaches to the Q11 and is supported by the Q89 base rest. This admits cool fresh air to the burner at all times and prevents the overheating of the lower parts of the lantern

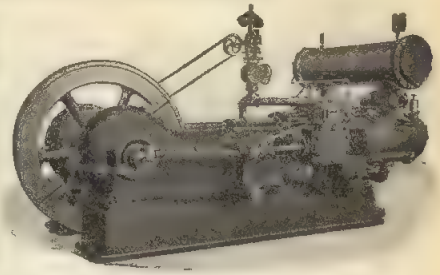
J75084—Two light, black glazed pottery vase with bronze metal base, 15 inch parchment effect shade with dancing silhouette figures and trees in black on a shaded background; height 20 inches ..... Each 22 50

Gardner Horizontal Air Compressors

Duplex, Belt Driven, Two Stage



Duplex, Steam Driven, Two Stage

Two-stage compression consists in compressing air in consecutive cylinders, the air being cooled between the stages of compression.

Air is admitted into the low pressure cylinder at atmospheric pressure and is compressed to a pressure determined by cylinder ratios Compressing air raises its temperature so it is then passed through an intercooler, where the air is broken up into thin streams and cooled by the nest of tubes, within the intercooler, through which cold water is continuously circulating. The temperature of the air is reduced to approximately the temperature of the atmosphere, after which it passes into the high pressure cylinder where it is compressed to the final pressure desired and discharged, under that pressure, into the air receiver.

The efficiency of two-stage compression is high and therefore an economy is effected by using this type machine. The same general construction is carried out in the two-stage type as is found in the single stage machines.

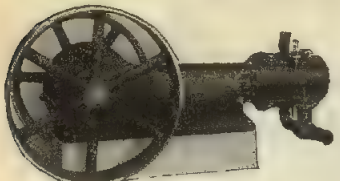
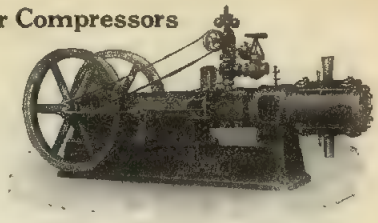
Gardner Horizontal Air Compressors



Single Cylinder



Class "B-S" Belted

Class "S-S" Steam Driven

Enclosed, automatic self-oiling type, permitting higher speeds than the older style open frame machines. Massive frames, bored guides, balanced fly-wheels, light seating valves, easy adjustments. Discharge valves, steel and cup shaped, poppet type, light and durable—inlet valve is a ground light steel disc—seating very quietly. Valves are set radially, giving good cooling—around cylinder walls also through both heads. Piston is double acting with spring rings—travels with minimum clearance, 1-32 to 1-16, giving high volumetric efficiency. First four sizes are of the open frame type.

Class B. S. Belt Driven

Fittings—Price of complete compressor includes speed and pressure governor, throttle valve, mechanically operated lubricator, fibrous packing for all stuffing boxes and all necessary special wrenches

RAZORS

GENCO

Made from the finest quality razor steel, carefully tempered, hollow ground; best grade polishing material used to obtain highly colored finish; honed ready for use.

OLD DUTCH

Imitation oak handle, oval with fancy metal ornaments; blade forged with special shoulder; extra full concave; highly colored polish. Barber, half-round or quarter-honed points.

Each

Old Dutch—Blade Widths, 5/8, 5/8 and 6/8 Inch; Weight Each, 2 Ozs. **$5.00**

GOLD SEAL

Transparent amber handle, flat with beveled edges, blade extra full concave; oval tang; highly polished, with back and tang heavily gold plated. Barber, half-round or quarter-honed points.

Each

Gold Seal—Blade Widths, 5/8, 5/8 and 6/8 Inch, Weights Each, 2 Ozs. **$5.00**

EXPERT

Imitation ivory handle, flat with beveled edges and round ends; blade ground extra full concave; highly polished; colored. Designed especially for those who can handle an extremely flexible blade. Barber, half-round or quarter-honed points.

Each

Expert—Blade Widths, 5/8, 5/8 and 6/8 Inch; Weight Each, 2 Ozs. **$5.00**

Each Razor in a Box

RAZORS

GENCO

Forged from the finest quality razor steel, uniformly hardened and tempered, carefully ground, honed and set ready for use.

DE ROMA

Plain blade, highly polished with crocus back and tang, extra full concave; oval ivory handle with metal ornaments. Barber, half-round or quarter-honed points.

Each

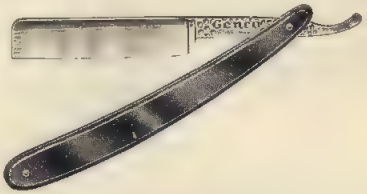
De Roma—Blade Widths, 4/8 and 5/8 Inch; Weight Each, 2 Ozs. **$5.00**

ARMY AND NAVY

Blade ground extra full concave, highly polished, half-round or quarter-honed points; oval imitation ivory handle with round ends. Especially recommended for the man with a hard stiff beard.

Each

Army and Navy—Blade, Widths, 5/8 and 6/8 Inch; Weight Each, 2¾ Lbs. **$5 00**



FORGE MARK

Extra full concave, highly polished with natural forge finish tang, Flat Black Rubber handle with beveled edges. Barber, half-round or quarter-honed points.

Each

Forge Mark—Blade Widths, 5/8, 5/8 and 6/8 Inch; Weight Each, 2½ Ozs. **$5.00**

Each Razor in a Box

EXTRA RAZOR HANDLES

Black hard rubber handles ready for blade to be riveted in. Flat or oval sides; For ½, 5/8, 6/8 and 7/8 Inch Razor Blades.

Per Dozen

Any Size **$2.00**

RAZORS

GENCO

Forged from the finest quality razor steel, uniformly hardened and tempered, carefully ground, honed and set, ready for use.

SENECA CHIEF

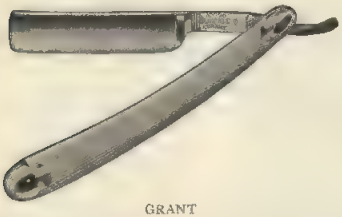
Ground concave and finely polished half-round or quarter-honed points, oval cocabolo handle with metal tips.

	Each
Seneca Chief—Blade Widths, 5/8 and 6/8 Inch; Weight Each, 2¾ Ozs.	**$4.50**

MASTER BARBER

Extra full concave; oval tang; highly polished; flat ivory handle, barber, half-round or quarter-honed points.

	Each
Master Barber—Blade Widths, 5/8, 5/8 and 6/8 Inch. Weight Each, 2¾ Ozs.	**$4.50**



GRANT

Forged with oval tang, ground with special concave; special colo polish; half-round or quarter-honed points; imitation ivory oval handle with metal tips.

	Each
Grant—Blade Widths, 5/8 and 6/8 Inch; Weight Each, 2½ Ozs.	**$3.75**

Each Razor in a Box

RAZORS

GENCO

Forged from the finest quality razor steel, uniformly hardened and tempered, carefully ground, honed and set, ready for use.

HEAVY

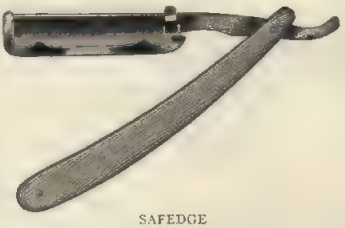
Ground half concave with staff bevel finely polished half-round or quarter-honed points, imitation ebony oval handle with metal tips.

	Each
Heavy—Blade Widths, 5/8 and 6/8 Inches; Weight Each, 2½ Ozs.	**$3.50**

HENRY'S XXX

Ground ¾ concave with high thin bevel; extremely fine polish; half-round or quarter-honed points; imitation gray pearl handle, oval with metal tips.

	Each
Henry's XXX—Blade Widths, 5/8, 5/8 and 6/8 Inch; Weight Each, 2¾ Ozs.	**$2.75**



SAFEDGE

Hollow ground, finely polished, especially built with safety guard attached; guard is reversible and can be used on either side of razor; can be removed quickly for stropping, cleaning or honeing; blade and guard fold entirely into the handle· ⅝ inch width.

	Each
Safedge—Imitation Ivory Handle; Weight Each, 3 Ounces.	**$4.00**

Each Razor in a Box

SAFETY RAZORS

GILLETTE—NEW IMPROVED TYPE

TRAVELER

Complete shaving outfit in leather case, purple velvet lined. New improved Gillette razor, shaving brush and stick soap in metal containers. Ten blades in metal blade box.

	Wt each	Each
Traveler, Silver	15 ozs.	$ 7.50
Traveler, Gold	15 ozs.	10.00

CHIPPENDALE

Handsome engine-turned case and blade box. Chippendale silver has heavy silver plated razor, case and blade box, whereas Chippendale gold has gold plated razor, case and blade box. Ten blades.

	Wt each	Each
Chippendale, Silver	10 ozs.	$ 9.00
Chippendale, Gold	10 ozs.	10.00

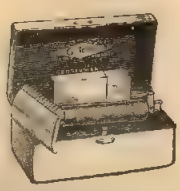
CHESTERFIELD

Flat style, handsome engine-turned case and blade box. Purple velvet lined. Chesterfield silver has heavy silver plated razor, case and blade box.

Chesterfield gold has heavy gold plated razor, case and blade box. Ten blades.

	Wt each	Each
Chesterfield, Silver	8 ozs.	$ 9.00
Chesterfield, Gold	8 ozs.	10.00

BOSTONIAN



Opening of cover automatically raises tray containing razor and blade box. Bostonian silver has heavy silver plated razor, case and blade box. Bostonian gold has gold plated razor, case and blade box. Ten blades.

	Wt each	Each
Bostonian, Silver	10 ozs.	$5.00
Bostonian, Gold	10 ozs.	6.00

RICHWOOD

Mahogany finished wood case. Richwood silver has silver plated razor and blade box. Richwood gold has gold plated razor and blade box. Ten blades.

	Wt. each	Each
Richwood, Silver	6 ozs.	$5.00
Richwood, Gold	6 ozs.	6.00

TUCKAWAY

A small, compact set. Tuckaway silver has silver plated razor, case and blade box. Tuckaway gold has gold plated razor, case and blade box. Ten blades

	Wt each	Each
Tuckaway, Silver	7 ozs.	$5.00
Tuckaway, Gold	7 ozs.	6.00

All the above, one in a box.

SAFETY RAZORS

GILLETTE—NEW IMPROVED TYPE

BIG FELLOW

Selected natural finished gumwood case. Long, thick handle Silver plated razor and blade box. Big Fellow Gold has gold plated case and blade box. Ten blades.

	Wt. each	Each
Big Fellow, Silver	9 ozs.	**$5.00**
Big Fellow, Gold	9 ozs.	**6.00**

ARISTOCRAT

Imitation ivory case, purple velvet and satin lined. Has gold plated, new improved Gillette razor. Blade box to match case. Ten blades.

	Wt. each	Each
Aristocrat	7 ozs.	**$6.00**

MILADY DECOLLETTE

Imitation ivory case, old rose velvet and satin lined. An appropriate set for ladies. To keep the under-arm smooth. Consists of special gold plated razor and blade box. Ten blades.

	Wt. each	Each
Milady Decolette	5 ozs.	**$6.00**

Above, one in a box.

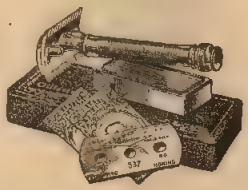
NEW STANDARD

Genuine leather covered case, purple velvet and satin lined. New Standard silver has triple plated razor and blade box. New Standard Gold has gold plated razor and blade box. Ten blades.

	Wt each	Each
New Standard, Silver	7 ozs.	**$5.00**
New Standard, Gold	7 ozs.	**6.00**

One in a box.

SHAWMUT



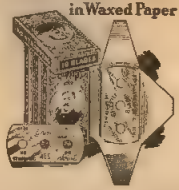
Handsome two-tone green case, velveteen lined. Panelled cover with attractive gold border. A genuine gold plated old type razor and blade box. One blade

	Wt. each	Each
Shawmut	5 ozs.	**$1.00**

One in a box, twelve in a carton.

BLADES

Genuine Gillette Blades in Waxed Paper



Gillette (new process) double edged wafer blades Each double edged blade is wrapped in waxed paper and placed in a sealed package of either five or ten blades.

	Wt. per carton	Per pkg.
Gillette Blades, package of 5s	7 ozs.	**$0.50**
Gillette Blades, package of 10s	6 ozs.	**1.00**

Twenty packages of 5s in a carton.

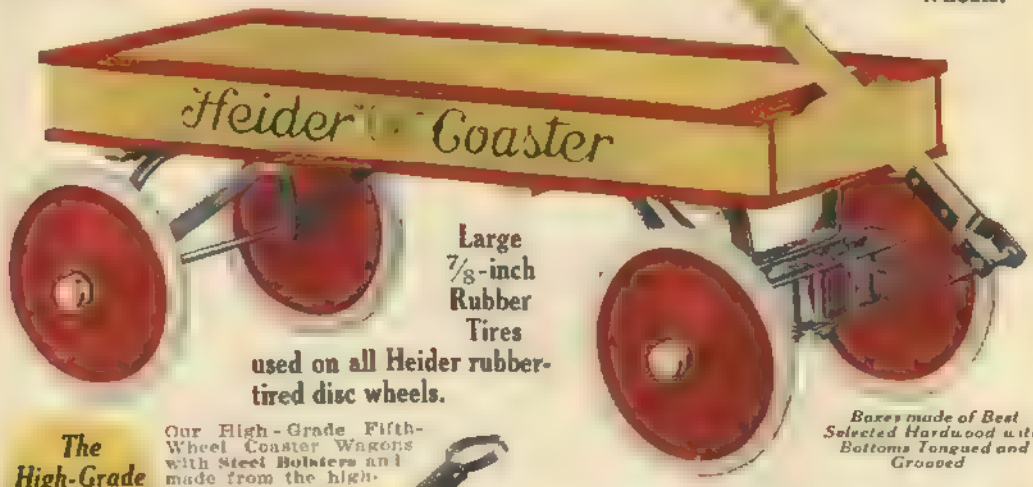
Ten packages of 10s in a carton.

Heider-Coasters.

THIS **Patented Auto-Axle Non-Tip Coaster Wagon with Steel Bolsters** will get business for you. It is something new and very attractive. It is a good seller because it fairly bristles with good selling points. Good features, the sensible kind, stick out all over it. The Auto-Axle Coaster Wagon is almost impossible to upset. The reason is self-evident if you look at the way the front axle is made. No danger in coasting or upsetting a load. Safe for the kids. Weight on front axle does not overbalance the wagon in turning. The exclusive good points appeal to every man and woman, and to all the boys and girls. You can sell these Coaster Wagons because they have the good talking and good selling points. Will give satisfaction and help to establish a permanent trade

The Auto-Axle Non-Tip Wagon

Heider Wagons are equipped with either Wood, Malleable or Disc Wheels.



Large 7/8-inch Rubber Tires used on all Heider rubber-tired disc wheels.

Boxes made of Best Selected Hardwood with Bottoms Tongued and Grooved

The High-Grade Fifth-Wheel Wagon

Our High-Grade Fifth-Wheel Coaster Wagons with **Steel Bolsters** and made from the highest quality materials, perfect in construction, in a thoroughly modern factory with latest improved machinery and by experienced workmen who know how to make good wagons

AUTO-AXLE NON-TIP WAGONS.

Heider-Young America Coasters.

LATEST TYPE DISC WHEELS.

The above illustration of the Heider improved disc wheel is the latest feature [illegible] to. This wheel is made of two steel discs.

LARGE 7/8-INCH RUBBER TIRES.

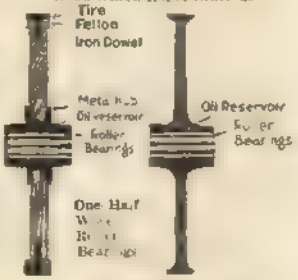
Such heavy-duty construction makes the disc wheel indestructible from any kind of ordinary use. The hub bearing is 2½ inches with self-contained roller type bearings. Nickel-plated hub caps cover the hub-nuts protecting the bearings from dust and dirt. Besides being the most durable wheel for all-around wear it is very attractive. Heider disc wheels may be obtained with steel tires in place of rubber if desired.

HERE are shown the wood, malleable and disc wheels used on the Heider Coaster Wagons. Also illustrations of the roller bearings, which make these wagons run so easily. Note extra long bearings.

The WOOD WHEELS are made with one-piece iron hubs, select hard-wood spokes set in white lead into hubs, which prevents them from coming loose and prevents decay. Felloe held to spokes with iron dowel pins; one piece rock elm felloe; ⅛ x ¾ inch steel tires, electrically welded and shrunk on by hydraulic press and riveted to felloe, making an exceptionally strong wood wheel.

The MALLEABLE WHEELS are one-piece malleable castings with the same general appearance as the wood wheel and almost indestructible. Both the wood and malleable wheels have a 2½ inch long axle bearing, and on the inside of the hub there is provided an oil reservoir, which if filled with hard oil will supply the rollers for an indefinite period. The rollers are ⅛ x 2½ inch cold rolled steel. It is a very desirable bearing in the malleable wheel as well as in the wood wheel

Wood Wheel, Roller Bearings.



This shows the **steel** front axle, steering mechanism, bolster and the two braces to box [illegible] our **patented** Auto-Axle Non-Tip Coaster Wagon. Spindles are malleable iron—axles and spindle pivot pins made of cold rolled steel. Front axle does not turn crosswise under the wagon when turning as the wheels are pivoted to front axle as on automobiles. This makes the strongest and most practical front axle construction on the market.

Malleable Wheel Roller Bearings.

Shows High-Grade Fifth-Wheel — special front bolster and axle construction where cold rolled steel axle is firmly riveted to channel steel bolster. Bolsters are reinforced at the top and bottom of large malleable fifth-wheel plates. Steel steering mechanism with brace to channel steel bolster. Large steel brace to box. This is an exceptionally strong bolster and axle construction.

Rear bolster and axle construction used on both Auto-Axle Non-Tip and High-Grade Fifth-Wheel Coaster Wagons. Strong steel braces from axle to box. Cold rolled steel axle is riveted firmly to channel steel bolster—making it very strong and practical.

THIS IS THE WAY HEIDER COASTER WAGONS COME TO YOU.

Explosives and Blasting Supplies

Dynamite

Dynamite is a High Explosive, commonly used in mining and quarrying operations, excavating and earth moving, breaking log and ice jams and for the improvement of agricultural lands.

It is made in various grades and percentages and is packed in cartridges 8 inches long with various diameters, the standard diameter being 1¼ inch. It is packed in 25 and 50 lb. cases.

Low Freezing Extra—This is an ammonia Dynamite and is not frozen as readily as other grades and can be used for most all kinds of work with the exception of work in water and underground work where the air is poor. Manufactured in strengths of 15% to 60%.

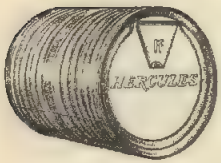
Nitroglycerin—This is very similar in looks to the **Low Freezing Extra** but has more of a shattering force and can be used in quarry work as well as for ditch blasting on the farm. Manufactured in strengths of 40, 50 and 60%.

Gelatin—This is a plastic Explosive and can be used where the work is very wet and under-ground as it does not give off the amount of injurious fumes as the other grades. **Gelatin** is manufactured in percentages of 35% to 100% but only from 40% to 75% is carried in stock **Prices on application.**

IMPORTANT

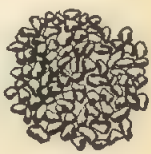
Dynamite, Caps or Powder cannot be shipped with hardware or other goods, neither can they be shipped by express. When entered on order with other goods, we will ship direct from nearest magazine. Shipments of 200 lbs. Dynamite, or more, will be delivered to any point on the line of transportation companies accepting High Explosives. Shipments of less than 200 lbs. f. o. b. nearest distributing point.

Hercules Blasting Powder



F

FF



FFF

Blasting Powder is packed in metal kegs of 25 lbs. each and is used in blasting soft materials such as dirt and soft coal as well as in some quarry work. It comes in various granulations and the most commonly used are those shown. The F granulation being slowest and the FFF fastest **Prices on application.**

Hercules Blasting Caps

These are a small copper capsules about ¼ inch in diameter containing a charge of fulminate of mercury which is exploded by the spit of the fuse. These are manufactured in No. 6 and No. 8, and the No. 6 may be used for all practical purposes.

Prices on application.

Safety Fuse

Used for firing Blasting Powder directly by its spark or exploding Dynamite when attached to Blasting caps. Prices per 1,000 feet:

Beaver Brand used for Agricultural Purposes	$7.00
Clover Brand for use in very wet work	7.70
Single Tape for use in damp work	7.70
Double Tape for use in wet work	8.65
Anchor Brand for metal mining	8.65

Electric Blasting Caps

These consist of copper capsules similar to those of ordinary Blasting Caps, but longer and slightly larger in diameter, having two insulated copper wires inside the cap which are bare and joined together by platinum bridge embedded in guncotton. When current passes thru this bridge it is heated and sets off gun cotton which in turn fires the charge of fulminate.

Made in both No. 6 and No. 8 in lengths of 4 to 30 feet, **Prices on application.**

Hercules Blasting Machines

Hercules Blasting Machines or **Batteries** are used for generating electricity for the detonation of Electric Blasting Caps, and are manufactured in three sizes as mentioned below:

	Capacity List
Hercules Midget for testing purposes generally four Electric Blasting Caps	$18.00
Hercules No. 2. Capacity of one to ten Electric Blasting Caps	22.50
Hercules New Style. Capacity of one to fifty Electric Blasting Caps	35.00

Leading Wire

Leading Wire

Leading Wire made in Single and Duplex coils of No. 14 copper wire in various lengths. Standard coils are 250 ft. in length, used to connect Blasting Machine to Electric Blasting Caps.

Connecting Wire

Connecting Wire

This is No. 20 copper wire put up in one lb. spools and for use in connecting Electric Blasting Caps to each other

Tools for Blasting Purposes

Such as Stone Drills, Earth Augers, Chisels, etc., are listed elsewhere in this catalog. See index.

ICE TONGS

[illegible] FAMILY

Cast steel, painted blue; tempered points; heavy rivet at joint wire grip.

	Per Doz
No. 25—Open 11½ ins; length over all 12 ins	$4 80

Packed loose, wt per doz 6 lbs.

FAMILY

Forged steel, natural finish; tempered points; heavy rivet at joint; oval grip; one link at each end of grip.

	Per Doz
No. 50—Open 12 ins, length over all 13[illegible] ins	$8 70

Packed loose; wt per doz 12½ lbs.

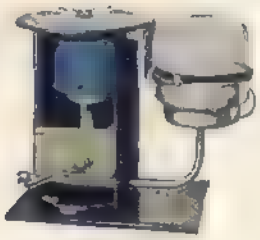
Nesco Oil Cook Stoves



No. 214

Is a mighty handy one-burner stove for shops, camps, summer homes, etc.

Very strong and substantial, will support 175 pounds. Fuel tank same size as large stoves Same Rockweave Wick and Nesco Burner

Height	15¾	inches
Length over all	20	"
Depth	12	

They fry, bake, boil, toast any time anywhere and that without smoke or odor. A very hot blue flame burns right up under the utensils. These stoves come in size and style suitable for house, or cottage, restaurant, club, boarding-house or camp;—in fact, wherever cooking is done. Carpenter and other shops find them handy for heating glue, water, etc.

Nesco Oil Cook Stoves are easy to clean and when properly cared for, will give greatest satisfaction.

No. 2212

For Laundry, Shop, Baking. Galvanized Top—

Height from floor...	21¾	inches
Length over all	33	"
Depth of stove top..	17½	"

No. 212

A Small Stove for Small Family.

No 215

Full Size, Allows 2 Burners For Baking and Still 3 Left For Cooking.

Height from floor	31	inches
Length over all	63	"
Depth of stove top	17½	"

They all have the wonderful long-lasting Rockweave Wick (patented), and the Nesco Burner.
See other side for description.

Nesco Oil Cook Stoves

The Secret of Successful Operation is in the Burner

There rests the famous, non-burnable Rockweave Wick (patented) in the bowl or channel of the burners. The pointer handle turns from side to side and raises the whole burner and chimney to lower or extinguish the flame, and lowers it for a higher flame by a handle crank. A lifting rod raises the chimney for lighting.

Here is the Famous Rockweave Wick

Asbestos strands are spun around fine wire. These strands are then woven into a strong fabric, flexible and easy to remove for cleaning, and as easy to put back; non-burnable, hence long-lasting. Ends must overlap and lap should be at the back of the burner bowl

No. 212—With High Shelf.

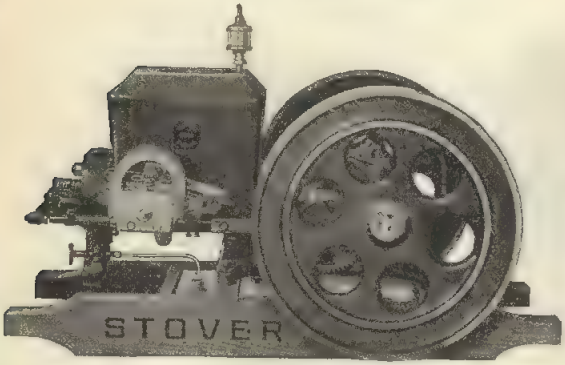
Stover Horizontal Hopper Cooled 1½ and 2 Horsepower Gasoline Engines



View of main frame cap showing removable die cast bearings and metal shims for taking up wear.

Showing drop forged connecting rod with removable die cast bearings and metal shims for taking up wear.

Stover 1½ and 2 H. P. Engines

1½ H P. furnished in hit and miss type only with either high tension battery or high tension magneto ignition. 2 H. P. furnished in either hit and miss type for gasoline or throttling governor type for kerosene.

The 2 H P. Engine is shown in the above illustration. The same care and construction is given this engine as any other size in the catalog, insuring the purchaser of Stover quality regardless of size. It is distinctive in design, has many outstanding features, such as water cooled cylinder head, removable die cast bearings in main frame and connecting rod with metal shims for taking up wear, grease cups on the main frame bearings, drop forge connecting rod, ground crank shaft, ground piston pin, large capacity hopper and fuel tank, speed changer and safety flywheel

The above illustration represents the 2 H P. throttling governor engine for gasoline. Lack of space prevents illustrating the 1½ H. P. or the throttling governor type in the 2 H P. The latter is identical in construction with the 2 H. P. hit and miss illustrated above except for the governing mechanism and the mixer Can be conveniently mounted on a hand portable truck if desired. Suction feed. Cannot be equipped with a fuel pump.

The 1½ H. P. can be furnished for operating on gasoline only. The 2 H. P. throttling governor engine furnished for operation on liquid fuel only 2 H. P gasoline engine can be converted into a gas engine by substituting a gas mixer for the gasoline mixer but cannot be furnished with a combination mixer.

Stover Engines can be furnished up to and including 30 H. P. A special engine catalog describing in detail the sizes not listed will be supplied upon request.

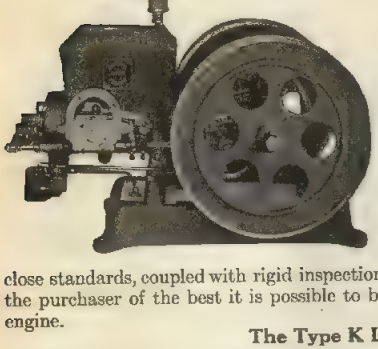
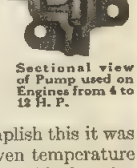
Stover Horizontal Hopper Cooled Gasoline Engines

3, 4, 6, 8, 10 and 12 Horse Power



Furnished in either hit and miss type for gasoline or throttling governor type for kerosene, with either Webster or Wico magneto. The above illustration actually represents our 6 H. P. Type "K" gasoline engine. Lack of space prevents illustrating both the gasoline and kerosene engines in each size. This cut will, we believe, suffice inasmuch as the principle of construction on all engines is the same, although slightly different in design.

Simplicity in construction was the paramount object in designing the Stover Engines. Especially designed machinery, capable of maintaining close standards, coupled with rigid inspection and good workmanship, insures the purchaser of the best it is possible to build into an internal combustion engine.

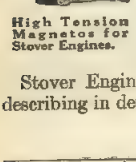


Sectional view of Pump used on Engines from 4 to 12 H. P.

The Type K Line

Which is built up to and including 8 H. P. contains the same special features that are clearly set out in the description under the 2 H. P. Engine illustrated on the preceding page.

The throttling governor engine explodes a charge every working stroke, the governor graduating the amount of fuel and air taken into the cylinder in proportion to the load being pulled. To successfully burn kerosene requires wholly different methods than when using gasoline. To accomplish this it was necessary to change the method of governing to obtain an even temperature in the cylinder. The speed regulation is very close, making it an ideal engine where a uniform speed is required. The fuel is contained in the base and the engines are shipped ready for operation with all pipe connections made complete.



High Tension Magnetos for Stover Engines.

Throttling governor engines are so designed that it is impossible to mix kerosene with the gasoline, while the engine is being warmed up on gasoline. The fuel tank is contained in the base on all engines. Are shipped ready for operation with all pipe connections made complete.

Stover Engines can be furnished up to and including 30 H. P. A special engine catalog describing in detail the sizes not listed will be supplied upon request.

No. 204A—250 watts; size 14¾x4 ins; draws 3.85 amperes ..... ✦$435 00
One in carton; wt each 13½ lbs. *145 00*

RECTIFIES TUBES

Radiotron.

Especialy adapted to be used with 5-watt power tubes and is rated at 20 watts. Each

No. UV-216—20 watts; size 2½x5 ins; draws 2.25 amperes ..... ✦$19 14
One in carton; wt each ¾ lbs.

Primarily intended for use with the 50 watt power tubes, to produce, a D. C. plate supply from an A. C. source. Can be shifted from one socket to another without signal audibility. Each

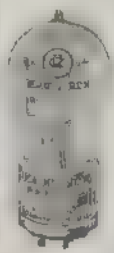
No. UV-217—150 watts; size 7½x2 ins; draws 6.5 amperes ..... ✦$75 54
One in carton; wt each 1½ lbs. *$26 50*

AMPLIFYING TUBES

Radiotron.

Operates on Storage Batteries Only.

A vacuum tube radio and tone frequency amplifier. For magnifying radio and tone frequency currents. Can be shifted from one socket to another in a cascade outfit without loss of signal audibility.



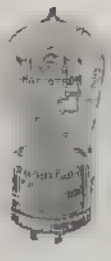
Each

No. UV-201A—Draws ¼ ampere, height 4¼ ins; diam 1¾ ins 10 20
One in carton; wt each 1 lb. *$4 00*

DETECTOR TUBES

Radiotron.

Operates on Storage Batteries Only.



A vacuum tube detector for amateur and experimental wireless stations. It is not only a detector or spark receptor, but is also an excellent tone frequency amplifier for magnification of the telephone circuits in vacuum tube receiving circuits.

Each

No. UV-200—Height over all 4¼ ins; diam 1¾ ins; draws 1 ampere 10 20
One in carton; wt each 1 lb. *$4 00*

Radiotron.

Operates on Dry Batteries Only.

Each

No. UV199—Designed for Radiola IV and has special base which will fit on Socket UR590 only. Can be used on Standard socket only with UR589 Adapter. Can not be used with ordinary rheostat. Requires Special Rheostat No. PR-539; draws .06 amperes 10 20
One in carton, wt each ¼ lb. *$4 00*

✦F. O. B. Illinois Factory Only.

RADIO ACCESSORIES AND PARTS

DETECTOR TUBES

No. WD-11—Radiotron renewal tube for receivers using 1½ volts on the filament; for mounting in regular dry battery sockets; height 4 ins; diam 1¼ ins; draws ½ ampere... Each 10 20 *$4 00*

WESTINGHOUSE

No. WD-12—Radiotron renewal tube for receivers using 1½ volts on the filament; with regular base for mounting in storage battery sockets; height 3 ins; diam ¼ in; draws ¼ ampere... Each 10 20 *$4 00*

LOUD SPEAKER, WARREN Jr.

Aluminum horn and tone chamber; horn crackle finish, tone chamber highly polished. Produces a rich and clear tone.

Equipped with adjuster for adjusting tone to the desired point. Each

No. WJR—Height 15 inches..... 16 65
One in carton; wt each 3½ lbs *$8 50*

MUSIC MASTER LOUD SPEAKER

Has undoubtedly the most clearest tone of all Radio Loud Speakers. Heavy cast aluminum tone chamber with violin wood amplifying bell that hangs suspended in perfect balance free from contact with the cabinet, thus giving full play to its resonant qualities.

Each

No. MM-8—Solid mahogany case; highly polished; Art panel front; silk backing 84 00
One in carton; wt each 21 lbs. *$35 00*

MUSIC MASTER LOUD SPEAKER

Has undoubtedly the most clearest tone of all Radio Loud Speakers. Heavy cast aluminum tone chamber; bell shaped horn made of violin wood. Art metal base, felt pad. Equipped with 5 foot extension cord.

Each

HAND POWER ELEVATORS

(For general description see preceding page).

HOW TO ORDER

Lifting capacity wanted.....
Size of hatchway (we build platform to fit.....
Elevators larger than standard size, see price for additionals.
Style of platform (see diagrams below).....
How many stories high is building (see diagrams below).....
Does car run in enclosed or open hatchway.....
Kind of business to be used for.....
Give the height of each story from top of floor to top of next floor above.

Sub-basement to Basement
Basement to First floor
First floor to Second floor
Second floor to Third floor
Third floor to Fourth floor
Fourth floor (To underside of roof timber.)

These diagrams indicate the different locations of guide posts in hatchway. State which would be best suited to your building.

Please make answers as complete as possible, and we will then be able to submit estimates for the elevator work best adapted to your requirements. When convenient make sketch of ground plan of building, showing position of hatchways, etc.

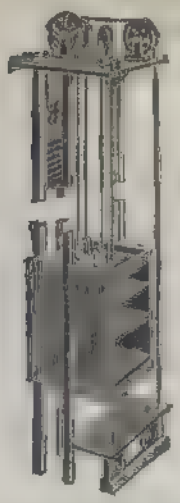
DUMB WAITERS



NEW YORK SAFETY

The above illustrates method of attaching fixtures so arranged that the weight may be at the back. The method of attaching brake grip on the under side of the shelf to which the fixtures are attached is also shown.

Place the brake grip in such a position that the hand rope which elevates the car will run through it. To apply the grip, pull the small cord which hangs down the well. To release it, pull down on the hand rope which will cause grip to drop off. To have a smooth, easy working dumb-waiter, overcome friction in every place possible.

Fixtures Only.

One size only. Suitable for all well holes under 24 inches square, not larger. The wheels should be placed on top of car so that weight of car shall be lifted from the center in all cases. They can be placed diagonally if necessary to accomplish this. Counter weight should weigh about the same as the combined weight of car and the two wheels on top, not less. Always use flat counter weights, which can be run in guides or box as desired. For stringing use pliable cotton rope, for operating ½ inch; for safety, ⅜ inch; and for brake, ¼ inch. Samples of rope sent with each set.

	Per Set
No. 25—Fixtures only, without weights	+$83 25

Packed one set in wood box; wt per set 65 lbs.

Dumb Waiters, Complete Car and Fixtures.

	Per Set
No. 26—New York Safety dumb waiters complete with No. 1 car described on following page, counter weight, guide runs, weight runs, and all rope for first 10 ft of travel	+$281 55
	Per Ft
For each additional foot in height add	+$2 40

Fixtures complete in wood box; wt per set 375 lbs.

NATIONAL

Adapted to all places where 30 pounds or less are to be carried. Not suitable for use in wells larger than 18 inches square.

The illustration is a perspective view of the wheels which go at the top of the well, arranged to have the weight at the left.

Hoist wheel 12 inches in diameter, the idler 4 inches, the operating wheels 3 inches.

	Per Set
No. 20—Fixtures only, without weights	+$36 75

One set in wood box; wt per set 35 lbs.

	Per Set
No. 21 Complete with car, counter weight, guide runs, weight runs, and all rope for 10 ft of travel; wt per set 170 lbs	+$197 70
	Per Ft
For each additional foot in height add	+$2 25

Fixtures complete in wood box.

	Each
No. 32—Made of ash, with one loose shelf, so as to admit of carrying a barrel of flour, etc. Open on three sides. For use with double face fixtures. Sizes from 20x20 ins to 32x32 ins	+

Crated.

HAND POWER ELEVATORS

Reliable and Easy Working.

Platform No. 2 and 3 are suspended by two standard wire cables, thereby equally distributing the load on the platform on the two wire cables. This is a great saving to the cables and other parts and gives greater safety and longer wear. The same plan is followed in wheels overhead, which are placed on ends of main shaft close to bearings. The cables are led direct from the platform over the cable sheaves at the top of the hatchway and down again to the counter balance weights without the use of idlers or drums; thus reducing the friction to a minimum. In the event of one of the cables breaking, the second cable is amply strong to hold the load on the platform. Is furnished with a screw brake so arranged as to stop platform at any point of travel, and will firmly hold the load and also permit the operator to control the speed of platform while descending.

Whenever the top floor of a building is less than 11 feet 6 inches, use the Combination Sheave Elevator, as by comparing the cuts, you will note on Sheave Elevator that pulling wheel or sheave is at the front of hatch, and is approximately 5 feet in diameter. Therefore a regular sheave elevator cannot be used where the ceilings are low on account of insufficient clearance way for persons to pass underneath.

We are therefore recommending the Combination Sheave Machine to be used with pulling sheave at side as an elevator should have no less than 6 feet from top of floor to underside of pulling sheave.

The Combination Sheave Elevator is also used to good advantage when the size of the platform is over 5 feet 6 inches in width.

We give full directions and erecting plan with each machine to parties outside of the city, so there will be no difficulty in putting up the elevator. Any average mechanic can put up same by following our directions. **See the following page how to order Elevators.**

APOLLO BICYCLES

The King of the Road

Bicycles look pretty much alike to the average buyer even the expert must depend upon the reputation of the producer for assurance of quality, material and workmanship

Apollo brand bicycles have a reputation of being the best all-around bicycles on the market Materials used in the making and assembling of these bicycles are thoroughly inspected before used Built by expert mechanics of long experience Apollo bicycles are made to give perfect satisfaction to the user. Popular and well known tires that will give long wear are used By what we say above we can safely guarantee our bicycles

GUARANTEE

APOLLO bicycles are fully guaranteed against any imperfections in material or workmanship, and repairs or replacements will be made free of charge, provided parts claimed to be defective are delivered to us transportation charges prepaid, and found by us to be defective.

A separate letter should be mailed in order to help us identify the parts.

This guarantee expires December 31st of the year during which purchase was made

As we do not manufacture Coaster Brakes, Saddles, Pedals, Handle Bars, Tires, etc., these various accessories are guaranteed by their respective manufacturers, as is the usual trade custom and all claims should be taken up directly with them

We have exercised the greatest care in the selection of tires for the various grades and all tires are guaranteed by the maker, to whom all claims for adjustment must be made.

N. SHURE CO.

SPECIAL NOTICE

We require a week to ten days time to make shipment of any of our bicycles as we do not carry them in stock completed Before making shipment we equip them with fresh tires and enamel. By doing this we deliver them with all their brilliancy and also gives the user longer wear

BEE-VAC
ELECTRIC CLEANER

Satisfactory and profitable to handle because it is trouble proof—STAYS SOLD and leads to other sales.

New and Improved Type "Model G"

Why BEE-VAC Leads in Quality

1—Equipped with a BIRCO 1/6 H. P. universal motor—horizontal and air cooled. Made especially for vacuum cleaner use.

2—Super-Suction, developed by perfectly balanced motor and fan, acts through narrow nozzle, extracting ALL ground-in germ laden dust and nap cutting grit.

3—Hinged self-cleaning double brush removes all clinging surface litter. When stubborn lint is removed brush is easily released and swings to rear of nozzle out of the way, but ready for instant use.

4—Dust bag, attached to exhaust by simple bayonet bag ring, easily emptied through large patented opening device at top of the bag.

5—Improved type ball and socket handle knob, relieves wrist strain and conforms automatically to changing position of operator's hand.

6—Rubber tired composition wheels placed outside and back of nozzle prevents breakage and permits thorough cleaning along entire length of fourteen inch nozzle and in corners.

7—Hose terminal easily connected to center of fan casing making attachments unusually effective.

8—Handle locking device, simple and positive, prevents stooping.

9—Entire casing made of highly polished cast aluminum—more durable than steel and rust proof.

10—The BEE-VAC, made with every thought for maximum service and efficiency, is built by specialists with thirteen years experience in manufacturing electric vacuum cleaners and vacuum cleaner motors.

An illustrated booklet goes with each cleaner, showing how to care for it and how to use it for all different kinds of work.

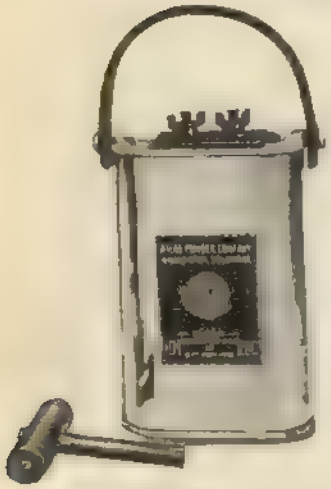
BLASTING MACHINES

ATLAS



Atlas Blaster

An especially handy general purpose machine that is light in weight and provided with a leather strap for carrying.

Operated by a key which is a separate part of the machine. This key may be kept in possession of the shot firer, thus preventing the operation of the machine by any other person

The operation is simple the machine is held in the left hand (bottom toward operator). The operating key, grasped in right hand, is inserted in the socket with back of hand toward the operator. A quick twist of the handle to the right fires the blast. The more quickly the twist is made the greater the power developed

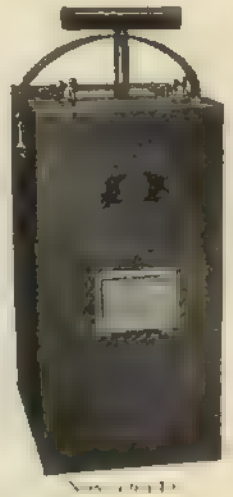
Based on insulated wire of lengths not exceeding 600 feet for No. 14 wire, 350 feet for No. 16 wire, or 200 feet for No. 18 wire. Atlas blasters will fire at the rated number of blasting caps stated in specifications

No. 2—Will fire ten 30 foot copper wire electric blasting caps or ten 6 foot iron wire electric blasting caps connected in single series; dimensions 4¾x2x6¾ inches high; net weight 5½ pounds; shipping weight 6½ pounds .....Each $22.50

One in a box.

BLASTING MACHINES

ATLAS



Atlas

Atlas Blasting Machines are small portable dynamos mounted in a box The armature of the dynamo is rotated by a downward thrust of rack bar. This converts muscular force into electrical energy

During the operation, the electric current is short-circuited through the field magnets for the purpose of building up, intensifying and storing the current until the end of the rack bar stroke, when the entire accumulation of current is delivered to the circuit.

Standard size for quarry, mine and ditch blasting.

No. 3—Will fire fifty 30 foot copper wire electric blasting caps or fifty 6 foot iron wire electric blasting caps connected in single series; size 7x8x14¾ inches high; net weight 22 pounds.....Each $35 00

One in a box.

U. S. Standard

These machines are similar to the Atlas No. 3, but differ considerably in design

No. 5—Will fire one hundred 30 foot copper wire electric blasting caps or one hundred 6 foot iron wire electric blasting caps connected in single series; size 9x11x21 inches high; net weight 57 pounds; shipping weight 75 pounds .....Each $100.00

No. 6—Will fire one hundred and fifty 30 foot copper wire electric blasting caps or one hundred and fifty 6 foot iron wire electric blasting caps connected in single series; size 8½x10¾x17½ inches high; net weight 41 pounds; shipping weight 55 pounds..Each $150.00

One in a box

Note—Blasting powder is not carried in stock but is shipped from nearest magazine by **freight only**; cannot be packed with other goods nor can it be shipped by boat or express

Note—Dynamite is not carried in stock but is shipped from nearest magazine by **freight only**; cannot be packed with other goods nor can it be shipped by boat or express.

Dynamite and Powder can be shipped together, but under no circumstances can they be shipped with Dynamite Caps, Electric Blasting Caps or any other goods

Dynamite takes double first-class rates. Dynamite in lots of 200 pounds and over will be shipped freight prepaid; less than 200 pounds, F. O. B. nearest distributing point

CALCIUM CARBIDE

MINERS LAMP UNION CARBIDE

Specially selected and perfectly adapted for use in miners lamps. Because of its high gas yield, special selection, uniform size, freedom from dust, and its uniform quality, is the most economical and satisfactory Carbide for use in miners lamps. Will keep indefinitely if protected from air and moisture.

In 2 Pound Blue and Gray Cans

Each can is equipped with a compression top which can be easily replaced in position, so that carbide remaining in can will be thoroughly protected from air and moisture

2 Pound Cans—Twenty-four cans in case. .....Per Case $9.60

24 cans in a case.

In 25 Pound Blue and Gray Drums

Packed in substantial sheet steel drums. Each drum is equipped with a screw top which can easily be replaced in position so that the carbide remaining in drums will be thoroughly protected from air and moisture

25 Pound Drums.....Per Drum $3.25

100 Pound Drums....Per Drum $11.70

Open stock.

BLASTING POWDER

ATLAS

"B" Grade

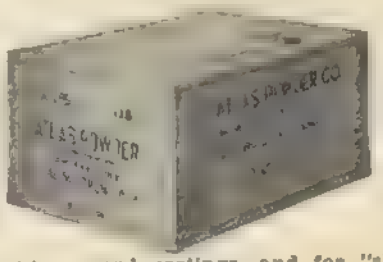
Made of charcoal, sulphur and sodium nitrate, glazed over with graphite. The smooth surface thus obtained causes the powder to flow freely and pack tightly in the bore holes. All granulations have same strength, difference in size determining difference in action; the finer the grain the speedier the action; finer granulations, therefore, shatter more than coarser ones

Packed in Sheet Steel Kegs, 25 Pounds in a Keg

Atlas Blasting—Size grain..	F	FF	FFF
Per Keg ..... $			

DYNAMITE

ATLAS



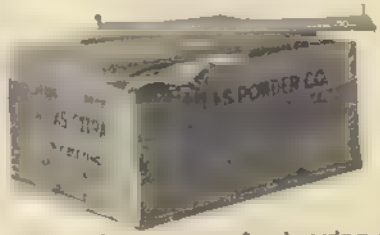
Nitroglycerin

Low freezing. A powerful, quick acting, high explosive; will shatter and splinter and should, therefore, be used wherever this result is desired; very effective for blasting boulders by mudcapping, for breaking old machinery and castings, and for "shooting" ditches in wet ground; will partially resist water, but if permitted to remain in a wet place for any great length of time, will loose a part of its strength.

In 1¼x8 inch sticks, weight about ½ pound

Atlas Nitroglycerin—Grades	40%	50%	60%
Per Pound ..... $....		....	....

In 25 and 50 pound boxes



Extra

Low freezing. Ammonium nitrate partly takes the place of nitroglycerin; while the strength is equal to that of the corresponding grade of nitroglycerin dynamite, the speed of detonation is slower; this produces more of a heaving and rending than a shattering effect; one of the safest explosives to handle and use; requires severe shock to detonate it; risk from accidental explosion is slight.

Well adapted to quarry and construction work, highway and railroad blasting, and to mining operations. Will give good results wherever conditions are not very wet.

Atlas Extra—Grades.	40%	50%	60%
Per Pound ..... $ ...		....	....

In [illegible] pound boxes

BLASTING FUSE

ENSIGN-BICKFORD, SAFETY

Beaver Brand

A yellow finished double countered fuse suitable for dry or damp work such as is encountered in most agricultural, block hole, or adobe blasting. In coils of 50 feet each, 2 coils in package.

Beaver	.Per 1000 Feet $7.00
Single Tape	.Per 1000 Feet 7.70

Crescent Brand

This fuse is very popular in large mining districts on account of its neat appearance and good waterproof qualities. It has one cloth tape and two waterproofing coats. Cotton threads are wound on the exterior of this fuse and it is finished with a clean, hard, white coat. In coils of 50 feet each, 2 coils in package.

Crescent	.....Per 1000 Feet $8.65
Double Tape	.....Per 1000 Feet 8.65

All fuse packed in cases of 6000 feet.

CAP CRIMPERS AND FUSE CUTTERS

ATLAS

Frosted Finish

Equipped with fuse cutting attachment and has one arm pointed for purpose of making hole in cartridge when priming. The finish prevents rusting and makes the tool easily discernible in dark places, such as mines.

No. 1 [illegible] .....Per Dozen $8.00

Half dozen in a box.

BLASTING PAPER

IN ROLLS

Coal Miners Shooting Paper

This paper is used for making cartridges to contain blasting powder. It is also sometimes used for making up "tamping bags".

Black Diamond—Put up in 1 pound rolls, width 9 inches, fifty rolls in a crate; weight 100 pounds .. Per Pound $ . .

Ideal—Put up in 1 pound rolls, width 9 inches; made from 90 pound glazed fibre, dark drab color; fifty rolls to carton; weight 50 pounds .....Per Pound $....

BLASTING CAPS

ATLAS

No. 6 Fuse Caps

Made of malleable copper. Diameter of the shell is as close to the size of a fuse as practicable in order that when the cap is crimped on the fuse the joint will be as waterproof as it is possible to make it.

No. 6 -Length of shell, 1½ inches, outside diameter of shell, 2.5 inch weight of explosive charge 1 gram .....Per 1000 $.

One hundred in a box.

No. 6 Electric Caps

Fired by means of electricity instead of a fuse. Wires carefully and effectively insulated and carefully tinned to prevent rust on iron and corrosion on copper wires. The caps also are waterproofed with the utmost care to prevent moisture from reaching the explosive charge.

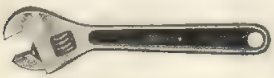
ADJUSTABLE WRENCHES

No. 48-S — Constructed of the best of material; especially useful in corners and confined places; the operating nut is steel and the sliding jaw a steel drop forging.

Lenth, Inches	Opens, Inches	Weight, per Dozen, Lbs.	Per Dozen
6	¾	5½	$8.00
8	1	12	10.00
10	1⅜	22	12.00
12	1⅝	33	18.00



ARROW—22½° ANGLE HEAD

Made from a special analysis of steel, drop forged, carefully machined and hardened by a scientific heat treatment process; polished jaws; steel knurled adjusting screw.

Length, Inches	Capacity, Inches	Weight, per Dozen, Lbs.	Per Dozen
4	½	1¾	$7.80
6	¾	4	7.80
8	1⅛	8	9.60
10	1⅛	15½	12.00

CRESCENT—SINGLE END

Drop forged from the best carbon steel and specially heat treated to insure toughness, as well as hardness. Parts fit perfectly and the adjusting screw always operates easily and smoothly. Spring washer retains the adjustment until intentionally changed. The design is carefully worked out in every detail. The braces to the jaws are so constructed as to secure the greatest possible strength and form an opening to fit a hexagon nut; the increased width of the handle towards the end is designed to fit the hand more comfortably, a hole is provided for hanging. Web is black oil finished, edges and head polished.

Nos.	Size, Inches	Capacity, Inches	Weight Per Dozen, Lbs.	Per Dozen
A14	4	½	1½	$7.80
A16	6	¾	3¾	7.80
A18	8	1⅛	7½	9.60

BONNEY CHROME VANADIUM WRENCHES

BONNEY ENGINEERS' WRENCHES

15° Angle of Opening

Bonney "CV" Chrome Vanadium Engineers' Wrenches are thinner, longer and stronger than Carbon Steel Wrenches of the same opening. The use of this alloy steel allows refinement of design both in shape and thickness of head. The thin pear shaped head made possible by the use of alloy steel makes this line of wrenches lighter, better balanced, and more serviceable in confined places, with unbreakable strength. Finished in nickel with buffed heads. Rigidly inspected, tested and guaranteed

BONNEY TAPPET WRENCHES

Bonney "CV" Chrome Vanadium Tappet Wrenches. These wrenches will fit a very large number of Tappet adjustments on automobiles and trucks. Each wrench has two openings of the same size, but with different angles, so as to allow the closest possible adjustment of nuts and screws.

The thinness of the wrenches requires an alloy steel of the highest grade with the best possible heat treatment. This has all been provided in the manufacture of these New Tappet tools

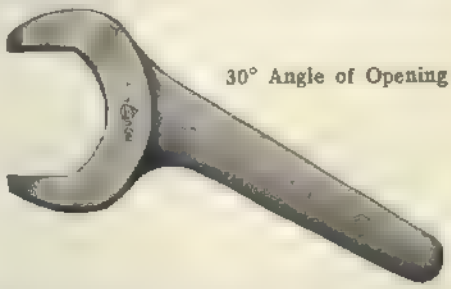
BONNEY WATER PUMP PACKING NUT WRENCHES

30° Angle of Opening



Bonney "CV" Chrome Vanadium Water Pump Packing Nut Wrenches. One of the hardest adjustments on a water cooled motor is the water pump packing nut. This nut is usually of brass and very thin. It should be tightened only with a wrench and never with a drive punch and hammer. Wrenches to do this work must be very thin yet short to fit into the narrow space in which the pump is located. These wrenches are designed especially for this work and their use for other classes of work or with added leverage is not recommended.

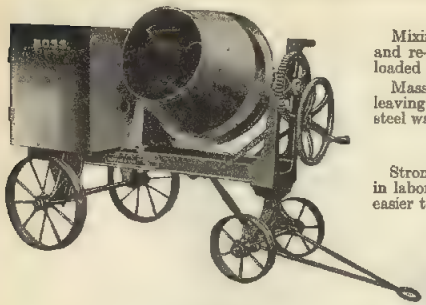
The Boss Tilter, Batch-a-Minute Low Charging Mixer

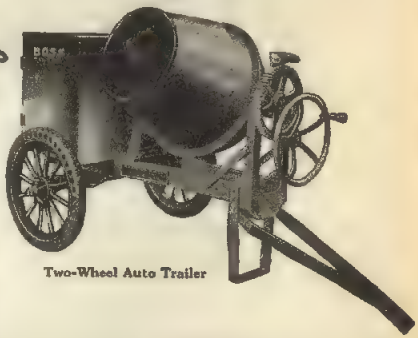


Mixing shovels (with self-cleaning passages) cut, turn and re-mix batch sixty times in a minute. Mixer can be loaded on either side. Mixing always in plain sight.

Massive hardened steel stub shaft forced into bowl bearings, leaving 8 to 10 inches wearing surface, with case hardened cut steel washer thrust bearings.

Mixes mortar as well as concrete.

Stronger and smoother mortar with a saving of 50 per cent in labor. In addition, masons lay more brick, as mortar is easier to spread. Proven on hundreds of jobs.



Two-Wheel Auto Trailer

The Two Wheel Auto Trailer shown above is built in 5 cubic foot capacity only, which is equal to an average house foundation per day. It is the same in all respects as the 3½ S mixer specified above except it is mounted on a two wheel trailer equipped with 30x3 inch solid rubber tires.

Boss Building Mixer, Heavy Duty Type

The patented high speed re-mixing action discharges faster—gives stronger and more uniform concrete. The drum is rotated by means of a steel roller pinion which provides a flexible, smooth-running transmission which has twice the life of gears or chain.

The pinion shaft and drum rollers are provided with Hyatt roller bearings, having self oiling rollers in dust proof cages which save 17% in power consumption.

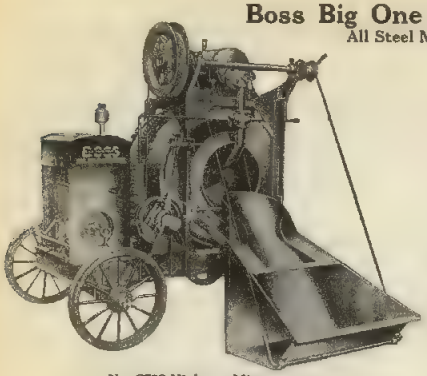
Boss Big One Bag Mixer

All Steel Model



No. C7S Highway Mixer

1,000 pounds excess weight is saved by building this fast discharging one bag mixer of steel instead of cast iron.

Full One-Bag Capacity

No Splitting Sacks

It has a capacity of easily 75 yards per day, yet is light enough to move on any job.

It is the most compact, strongly built and lightest weight mixer made, of equal capacity. It is guaranteed to operate as fast, efficiently and economically as any other mixer of its size regardless of price. The high quality of material and workmanship is fully guaranteed and any parts found defective within one year will be replaced free of charge.

Extra large Novo or Le Roi gasoline engine is furnished.

No. C73S, Special Highway Mixer

Has solid rubber tired wheels. It is built for long hauls and is furnished with a steel hitch suitable for attaching to Auto Truck.

No. C71S Low Charging Mixer

With Wheel Barrow Hopper, Measuring Water Tank and Hinged Loading Platform

Is a compact, sturdy, all-purpose outfit.

The hopper is extra wide, permitting the barrow to dump into mixer without spilling.

The loading platform is only knee high and is hinged to swing up when moving outfit.

It will also turn out better mixed mortar for forty masons.

No. C71S with Wheel Barrow Hopper Water Tank and Loading Platform

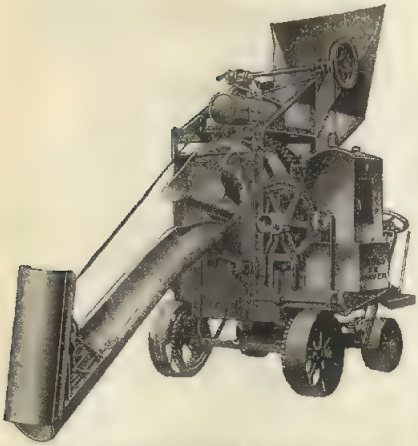
Prices Quoted on Application

Boss Building and Paving Mixer

A Fast One-Bagger

For Streets, Alleys, Walks, Floors and Curbs



enough to dump into forms, saving wheeling.

Built for Heavy Work

Hyatt Roller Bearings in chilled drum rollers, also in countershaft boxes. Steel roller pinion drive. Crucible steel traction gears. Oversized gears with heavily gusseted structural work. 30 per cent surplus power of most reliable makes, backs our claim for heavy duty construction.

Real Portability

A team will move outfit anywhere if wanted without traction. With traction, it will go up any grade at rate of 1½ miles per hour. Traction gears made of steel and always in mesh. Strongest yet lightest paver on the market.

High Drum Type

High drum quick discharge type. Load is carried low and distributed within the wheels. Twelve foot sectional swinging chute dumps at three points to save moving. High Wide tires, light weight.

One Man Control

One man controls every operation from seat, including two way traction, hopper, discharge, water. The 8 H P. Radiator Cooled Novo or LeRoi engine is within easy reach of operator. Power Loader is automatic stop type. Measuring pressure water tank.

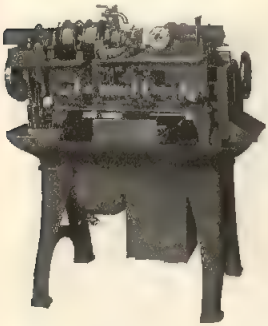
Brown & Sharpe
Automatic Screw Machines



No. 2537-00—$\frac{1}{16}$" x 1¼" **No. 2538-0**—¼" x 2"
No. 2539-2—⅞" x 3"

Automatic Screw Machines are arranged to advance the stock and operate the tools entirely without the aid of an operator, being designed primarily for handling bar stock.

One operator can easily attend to four or more machines.

They are so constructed as to use tools for a great variety of operations, including those of plain and taper turning, forming to practically any shape, cutting off at an angle, centre and cross drilling, threading, counter-boring, recessing, knurling, milling slots or spots, generating spiral and worm gears, castellating nuts and various others. Many varieties of small pieces can be handled advantageously by the use of magazine feeding attachments.

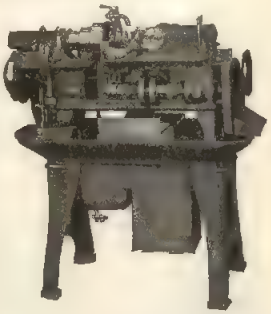
No. 19 Automatic Screw Machine differs from the regular design in having the spindle run in one direction only and the turret does not move horizontally but has sliding spindles for advancing and withdrawing the turret tools.

The machine is designed to run at unusually high speeds.

Full information and prices on application.

No. 2540-19—19¾" x 13¾"

Brown & Sharpe
Automatic Turret Forming Machines

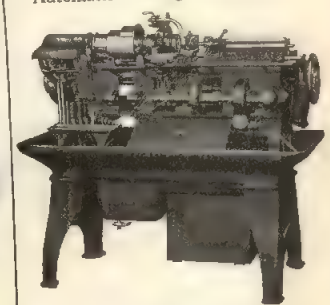


No. 2541-00—$\frac{1}{16}$" x 1¼" **No. 2542-0**—½" x 2"
No. 2543-2—¾" x 3"

Will perform all the various operations common to automatic screw machines aside from internal threading, such as straight, taper, and form turning, drilling to several diameters, reaming counterboring, recessing, knurling and others. External threads may be cut with an opening die.

Full information and prices on application.

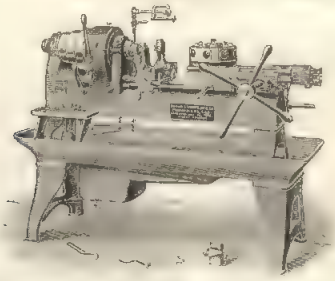
Brown & Sharpe
Automatic Cutting-off Machines



No. 2544-00—$\frac{1}{16}$" x 10" **No. 2545-0**—½" x 12"
No. 2546-2—¾" x 16"

Will perform plain or form turning, knurling, cutting-off and other operations with the two cross slide tools, like the automatic screw machines, also one tool operation, as drilling or straight and taper turning with the tool slide. External threads may be cut with an opening die. Thus they are adapted to the manufacture of many parts from bar stock, as chain studs, straight or taper pins, washers, and bushings.

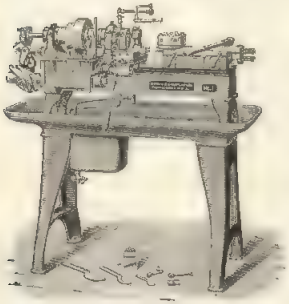
Brown & Sharpe Plain Screw Machines



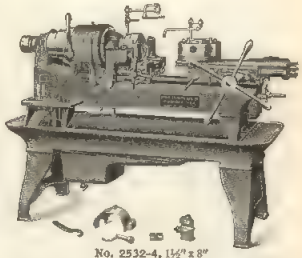
No. 2527-4 -1½" x 8" Hole through spindle, 1 ⅝". Length turned, 8".
No. 2528-6—2" x 10" Hole through spindle, 2 ⅛". Length turned, 10".

Since all work on Plain Screw Machines is chucked by hand, their particular field lies in finishing small castings and forgings, and irregular shaped pieces which may be held either in a chuck or collet, or attached to a face plate. They are also suitable for manufacturing screws, studs, and various small parts of machines and tools from bar stock previously cut in sections.

Brown & Sharpe Wire Feed Screw Machine



No. 2529-0, ¾" x 2¼"
No. 2530-1, ⅝" x 3"
No. 2531-2, ⅝" x 5"



No. 2532-4, 1½" x 8"
No. 2532-6, 2" x 10"

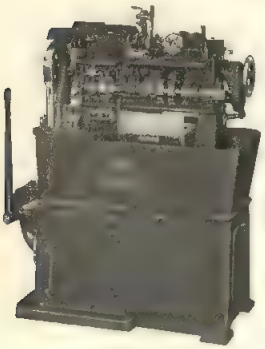
As the Wire Feed Screw Machine with Automatic Feed is equipped with suitable mechanism for automatically advancing stock through the spindle and gripping it in a chuck, it is well adapted to producing pieces from the bar. The automatic action of the chuck also gives rise to the extensive use of this machine for working on bar stock previously cut in sections, and for performing second operations on partly finished work, also for handling irregular pieces held in a special chuck or collet.

The Nos. 2532-4 and -6 machines with Roller Feed are similar to the Plain Screw Machines in all essential details, and have in addition an automatic chuck and roller feed for handling bars, adapting this type particularly to the medium and heavier classes of bar work.

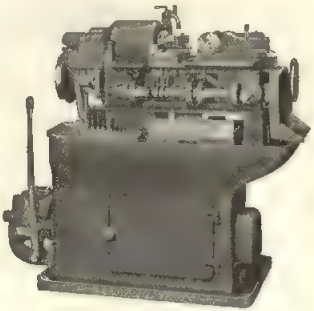
The facility with which they may be shifted to handle any size or kind of stock without the use of changeable parts makes them of special value in shops requiring small quantities of a great variety of machine parts made from the bar. The convenient arrangement of the several operating levers and adjustable parts also makes for efficiency on this class of work, by aiding the operator in tooling up the machine quickly and in obtaining maximum production on the various styles of work handled.

Brown & Sharpe Automatic Screw Machines

Constant Speed Drive



No. 2533-00G, ⅛" x 1¼".



No. 2534-0G, ⅛" x 2".

The adaptation of the Constant Speed Drive to the Automatic Screw Machine increases its efficiency and equips it more fully to meet the demands of modern manufacturing. As arranged for this type of drive, the machines differ from those driven from a countershaft in the method of applying power to the spindle, and making speed changes. The main drive is direct to the machine driving pulley which runs at a constant speed.

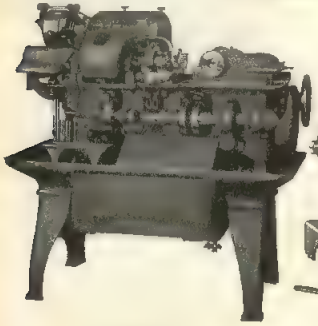
As the machine is constructed with a friction clutch, located in this driving pulley, it can be belted directly to the line shaft, a feature in line with modern methods. Overhead works are eliminated, doing away with the expense of a large amount of belting and the care of countershafts and hangers. An added feature arising from this fact is, that the machines can be placed to much better advantage on the floor, it being comparatively easy to arrange for a line shaft pulley or simple countershaft which takes up no more room than the machine itself.

All changes of spindle speeds, which are otherwise made by the overhead belts, are here obtained quickly and conveniently by a system of change gearing on the machine. As the driving belts are removed from over the spindle, the head of the machine can be entirely shielded by a hinged cover.

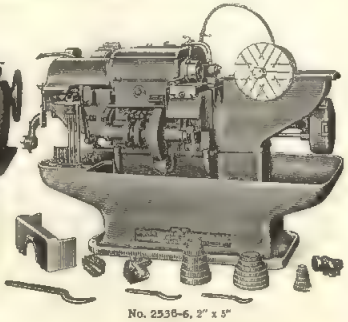
Attention is also called to the fact that the machines, being driven from a constant speed pulley, are well adapted to the application of an individual constant speed motor drive.

The Nos. 00G and 0G Automatic Screw Machines are designed with a cabinet type base, in which the entire spindle driving mechanism is located. This adds to the rigidity of the machine, in that the entire mechanism is contained within the frame, thereby reducing to a minimum any vibration caused by the spindle when running at the high speeds used on small work.

Full information and prices on application.



No. 2535-2G, ⅛" x 3".



No. 2536-6, 2" x 5"

Reed Motor Lawn Mower and Roller

Gasoline Driven

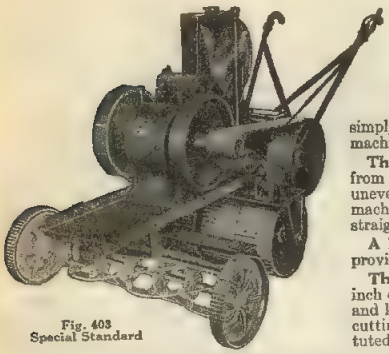

Fig. 403
Special Standard

For the Rapid and Efficient Mowing and Simultaneous Light Rolling of Lawns, Parks, Golf Courses, etc.

Simple construction, ease of operation and control, and full flexibility are obtained by exclusive and patented features.

The engine provides all motive power. The operator simply controls the power through a hand lever and guides the machine by swinging the handles.

The Cutting Unit, Fig. G-30, is flexibly connected to trail from the front end of the main frame and is free to conform to uneven lawn surfaces, and to all turning movements of the machine. It cuts when turning the same as when moving straight ahead.

A Differential Drive from the motor to the ground rollers provides abundant traction without injury to the lawn.

The Light Roller Pressure (about 20 to 30 pounds per lineal inch of roller) presses the roots of grass into place in the spring and keeps the lawn smooth without packing the ground. The cutting unit can be easily removed and a large caster substituted for rolling only, when desired.

The Motors are high grade four cycle type, easy to start, smooth running, with plenty of power. Speed is controlled with automatic throttling governors.

The Cutting Units are driven from the side wheels, as on hand mowers. The entire unit is independent and can be quickly removed for sharpening or replacement.

Special Standard Fig. 403

This is the popular size for the majority of lawns, and two or more of these machines are frequently used in preference to the Triplex (Fig. 330) on large lawns having many narrow spaces.

Engine 3 Horse Power, Radiator Cooled. Ground roller 12½ inches diameter, 26 inches wide. Cutting width, 30 inches; cutting capacity, 4 to 6 acres per day. Shipping weight, crated, 680 pounds.

Price, magneto ignition.....$365.00 Battery ignition.....$350.00

Regular Standard Fig. 401

This machine for moderate size or smaller lawns, which are reasonably level, is made in 22 and 30 inch sizes and equipped with 1½ to 1¾ horse power hopper cooled engines.

The 30 inch size has 12½x26 inch ground rollers. Mowing capacity of 4 to 5 acres per day. Shipping weight, crated, 650 pounds.

Price, Magneto Ignition.....$340.00
Price, Battery Ignition..... 325.00

The 22 inch size has 12½x21 inch ground rollers. Mowing capacity 2 to 3 acres per day. Shipping weight, crated, 600 pounds.

Price, Magneto Ignition.....$275.00
Price, Battery Ignition..... 260.00

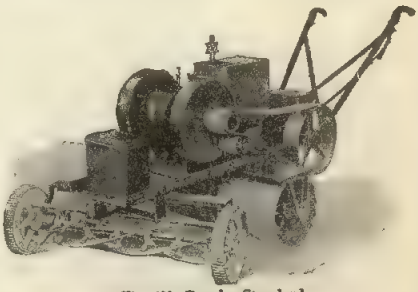

Fig. 401 Regular Standard

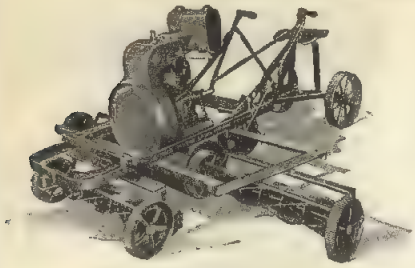
Triplex Fig. 330

Using three 30-inch cutting units triples the capacity without additional effort of the operator. The rear mowers are in line with the main traction roller and pivot on the same centre. One wheel on each side, mower rides in end of the traction roller from which it obtains by friction the necessary cutting power. This arrangement adds very little weight to the traction roller, and permits steering almost as easily as a single cutting unit. The side mowers can be quickly removed and the outfit converted into a single unit machine for narrow spaces and difficult work.

Reed Motor Lawn Mower and Roller (Cont'd.)



Triplex Fig. 330 with Riding Trailer

Riding trailer as shown in Fig. 330 will be furnished when ordered with either the Triplex or Special Standard.

Triplex cutting width 87 inches. Mowing capacity 15 acres per day. Shipping weight, crated, 1050 pounds.

Price, Magneto Ignition $690.00
Price, Battery Ignition 675.00
Riding Trailer, extra 25.00

Fig. 30. Crestlawn High Speed Cutting Units

These units are equipped with Timken tapered roller bearings for the reel shaft with automatic adjustment for wear. As the reel is always held positively in place it is only necessary to adjust the cutter bar to proper contact with the blades. Driving wheels revolve on ball bearings.

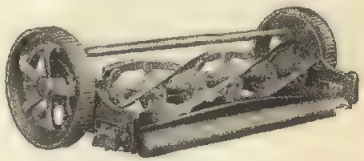


Fig. 30. Crestlawn Cutting Unit

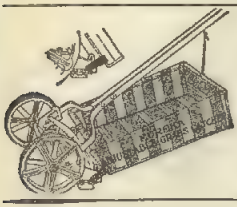
The Fig. 30 cutting unit has a cutting width of 30 inches. Driving wheels 11 inches diameter. Revolving reel, 7 inches diameter. Five blades.

Price $60.00

The Fig. 22 (not shown) is the same as Fig. 30 except the cutting width is 22 inches. Drive wheel 10½ inches diameter; revolving reel 6 inches diameter. Five blades.

Price $45.00



Eureka Adjustable Grass Catcher

Made to meet the demand for a low-priced grass catcher.

Adjustable to all sizes and makes of low wheel mowers.

No 1. Fits 12 to 18 inches, inclusive. Weight per dozen, 17 pounds.
Price, per dozen $8.00

No 2. Fits 18 to 24 inches, inclusive. Weight per dozen, 18 pounds.
Price per dozen $9.00

Bieder Adjustable Grass Catcher

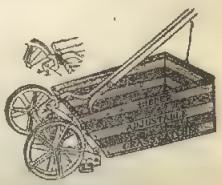
One of our best numbers.

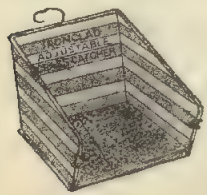
Made extra deep to prevent grass being thrown over sides and rear. Will fit all sizes and makes of mowers

Our unconditional guarantee is back of this grass catcher.

No. 7. Fits all low wheel mowers, 18 inches and smaller. Weight per dozen, 20 pounds.
Price per dozen $11.00

No. 13. Fits all high wheel mowers, 24 inches and smaller. Weight per dozen, 22 pounds
Price per dozen $15.50





Ironclad Adjustable Grass Catcher

Made of heavy striped canvas, with galvanized iron bottom. This combines lightness with durability, and is especially designed for the trade that wants the best irrespective of price.

No. 1. For all high and low wheel mowers, 18 inches and smaller. Weight per dozen, 13 pounds
Price per dozen $20.00

No. 2. For all high and low wheel mowers, 18 to 24 inches. Weight per dozen, 50 pounds.
Price per dozen $23.50

RADIO SETS AND PARTS

FREED-EISEMANN
NEUTRODYNE VACUUM TUBE RECEIVING SET

Operating Distance Up To 3000 Miles. Wave Length Range 200 to 575 Meters.

Same as No. NR-6 except encased in handsome genuine African mahogany highly polished. All metal parts gold plated; front panel hinged to be lowered enabling operator to use same as a writing desk. Can be used separately or with No. FE150 Console Table Loud Speaker.

No. FE-150—Console Table only	225 00	*$100 00*

Carefully boxed.

RADIO SETS AND PARTS

NEUTRODYNE VACUUM TUBE RECEIVING SET
FREED-EISEMANN

Operating Distance Up To 3000 Miles.

Wave Length Range 200 To 575 Meters.

Consists of two stages of tuned radio frequency, detector and two stages non-regenerating audio frequency amplification. Has Hazeltine neutrodyne circuit. Will tune out any local broadcasting and bring in distant stations without distortion. The setting of the three large tuning dials is always same for any particular broadcasting station. After a station has been brought in the positions of the dials should be noted. The same station can be brought in wherever it happens to be broadcasting by lighting tubes and turning dials to these readings. This set has such tremendous volume that it is necessary to use all five tubes only when receiving the most distant stations like those across the continent. Has no whistle but that of a regenerative set and no reflex circuit. Hand rubbed solid mahogany cabinet, polished black formica panel and bakelite dials both with beveled edges and engraven lettering.

The antenna furnished with this set includes everything; necessary: 150 feet of stranded copper antenna wire, 25 feet No. 14SBRC lead-in wire, 20 feet No. 18 rubber covered ground wire, 1 No. 200 lightning arrester, 1 No. 708 battery switch, 2, ½x6 inch porcelain tubes, 3 No. INC porcelain knobs, 2 screw eyes, 1 ground clamp, 2 No. 500 insulators, 1 counter and 12 insulated staples.

Set includes the following:		Each
No. NR-6—Receiver with battery switch		337 50
		$150 00
No. UV201A—Tubes (5 only)	10 20	*4 00*

		Per Set
No. NR-6C—Complete as described, ready to be installed	439 12	*$215 00*

Carefully packed in cartons; wt per set 118 lbs.

COMPLETE SET OF PARTS FOR BUILDING NEUTRODYNE RADIO RECEIVERS.

Contains all the parts except cabinet for building a five tube Neutrodyne set. Consists of a panel drilled and engraved, special parts for the Neutrodyne circuit, all necessary condensers, rheostats, jacks, sockets and dials. Complete with wiring diagram and instructor.

Price does not include cabinet.

		Each
No. KD-50—Wt each 19 lbs	180 00	*$80 00*

One in carton.

RADIO SETS AND PARTS

NEUTRODYNE VACUUM TUBE RECEIVING SET
FREED-EISEMANN

Operating Distance Up To 2000 Miles, Wave Length Range 200 to 500 Meters.

Consists of one stage of high powered radio frequency, a detector and two stages of non-regenerative audio frequency amplification. Has Hazeltine neutrodyne circuit.

Very selective; easy to operate. Two large tuning dials to adjust.

The setting of these dials is always the same for any particular Broadcasting Station. After the station has been tuned in, the position of the dials should be noted and recorded. The same station can again be received by turning dials to correspond with former readings. No whistling noises.

Has as great a volumn as No. NR-5 and NR-6.

Hand rubbed solid mahogany cabinet, polished black formica panel and bakelite dials both with beveled edges and engraved lettering.

The antenna furnished with this set includes everything necessary: 150 feet of stranded copper antenna wire, 25 feet No. 14SBRC lead-in wire, 20 feet No. 18 rubber covered ground wire, 1 No. 200 lightning arrester, 1 No. 708 battery switch, 2, 1/16x6 inch porcelain tubes, 3 No. INC porcelain knobs, 2 screw eyes, 1 ground clamp, 2 No. 500 insulators, 1 counter and 12 insulated staples.

Crated.	*$135 00*

The big future of radio lies in the small town and rural field.

Of the one hundred and ten million population of these United States, over sixty million reside in towns of under five thousand population or on the farms. To these rural dwellers radio is the greatest invention of all time. It means an end to isolation, it means musical and educational advantages previously known only to the city dweller.

RADIO SETS AND PARTS

BLENHEIM MODEL

A Combination Emerson Phonograph And Howard Neutrodyne Radio Receiver.

Genuine mahogany veneered cabinet; all metal parts highly nickel plated.

The Phonograph is equipped with improved throw-back tone arm and heavy double spring motor; 12 inch velvet covered turntable, automatic stop; tone modifier, album filing system and genuine master amplifier horn.

The Receiver is of the 5 tube Howard Neutrodyne type. Operating distance up to 3000 miles. Wave length range 200 to 575 meters. Consists of two stages of tuned radio frequency, a detector and two stages of non-regenerative audio frequency amplification. Has Hazeltine Neutrodyne circuit. Local Broadcasting Stations can be tuned out and distant stations brought in without any distortion. The setting of the three large tuning dials is always the same for any particular Broadcasting Station. After a Station has been tuned in the position of the dials should be noticed. The same Station can be easily picked up at any other Broadcasting by turning dials to the same readings. It is large volume and is necessary to use five tubes only when distance Stations like those across continent are picked up. The only Neutrodyne Receiver on the market having a rheostat for each tube. this enables each tube to be lighted exactly to the point at which it gives best results. All batteries are incased in cabinet and only antenna and ground wires are visible.

The antenna furnished with this set includes everything necessary: 150 feet of stranded copper antenna wire, 25 feet No. 14SBRC lead-in-wire, 20 feet No. 18 rubber covered ground wire, 1 No. 270 lightning arrester, 1 No. 708 battery switch, 2, 7½x6 inch porcelain tubes, 3 No. 1NC porcelain knobs, 2 screw eyes, 1 ground clamp, 2 No. 500 insulators, 1 connector and 2 insulated staples.

Has the line of a real airplane. Brightly enameled yellow trimmed with red and blue. Propeller in front turns rapidly while plane is running over the floor. Strong clock work motor entirely enclosed. Will run forward or in a circle. Length 8½ inches and 7 inches wide. Each in box.

No. 39N40. Per dozen... . . **3.90**

STORE LADDERS

MILBRADT'S

Bent Ladder.

Is intended for shelving that is not very strong, as most of the weight rests on the floor. This ladder runs on a hardwood track fastened to shelving near the top to guide it and has attached at the bottom cushion tired wheels that run on the floor, but no track is used on the floor.

The track should be fastened to a shelf that is about 3 feet down from the top.

In ordering, observe the following instructions:

1st.—Give the exact height from floor to top of ledge.

2nd. Give the exact width or projection of base shelf.

3rd. Give the exact perpendicular height from the top of ledge to the top face of shelf to which track is to be fastened.

4th. Give entire length of each run of track and number of uprights for each run.

5th. Give dimensions of uprights, also distance of uprights from center to center.

6th.—State if uprights are straight faced or turned spindle.

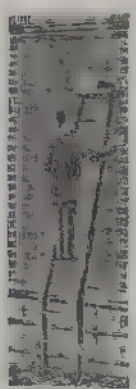
Wood Track.

	Per Ft
No. 7—No brackets needed; complete with screws; wt per ft ½ lb	✦$0 99

Ladders and track crated.

BICYCLE



Bent Floor Track Ladders.

The track for these ladders is placed on the floor entirely independent of the base shelf, and for this reason this style is preferred by many buyers to any other, particularly where the base shelf is narrow. Otherwise this ladder is the same as the bent base shelf. The track for the floor is so small that there can be no objection to it whatever.

Both the oak and pine are finished in the natural wood colors.

In ordering, observe the same instructions as on No. 25 ladder shown on preceding page.

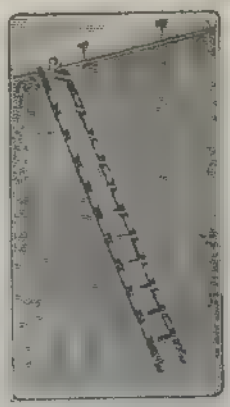
CHICAGO—BICYCLE



The track is open, permitting the use of large wheels, two of which are fitted to top and bottom of each ladder. A special device prevents tipping of the ladder and it cannot possibly get off the track. When so ordered they are made to turn corners or follow any crooked or curved track. Japanned mountings; rubber tired wheels.

They are made of yellow Georgia pine, with plain sides; and oak with ornamental open work sides, finished in the natural wood colors.

For standard ladders up to 14 ft in length, 3½ in. sides, 4 in. steps; length of steps 12 inches.

In ordering, observe the following instructions:

1st.—Give exact perpendicular height from floor to ceiling.

2nd.—Give entire length of track required.

Ladder and Fixtures Complete.

	Each
No. 34—Oak; (not to exceed 10 ft in length) wt per ft, 3½ lbs	✦$79 50

Packed loose.

	Each
Curves, for Chicago ladder track, extra	✦$9 90

BICYCLE

The track of the Bicycle ladder is built at the bottom, either on the base shelf or the floor, so that the entire weight of the ladder and operator is supported from below.

Light turned pole at the upper end of the ladder is used for a guide. Stout hook holds the pole in place. Has an extra wide shelf at the top for convenience of handling goods.

Has a double track; a half round steel rail for the wheels to run on at the bottom. The steel rail is 5/16 of an inch in height and ½ of an inch in width, the pole is little over an inch in diameter; sides 3½ inches wide; steps 4 inches wide; length of steps 12 inches.

In ordering, observe the following instructions:

1st.—Give exact distance from floor to ledge.

2nd. Give exact width of ledge

3rd.—Give exact perpendicular height from ledge to top of shelf to which ladder is to be fastened.

4th.—Give entire length of each run of track and number of uprights for each run.

5th.—Give dimensions of uprights, also distance of uprights from center to center.

6th.—State if uprights are straight faced or turned spindle.

	Each
No. 25—Oak, japanned mountings	✦$66 00
No. 26—Oak, nickel plated mountings	✦72 75
No. 27—Yellow pine, japanned mountings	✦56 25
No. 28—Yellow pine, nickel plated mountings	✦63 00

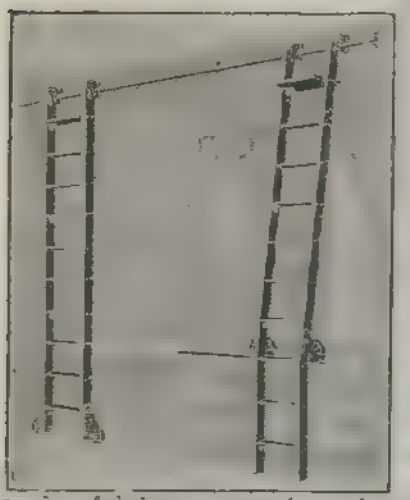
Average wt per ft, 3½ lbs.

Wrapped in paper, with castings protected with cleats.

✦F. O. B. Iowa Factory Only.

STORE LADDERS

RICHARDS BALL-BEARING



Ladders are made of oak or pine, selected and kiln dried. Steps are let into the sides and held by screws passing through the sides of ladder, made perfectly rigid with steel rungs.

Ladder sides are 3½ inches wide and steps 4 inches wide on ladders up to 14 ft.; over 14 ft. sides are 4 inches wide and steps 5 inches wide.

Steps are 14 ins. long between ladder sides. Track is attached to the uprights of shelving, edge of shelves or to cornice as shown above.

Straight Ladders.

Straight ladders can be set close to shelving when not in use, as the upper fixture has a self-adjusting vertical slide, which accommodates to thickness of door. Furnished with ball-bearing fibre or rubber tired wheels for bottom of ladder.

In ordering, observe the following instructions:

1st.—Give exact perpendicular height from floor to top of shelf to which track is to be fastened.

2nd. Give entire length of each run of track and number of uprights for each run.

3rd. Give dimensions of uprights, also distance of uprights from center to center.

4th.—State if uprights are straight faced or turned spindle.

5th. State if fibre or rubber-tired wheels are preferred.

Ladder and Fixtures Complete, Any Length.

	Each
No. 114—Oak; wt per ft 3½ lbs	+$74 25
No. 114P—Pine; wt per ft 3 lbs	+66 75

Bent Ladders.

Bent ladders have roller-bearing wheels running on half round ledge track.

In ordering, observe the following instructions:

1st.—Give exact distance from floor to ledge.

2nd. Give exact width of ledge.

3rd—Give exact perpendicular height from ledge to top of shelf to which track is to be fastened.

4th. Give entire length of each run of track and number of uprights for each run.

5th.—Give dimensions of uprights, also distance of upright from center to center.

6th.—State if uprights are straight faced or turned spindle.

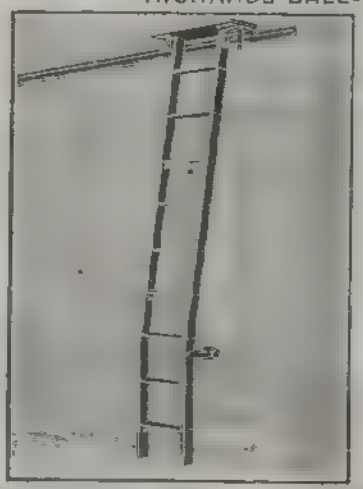
Shipped wrapped with castings protected by cleats.

RICHARDS BALL-BEARING



The top fixtures made of steel, have finest case hardened ball bearings. The weight is carried entirely by the upper fixtures, the lower rollers acting as a guide against the edge of the ledge. The track consisting of steel angle and grooved wooden runway, is attached to the uprights of shelving, the edge of shelves or cornice. Fixtures aluminum finish. Ladders furnished in oak or pine.

For standard ladders up to 14 feet in length, width of ladder sides, 3½ inches, width of steps 4 inches. Ladders over 14 feet long have sides 4 inches wide and width of steps 5 inches. Steps are 12 inches long between ladder sides.

In ordering, observe the following instructions:

1st.—Give exact distance from floor to ledge.

2nd. Give exact width of ledge.

3rd Give exact perpendicular height from ledge to top of shelf to which ladder is to be fastened.

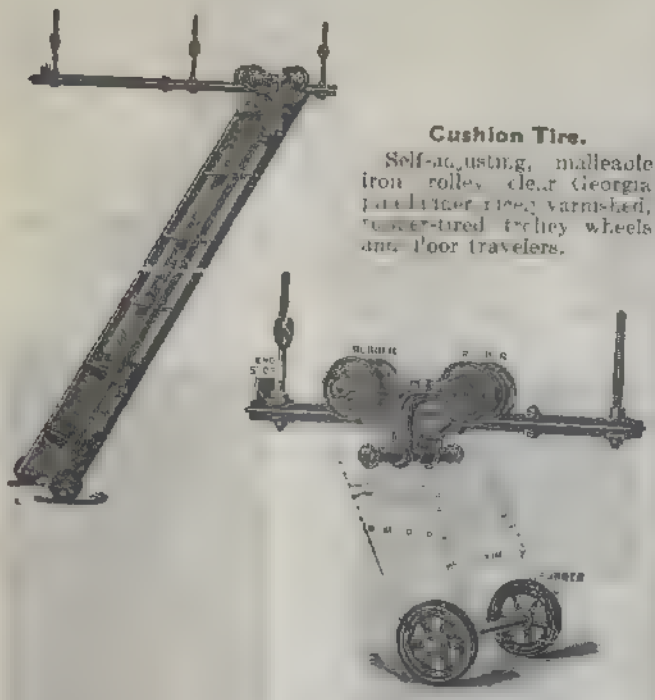
STORE LADDERS

MYERS'



Cushion Tire.

Self-adjusting, malleable iron rollers, clear Georgia pine ladder rods varnished, cushion-tired trolley wheels and floor travelers.

The track is double angle steel rail which is very neat and strong and is suspended from ceiling by means of lag screws, either jointed or rigid, or by flanged plates and wood screws. By this means the track is placed close to the ceiling and can be leveled on an uneven ceiling without the least trouble and without any blocking or bridging.

The trolley is self-adjusting, is made of malleable iron, fitted with turned steel bearings, and 3 inch anti-rattler wheels, turned and bored on a lathe and fitted with special rubber tires.

The ladder is constructed of the best clear Georgia pine nicely finished, filled and varnished. It has open panel sides 5 inches wide, with 5 inch steps, each step being supported at each end with a special malleable dowel-tee, which makes the strongest construction possible. The width of ladder is 12 inches.

The floor-travelers are 5 inches in diameter, composed of metal sides with rubber cushioned tires, clamped in such a position as to be impossible to come loose or work off. They are laced on a steel axle which revolves with one of the wheels, the other running loose. In this manner the ladder will adjust itself to the floor.

In ordering, observe the following instructions:
1st.—Give exact perpendicular height from floor to ceiling.
2nd.—Give entire length of track required.

	Each
No. IML—Ladder and hanger, complete without track; for ceilings 14 ft or less in height; wt each 60 lbs	✦$66 75

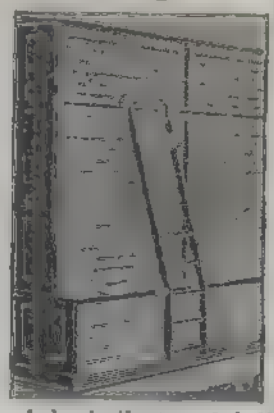
STORE LADDERS

MILBRADT'S

The Milbradt step ladders are the strongest, neatest and easiest running ladders on the market. They are made to order, any shape and length necessary to fit shelving, of good oak lumber, in the best possible workmanlike manner, finished in first class style. They are made in various styles to suit all kinds of shelving.



Bent Shelf Ladders.

Runs on steel track, has rubber rollers attached near the lower end that run against the edge of base shelf, nickel plated malleable iron trimmings.

The track should be fastened to a shelf that is about 3 feet from the top.

In ordering, observe the following instructions:
1st.—Give the exact height from floor to top of ledge.
2nd.—Give the exact width or projection of base shelf.
3rd.—Give the exact perpendicular height from the top of ledge to the top of shelf to which track is to be fastened.
4th. Give entire length of each run of track and number of uprights for each run.
5th.—Give dimensions of uprights, also distance of uprights from center to center.
6th.—State if uprights are straight faced or turned spindle.

IMPROVED HEX. GEAR SHIFT EXTENSION

IMPROVED HEX GEAR SHIFT EXTENSION

Improved Hex Gear Shift Extension is made for the following cars shown below. Its object is to make it easy to reach the gear shift lever while driving and adds to the appearance of the car. The data below gives the names of the cars in alphabetical order, and opposite the name is the model number of the extension which fits that particular make of car.

The price includes the bakelite ball.

Improved Hex Gear Shift Extension.
Each $2 00

BOYCE MOTO-METERS

BOYCE DE LUXE AND STANDARD MODELS

De Luxe Cloisonne Name Plate Standard

De Luxe Model. Designed for the highest grade passenger cars. The temperature tube is one-half inch in diameter, having a broad column of red liquid readable at a great distance. The case is triple nickel-plated, and the finish of the entire instrument is of the highest quality of workmanship. It is in truth a De Luxe instrument. Size, 3⅜x5¾ inches. Entire weight (packed in carton), 23½ ounces.

De Luxe Model Moto-Meter (including Sedlaich Lock).....each $15 00

Standard Model. A perfect heat recording instrument of the highest type, with extra wide broad ribbon bore thermometer tube. Furnished in high grade black enamel with nickel plated retaining rings or all nickel finish. Size, 3⅜x5½ inches. Weight (packed in carton), 16 ounces.

Standard Model Moto-Meter (Specify finish).each $10 00

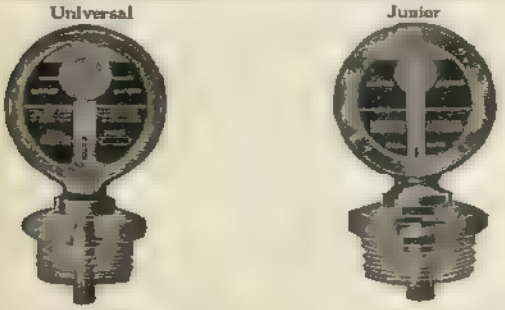
CLOISONNE ENAMEL NAME PLATE

Cloisonne Enamel Name Plate. A special plate for De Luxe and Standard Model Boyce Moto-Meters which is easily inserted in place of the name plate regularly furnished in either of these models. This new plate is attractive in design, and is finished in a neutral tone of gray-blue cloisonne enamel which harmonizes beautifully with all car finishes. A crystal window inlaid in each plate adds considerably to its appearance.

Cloisonne Enamel Name Plate.....each $2 00

BOYCE UNIVERSAL AND JUNIOR MODELS

Universal Junior



Universal Model. Slightly smaller than the Standard Model, finished in all nickel. Beveled crystals add to its appearance. Size, 3x5 inches. Weight (packed in carton), 14 ounces.

Universal Model Moto-Meter.....each $7 50

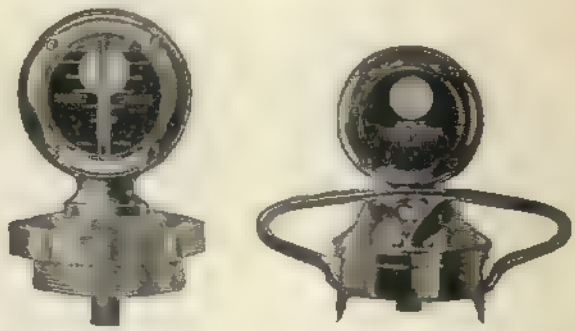
Notice: Orders may be accepted from car distributors, dealers and agents for **Universal Model Boyce Moto-Meters** with car design name plates in any quantity. Discounts will depend upon the quantity purchased

Junior Model. The frame of this instrument is heavily nickel plated, and it has the same range of temperature as the Standard and Universal Models. Size, 3x4⅞ inches. Weight (packed in carton), 8 ounces.

Junior Model Moto Meter.....each $5 00

BOYCE MIDGET AND FORD MODELS

Midget Ford



Midget Model. Designed especially for use on small cars. It has a polished nickel frame and is finished with beveled crystals both front and rear. This instrument, except for its size, is identical with more expensive Boyce Moto-Meters for the larger types of cars.

Midget Model Moto-Meter.....each $3 50

Special Model for Ford. This model consists of a Midget Model Boyce Moto-Meter mounted on a handsomely designed locking radiator cap. Complete unit is nickel plated, and offers an article of great utility as well as beauty for the Ford car.

Special Model Moto-Meter for Ford Cars.....each $4 00

Notice: Special car name dials for use in the **Ford Model and the Midget Model Boyce Moto-Meters** will be made only for the following cars: Chevrolet, Ford, Gray, Overland and Star, and will incorporate only the trade-mark or name of car

BOYCE TRUCK AND TRACTOR MODEL

Truck and Tractor

Truck and Tractor Model. Designed especially for severe conditions, such as for use on trucks and tractors; diameter of thermometer tube is one-half inch, making breakage practically impossible; casing is nickel plated, and the tube has a broad red column of indicating liquid, easily seen regardless of dust conditions. Size, 2⅞x4¾ inches. Weight (packed in carton), 16 ounces.

Truck and Tractor Model Moto-Meter.....each $10 00

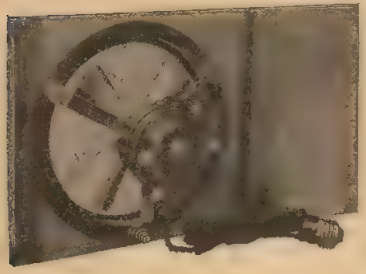
Assortment of fans in full carton lots permitted to obtain quantity price.

One in a corrugated carton.

VENTILATING OR EXHAUST

POLAR CUB



No. B-94

Complete with 6-inch fan. Ideal for kitchens, bathrooms, laundries and any other room in the home where odors, steam or smoke collect.

It is only necessary to insert it in the top of the window, extending it to the required length, attaching the cord to the electric light socket, and the ventilator is ready for work.

Equipped with a standard Polar Cub Universal Motor, 110 volts, A. C. or D. C., high grade varnished and shellaced extension boards.

Wood cleated on each end of boards to prevent warping.

Length of cord, 8 feet; plug, 2-piece separable.

All parts dipped and baked in black japan; motor finished in rubber enamel black; natural wood varnished and shellaced boards.

Extends 18¼ to 31½ inches. Width, 8¼ inches.

No.	Wt. each	Each
B-94	5 lbs.	$1.98

Six in a carton.

VENTILATING OR EXHAUST

ROBBINS & MYERS

Remove all the fumes and odors which might be distasteful or injurious to the health, and draw in a constant supply of fresh air.

For mounting in walls or partitions and exhausting into open space (free air). Bearings provided with hardened steel end thrust washers, thus making fans suitable for vertical operation, upward or downward discharge.

Drawn steel motor frames. Motor and fan blades mounted in a rigid support complete and ready to fasten to the wall or ceiling. Fully enclosed; dust and moisture-proof.

When working against free air the 12-inch fan will displace approximately 1000 cubic feet of air per minute; the 16 inch fan will displace 1550 cubic feet. When working against back pressure or other obstruction to free air, the displacement will, of course, be reduced.

12-inch size—diameter of fan blades, 12 inches; diameter of ring, inside, 13¾ inches; outside, 16 inches. 16-inch size—diameter of fan blades, 16 inches; diameter of ring, inside, 17¾ inches; outside, 20 inches.

Motor and supporting ring finished in baked black enamel. Fan blades of brass, polished and lacquered.

A. C., 60 Cycles, 110 Volts

No.	Dia. of blades	Watts	R. P. M. free air	Ship. wt., each	Each
4054	12 in.	54	1500	19 lbs.	$31.55

4001	12 in.	55	1550	16 lbs.	$31.25
4026	16 in.	75	1500	20 lbs.	34.75

Note—Fans for operation on 220 volts can be furnished from San Francisco stock.

CEILING

ROBBINS & MYERS

A. C., 60 Cycles, 110 Volts, 145 Watts

Four 56-inch reversible hardwood blades, polished mahogany finish. Three speeds. Black enameled induction type self-starting motor, canopy, hanger rod and blade shanks. Supplied with ceiling canopy, hook, insulated hanger and adjustable hanger rod. Motor housing and hanger drilled and tapped for standard ¾-inch iron pipe or conduit for use as hanger rod.

Motor not wired for lights nor furnished with electrolier attachment, but switch casing below blade carrier has four neatly plugged holes suitable for standard ⅜-inch brass fixture pipe connection, and customer can easily wire motor and attach electrolier fittings for lights if desired.

No.	Speed, R. P. M. High	Med.	Low	Ship. wt., each	Each
3219	225	175	145	70 lbs.	$56.50

D. C., 110 Volts, 145 Watts

Four 56-inch reversible hardwood blades, polished mahogany finish. Three speeds. Black enameled self-starting motor, canopy, hanger rod and blade shanks with two gilt lines around motor body. A four-point, three-speed switch, fitted in casing at the upper end of motor, serves to start and stop fan as well as to regulate its running speed. Supplied with ceiling canopy, hook, insulated hanger and adjustable hanger rod. Motor housing and hanger drilled and tapped for standard ¾-inch pipe or conduit for use as hanger rod.

Since shaft revolves with armature, motor is not suited for wiring for electrolier fittings.

No	Speed, R. P. M. High	Med.	Low	Ship. wt., each	Each
B-265	225	180	135	68 lbs.	$56.50

All above, one in a box.

ROBBINS & MYERS

SPECIFICATIONS—NON-OSCILLATING AND OSCILLATING TYPES

Frames. With the exception of the No. 3504, 8-inch fan which has a cast iron frame, the base, motor frame and end heads of all oscillating and non-oscillating fans are drawn from heavy sheet steel. This construction makes the fans light in weight, easy to handle and effects a considerable saving in transportation costs.

Bearings. The bearing hubs of the drawn steel fans are of cast iron, except No. 4100, in which they are white metal. They are inserted through holes in the steel end heads and are attached to them by screws. The bearing hubs can be removed at any time by simply loosening the screws which hold them in place.

The bearing bushings are phosphor bronze and are pressed into the hubs, except in No. 4100, in which the bushings and hubs are of die cast white metal. After the hubs are attached to the end heads, both bushings are reamed out at the same time by a reamer with aligning pilots, insuring exact alignment of the bearings.

Bushings can easily be removed and replaced without special tools of any kind

An annular groove in each end of the hub collects the surplus lubricant which may run out of the bearing. A small duct leading from this groove conducts the lubricant back to the grease cup and makes it impossible for any lubricant to run out of the bearings

The bearings are lubricated by wick oilers. A spring holds the wick against the shaft, and a guide through which the wick passes insures that the wick will be in the proper position at all times. The bearings are large and substantial. This, together with the positive method of lubrication, insures long life. All types have an oil cup for the bearing at each end of the motor. The cups are filled with a selected grade of hard oil when the fan leaves the factory. This is sufficient for service one season.

The No. 3504 8-inch fan bearing is essentially the same as the others, except that the hubs are integral with the cast iron end heads. They are lubricated by wick oilers and the bushings are phosphor bronze

Oscillating Mechanism. The oscillating mechanism permits the fan to be changed from fixed to oscillating operation of any desired sweep, simply by turning a knob on the edge of the propeller plate.

The gear mechanism is mounted in a horizontally split, grease-tight gear box, the upper half of which is integral, with the bearing hub of the motor. This box is packed with hard oil before leaving the factory and need not be repacked until the beginning of the second season of service. The screw type stuffing box, through which the shaft carrying the propeller plate passes, is packed with a felt washer which prevents any of the lubricant leaking out.

Swivel and Trunnion. The vertical and horizontal adjustments of the non-oscillating fans are obtained very easily By loosening the lower wing screw the fan can be tilted forward or back, and by means of the upper wing screw any desired horizontal adjustment can be obtained.

The Nos. 3000, 3504 and 4100 fans have one wing screw only for adjustment forward and back and do not have the horizontal adjustment.

Switch. Is so constructed that pressure on the lever does not affect the contact. It moves over a deeply notched metal strip, which insures positive "off" and "speed" positions.

Blades. The blade design of the 1925 fans is such that excellent air delivery is obtained. With the exception of Nos. 3504 and 4100, which have steel blades, the blades of all oscillating and non-oscillating fans are made of heavy sheet brass, firmly riveted to a punched steel carrier, which insures uniform pitch for all blades. The shape of the blades and the pitch are carefully determined to give the maximum breeze with lowest wattage and least noise. The blades are carefully balanced.

Guard. A heavy steel guard is used, which is supported by four punched steel arms. The strength and rigidity of the guards are such that they provide the best means for carrying the fans.

Base. The base flares out to a wide diameter, which makes it practically impossible to overturn the fans accidentally. The drawn steel disc which covers the base and supports the speed regulating device, is covered with a felt pad on all fans, except No. 3504, which has rubber feet. This permits the fans to be placed on highly polished surfaces without danger of marring the finish.

Finish. The motor frames and bases of all Non-oscillating and Oscillating Fans are finished in two coats of gloss-black enamel, baked on and relieved with gilt lines, except in Nos. 3504 and 4100. The guards are of steel, finished in baked black enamel. The blades of all fans, except Nos 3504 and 4100, are of brass, polished and lacquered. The steel blades of Nos. 3504 and 4100 are oxidized finish.

Air Distribution. Fans are sometimes incorrectly judged by the velocity of the breeze they produce. The blade construction of a fan may be such as to impart a high velocity to the air while the cone of air leaves the blades at a very narrow angle. The area it affects and the volume of air moved is consequently low. To stand directly in front of such a fan, however, one would get the impression that it is more powerful than another fan which gives relatively low velocity but throws the air out from the blades at a wider angle and moves a greater volume.

A high velocity breeze may really be objectionable and unpleasant if one remains in it any length of time. Then, too, high velocity is usually accompanied by a disagreeable air hum.

The greatest comfort from a fan is obtained with a gentle breeze of large volume and wide distribution such as is obtained with Robbins & Myers Fans.

Wattage Consumption. All parts of Robbins & Myers Fans are designed scientifically, both electrically and mechanically. This, together with the accurate machining and careful workmanship which goes into every detail, insures smooth operation and low wattage consumption for the breeze produced.

Speeds. Fan speeds and watts may vary 10% from those given in the tables

Voltage Range. All of the direct current and universal fans will operate on voltages 10% higher or lower than the normal 110 volts, and 5% higher or 10% lower than the normal 220 volts

All of the alternating current induction fans will operate on voltages 10% higher or 5% lower than the normal 110 or 220 volts.

Cords and Plugs. All Robbins & Myers Non-Oscillating and Oscillating Fans listed are regularly furnished with eight feet of cord and screw base separable plug for connection to any lamp socket.

Appearance. The smooth drawn steel frame, the graceful, well balanced design and the flawless enamel finish of the Robbins & Myers Fan, give it an appearance which makes it stand out conspicuously and impress the prospective buyer favorably. It is a high grade, reliable fan which looks the part. Dealers find that the fine appearance of the fan is a very effective sales help.

Silver Finished Mesh Bags

The very latest and most popular styles in mesh bags, with plain and embossed frames—two ball clasp, close mesh, 14-inch fancy chain handles. Bottoms finished with fancy tassels, bangles, pendants etc., as shown in illustration. Big values at small cost.

STEELCRAFT JUVENILE TOYS

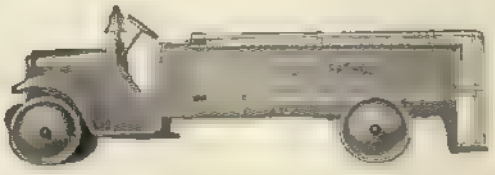
GMC TRUCK STANDARD TYPE

Standard Type Miniature GMC Trucks. Similar in appearance, and just as reliable, these trucks of a heavy automobile steel reinforced construction, electrically spotwelded throughout are unsurpassed for sturdiness and simplicity of operation. These unexcelled features of truck construction, combined with such practical items as rubber tires, disc wheels, etc., afford a truck with the appearance of the real GMC truck and of such ruggedness as to defy damage under the hardest usage. The Firestone rubber tires identical in design to those used on the large truck, offer shock absorbing qualities on rough pavements, and permit the use of the truck in the home by eliminating the possibility of the scratching or marring of polished floors.

Specifications: Length over all, 26 in.; length of body, 14½ in.; width of body, 6½ in.; depth of body, 2⅛ in.; capacity, 1/10 ton. Channel steel frame (extra deep and heavy). Wheels are double disc, heavy steel. Front and rear are solid rubber Firestone tires. Body has gray baked enamel finish; chassis, radiator, hood, cowl, seat and fenders have black baked enamel finish. Wheels have red baked enamel finish; steering gear, direct connected (extra strong sturdy wheel). Shipping weight, 12 lbs.

Steelcraft GMC Standard Miniature Truck....each $5 40

GMC POLICE PATROL



GMC Police Patrol. A toy of an exceedingly pleasing appearance and at the same time is so sturdily constructed that it will withstand the hardest of usage. The details in design and its colorful finish are of exceeding interest to the child. The patrol is of a heavy automobile steel reinforced construction, electrically spotwelded throughout. With this sturdiness of construction are featured such practical items as rubber tires, disc wheels, brass bell, large steering wheel, brass rail around body. The Firestone rubber tires permit the use of the patrol in the home where it is an all-year-round toy as it will not scratch or mar the polished floors.

Specifications: Length over all, 26 in.; length of body, 15½ in.; width of body, 6½ in.; frame, channel steel (extra deep and heavy); wheels, double disc, heavy steel; Tires Firestone front and rear, solid rubber; finish, fire engine red, baked enamel; steering gear, direct connected (extra large, sturdy wheel); bell and railing, brass; shipping weight, 12 lbs. each. Packed in individual cartons six in standard crate.

Steelcraft GMC Police Patrol ....each $7 00

GMC TRUCK—DUMP TYPE

Dump Type Miniature GMC Trucks. Similar in appearance and just as reliable, these trucks of a heavy automobile steel reinforced construction, electrically spotwelded throughout are unsurpassed for sturdiness and simplicity of operation. The Firestone rubber tires identical in design to those used on the large truck, offer shock absorbing qualities on rough pavements, and permit the use of the truck in the home by eliminating the possibility of the scratching or marring of polished floors. The Dump Truck features a patented dumping mechanism of exceeding delight to the children.

Specifications: Length over all, 26 in.; length of body, 14½ in.; width of body, 6½ in.; depth of body, 2⅛ in.; capacity, 1/10 ton; frame, channel steel (extra deep and heavy). Wheels, double disc, heavy steel. Tires, Firestone, front and rear, solid rubber; finish, body, gray baked enamel; finish, chassis, radiator, hood, cowl, seat and fenders, black baked enamel; finish, wheels, red baked enamel; steering gear, direct connected (extra strong, sturdy wheel); dumping mechanism, sturdy screw type, holding each front corner of box. Shipping weight, 12 pounds each.

Steelcraft Miniature GMC Dump Truck.....each $6 30

GMC TANK TRUCK

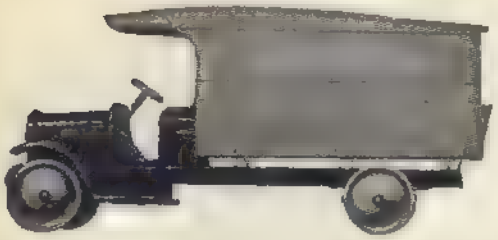
GMC Tank Truck. Every detail has been carried out to produce in miniature an exact replica of the famous GMC Tank Truck seen daily on the streets, making it of exceptional appeal to the child. The truck proper is built throughout of the highest grade heavy automobile steel, reinforced and electrically spotwelded. The tank is similar to those on the larger trucks and is constructed of heavy coated steel so that it will not leak or rust. It is equipped with filler and outlet connections which are very practical, and will not get out of order in the hands of a child. Attention is called to the particular features of Steelcraft construction, disc wheels, extra heavy channel steel frame, large heavy steering wheel, baked enamel finish and also that all wheels are rubber tired. The Firestone tires are similar to those on the large trucks and are an added factor in the popularity of this truck, because they permit the use of the truck in the home.

Specifications: Length over all, 26 in.; length of tank, 15 in.; width of tank, 6 in.; depth of tank, 4⅜ in.; capacity, 1.4 gal.; tank, non-leakable; frame, channel steel; wheels, double disc, heavy steel; tires, Firestone solid rubber; finish, tank, gray enamel; finish, chassis, black baked enamel; finish, wheels, red baked enamel; steering gear, direct connected; shipping weight, 13 lbs. each. Packed in individual cartons, six in standard crate.

Steelcraft GMC Tank Truck.....each $7 20

STEELCRAFT JUVENILE TOYS

GMC MOVING VAN



GMC Moving Van. An exact replica in miniature of the moving vans seen in daily use on the street. The truck proper is of the usual Steelcraft construction being of the highest grade heavy automobile steel reinforced and electrically spot welded. The Van part is also of stamped steel and conforms exactly to the large moving van. It is commodious and has a drop tail gate which is as on the large vans. All the construction is such as will withstand the hardest of usage. Attention is called to the fact that along with its very sturdy construction all the wheels are rubber tired. The Firestone rubber tires permit its use in the home without the marring of polished floors and makes it an all-year-round plaything.

Specifications: Length of body, 26½ in.; width of body, 14½ in.; frame, channel steel; tires, Firestone front and rear, solid rubber; shipping weight, 13 lbs. each; finish, hood, cowl, seat, and chassis, black baked enamel; finish, body, fawn baked enamel; finish, wheels, red baked enamel; steering gear, direct connected (extra strong sturdy wheel). Packed in individual cartons, six in standard crate.

Steelcraft GMC Moving Van.....each $7 20

GMC TRACTOR AND TRAILER

GMC Tractor and Trailer in Miniature. A 2 in 1 Toy Truck. A plaything that is so sturdily constructed that it will defy damage under the hardest of use or abuse. It is built throughout of heavy automobile steel and every part is electrically spotwelded. Combined with this unusually sturdy construction are such practical features as disc wheels, baked enamel finish and solid rubber Firestone tires. Added items which contribute to the popularity of this plaything with the children are the ingenious contrivance connecting the tractor and the trailer proper, and the mechanism operating the prop to support the trailer body when disconnected. Both devices are practical in every detail and will not get out of order. Equipped with Firestone rubber tired wheels.

Specifications: Length over all, 29½ in.; length of body, 14½ in.; width of body, 6½ in.; depth of body, 2⅛ in.; capacity, ⅛0 ton; frame, channel steel (extra deep and heavy); length of tractor, 17⅞ in.; length of trailer, 10½ in.; shipping weight, 14 lbs. each, wheels, double disc, heavy steel; tires, Firestone, solid rubber; finish, chassis, black baked enamel; finish, body, gray enamel; finish, wheels, red baked enamel; steering gear, direct connected (extra large, sturdy wheel); trailer prop, with raising and lowering mechanism; trailer coupling, spring universal action.

Steelcraft GMC Trailer and Tractor.....complete $7 80

THE STEELCRAFT line of wheel goods opens an entirely new field for greatly increasing your business.

They constitute a distinct innovation that will be welcomed by every buyer.

A full appreciation of what Steelcraft engineers have achieved is impossible without an inspection of the product. They must be seen to be appreciated. When the prices of the various models are balanced against the models themselves, you will readily appreciate and see in these the most attractive offering of the year.

They have been engineered and designed with principles of automotive practice, and mass production has been applied in the building of same. This is all reflected in their durability and price.

Steelcraft toys are built entirely of steel. Bodies are fabricated from automobile sheet steel stock, riveted or spotwelded together which is the last word in construction

Fenders are stamped out of heavy gauge real fender steel and covered with a baked on, lasting coat of enamel. All body finishes are in colored enamel, baked on, no paint or varnish being used.

They ride and drive with ease and comfort of a standard automobile.

This is due to the fact that they have real automobile spring suspension. These springs are made of high carbon, tempered spring steel and are so strong and resilient that a grown man can jounce up and down on the running boards.

Pedals are adjustable for children from 3 years to 10 years of age.

Space does not permit us to detail all of the outstanding features, such as roller bearings, over-size rubber tires, padded seat cushions, real nickel plating, real windshields, real running boards, and many other accessories.

Steelcraft prices are closely competitive regardless of the obvious quality of the product.

STEELCRAFT JUVENILE TOYS

SCOOTER—WITH BRAKE

No. Y-1 Steelcraft Scooter. Large size with brake. Dimensions, height from ground 34 inches; length over all 42 inches. Exceptionally heavy steel frame designed to have steel platform slightly lower at rear end. Front fork is heavily raked toward rear to eliminate trickiness and with a slanting platform produces an exceptional speedy "feel". Handle is of hardwood, good grip, and has rubber mat on foot section to prevent slipping.

Equipment. Wheels, 12 inches with 1 inch rubber tires wired on, with self contained roller bearings; brake, simple and powerful brake on rear wheel operated by rider's heel; finish, all metal parts are attractively enameled, and are baked at a temperature to secure a permanent finish; platform, heavy steel with black rubber mat secured with nickel plated rivets; stand, stud to hold scooter upright when not in use; packing, packed in dustproof cartons, six in standard crate. Shipping weight 19 lbs. each.

MARION STEAM SHOVEL

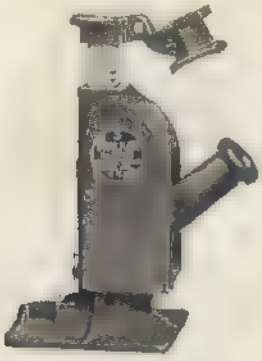
Marion Steam Shovel is not just a fragile toy, but is a real mechanical device, [illegible] stand up under the hardest of usage, and to perform [illegible] as the larger one. Extreme care has been paid to the [illegible] functioning as well as in construction. The shovel proper raises and lowers readily—it can be made to automatically release sand at any height desired. The entire body swivels easily on the base, enabling the bucket to be emptied in any position. The large casters roll readily and the shovel [illegible] as desired. [illegible] of heavy stamped steel.

Specifications [illegible] all height, 14 inches; width, 7 inches, height, [illegible] inches; [illegible] of shovel; finish, boom, shovel and base, black baked enamel; shipping weight, [illegible] lbs. Packed in standard cartons, six in standard crate.

Steelcraft Marion Steam Shovel.....each $5 25

WALKER JACKS

WALKER RATCHET TRUCK JACK



No. 5 Walker Badger Jack. Designed for 3-ton motor trucks. Drop forged pawls and a case hardened steel rack provide ample strength. Bearings are heavy, average grease. All working parts machined in jigs. Extra large base. 17-inch handle. Height, 10 inches; raise, 6 inches, capacity, 3 tons; extension cap, 1½ inches weight, 13½ pounds. Double cap gives two lifting heights.

No. 5 Walker Ratchet Truck Jack..... each $8 25

WALKER RATCHET TRUCK JACKS

No. 55 Ratchet

No. 475

No. 55 Walker Badger Jack. For heavy duty. One-piece rack bar and foot lift and also lifting pawls are drop forged and casehardened. Large 5x8-inch base. 30-inch hickory handle. Height, 14 ½ inches raise, 6¼ inches; height of foot, 8¼ inches; capacity, 5 tons. Weight, 32 pounds.

No. 55 Walker Ratchet Truck Jack..... .....each $17 50

No. 475 Walker Badger Jack. Built for the heaviest trucks. Best of materials are used—high carbon steel gears, pinions, pawls and racks, and nickel steel parts, which parts are specially treated. Gears and pinions are machined from forged blanks. Small parts are machined on special jigs. Compounded gears enable one man to lift the capacity of the jack with the 18-inch handle. Height, 13 inches; raise, 6¾ inches; capacity, 7½ tons; weight, 33 pounds.

No. 475 Walker Ratchet Truck Jack.....each $23 50

NEW WALKER JACKS

No. 605

No. 216

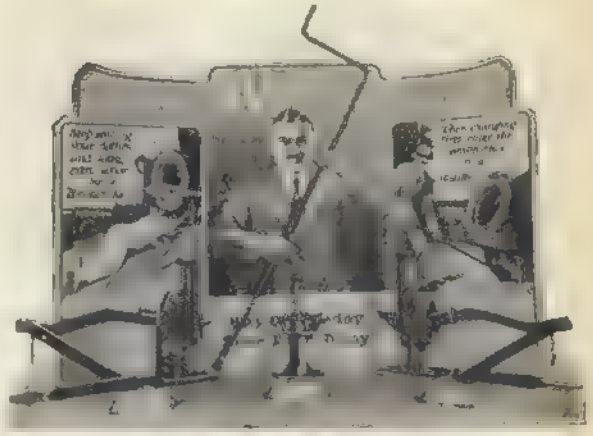
No. 605 Walker Jack. A new type steel jack, designed especially for the new Ford cars. One of the features of this jack is its peculiar type of flip cap. Ford cars come through equipped with cord tires, but if the purchaser desires balloon equipment he simply tilts the flap to the rear, making the jack low enough to handle the Ford equipped with balloon tires. The jack is baked enamel inside and out to prevent rusting. Height, 8½ inches; flip cap, 2 inches; raise, 5⅛ inches; capacity, ⅝ ton; weight, 5 pounds.

No. 605 Walker Jack for Ford.. ...each $1 60

No. 216B Walker Improved Screw Jack. Meets the needs of 1-ton truck drivers and owners of speed wagons. Ball bearing race way is an added feature to this jack, making it easy to operate. Placed under the axle, a few easy strokes and up goes the car and its load. Height, 10 inches; raise, 6 inches; capacity, 2½ tons; weight, 8 lbs.; diameter of screw, 1 inch.

No. 216B Walker Improved Screw Jack . . each $4 25

NEW WALKER WINDOW DISPLAY

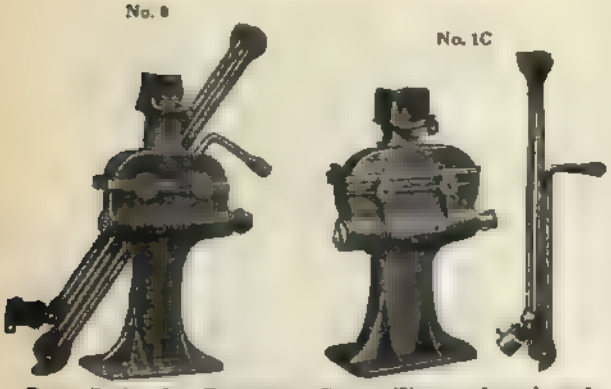


Walker Window Display. Free to dealers buying ten balloon tier jacks. The assortment consists of 3 No. 605, 3 No. 620 and 4 No. [illegible] list price $41[illegible] complete with the ten jacks. The window card has [illegible] panels, and the entire piece is lithographed in eight colors. One of the beauties of this assortment is that the jacks that go with the assortment will not only handle any balloon tire, but will also take care of any type of tire. It is a real advertising feature for the dealer.

Walker Window Display....Free With Above Assortment

REES JACKS

REES PASSENGER CAR JACKS



Rees Jacks for Passenger Cars. The preferred jacks with the Rees Double Worm Gear Drive, four working parts. MICA CHIMNEY

No. 323

No. L-327

Burns common gasoline, 300 candle power. Match lighting burner, no torch required. Diameter of fount, 6 inches. Finish, nickel plate.

Lights through a door in the reflector. Holds 2 pints, burns 12 to 15 hours on one filling and is guaranteed to burn in any wind.

No.	Height	Shipping wt. each	Each
L-327	14 in.	6 lbs.	$10.50

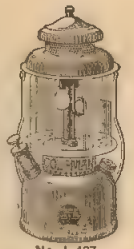
One in a carton.

MICA CHIMNEYS—WITH REFLECTOR

No	Wt. each	Each
M-327	2 ozs	$1.20

Twelve in a carton.

No. L-427



No. L-427

Same general appearance as No. L-327 with the addition of the following feature.

Built-in Pump—Screws into the lantern fount. Never is loose to get lost or damaged. Operates on the principle of delivering air above the gasoline line in the fount. This keeps gasoline out of pump barrel thus preventing damage to plunger leather and eliminating the annoyance of having gasoline thrown out of the top of the pump on the upward stroke.

No.	Height	Shipping wt. each	Each
L-427	14 in	6 lbs	$12.00

White Enamel

Sanitary White Enamel or Rich Golden Oak

THE busier you are in your kitchen the more you will appreciate a Master-Made Cabinet. Once it becomes your daily servant you will wonder how you ever got along without it. Built of seasoned Golden Oak, with interior of upper section white enameled, with slide-out top surfaced in either nickel or white porcelain enamel. Or in handsome white enameled throughout, with white porcelain enameled top. An attractive feature is the great amount of drawer and cupboard space this cabinet gives you—far more than usual. Five roomy drawers in the base with a large drawer for linens, just above the big utensil cupboard.

You Can Do More Work in Less Time

Utensil cupboard has sliding metal tray, sliding wire shelf, bulk measuring and metal bun rack on door. Metal cake box in bottom drawer at right. A coarse sieve, wire egg beater and flour sifter slide in the front with a sugar scoop. Big bread box has a cutting board cover. Above this is a pan cupboard, a wire shelf for pie tins, rolling pin under it, and a spice rack. Above this is a cupboard with a shelf for cups and saucers, and a glass top and coffee bin. The top 42-pound capacity flour bin is white enameled, has a porcelain and glass sifting device, and a measuring cup. Above this is a cupboard for baking dishes, kitchen utensils and table linen. Cutting board for top and cake at 34 in. by 16 inches and slides out under table top. Metal coupon block and pencil on right of cabinet. Table top is 36 by 20 inches and pulls out to a working width of 36 inches. Height of cabinet, 68 inches. Width, 41 inches. Shipping weight, about 175 pounds. Cabinet can be had in white enamel throughout, with white porcelain enameled top, at same price. Shipped from factory near South Bend, Ind.

See illustrations on Page 535.

WARD'S Master Made

$39.75 Cash Price

THERE is no need to wait until you have saved the full price of this compact, labor saving Kitchen Cabinet. Simply send us $5 and your order and save yourself many time consuming trips in the kitchen. You can pay the balance in easy monthly payments of $5 each. One of the chief advantages of this Master-Made Cabinet is the large amount of space it provides for keeping groceries, pots, dishes, and cutlery within easy reach, and close together. Everything remains clean, and safe from mice and ants. Think of the years of service you will receive from this convenient cabinet. We sell thousands of Kitchen Cabinets each year. Our customers are always pleased with the high quality and low prices of our cabinets as compared with prices they have to pay elsewhere.

Why Be Without a Good Cabinet?

Time lost means energy wasted. Wasted motions tire you out as much as actual work. That's why this Master-Made Cabinet is such a real kitchen economy. A full sliding top of clean, white porcelain enamel pulls out to work on—40 inches wide by 20 inches deep. Rainproof, windproof, won't chip or crack, extremely sanitary. Cleans with a wet cloth. Front has a pull down shutter that keeps out dust and is easy to operate when it does. Working equipment of cabinet is very complete. Swinging glass sugar and tea metal cup and shut off, 2 glass spice jars and two for tea and coffee. Big white enameled, 40-pound flour bin, with sifter, sweeps down for filling, and has window front. Special bracket and block for meat grinder. Bottom has tinned bread box, cake box, cutting board and kitchen cutlery drawer. Attractive set glass door, with white enameled interior. Removable wire shelf. Sliding metal tray in bottom, wire rack on door. Furnished cutlery drawer. Any proof castors.

Comfortably Equipped for Easy Housework

Height, 72 inches; width, 40 inches. Stands on floor and against wall. Made of hard wood, white finish with interior of upper section white enameled for all sanitary purposes.

Use Easy Payment Order Blank No. 1 on Page 697. Tinted and finished in Golden Oak. Weight about 150 pounds. Send for freight charges, see information at bottom of this page.

266 C 4146 Golden Oak White Porcelain Top. $44.75

266 C 4149 Golden Oak White Porcelain Top Cash Price 39.75

Shipped from Factory near South Bend, Ind.

Furnished in White Enamel

At only a slight additional cost you can secure this same Cabinet, finished throughout in spotless White Enamel. Many prefer it for the increased light it gives. Has white porcelain top. Use Order Blank No. 1 on Page 697. White Enamel Cabinet will withstand whatever any glass floors, and will not crack, chip or peel. Outside white enamel is same enamel, size and weight as Golden Oak Cabinet.

ICE CREAM FREEZERS

WHITE MOUNTAIN

Triple Motion, With Crank

The new design triple motion White Mountain freezer shown at left embodies the very latest and most scientific construction in ice cream freezers. The tubs are built on new lines of correct height and diameter resulting in minimum ice consumption. The cans which are made of Keystone copper steel charcoal tin plate are of corresponding height insuring quick freezing. Can covers are of cast iron with accurate gear teeth. The special patented new form of beater retains the famous triple motion, an original and exclusive feature of White Mountain freezers. The entirely new top frame construction eliminating all complicated gear mechanism makes a remarkably smooth and easy operating freezer.

The pulleys should turn about 75 revolutions per minute to give the correct speed to the freezer.

ARCTIC

Single Motion

The New Design Arctic freezer is a single motion machine. The can turns while the beater remains stationary. It is a perfect specimen of this type of freezer. The tub is carefully made of selected stock, is watertight and securely bound with wire hoops. The can is made of Keystone copper steel charcoal tin plate, having a tin plated, cast iron cover. The beater is of cast iron, tin plated and fitted with double self-adjusting wood scraping bars. All outside castings galvanized.

No. 12C—Light, medium and heavy weight $13 80

One in paper bag.

LANTERNS

DIETZ HOT BLAST

For Kerosene

Hot Blast tubular lanterns are so constructed that fresh air enters the globe at the base through the perforated globe-plate. This fresh air becomes heated and is partly burned. It rises through the globe, mixed with spent gases of combustion and a portion is gathered into the canopy or inverted funnel over the globe and then is drawn down through the side tubes by suction, to be again discharged into the flame.

Special Features—Dietz security standing bail; patent brass eyelets; patent safety burner; patent positive-locking globe lift; large oil filler with non-loseable cap, double seamed solderless oil fount.

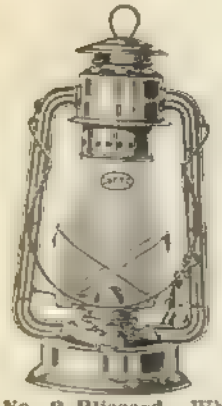
Monarch, Hot Blast

Bright tin finish only; beaded round tubes.

Height over all 13½ inches; volume of light by test, 4 C. P.; oil used 150° kerosene; size of wick ⅝ inch; fount capacity 20 hours; name of globe, Dietz "Fitzall"; patented steel burner No. 411.

Monarch—White globe . . . Per Dozen **$16 50**
Monarch—Ruby globe . . . Per Dozen **20 50**

One dozen in a case; weight per case 38 pounds.



Blizzard, Cold Blast.

Bright tin finish only; high globe; reinforced tubes; specially braced lift-guide. The Loc-Nob prevents globe from slipping out of retaining guard when tipped back

Height over all 14¾ inches; volume of light by test 10 C. P.; 1 inch wick; oil used 150° kerosene; fount capacity 26 hours. Dietz "Blizzard" Loc-Nob globe. No 262 patented steel burner.

No. 2 Blizzard—White globe . . Per Dozen **$27 00**
No. 2 Blizzard—Ruby globe . . . Per Dozen **31.00**

Half dozen in case; weight per case 26 pounds

Little Wizard, Cold Blast

Bright tin finish; specially braced lift-guide; wide Loc-Nob globe; into which a good sized hand may be thrust for cleaning. An ideal lantern for Boy Scouts and campers. It is also used, with a green globe, as a police traffic lantern.

Height over all 11½ inches; volume of light by test, 6 C. P.; ⅝ inch wick; oil used 150° kerosene; fount capacity 20 hours; Dietz "Little Wizard" Loc-Nob globe; No. 201 patented steel burner

Little Wizard—White globe . . . . . Per Dozen **$17.50**

One dozen in a case; weight per case 26 pounds.

DIETZ COLD BLAST

For Kerosene

Fresh air only is fed to the flame at the wick; all spent or burned air is expelled absolutely from the lantern, and is not re-circulated again as it is in "Hot Blast" lantern. By permitting only fresh air, fully charged with oxygen, to reach the flame in a Dietz "Cold Blast" lantern, a more brilliant, whiter light is obtained. The candle power of this light is double that obtained from any "Hot Blast" lantern.

Special Features—Dietz security standing bail; patent brass eyelets, patent safety burner; patent positive-locking globe lift; large oil filler with wired filler cap and double-seamed solderless oil fount; specially braced lift-guides where needed

D-Lite, Cold Blast

Bright tin finish only; equals the largest Dietz cold blast lantern in lighting power; specially braced lift-guide; Loc-Nob globe with wide openings, into which the hand may be inserted with ease for cleaning; reinforced tubes.

Height over all 13¼ inches; volume of light by test 10 C. P.; 1 inch wick; oil used 150° kerosene; fount capacity 20 hours; Dietz "D-Lite" Loc-Nob globe; No. 262 patented steel burner.

No. 2 D-Lite—White globe . . . . . Per Dozen **$27.00**

Half dozen in a case; weight per case 26 pounds

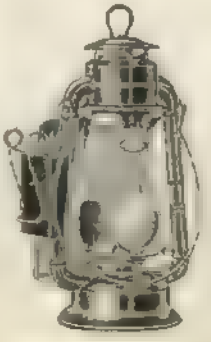
Large Fount D-Lite, Cold Blast

Bright tin finish; utmost lighting power; reinforced tubes; braced lift-guide; easily cleaned short Loc-Nob globe; enlarged oil capacity, saving annoyance of frequent refilling.

Height over all 13¾ inches; volume of light by test 10 C. P.; 1 inch wick, oil used 150° kerosene; fount capacity 35 hours; "D-Lite" Loc-Nob globe; No. 262 patented steel burner

No. 2 Large Fount D-Lite—White globe . . . . . Per Dozen **$29.50**

Half dozen in a case, weight per case 28 pounds.



Junior Wagon, Cold Blast

Tin, black enameled; made right and left hand; law-abiding ruby rear lens, fits round or flat holders. Complete with style E flat holder.

Height over all 12 inches; reflected light by test 10 C. P.; ⅝ inch wick; oil used 150° kerosene fount capacity 15 hours; Dietz "Junior" globe; 201 patented steel burner; 2¼ inch ruby rear lens.

Junior Wagon—White globe; 2¼ inches; bull's eye lens, complete with flat holder . . . . . Per Dozen **$35.50**

Half dozen in a case; weight per case 29 pounds.

Note—When ordering Junior wagon lanterns always specify if for right or left hand.

LANTERNS

DIETZ DRIVING AND PARKING LANTERNS

Eureka

For kerosene. Complete with style "A" holder. Made in the right or left hand.

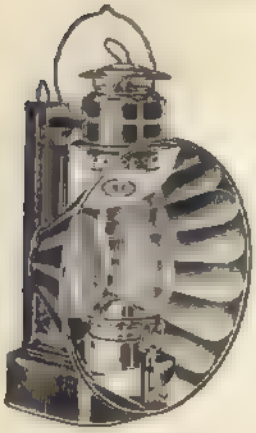
Note — When ordering these lanterns, always specify for right or left hand. A dependable small driving lantern, ideal for any light vehicle. Made of cold rolled steel, black enameled; nickeled door rim; positive locking oil fount; lawful ruby rear lens.

Height over all 7¼ inches; ⅝ inch wick; oil used 150° kerosene; fount capacity 10 hours; No. 561 patented steel burner.

Eureka—Plain lens; size of door lens 3⅛ inches; 2¼ inch ruby lens.....Per Dozen **$35.00**

One dozen in a case; weight per case 26 pounds.

DIETZ WALL LANTERNS



Beacon, Cold Blast

For kerosene. Tin, green enamel finish. The ideal lantern for outdoor use. A brilliant high candle power light, aided by white enameled reflector makes it the most useful outside lantern made.

Note—Not practical for use as hand or vehicle lantern.

Height over all 15¼ inches; reflected light by test 50 candle power; size of wick 1 inch; oil used 150° kerosene; fount capacity 35 hours; Dietz "Blizzard" globe; No. 262 patented steel burner.

No. 30—Without reflector.....Per Dozen **$64.50**

Quarter dozen in a case; weight per case 25 pounds.

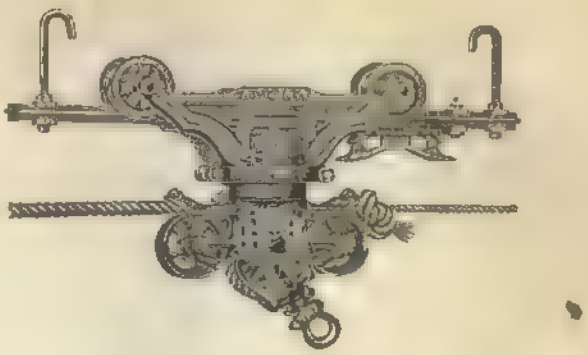
HAY CARRIERS

MYERS CLOVER LEAF UNLOADER



For Double Steel Track

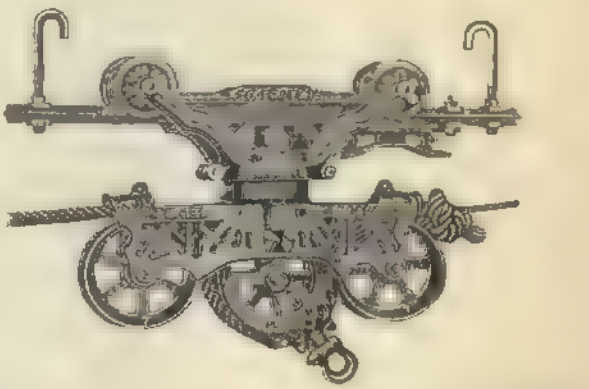
Swivel and reversible; rope draft; made of malleable iron throughout; 16 inch truck; heavy and substantially made, fitted with wide open mouth to receive fork pulley when approaching in any direction; has swinging fork pulley, which relieves the carrier from all strain when drawing hay over a high beam or into a well filled mow; the track wheels revolve on ⅞ inch turned steel axles; rope sheaves have longer hub than any other make of carrier.

The lock is composed of three parts and has no springs; the locking device grasps the fork pulley on either side and permits it to swing free.

No. 114—Weight 28 pounds Each $10 25

Open stock.

MYERS CLOVER LEAF UNLOADER



For Double Steel Track

Swivel and reversible; for rope or cable draft; 16 inch truck; made of best annealed malleable iron, thoroughly braced, which insures strength sufficient to withstand the most severe usage; the rope sheaves are 7 inches in diameter with 1⅞ inch turned steel bearings; this style of bearing will give more service and is easier to operate than any other style of sheave; rope or cable is a special feature used only on Myers line of Unloaders and enables the farmer to use either style he may desire.

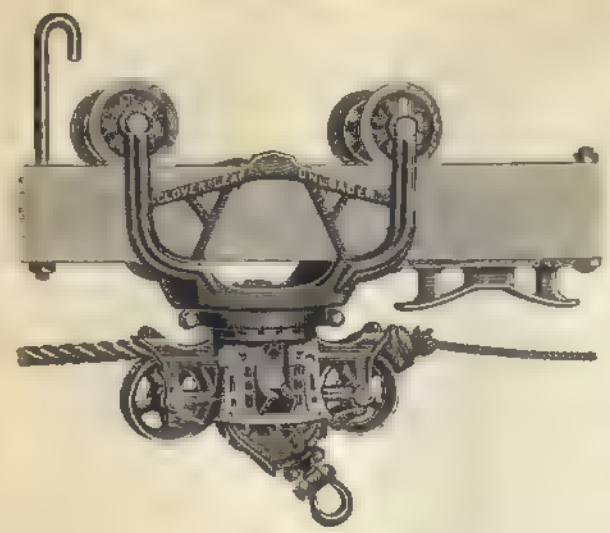
This Unloader is made with a large open mouth, swinging fork pulley and double force lock which engages the frame of the fork pulley on both sides, allowing the load to swing clear, avoiding strain.

No. 124—Weight 40 pounds..... Each $12.50

Open stock.

HAY CARRIERS

MYERS CLOVER LEAF UNLOADER



For Wood Track

Swivel and reversible; for rope draft; with ⅞ inch axles and oil openings; fitted with wide open mouth to receive fork pulley; rope sheaves and track wheels fitted with large turned bearings; can be reversed by reversing the swivel or by drawing the rope through from end to end; fills all requirements and enables the dealers to supply customers with this style of machine.

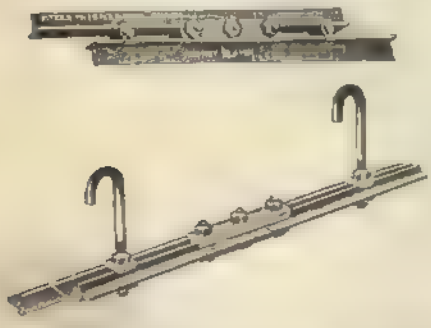
Has swinging fork pulley, a great advantage in drawing hay into the mow when filled near roof.

No. 120—Weight 12 pounds.....Each $10.25

Open stock

HAY CARRIER TRACK

MYERS PATENT, DOUBLE STEEL



With Joint Clamps and Bolts, without Hanging Hooks

Made by placing two T steel rails together; held in place by clamps and hanging hooks, with space between so hanging hook can be placed where it concides with rafter, thus making it a very convenient track to put up. Hanging hook serves as a clamp also, and adds much in holding track to place, serving for clamp and hanging hook

When track is clamped together it becomes very stiff, and is the most complete device known for a hay or merchandise carrier track; easily put up; no riveting; a wrench is the only tool needed; it is a complete system.

Joint clamp is composed of two pieces of malleable iron and three ½ inch bolts.

No. 824—5 and 12 foot lengths; weight per foot about 2 pounds . Per Foot $0 26

Open stock

HAY CARRIER TRACK FIXTURES

END STOPS

For Meyers Patent Double Steel Track

Two furnished with each carrier; designed to prevent trolley from running off track at either end.

No. 1042—Malleable iron .....Each $0 25

Open stock.

RAFTER BRACKETS

Steel

Used in putting up wood or steel track. V shaped; used to support hanging hook by nailing to peak of rafters or cross beam, and held to rafters by using heavy nails; saves expense of lumber and labor of fitting same to rafters, and is much better as the hanging hook is shorter, occupying less space. One for each hanging hook

No. 301—Steel; weight each about 4 oz ...Per 100 $6 00

Open stock

ROPE HITCHES

Myers Patent

Wanted by every farmer who uses a horse hay fork; no more hard knots to untie, nor wasting of rope by cutting knot open; rope released from whiffletree instantly; hitch shortened to any desired length by drawing on end of rope; twist in rope removed by means of swivel instead of going to end to effect working of carrier.

No. 376—Malleable iron; weight each about 1½ pounds. .....Each $0 40

Open stock

HAY FORK PULLEYS

MYERS SPECIAL

Malleable Frame

Frame extends around entire surface of sheave. This is a great protection to the rope. The frame is made in two separate pieces riveted together at the swivel eye; malleable iron clevis and steel bolt; specially designed for rough usage.

No. 1124—Diameter of sheave 6 inches; weight per dozen 48 pounds .....Per Dozen **$15.00**

Open stock.

MYERS COMMON

All Cast Iron

Open stock

CAST FRAME KNOT PASSING

Iron Sheave

No. 820—Heavily ribbed and extra strong frame; will pass a large splice or knot; 1 inch loose pin; 6 inch sheave; swivel eye; weight per lozen 45 pounds.....Per Dozen **$8.40**

Open stock.

MYERS O. K. PLAIN

Wood Sheave

Frame has heavy ribs and swivel eye, and follows the rim of the sheave to a point nearly opposite the axle. This not only gives great strength to the pulley but prevents the wearing of the rope in drawing over the side of the cast frame as is the case on nearly all plain pulleys.

No. 1133—Diameter of axle 1⅛ inches; sheave made of hard maple dipped in hot oil, weight per dozen 39 pounds .....Per Dozen **$7.20**

Open stock.

MYERS O. K. KNOT PASSING

Wood Sheave

With special heavy ribbed frame which follows the rim of the pulley down to a point opposite the axle. The frame is flanged out from the edge of the pulley so as to form an easy approach for the rope.

The frame is made of two separate halves riveted together.

No. 1120—With 1 inch loose pin; axle 1⅛ inch diameter; 6 inch hard maple sheave dipped in hot oil; weight per dozen 44 pounds.....Per Dozen **$8.40**

Open stock.

When in a hurry for goods send us a Mail Order. We ship promptly. Don't wait for our salesman's regular visit.

HAY CARRIER FORKS

Closed.

NELLIS

Single Harpoon

Set

No. 773—Length from guard to point 27 inches; malleable iron head, wrought steel blade, tool steel point, finely finished in red enamel; weight each about 11 pounds.....Each **$5.00**

Open stock.

MYERS DOUBLE HARPOON

Closed

Heavy Spring Steel Frame

No cross bar, easy to trip, extra large capacity. Open hearth spring steel, ¼x1¼ inch.

Having no cross bar, the forcing of it into the hay starts the barbs to open when fork is nearly loaded, thus compressing bundle and enabling fork to take a larger load.

Levers held in position by a spring, never get loose or drop open in loading.

Set.

A special feature is the manner in which trip rope is attached to levers, which permits fork to be tripped from any direction, whether it be sidewise, edgewise, or at any angle.

No. 1314—Japanned frame, width 16 inches, length over all 40 inches; weight each 21 pounds....Each **$3.00**

Open stock.

MYERS LOCK LEVER

Open

Heavy Spring Steel Frame

Sets with one lever and locks either open or closed. While not larger than regular double harpoon (except in width), has 50 per cent more capacity, owing to cross bar being placed nearer top while it gathers grain or hay from end of point and not two inches from bottom, like old style forks.

Set

Trip rope being placed at top assists greatly in withdrawing fork from mow, as tines trail and do not catch on beams.

No. 670—Japanned frame, length from end of point to cross bar 30 inches, length over all 36 inches, width 19 inches; weight each 24 pounds.....Each **$5.75**

Open stock.

HARRIS DOUBLE HARPOON

Regular

No. 268.

No. 268—Spring steel tines black japanned, length of tines from cross bar 25 inches, width 16 inches, weight each 16 pounds.....Each **$2.50**

MACHINISTS VISES

REED

Finest grade cast iron, with suitable percentage of steel. Tool steel faced jaws, securely welded on. Jaws have deep, cross-milled corrugations giving superior grip. Broached body, machined sliding bar. Nut with milled base fits into milled slot in body, quickly and easily replaced if necessary. Screw is also renewable.

Stationary Base, Stationary Jaw

This is the Reed basic design and from which all other bench models have been patterned.

BLACKSMITHS VISES

INDIAN CHIEF

Solid Box

Improved design to give strength, power of grip, and uniformity of design. Jaws solid steel drop forging, faced with ½ inch crucible tool steel. Screw is a solid one-piece steel forging. Thread of 29 degree angle; a great improvement on the old square thread, as it is stronger at the root and moves with less friction. Concave and convex surfaces on box, screw and washers, make a perfect ball bearing at whatever point vise is opened; impossible to break, bend or strip thread

Nos.	Jaws, inches	Vise Open, inches	Depth from Top of Jaw to Top of Box, in.	Weight Each, Lbs.	Each

HINGED PIPE VISES

REED SELF-LOCKING

Clamp Kit

For the workers kit—to take to the job. Heavy and strong enough for average work, yet sufficiently light to be carried in the kit with other tools. May be quickly clamped to any convenient position, partition or plank. On cement work a plank wedged between floor and ceiling will serve. Does away with time wasted in laying out and boring holes. Unnecessary to carry brace, bit and tools for mounting. Hardened and tempered tool steel pipe jaws.

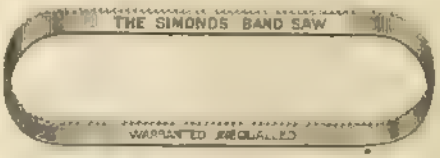
NARROW BAND SAWS

SIMONDS



In 250 foot Coils

Note—Narrow band saws are furnished set and filed but not brazed. When ordering, always give length, width, gauge and number of teeth per inch. There is always one more point per inch than there are teeth.

Heavy figures show saws, which the majority of the trade specify in the various sizes, on which prompt shipment is made.

Width, Inches	Per Foot	Gauge	Teeth Per Inch	Gauge	Teeth Per Inch	Gauge	Teeth Per Inch
¼	$0.13	21	5	21	4		
⅜	.14	21	4	21	5		
½	.15	21	4	21	3		
⅝	.16	21	3	21	4

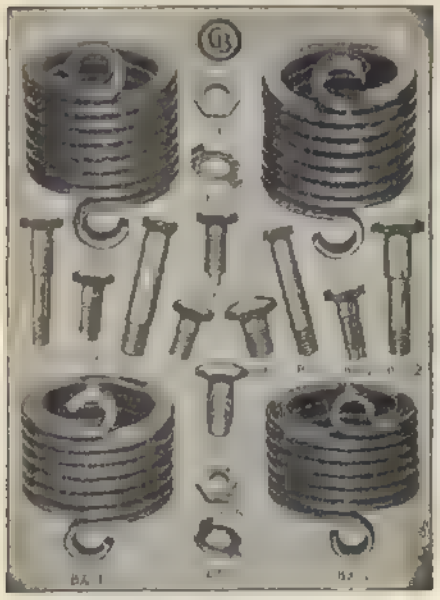
BENDIX REPLACEMENT PARTS AND SPARK PLUGS

BENDIX REPLACEMENT PARTS



TO FIT BENDIX DRIVE

No. Part

BX1—Spring Bolt, to fit large hollow type drive.

BX2—Spring Bolt Nut, to fit BX1.

BX3—Lock Washer, to fit BX1 and BX4.

BX4—Spring Screw, to fit large hollow type drive.

BX5—Driving Spring (Right Hand), to fit large hollow type drive. Eight-coil spring.

BX6—Driving Spring (Left Hand), to fit large hollow type drive. Eight-coil spring.

BX7—Spring Bolt, to fit small hollow type drive.

BX8—Spring Bolt Nut, to fit BX7.

BX9—Lock Washer, to fit BX7 and BX10.

BX10—Spring Screw, to fit small hollow type drive.

BX11—Driving Spring (Right Hand), to fit small hollow type drive. Seven-coil spring.

BX12—Driving Spring (Left Hand), to fit small hollow type drive. Seven-coil spring.

BX14—Driving Spring, extra heavy. (Right Hand.) To fit large hollow type drive. Eight-coil spring. (See cut BX5.)

BX15—Driving Spring, extra heavy. (Left Hand.) To fit large hollow type drive. Eight-coil spring. (See cut BX6.)

BX16—Driving Spring, extra heavy. (Right Hand.) To fit small hollow type drive. Seven-coil spring. (See cut BX11.)

BX17—Driving Spring, extra heavy. (Left Hand.) To fit small hollow type drive. Seven-coil spring. (See cut BX12.)

BX18—Spring Bolt, $1\frac{5}{16}$ inch long, ¼-inch tip diameter. To fit small hollow type drive.

BX19—Spring Bolt, 1 inch long, ¼-inch tip diameter. To fit small hollow type drives, using extra heavy springs.

BX20—Spring Bolt, 1 inch long, $\frac{5}{16}$-inch tip diameter. To fit Ford Bendix drive.

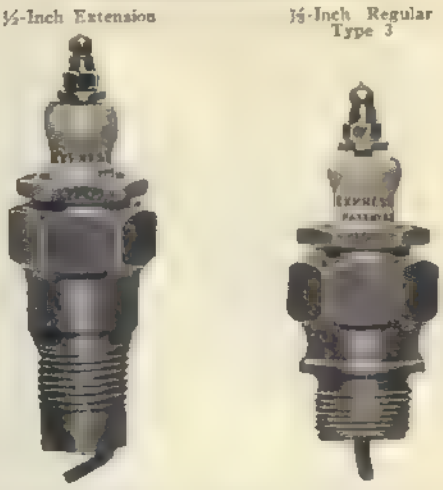
BX21—Spring Bolt, $1\frac{5}{16}$ inch long, $\frac{5}{16}$-inch tip diameter. To fit special large hollow type drive.

BX22—Spring Bolt, special, with shoulder. To fit large hollow type drive.

BX23—Spring Bolt, special, with shoulder. To fit small hollow type drive.

BX30—Ford Driving Spring (Left Hand), to fit Ford Bendix drive. (See cut BX12.)

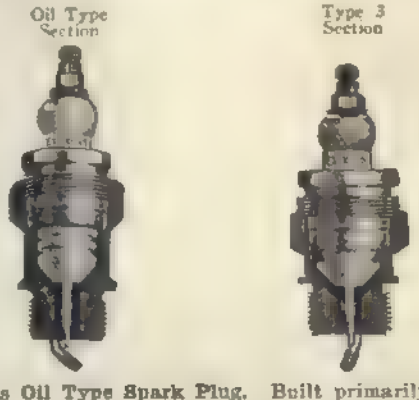
EXPRESS SPARK PLUGS



Express Spark Plugs. The only plug on the market with an oilproof gap. The patented slotted lower electrode carries oil away from the firing points faster than an oil bridge can form and absolutely prevents fouling. Every Express plug is a two-piece construction. Standard sizes are ⅛-inch regular and extension, ½-inch regular and extension and metric.

Express Type 7 Spark Plug. Designed primarily for Buick engines, this model has a very small gas chamber and the lower part of the insulator is cone-tapered to present a minimum heating surface. Made only in ⅛-inch extension size.

Express Speed Type Spark Plug. A maximum plug for racing or high-efficiency engines. Has two annular rings on the shell to carry off excess heat. Made in ⅛-inch regular style only.



Express Oil Type Spark Plug. Built primarily for engines that pump oil excessively, this model will fire regularly under the worst oil conditions. It should not be used in good-compression, high-temperature cylinders, however, as it is designed to gather heat on its finned insulator to offset the lower temperatures of oil-pumping engines.

Express Type 3 Spark Plug. The popular model for the big majority of cars and is especially recommended for Continental motors. Regular ⅛-inch and ½-inch sizes.

Express Oil Type Spark Plug for Ford. It will operate indefinitely in cylinders which will foul the ordinary spark plug with oil in five minutes. Use ½-inch regular on all Ford engines up to 1919. On later models use ½-inch extension Oil Type.

Express Spark Plugs (any type).....each **$1 00**

AC 1075 SPECIAL FOR FORDS

The AC 1075 has four special features that make it easy to sell to Ford owners. Here they are:

Spring terminal clip assures tight connection and locks nut so that it will not unscrew—also permits detaching and reconnecting cable while motor is running to test plug and coil.

Plug comes apart by unscrewing this bushing. Note heavy porcelain to withstand hard service.

The high temperature fins of the patented carbon proof porcelain attain sufficient heat to burn oil deposits thus offering effective resistance to carbon.

Heavy electrode, designed to form natural drain so no oil will lodge in spark gap.

Ford owners are easily sold AC 1075's when shown their special features—and you make a larger profit on them than on plugs ordinarily sold for Ford engines.

PRICE AC 1075.....75c Each **EXTRA PORCELAIN AND GASKET....35c Each**

AC QUICK SELLER ATTRACTS BUSINESS, PROTECTS STOCK AND MAKES SALES

The AC Quick Seller occupies but little counter space. It enables the dealer to place a handy and sufficient stock on the counter at the point of purchase.

There are Four Types:

Regular—Holds 140 AC Plugs
Junior—Holds 50 AC Plugs
AC 1075—Holds 50 AC 1075 Plugs
Chevrolet—Holds 50 AC Plugs

Any type may be had by bringing stock of AC's to quantity it holds—shipped from jobbers stock.

The AC Plug Kit

THE AC PLUG KIT SELLS FOUR PLUGS INSTEAD OF ONE

The AC Plug Kit makes it possible to carry spare plugs without risk of damage. It is something that motorists have always needed. You can offer these kits free with each sale of four or more AC plugs. The kit costs you nothing, being shipped from jobbers stock on basis of one plug kit for each ten plugs ordered.

Spark Plugs

The Standard Quality Plugs of the World

AC TITAN - $1.00

AC CARBON PROOF SPARK PLUGS

Now made in all types and sizes.

They are recommended especially for Winter driving to make easier starting and better motor performance.

Also for all-year service in motors that have a tendency to pump oil.

This makes it possible to do a greater spark plug business in winter than ever before.

New Cars and Models

Mechanical Construction of New Ajax Features Seven-Bearing, Six-Cylinder Engine

Open bodies have leather upholstery and four-wheel mechanical brakes standard on all models

CLOSED bodies with four doors, seven bearing crankshaft, four wheel brakes, balloon tires mounted on disk wheels and many other features identified with the latest in motor car construction make the new Ajax car an outstanding addition to the passenger car field. The car measures about 153 in. overall, ample leg room in both the front and rear compartments being one of the outstanding features. While the top of the closed body is less than six feet above the ground, the head room is liberal. Duco finish in characteristic. Nash colors are standard on both bodies, the five passenger sedan and touring car of similar capacity which constitute the body types at present.

Prices of the new car have been announced as follows: Touring $865, Sedan $995. These prices are f. o. b. the factory.

The cylinder block is very compact and simplified as the front and rear supporting arms are formed by pressed steel plates which also act as frame members. Bodies, although not entirely steel construction incorporate an unusual amount of this material with consequent simplification.

As illustrated, the engine has six cylinders of 3 in. bore with a stroke of 4 in., giving a displacement of 169.65 cu. in. The power curve peaks at more than 40 h.p. at approximately 2400 r.p.m. as the timing and carburetion have been worked out to produce

Ajax six four door sedan. Note belt line moulding extending to radiator

good low and moderate speed performance rather than top speed, although the car is capable of approximately 55 m.p.h. L-head construction with cylinders and crankcase en bloc with separate detachable head, both of cast iron, are used.

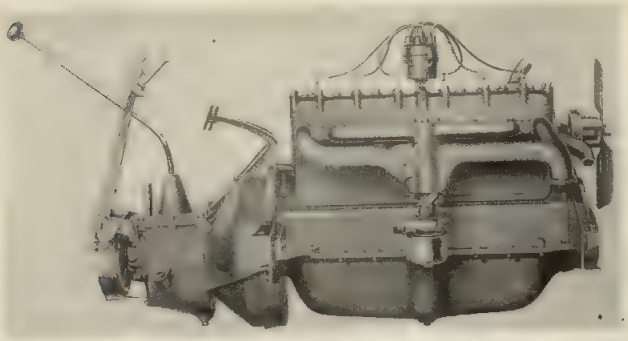
Elliptical cheeks of 5/8 in. thickness are used at all of the crankshaft throws and the main bearings are 1¾ in. dia. from end to end while the crankpins are 1⅝ in. dia. Journal lengths for the main bearings are as follows:

Front and rear, 1 15/16 in.; center, 1 7/16 in.; four intermediate, ⅞ in.

Crankpin bearings are 1 5/16 in. long. End thrust on the crankshaft is taken at the center bearing. Bronze back babbitt lined bushings are used on the main bearings with shims of .003 in. thickness. At the front end, the crankshaft carries the composition pinion of the two-gear timing train and at the rear a return thread is located between the flywheel flange and the rear bearing. Oil leakage at the front is prevented by a pressed steel thrower ring.

Connecting rods are drop forged steel of light uniform shank section. Two ⅜ in. dia. bolts retain the caps of the lower cast in bearings and the upper end carries a phosphor bronze bushing of 47/64 in. inside dia. and 1¼ in. length. Both the upper end of the rod and the bushing are slotted out at the top to allow oil to splash into the piston pin bearing. The center to center length of the connecting rod is 8½ in., which is 2.125 times the length of the stroke and somewhat unusual for engines of this size. Pistons are of light section cast iron with 3 rings of ⅛ in. width, one of which is an oil scraper ring located above the pin which is retained by a dog pointed screw. Pistons and rods are held to ⅛ oz. variation and the rods are checked for relative weight at each end. The 7 bearing crankshaft is dynamically balanced on a Precision machine.

Combustion spaces are domed to induce turbulence. Liberal water jacket space surrounds the cylinder barrels and all of the valves, there being no siamesed walls between even the intake valves. The cylinder water jacket extends down to a point about 1 in. below the lower position of the piston head. Cylinder barrels are bored, reamed and finally honed. The spark plugs are located in the head of the engine.



The power plant is distinctive in that it employs a seven bearing crankshaft and semi-integral stamped steel mounting brackets front and rear

Cast iron head valves have a clear diameter of 1¼ in. with a 5/16 in. lift and the 5/16 in. dia. stems are centered in cast iron bushings which are almost 3 in. long. Cylindrical valve springs are retained by cups and C-clips. Chilled iron mushroom tappets are mounted in groups of six in iron carriers which are bolted to the sides of the cylinder barrels. Two bolts retain each carrier.

Six bearings carry the cam shaft, the center bearing having been replaced by a helical gear which drives the oil pump and distributor head. At the front the cam shaft gear bearing is supported in a cast iron sleeve which is piloted and bolted to the front face of the crankcase. This bearing is 1⅜ in. long and its diameter is 1½ in. The rear bearing, which is machined in the crankcase is 1⅝ in. long and 1¼ in. dia., while the intermediate bearings which also are machined directly in the crankcase are

½ in. wide and approximately 2⅜ in. dia., being graduated to allow the introduction of the camshaft from the front end. Cams are 9/16 in. wide and the base diameter of the shaft which is machined all over and hardened is 1 in. Cams are arranged so that the exhaust valve closes and the intake valve opens 5 deg. past top dead center. The intake valve closes at 45 deg. past bottom dead center while the exhaust valve opens at a corresponding figure before bottom dead center.

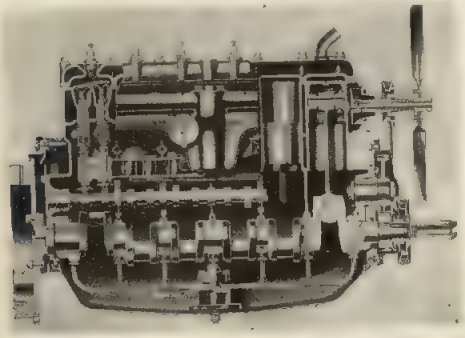
Lubrication is full pressure type for the main and lower rod bearings and the camshaft gear bearing. A hole drilled in the front wall of the crankcase supplies the camshaft gear bearing. The oil pump is located at the right of the center main bearing and is carried by an extension bracket which places the pump in the lowest point of the oil pan. An inverted screen assembly is attached directly to the pump body. Drive is by a vertical jointed shaft from a helical gear which meshes with the gear cut in the center portion of the camshaft. The upward extension of this shaft drives the distributor head which is located above the cylinder head.

Belt drive is used for the generator as well as the fan and water pump. The generator, which is part of a complete Auto-Lite electrical system, is located on the left side of the engine and is bolted on the back of the 3/16 in. thick steel plate which forms the front engine support. Two pulleys are mounted side by side on the front end of the generator shaft. One of these receives the pulley on the front end of the crankshaft while the other transmits the drive to the combined fan and pump unit which is located at the front end of the water jacket. Rubberized fabric V-belts are used in both places and the generator and combined pump and fan unit are driven at approximately 1½ times crankshaft speed.

Plain bearings are used in the fan-pump unit and the drive pulley and 16 in. dia. fan are mounted on a common flange at the front end of the impeller shaft. The impeller is fastened to the shaft by a cone-pointed screw and an adjustable packing gland at the front end prevents leakage. The volute chamber of the pump discharges directly into the cylinder water jacket.

Manifolds are located on the right side of the engine. Separate cast iron intake and exhaust manifolds are fitted together at the center to provide a hot jacket around the riser of the intake manifold. The heat at this point is controlled by a valve which allows any desired degree of heating action for either winter or summer driving. The end pairs of intake ports are siamesed while individual passages are provided for each of the middle pair of cylinders. Two siamesed ports and two individual ports are used for exhaust outlet. A Carter 1 in. plain tube vertical carburetor provides the mixture.

An oil filler and bayonet gage are placed on the left side of the crankcase as is the starting motor which is mounted on the rear steel plate motor support in a manner similar to that of the generator at the front. A hardened steel ring gear is shrunk over the outside of the flywheel. The width of this gear is ½ in. and the teeth are chamfered on the engagement side. Bendix drive is used for the starter pinion.



Section through seven main bearing Ajax six-cylinder engine. Note oil distributing manifold to each main bearing and oil passage to front camshaft bearing

Intermediate between the engine and gear box is a 9 in Borg & Beck push type clutch which is mounted on a ten spline shaft with a graphite bronze bearing at the pilot position in the rear end of the crankshaft. A self-lubricating compressed graphite shoe is used in the throwout position and is operated by a transverse lever which is connected to the lower end of the clutch pedal lever by a short adjustable link.

Gear box design is conventional throughout, although the face of the various gears is unusual for cars of this weight and power,

the face of the gears being uniformly 5/8 in.

Standard gear shift with the lever ball mounted in a stamped steel gear box cover is used. A built in transmission lock secures the shifting gates in the neutral position. A Hyatt bearing is installed at the front position with a single row annular bearing at the rear. Countershaft bearings and the spigot bearing are bronze. Countershaft gears are cut in an integral forging and the shaft is secured by a nut at the front. Six splined shaft construction is used for the sliding gears and the universal joint hub. Conventional construction is used for the speedometer take-off at the rear end of the tail shaft.

A bracket attached to the rear of the gear box carries the hand lever which operates the emergency brake. A pressed steel drum of 6¾ in. dia. is mounted on the spider for the front propeller shaft universal joint. A direct link operates a contracting band which is lined with molded anti-friction material of 1¾ in. width. Three rubberized fabric disks of 6 in. dia. are used in each universal joint.

Semi-floating construction is used at the rear axle which is equipped throughout with Timken bearings. Spiral bevel gears have a reduction of approximately 4.7 to 1. A two-pinion differential is located by pressed steel caps which are threaded in outside of the bearings while the location of the pinion shaft is determined by shims during assembly. Live axles are splined at the inner end and butt against a spacer at the center of the differential carrier and are tapered and keyed at the outer ends to receive the wheel flange and the Timken bearing. The position of the outer bearing again is determined by shims in the assembly process.

Budd disk steel wheels carrying 4.75 balloon tires on a 21 in. base are standard equipment all around and a spare wheel which is mounted on a dummy flange carrier at the rear is included. Twelve in. brake drums are mounted on all four wheels. Rear brakes are external contracting bands while self-energizing shoes are used at the front end. Rear brakes have a half wrap and are lined with molded friction material of 1¾ width. The braking action and silence have been improved by cutting away the shoe linings for a distance of 2 in. each way from the brake anchor at the back.

Rear springs are underslung and are approximately 50 in. long and 2 in. wide while the front springs have the same width and are 36 in. long. Vertical knuckle pins are clamped in the outer ends of the I-beam front axle, which has a deep drop between the spring pads and the wheels. Timken bearings are located in the front hubs while the king pin is mounted in bronze journal bearings and fitted with hardened steel thrust washers. The cross rod is a straight tube and is fitted with threaded yoke ends for adjustment. The cross rod pin at the left is equipped with a multiple disk clutch arrangement which dampens the shimmying tendencies of the low pressure tires. One side of the clutch arrangement is anchored to the cross rod assembly while the other is anchored to the steering knuckle arm and a compression spring exerts pressure on four alternate metallic and friction material surfaces.

Front wheel brakes resemble those fitted to the recent Nash models being internal with carriers which form splash guards by overlapping the edges of the drums. Two piece aluminum shoes carry molded strips of compressed brake lining of 1¾ in. width.

Braking force is divided equally between the two axles and no equalizers are used.

Side members are kicked up over the rear axle and have conventional spring horns at each end. In the horizontal plane the side members are straight and taper uniformly from the rear to the front end, the width at the rear axle being 40 in. and at the front axle 28 in. The depth at the middle section of the frame is 4½ in. and the flange width over the greater portion of the length is 1½ in. with a stock thickness of 5/32 in. A splined tubular cross member is located between the front spring horns.

Both body models are finished in gray green Duco which is the same shade as used on the present Nash models. Black beading is arranged in a double belt effect and the upper quarters of closed body are finished in black. Heavy drop crowned one-piece fenders are finished in black enamel. Cork linoleum and metallic binding are fitted to the running boards. Seats and backrests in the open job are finished in leather while the closed job is finished in Mohair cloth. Instruments are assembled in a panel arrangement which incorporates the manual control for the carburetor. As the ignition advance is automatic, no manual controls are placed on the steering column but the horn button finishes off the upper end of the steering post. Steering is accomplished by a Ross cam and lever gear. Rear view mirrors are standard on both open and closed models.

Standard lighting equipment includes head lamps with deflector lenses, cowl lamps on both models, tail lamp and a dome lamp with separate switch in the sedan body. A USL storage battery is located under the driver's side of the front seat while the tool compartment is at the right side. Gasoline is carried in a 15 gal. tank, which is suspended under the rear cross member. The muffler tail pipe is concealed within the channel of the right side member as it comes out at the rear and thus avoids the gas tank. A gasoline gage is in the left end of the tank.

Peerless Announces New Smaller Six Chassis

ENTERING the medium price six cylinder field with a sedan at $1,595 and mounted on a 116 in. wheelbase chassis employing a 3¼ by 4⅝ in. L-head engine and four-wheel brakes, the new car of the Peerless Motor Car Co. will broaden their dealers' line which hithertofore was comprised of a larger six and an eight cylinder model.

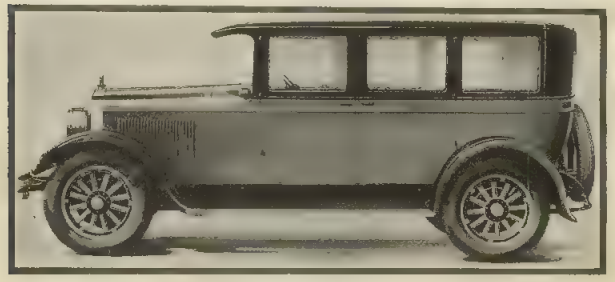
While six body styles will be offered on the new model, known as the 6-80 series, later during the season, production is being concentrated at the present time on the standard four-door sedan. Prices for the other body styles have not yet been decided, but it is understood the standard sedan will have the highest list with the prices scaling down to the five-passenger open car.

The engine which has 7 main bearings is assembled with the single plate clutch and three speed transmission forming a unit power-plant supported in the frame at four points. The rate of acceleration is said to be unusual while the car is credited with a high speed of better than 70 m. p. h.—and a speed of 42 m. p. h. in second gear.

Although conceived and designed in the Peerless shops, the engine is specially constructed for the new car by the Continental Motors Corp. This is the first of a series of engines to be built outside of the Peerless plant for a number of years. Rated at 25.35 h. p. and with a piston displacement of 230.2 cu. ins., the new power-plant develops 68 actual brake h.p. at 2,800 r. p. m. on the dynamometer. The peak torque is stated to be 149.5 ft. lbs. at 1,100 r. p. m. A new type of high turbulence combustion chamber and special valve timing are two of the important factors contributing to the high output of the engine.

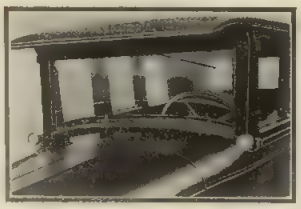
Gray iron cylinders are cast en bloc with the upper half of the crankcase having the flange for the pressed steel oil pan 2 7/8 in. below the center line of the crankshaft. The detachable cylinder head is secured by 22 steel studs. The carbon steel crankshaft is of massive construction, employing 2⅜ in. diameter main journals and weighing 54¾ lbs. Lengths of the bearings in inches follow: Front 1 25/32, intermediatea 1¼, center 1⅜, and rear 2 13/32

Smooth operation virtually free from vibration has been secured by careful balancing of the rotating and reciprocating parts and by the mounting of a Lanchester vibration dampener on the forward end of the crankshaft to eliminate torsional vibration. Pistons and connecting rod are weighed against one another to within .5 of an ounce while the shaft and flywheel are placed in static and dynamic balance.



This five passenger sedan listing at $1595 will be the first model Peerless will produce on its new line of six cylinder cars. Balloon tires and hydraulic four-wheel brakes are standard equipment.

Connecting rods of I-beam section and formed of open hearth steel have a bearing diameter at the big end of 2⅛ in. with a length of 1⅝ in. At the upper end the gray iron pistons are secured by a 1 in. diameter piston pin formed from solid bar stock and locked in the piston by a set screw. An additional locking device in the form of snap rings at the ends of the pin is also provided. The length of the piston is 3¾ in. with 2 5/16 in. allowed above the pin. Hand fitted to the cylinders, the pistons are provided with three rings each 3/16 in. wide above the pin, the bottom ring being a special oil control type and of Drainoil brand. The weight of the connecting rod assembly with pin and rings complete is 58 ounces.



The one-piece vision ventilating windshield standard equipment on the sedan model

A newly developed low pitch Morse chain No. 54, 1¼ in. wide and making for unusual quietness provides the front end drive for the accessories and camshaft. The latter mounted on the left side is forged from special alloy steel and runs in four bronze back babbitt bushings of the following dimensions:

Front: 2 1/16 by 1 11/32 length.
Second: 1 15/16 by 29/32 length
Third: 1¾ by 29/32 length.
Rear: 1½ by 1 13/16 length.

Adjustment for the timing chain is provided for in the movable generator—ignition unit mounted on the right side of the engine.

By the employing of a small flank radii in the design of the cam contour causing low contact pressure between the tappets and cams, most of the valve operation noises have been eliminated. Mushroom type tappets operate the valves, which are formed with nickel steel heads welded to open hearth steel stems.

Both valves are interchangeable, the head diameter being 1⅝ in., the length 4 45/64 in., stem diameter ⅜ in. and the lift 21/64 in. for both. The tappet guides and tappets are removable as a unit without disturbing any other part of the engine. Adjustment is by screw and lock nut.

Located on the outside of the crankcase near the carburetor, the oil pump is driven by helical gears off the camshaft, the take-off being placed on a line between cylinders number 5 and 6. This pump incorporates the oil pressure relief valve in the same casting, the unit being secured to the crankcase by four bolts. By removing six additional bolts, the pump cover may be detached, exposing the spur pump gears.

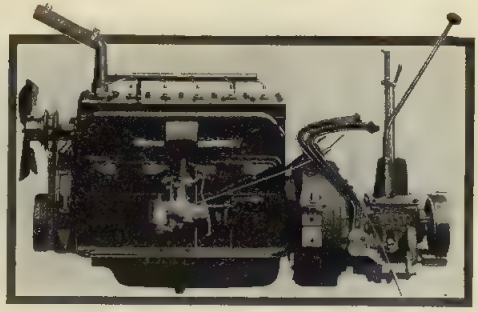
Lubrication is by the full pressure system, oil being forced through tubing to each of the main bearings. Through the hollow crankshaft oil passes to the connecting rods while the camshaft bearings are oiled by passages drilled in the crankcase. Other parts are lubricated by mist, the surplus oil falling back upon the oil pan tray and is screened before entering the oil pan proper. There is another screen of circular shape below the tray from which the oil is drawn by the pump above.

As a further guard against impurities in the lubrication system, a Purolator oil filter is bolted on the dash, the lead being taken off at the oil pump where the tubing is connected for the pressure gage. The oil capacity of the crankcase at the "full" mark is 7 quarts, while the oil level is indicated by a graduated bayonet type blade.

A plain tube cross throttle type of Stromberg carburetor model OX-2 with a nominal outlet size of 1¼ in. is bolted to the cast integral intake and exhaust manifold. The outlet from the latter is led down the forward part of the engine by 2½ in. diameter pipe which in turn is joined to a 28 in. welded pressed steel concentric type muffler, having a 1½ in. diameter tail pipe. Fuel is delivered to the carburetor from the 15 gallon tank at the rear by a large capacity Stewart-Warner vacuum tank.

With the exception of the 6-8 volt U. S. L. make of battery, the electrical units are of Auto-Lite manufacture. Both starter and generator are mounted on the right side of the engine, the former carrying th S. A. E. mounting and an outboard type of Bendix drive employing an 11-tooth pinion. The generator which is mounted on a separate support casting is driven from the front end chain by a special spring drive at 1 1/5 engine speed.

On this special casting the semi-automatic advance distributor unit is placed and is driven from the generator drive by spiral gears. The accessibility of this type of construction is demonstrated by the fact either the distributor or generator can be removed without affecting the other. Both the ignition coil and the cut-out are mounted on the generator in very convenient positions.



The Peerless six power plant, showing exhaust manifold outlet at the front side of engine. Note accessible location of the oil pump behind the carburetor.

The model designations of the various units are as follows:

Distributor: No. IG-4118
Starter: No. MN-4102.
Coil: No. IG-4063.
Generator: No. GY-4102

The combined fan and water pump unit is removable from the front of the cylinder block by loosening four nuts. The fan itself runs on two taper roller bearings with the extension of the shaft carrying the water pump impellor passing through a packing nut and supported in a large phosphor-bronze bushing. Grease cups are provided to lubricate the anti-friction and bushing bearings. A V-belt ⅝ in. wide comprising 29 links provides the drive for the fan-pump unit with adjustment by a movable flange which screws in and out on the fan pulley.

The fan itself is 16 in. in diameter and has four blades. Radiator is of cellular honeycomb construction. The water around the cylinders extends considerably below the distance of the piston travel while there is an extra amount of water around the exhaust valves. The capacity of the entire system is 3½ gallons.

Between the transmission and the engine a single plate dry disk, Borg and Beck clutch, Model No. 10-L, is employed. The steel plate is faced on both sides with woven asbestos lining, the maximum diameter being 9⅜ in. by 6¼ in. minimum diameter.

At two accessible points adjustment is provided to compensate for wear of the friction surfaces and to provide proper pedal clearance. The ten spline 1⅛ in. clutch shaft is supported at either end in roller bearings and carries a graphite throw-out collar requiring no attention or lubrication.

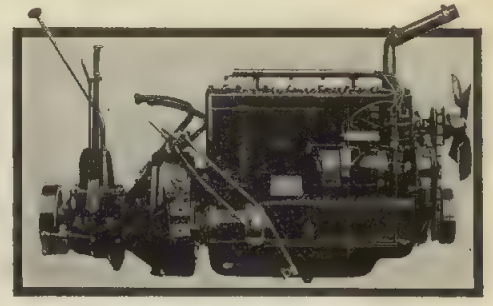
The gearset is of Detroit Gear Machine Co. manufacture with special modifications and provides three speeds and one reverse of the following ratios:

Low: 3.11 to 1.	Third: 1.00 to 1.
Second: 1.70 to 1.	Reverse: 3.78 to 1.

At the forward end of the sliding gear shaft a roller bearing is employed while the rear is supported by one of the ball type. The secondary shaft is carried on plain bronze bushings. The main shaft is a six spline forging with the teeth of the engaging gears chamfered to make for silent engagement. Spiral drive for the speedometer is located above the main shaft and placed to the rear of the ball bearing. A very simple linkage, as can be seen from illustrations of the power plant, is employed to connect the emergency brake lever with the transmission brake. The dimensions of the transmission brake drum are 7 in. diameter by 2 in. wide. An approved lock is also built into the transmission case.

A two inch tubular propellor shaft with an oil-tight metal universal joint at either end transmits the power to the semi-floating Columbia make rear axle. Except for slight modifications, the axle which is designed for the Hotchkiss form of drive is identical to Columbia axle model number 12,035. The pinion forged integral with the shaft is carried on two taper roller bearings in the overhung mounting style.

A tapered roller bearing on each side supports the four pinion differential assembly while a single bearing of the same type is employed at the wheel ends of the chrome-molybdenum heat-treated axles. These shafts have a diameter of 1 9/16 in. at the wheel bearings and at the ten spline differential end are 1 5/16 in. in diameter. The housing is of pressed steel and of the one-piece banjo type. A standard gear ratio of 4.45 to 1 for all body models is



Mounting of the generator and distributor is such that either unit may be removed without disturbing the other. Note Lanchester damper at front end of crankshaft.

provided, the teeth on the 9¼ in. diameter ring gear being 49 and those on the pinion 11.

Lockheed hydraulic brakes of the external contracting type having drums 14 in. in diameter and 2½ in. wide are used on both axles. The thickness of the friction lining is 5/32 in. and the width 2 in. Brake anchors are set 45 deg. ahead of center giving ¾ wrap on the brake bands and making for more effective and smooth operation.

Front axle is a Columbia model No. 1,200-H of "I" beam section with the 15/16 in. diameter steering pivot pins inclined at an angle. As on the rear axle, Timken roller bearings are employed. Steering knuckle thrust is taken by a radial ball bearing which together with the Ross cam and lever type steering gear provides easy turning of the wheels. The gear ratio is 11½ to 1, while the turning radius in either direction is approximately 20 ft.

Semi-elliptic springs are employed, those on the front being mounted above the axle while those on the rear are underslung, the dimensions being 37¾ in. long by 2 in. wide with 8 leaves on the front and 54¼ in. long by 2¼ in. wide with 11 leaves at the rear. Exceptionally easy rding qualities are claimed for the new car and one of the special design features responsible for this is the setting of the extra long spring shackles at an angle of 45 deg. when the car is loaded. This design allows a free movement of the flat cambered springs. Heavy coil springs are placed on the shackle bolts to compensate for wear and prevent rattles, the dimensions of the bolts being ¾ in. diameter all round.

An unusually rugged straight tapered frame is provided for in the new car. The maximum depth of the side channel members is 7 in. which is claimed to be the deepest frame constructed for a car of this weight. The thickness of the stock is ⅛ in. Three pressed steel cross members and one tubular brace at the extreme rear of the frame are employed while the foremost cross member is reinforced with diagonal gussets upon which the front of the engine is supported. The rear engine supports are bolted to mounting plates riveted to the frame with the flywheel housing forming a frame cross member.

Standard tire equipment consists of 30 by 5.77 in. balloon tires mounted on Firestone "A" rims attached to 12 spoke artillery wheels. In addition Gabriel snubbers are used all around while the chassis lubrication is by the Alemite system.

All bodies including the present sedan will be of composite wood and steel construction while the exterior finish will be in three color lacquer with suitable striping. On the closed cars a fine grade of mohair plush will be employed for the upholstery, with genuine Spanish leather used on the two open cars. In addition to the usual dash instruments which are mounted in a panel embodying the radiator design, a gasoline gage is installed which together with the following items are fitted as regular equipment. Windshield wiper, rear view mirror, rear traffic signal, cowl lights, transmission lock, shock absorbers all around, foot rest, robe rail, besides a dome light and curtains on the closed cars.

The headlights which are nickeled to correspond with the radiator are fitted with special lens and a single 21 c. p. bulb with the dimmer control mounted in a combination switch on the metal dash. All interior hardware on the closed jobs including the rotary window regulators, will be given a bright and dull silver finish. The foot accelerator pedal is formed of malleable iron and is of the treadle type. Ready for the road but excluding passengers, the sedan model weighs 3310 lbs. with 1715 lbs. of the weight taken on the rear wheels.

"PENNANT" FIELDERS' GLOVES

KNOCKOUT VALUE IN AN ALL LEATHER FIELDERS' GLOVE

A glove you can't buy elsewhere within several dollars of this price! Note materials, size and quality. "Pennant" made.

Nearly Full Size

Selected [illegible] glove leather, palm and fingers genuine leather lined [illegible] of fingers, set a third [illegible] in box.

BASEBALL UNIFORMS and SUNDRIES

"PENNANT" UNIFORMS

Shipped from Factory in Chicago

Swatches furnished on request. Show the local teams cloth samples and tell them you can get prompt delivery

Important Note—Our quotations are for uniforms complete, 5 pcs. shirt, pants, cap, hose and belt, complete in box. All our suits are cut over extra large, roomy athletic patterns, allowing freedom of action

Shirts—Double row silk soutache braid on neck, front and sleeves.
Pants—Canvas stayed waist, double crotch, back seam tape reinforced, elastic bottoms, belt loops and tunnel, roomy hip pockets.

Caps—Cloth matches suit, green lined visors.
Belts—Heavy solid leather
Hose—Footless, 4 in. calf band.

➡1K658-18—SPECIAL, BOYS' light gray athletic flannel with narrow red and green stripe strong and durable made in the same pattern as our No. 1 suit, same workmanship, solid color ribbed hose. Sizes 28 to 34 in. chest. SPECIFY SIZES.
Suit **$3.25**

➡1K650-23 — SEMI-PRO MEN'S gray with alternating dia. mond, coon stripes made of flannel you can guarantee to be the equal of any worsted goods made at the price as well as durable. Sizes 34 to 44 in. chest. SPECIFY SIZES.
Suit **$5.75**

➡1K655 — PROFESSIONAL MEN'S standard Portland tailored wool flannel shirt and two weave grey with maroon and white stripes, satin faced cap, wool plated hose. Sizes 36 to 42 in. chest. SPECIFY SIZES.
Suit **$8.00**

➡1K657 — MEN'S worsted athletic flannel street gray mixture with one hair pin stripe, ventilated cap, web loop leather belt. Sizes 36 to 44 in. chest. SPECIFY SIZES.
Suit **$10.00**

WOOL PLATED BASEBALL HOSE

1K662—Wool plated, heavy gray with 4 in. navy band on calf, footless. ½ doz. in box. Doz Out

"PENNANT" CHEST PROTECTOR

1K705 — "Professional," full size, hand stuffed with curled hair, high absorber protection, extra deep, large, arch protector, leather bound, all-position adjusting web harness. 1 in carton. Each **$3.25**

"PENNANT" MASKS

Enameled steel wire frames, welded joints.

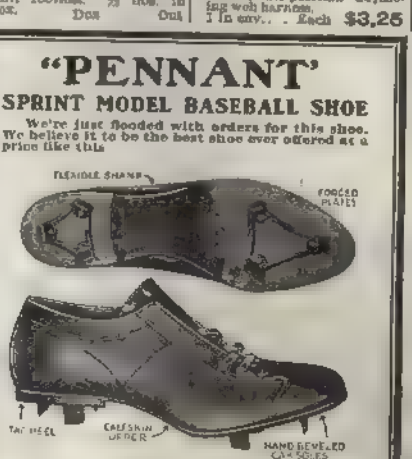
1K706—Youths' leather covered pads, elastic harness with strap and buckle. 1 in box. Each **$1.35**

1K707—Professional, full size, combination leather faced pad laced to frame, chin protector, elastic head harness with two way strap and buckle adjustment. 1 in box. Each **$2.60**

1K708—Professional, full size, leather faced pad laced to frame, chin and neck protector, elastic head harness with two-way strap and buckle adjustment. 1 in box. Each Out

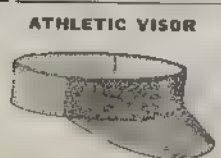
"PENNANT" SPRINT MODEL BASEBALL SHOE

We're just flooded with orders for this shoe. We believe it to be the best shoe ever offered at a price like this



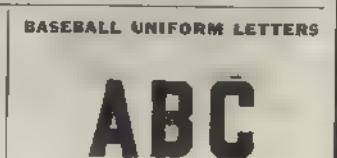
1K733—Black calf upper, tough soft pliable uppers, hand beveled light weight oak soles with tempered steel plates, prevents injury to ball of foot from spike pressure, cap heel, forged plates, ground edges. Sizes 7 to 11. SPECIFY SIZES. 1 pair in box.
Pair Out

ATHLETIC VISOR



1K667—For all forms of athletics, for automobile drivers, muslin lined felt head band with elastic sun, 1 oz. flexible green transparent celluloid visor. 1 doz. in box with display card.
Doz **$4.00**

BASEBALL UNIFORM LETTERS



1K663—2½ in. high, black felt block type, attachable with cement or tailors' adhesive material. SPECIFY LETTERS.
Each 3c

FISHING TACKLE

No need to invest heavily in tackle when you buy here, but you will find it necessary to reorder again and again and again

Bonney "CV" Wrenches are stronger than the bolt -

Every Bonney "CV" Engineer Wrench is guaranteed to strip the thread of any standard U. S. S. or S. A. E. nut or break the bolt *before the jaws will spread.*

The great strength of Bonney "CV" Wrenches is made possible through specially heat treated drop forgings of that super steel — *Chrome-Vanadium.* Our "C-V"* wrenches have a factor of strength more than twice that of carbon steel wrenches.

"Short Bite" Will Not Spread Bonney Wrenches

The heads on Bonney "C-V" Engineer Wrenches are pear shaped and forged at an angle. This permits getting it to tight places or where a full hold is impossible. Even full leverage on a "short bite" is guaranteed not to spread a Bonney "CV"*

MACHINISTS' VISES

BONNEY STANDARD VISE ASSORTMENT

Jaws are of best grade gray iron and the main and thumb screws are cast semi-steel with cut threads. The head and collar is of a single piece with the main screw and will not wear out or pull off. Finished in black enamel baked on, with polished screws, jaws and anvils.

The stand is of cast iron, japanned, with hardwood shelves.

The following are Nos. and dimensions of vises contained in this assortment.

Vise Nos.	00	01	02	02½
Size jaws, ins.	1	1½	2	2½
Wt each, lbs.	1	1½	2¼	4

Per Ass't

No. 10BA—Consists of 17 vises: 6 No. 00, 6 No. 01, 3 No. 02 and 2 No. 02½, complete with display stand. $31 50

One ass't in case; wt per ass't 40 lbs.

YANKEE, cast iron body and jaw, bright finish; dull black finish base. The adjusting screw is of steel, ½ inch diameter with ¾ inch head to receive sliding bar. A removeable swivel jaw is furnished to hold taper work, and is made of steel, case hardened. So constructed as when adjusting vise, the body slides instead of the rear jaw. Has a swivel base. Fitted with a lever, which by one turn, rigidly fastens the vise, and by another turn, again releases it. Countersunk holes are provided for screwing vise to bench.

Patent Swivel Base.

Nos.	1991	1992	1993
Size body, ins.	3⅝x1¾	4⅛x2	7¼x2¾
Extreme height, ins.	3⅛	4⅛	5¾
Diam base, ins.	2½	3¼	4½
Depth jaws, ins.	⅞	1⅛	1⅜
Jaws open, ins.	1½	1 15/16	3⅛
Wt each, lbs.	2½	5½	18½
Each	$9 00	13 80	22 50

Nos 1991 and 1992, one in cardboard box; No. 1993, one in fibre box.

YANKEE

Cast iron body and sliding jaw, bright finish, accurately machined to hold work square when used either flat or on sides.

The sliding jaw slides in a V-shaped groove, insuring parallel movement. The adjusting screw is of steel, ½ inch diameter with ¾ inch head. A removable swivel jaw is provided to hold taper work, and is made of steel, case hardened.

Two countersunk holes are provided in base to screw vise to bench.

Stationary Base.

Nos.	990	93
Size body, ins.	6x2⅜	79x2¾
Extreme height, ins.	2	3
Depth of jaws, ins.	1⅜	1⅞
Jaws open, ins.	3	3⅛
Wt each, lbs.	3¾	9
Each	$7 50	15 75

One in box.

MACHINISTS' VISES

BOYCE MOTO METER

THE NEW MIDGET MODEL

The New Midget Model Boyce Moto Meter has been designed especially for use on small cars. It has a polished nickeled frame and is finished with beveled crystals both front and rear. This instrument, except for its size, is identical with more expensive Boyce Moto Meters for the larger types of car.

	Each
Midget (New Model)	$3.50
Ford Special (with cap)	4.00

JUNIOR

This model appeals strongly to owners of cars of medium size. The frame is heavily nickel plated, and it has the same range of temperature as the Standard and Universal models.

Junior	$3.00

UNIVERSAL

Slightly smaller than the Standard model, finished in all nickel. Beveled crystals add to its appearance. Its handsome open face is more easily read than a clock.

	Each
Universal	$7.50

Stocked with special dials for Dodge, Essex and Overland 4.

STANDARD

A perfect heat recording instrument of the highest type, with extremely broad ribbon-bore thermometer tube. Because of its perfection of workmanship, this model has been selected as regular equipment on America's leading cars.

	Each
*Standard, regular finish	$10.00
Standard, all nickel finish	10.00

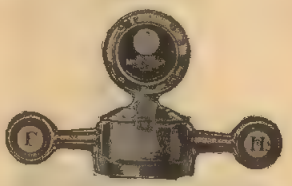
*Stocked with special dials for Overland and Hudson.

DE LUXE

This model is all that the name implies, having been designed for the highest grade passenger cars. Case is silver plated, and the finish of the entire instrument is of the highest quality of workmanship. Equipped with the Schlaich Moto Meter lock, which furnishes absolute protection against theft, not only of the Boyce Moto Meter, but the radiator cap as well.

	Each
De Luxe	$15.00

ARISTOCRAT



Three elements are combined in the Aristocrat model—utility, beauty and protection. A midget model Moto Meter mounted on a handsome bar type locking radiator cap. The complete unit nickel plated throughout and assembled ready for installation. Although assembled with the midget model the hole in the cap is large enough to use the universal model Moto Meter, which can be furnished at a small additional cost.

	Each
Ford Aristocrat	$7.00
For Chevrolet, Gray or Star	7.50
For Overland or Maxwell	7.50

FORD SPECIAL

If every Ford owner knew the value of a Boyce Moto Meter on the Ford car, he would without question install one immediately.

The Special for the Ford consists of a Midget Model Boyce Moto Meter mounted on a handsomely designed locking radiator cap. Complete unit is nickel plated, and offers an article of great utility as well as beauty for the Ford car.

	Each
Ford Special	$4.00

All the above, one in a carton.

LOXRITE RADIATOR CAPS

SPEEDWAY WING AND DE LUXE WING

The Loxrite Radiator Locking Cap is the Aristocrat in beauty and quality, and is made in three distinctive designs. It is a positive locking cap and insures against theft of your moto meter. It takes less than a minute to install on the radiator, and when locked by the special lock plug it is impossible to remove the cap without turning the radiator upside down. The locking pin is protected from contact with water, dirt or dust, and has no chance for rust or corrosion. The Monogram Shield is hinged at the bottom and fitted with snap catch at the top. This catch engages the cap and holds it firmly in place after filling the radiator. The patented Loxrite insert can be easily inserted into the cap making it possible to readily fit any radiator. These inserts are made in two sizes. The large size to fit the Speedway Wing and De Luxe Wing, while the smaller one is made for the Speedway caps. The following emblems can be furnished for both large and small caps: Masonic, Elks, Shriners, Knights of Columbus and Woodmen Large emblems: Durant, Hudson, Dodge, Oldsmobile, Buick, Nash, Cadillac, Reo, Hupmobile, Studebaker, Crysler, Rollin, Jewett and Oakland. Small emblems: Chevrolet, Overland, Star, Gray, Oldsmobile, Studebaker and Dodge.

Model		Wt each	Each
Speedway Wing	Complete with insert	1¼ lbs.	$4.00
De Luxe Wing	Complete with insert	2 lbs.	7.00

The above prices do not include moto meter.

EXTRA INSERTS AND INITIALS

	Each
Speedway Wing Inserts	$1.00

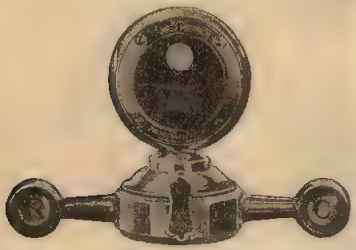
SCHLAICH CAP LOCKS

FOR BOYCE MOTO METERS



MODELS A AND B

Models A and B designed especially for the De Luxe Moto Meter. Bore in lid ¾-inch, the size of the De Luxe Moto Meter stem. Universal and Standard model Moto Meter center in the depression in the lid. Model A caps are 3 inches in diameter for cars with small radiator necks. Model B measures 3⅜ inches in diameter and is for cars with large radiator necks.

MODEL XF

The model XF is an exceptionally beautiful cap with cloisonne enameled blue and silver insert plates on arms. Built especially to harmonize with the cloisonne dial of the Standard model Moto Meter. All type F inserts fit this model.

MODEL F

Model F designed especially for the Universal Moto Meter. Bore in lid ⅝-inch, size of Universal or Standard Moto Meter stem. The Midget model Moto Meter centers in the depression of the lid. Both ½-inch and ⅝-inch locking collars are packed in each box. This model cap is used by the Moto Meter Co. on their six models of Aristocrat Boyce Moto Meters.

MODEL E

The Model E Cap is identical in workmanship, size and material with the F model cap except that it has plain balls on the arms. Designed for those who want accuracy and protection for their Moto Meter at a lower cost. All type F inserts fit this model.

PARTS CABINET

The Parts Cabinet contains an ample supply of replacement parts for all minor repairs.

JEWELS

Red or green multi-cut with gold leaf background to reflect rays of approaching cars during the night season.

SERVICE STATION SIGNS

A handsome metal flange sign finished in blue, buff and gray. Furnishes a direct tie-up with the service station.

All caps are priced complete with inserts, initials or emblems, but do not include Moto Meter. All A inserts are interchangeable in A caps, B inserts in B caps, F inserts in F caps, but are not otherwise interchangeable.

Model	Each
A and B	$6.00
XF	6.00
F	4.00
E	3.50
Extra Inserts	.50
	Per pair
Jewels	$0.50

All the above, one in a carton.

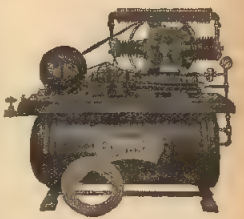
AIR COMPRESSORS

BRUNNER

MODELS 939, 949 AND 969 ASSEMBLED UNITS



MODELS 939, 949 AND 969

The Brunner two-stage outfit is built with the safest and most expensive tank—drawn seamless steel that will endure for years without developing annoying leaks or deteriorating to the point of becoming a public menace. The entire assembly follows engineering soundness as typified by the use of such a tank. The unit at any reasonable speed or any pressure is silent, free from vibration, and runs smoothly without rattle or the familiar thump-thump of common two-stage outfits.

The Brunner Model 939 is the fastest-working ¾-H.P. unit built. Pressure in the 32-gallon tank rises from zero to 175 lbs. in less than 25 minutes. A pressure rise of 25 lbs. is a matter of five minutes or less. The answer is not excessive speed; it is astonishing efficiency produced by dual valves, large intercooler and snugly fitted, polished pistons No other machine approaches this air delivery with equal motor.

The drip tank, holding the moisture discharged by the unloader, helps to keep these machines clean and attractive.

Equally good proportional results are had with the larger models 949 and 969. The first of these mounts the same compressor, but with 1-H.P. motor and with 45-gallon seamless steel air tank. The No. 969 also uses the same compressor and 1-H.P. motor, with a 65 gallon seamless steel tank Pressure rise is produced in about equal time by all three units, as the compressor is proportionately speeded to tank-size in each case. It is obvious that the smaller unit has the longer life, but the larger assemblies, running at higher speed, are, nevertheless, in great favor with oil stations and other busy establishments. Long life seems not vital when parts are so quickly and cheaply replaced.

The outfits are completely equipped, as illustrated.

TABLE OF SPECIFICATIONS

	Model 939	Model 949	Model 969
Horsepower	¾	1	1
Capacity	3 cubic feet per minute	4 cubic feet per minute	4½ cubic feet per minute
Tank size	32 gallons	45 gallons	65 gallons
Weight	625 lbs.	660 lbs.	755 lbs.
Height	40¼ inches	45⅛ inches	45⅛ inches
Floor space	19½ inches by 45⅛ inches	24 inches by 45⅛ inches	24 inches by 60 inches
Shipping weight	600 lbs.	744 lbs.	920 lbs.
Boxed for export	30 cubic feet	43 cubic feet	57 cubic feet

Model 939

Model	Each
939, with 1-phase A.C., 110-220 volt, 60-cycle motor	$370.00
939, with 110-volt direct current motor	372.00
939, with 220-volt direct current motor	372.00
939, with 32-volt direct current motor	372.00

Other motor equipment specially quoted.

Model 949

Model	Each
949, with 1-phase A.C., 110-220 volt, 60-cycle motor	$410.00
949, with 110-volt direct current motor	412.00
949, with 220-volt direct current motor	412.00

Other motor equipment quoted on request.

Model 969

Model	Each
969, with 1-phase A.C., 110-220 volt, 60-cycle motor	$440.00
969, with 110-volt direct current motor	442.00
969, with 220-volt direct current motor	442.00

Motors of other types at relative prices.

MODEL 965 ASSEMBLED UNIT

MODEL 965

Owners and users of this assembly have the satisfaction of possessing the first successful unit of its kind ever built and sold successfully. Other heavy duty assemblies have failed for the reason that vibration has loosened the joints and led to the early destruction of a costly machine. The Brunner Model 965 is free from vibration, the No. 105 Compressor being of balanced load type, with all running surfaces ground and polished. The operation of this giant type outfit is as smooth and silent as an eight-cylinder motor. Nevertheless, Brunner practice of grinding all fitted joints is carried out, locked cap screws are used to clinch the power plant on the saddles, and the heavy seamless tank is clamped in place with four heavy iron straps. Years of constant operation will not affect the rigid stability of this rugged and reliable outfit.

Model 965 has ample capacity for the largest and busiest filling station, even handling three or four air-driven gasoline pumps. Pneumatic truck tires are quickly inflated from the large tank. No degree of air demand will find it unready or inadequate.

While space is not wasted, and whole assembly is very compact, the entire unit is not small. The top of the compressor reaches 48½ inches from the floor. Length over all is 65 inches and extreme width is 22 inches. The weight, 775 lbs., is too great for overhead location. Shipping weight is 970 lbs. Crated for export, gross volume is 57 cubic feet.

Model	Each
965, with 1-phase A.C., 110-220 volt, 60-cycle motor	$560.00
965, with 2 or 3 phase A.C., 220-440 volt, 25 cycle motor	560.00
965, with 220-volt direct current motor	615.00

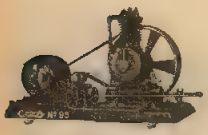
Other motors are supplied at special prices

All above, one in a crate.

AIR COMPRESSORS

BRUNNER

MODEL 95 POWER PLANT



MODEL 95

A powerful and rugged assembly incorporating the heavy duty No. 105 with 1½-H.P. motor, automatic unloader-controller, and the unique Brunner adjustable belt tightener. Designed for heavy service and for high pressure, this model will find ready favor among air users who haven't floor room for a complete unit with tank. In such cases a 65 or 80-gallon tank may be suspended from the ceiling or otherwise installed out of the way, to be charged from the No. 95 automatic power plant. Of generous capacity and adapted to high pressure, it is suited to pneumatic truck tire inflation, or will easily handle the air demands of the busiest oil station

The automatic controller may be adjusted to any pressure up to 200 lbs. The unloader works simultaneously with the controller, permitting the motor to start "no load," saving current and protecting the motor The exclusive Brunner drip tank receives the unloaded discharge A heavy endless belt of oak-tanned leather is furnished and is quickly adjusted to proper tension and correct alignment by the latest design Brunner belt-tightener.

Pulley ratios provide a compressor speed of 290 R P M , giving a capacity of 5 cubic feet of free air per minute. At this speed prompt air service is ever available and the machine will endure for years without repair or loss of efficiency.

Model 95 weighs 335 lbs , is 25½ in. high and 45½ in by 19 in on the floor Equipment is complete, as illustrated.

Shipping weight, 425 lbs. Packed for export, 17⅛ cubic feet.

Model	Each
95, with 1-phase A.C., 110-220 volt, 60-cycle motor	$420.00
95, with 2 or 3-phase A.C., 220-440 volt, 60-cycle motor	395.00
95, with 220-volt direct current motor	475.00

Other motors are special and are quoted on request.

MODEL 11 COMPRESSOR

MODEL 11

To name the uses and virtues of this popular type would be to recite the endless uses of air in garages and machine shops Of large capacity and of rugged strength, Model 11 is a popular choice and the price is very low Single cylinder design requires greater power than the same load distributed over two smaller cylinders, and long life is not to be expected in the same degree as with the divided load compressor. Nevertheless, the purchaser of the Model 11 is usually pleased to spend the power and sacrifice durability to enjoy the advantage of large capacity with low purchase cost.

Compressors of similar type are found in a dozen or more makes, but only the Brunner has ground finishes, low head clearance, removable brass valves hammered rings and other Brunner features already described.

The price at which this machine is sold does not permit the use of the special high grade cylinder iron nor quite the close manufacturing limits incorporated in the other Brunner models, but the volume in which this machine is manufactured and the use of labor-saving machinery to the widest extent makes this the biggest bargain in the air compressor field.

Used with tanks up to 80-gallon size, at any pressure up to 200 lbs., and at speed of 300 R.P.M. to 450 R P M , the Model 11 supplies ample air for tire inflation in large garages, for paint spraying, for driving small pneumatic tools, and for a variety of industrial purposes Motor of 3-H P is adequate to get maximum results. Vibration is reduced by using a heavy-rimmed flywheel driving pulley.

This compressor stands 22 in. high, covers 14 in. by 18 in. floor space and weighs 120 lbs. Outlet is tapped for ½-in. iron pipe. The pulleys supplied are 2¼ in. wide.

Shipping weight, 160 lbs. Boxed for export, 6 cubic feet.

Model	Each
11, with 14-in. flywheel-pulley	$48.00
11, with 14-in. tight and loose pulleys	53.00

Note: As a vacuum pump, Model 11 is particularly adapted to milking machines, gasoline dispensers and similar uses

MODEL 102

MODEL 102 COMPRESSOR

Thousands of well pleased owners give evidence that this has been always the standard compressor of the garage field. Its capacity and unfailing performance make it the perfect equipment for the average automotive establishment. Its air delivery is rapid, its power requirement low, its oil consumption meager, and its enduring efficiency a source of year after year air profit.

Model 102 is the best that can be had, combining every resource of Brunner equipment and care. Only the busiest hose lines or a large shop will require a larger machine. A motor of ½-H.P.' to 1-H.P. will drive it at normal speed up to 200 lbs. pressure, and it should be used with a tank of 50-gallon or less capacity. At 350-R.P.M. it will raise the pressure from zero to 150 lbs. in a 32-gallon tank in 25 minutes.

Height, 13 in.; floor space, 6½ in. by 10 in. Net weight, 50 lbs. Lubrication, splash system. Outlet tapped for ¼-in. iron pipe. Adjustable safety valves in each cylinder. Pulley width, 2 in.

Shipping weight, 70 lbs. Boxed for export, 1.4 cubic feet.

Model	Each
102, without pulleys	$55.00
102, with 3-in. tight and loose pulleys (furnished unless otherwise specified)	61.00
102, with 14-in. tight pulley	59.00
102, with 14-in. tight and loose pulleys	65.00
For vacuum service, common intake fitting, extra	3.50

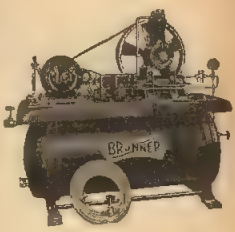
If sub-base, as shown in illustration, is not desired, deduct $4.50 from list price.

All above, one in a crate.

COMPRESSORS

BRUNNER

MODEL 932 ASSEMBLED UNIT



MODEL 932

Today this machine meets all the requirements of the average automotive establishment. A garage operating pneumatic shop tools will require greater air capacity An oil station with air operated gasoline pumps must have a heavier machine. The No. 932 does, however, satisfy the air needs of the vast majority of dealers. The wide popularity of this type is well founded, but this Brunner unit is rapidly replacing cheaper machines of like appearance and rating.

The No. 92 power plant, described on a preceding page, is securely bolted and locked to matched, solid arch saddles held in position with lateral braces. A double-tested Brunner tank, guaranteed for a working air pressure of 175 lbs to the square inch, is suspended in the saddles and secured in place with strong metal straps. This unit operates without vibration or noise, will not develop loose joints, and is good for twenty years of daily operation.

This machine is largely self-operating, incorporating a remarkable unloader controller which maintains desired tank pressure and at the same time relieves the motor of starting load A Brunner doubly adjustable belt tightener is a feature The valves are of Brunner own make including the patented, non-pounding check valve. Pipe threading is full and clean, with brass fittings In fact, every assembly feature of this splendid outfit is in keeping with the high Brunner standard which is so familiar to the general trade.

Note the demountable drip tank, an exclusive Brunner feature.

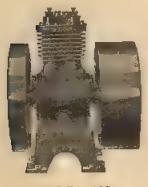
Dimensions: Height, 40 in.; floor space, 18 in. by 45½ in. Outlet for ¼-in. iron pipe.

Net weight, 440 lbs. Shipping weight, 535 lbs. Boxed for export, 29 cubic feet.

Model	Each
932, with 1-phase A.C., 110-220 volt, 60-cycle motor	$325.00
932, with 110 volt direct current motor	325.00
932, with 220-volt direct current motor	325.00
932, with 32-volt direct current motor	330.00

Motors not listed are specially quoted on application.

MODEL 105 COMPRESSOR



MODEL 105

Strictly speaking, any compressor for higher pressures and above 5 cubic feet capacity should be water cooled but many operators object to the necessity of looking after water supply and for those users Brunner builds Model 105 a large, heavy and very rugged air cooled compressor This model is large in every dimension, with long bearings, heavy forged crankshaft and a high factor of strength in every part. Being of balanced load type, however, and having all running surfaces ground and polished, this excellent model turns freely and is easily operated by a 1½-H.P. motor.

Machine and repair shops favor the Model 105 using it with tank sizes up to 80 gallons capacity, and carrying pressures of 175 lbs to 200 lbs At a normal speed of 350 R. P. M. to 450 R. P. M., it will handle a large tank quickly.

A number of industrial uses have been found for this compressor. Fire alarm whistles use it generally Builders of huge gas engines employ it for air starting. It figures in many cleaning installations The range of its usefulness seems unlimited No 105 shares a popular field with No 11 but this two-cylinder type consumes less power and has far greater life.

Some mechanical features deserve mention Safety valves are built into each cylinder, while both intake and outlet valves are large diameter steel mushroom type in brass cages Connecting rods are forged steel with S.A.E. white metal split bearings. Main bearings are extra long, of special bronze alloy and are ingeniously oiled. Oil gauge and filler are on exposed area of crankcase. In every detail, the No. 105 is typical of Brunner excellence.

Dimensions Height, 22½ inches, floor space, 16x18 inches over double pulleys and flywheel. Outlet for ½-inch iron pipe. Pulley width, 2½ inches.

Net weight, complete, 184 lbs Shipping weight, 235 lbs Boxed for export, 8¾ cubic feet

Model	Each
105, without Pulleys or Flywheel	$100.00
105, with Flywheel, no Pulleys	112.00
105, with Flywheel and Tight and Loose Pulleys	125.00

(Unless otherwise ordered, the latter equipment is supplied.)

One in a crate.

BRUNNER SEAMLESS STEEL AIR TANKS

175 lbs. Working Air Pressure; Tested to 350 lbs.

Too often the weakest and most troublesome part of a compressor outfit is the tank Leakage is annoying failures are dangerous, and frequent replacement is costly To secure a tank that avoids all three objections has been a severe problem, but the Brunner Seamless Drawn Steel Air Tank has perfectly answered every requirement This style used exclusively on Brunner units, is more costly than other types of air tanks, but these seamless tanks cannot leak, they are safe, and their life is far greater than welded or riveted tanks.

The shell of this type of tank is drawn cold from a single sheet of heavy steel The steel is thoroughly annealed between each drawing operation to eliminate internal stresses in the material This method of manufacture not only produces a tank without longitudinal seams in the shell, but the drawing operation increases the homogeneity of the metal and also increases its strength. The thickness of the shell is figured with a factor of safety of five times the working pressure

The concave bottoms are of approved design and are of course figured with the same factor of safety as the shells. They are inserted into the shell, which is crimped over the edge of the bottom and brazed This construction not only makes a tremendously strong tank but absolutely guards against leakage so commonly found in ordinary riveted or brazed tanks.

The working air pressure of Brunner Seamless Steel Air Tanks is 175 lbs to the square inch with a factor of safety of five, and all tanks are tested to double the working pressure This does not mean that they are recommended for use at pressures above the working pressure, this factor of safety and double test is used as a safeguard.

Cap. gals.	Cap., cu. ft.	Dimensions	Approx wt.	Each
15	2	12x30 in.	54 lbs.	$26.50
32	4.3	16x40 in.	115 lbs.	43.00
45	6	18x43 in.	155 lbs.	58.00

SPECIFICATIONS FOR BELT DRIVEN GARAGE OUTFITS

BRUNNER

To assist the purchaser in specifying the items for an entirely complete outfit with the exception of the iron piping, we list the three following garage outfits which are recommended for garages housing 15 cars or more

The compressors listed in the following outfits give the most popular pulley equipment. The purchaser can vary the pulley equipment and size of tank to best suit his individual requirements and there will be a decrease or increase in the cost of the entire outfit depending upon the pulley equipment and tank selected This can readily be figured from the list prices of the compressors and tanks.

BELT DRIVEN GARAGE OUTFIT No. 1

For garages housing up to 50 cars and large vulcanizing shops.

	Each
1—No. 102 Belt Driven Compressor, 9-inch Tight and Loose Pulleys	$61.00
1—45 Gal. 18x43-inch Seamless Steel Tank (for 175 lbs. working pressure)	58.00
1—Model "B" Air Gauge	3.00
1—No. 70 Horizontal Check Valve, ¼-inch	3.75
1—No. 73 Safety Valve for Air Tank	2.50
1—No. 83—¼-inch Needle Valve	2.25
1—No. 83—⅜-inch Needle Valve	2.25
1—No. 82 —⅜-inch Needle Valve with Swivel Hose Connection	2.25
2—Specially Ground Brass Unions, ¼ and ⅜-inch	1.25
1—Automatic Tire Connection	1.70
1—25 ft. Drop Line, ¼-inch "Resistoil" Air Hose	7.00
Complete Outfit	$144.95

BELT DRIVEN GARAGE OUTFIT No. 110

For garages and service stations housing 50 to 75 cars

	Each
1—No. 13 Belt Driven Compressor, 14-inch Tight and Loose Pulleys	$ 53.00
1—65 Gal. 18x60-inch Seamless Air Tank (for 200 lbs. working pressure)	90.00
1—Model "B" Air Gauge	3.00
1—No. 70 Horizontal Check Valve, ¼-inch	5.00
1—No. 73 Safety Valve for Air Tank	2.50
1—No. 83—⅜-inch Needle Valve	2.25
1—No. 84—½-inch Needle Valve	3.25
1—No. 82—⅜-inch Needle Valve with Swivel Hose Connection	2.25
2—Specially Ground Brass Unions, ⅛-inch and ⅜-inch	1.70
1—Automatic Tire Connection	1.70
1 -25 ft. Drop Line, ¼-inch "Resistoil" Air Hose	7.00
Complete Outfit	$171.65

BELT DRIVEN GARAGE OUTFIT No. 165

For garages and service stations housing 60 to 90 cars.

	Each
1—No. 105 Belt Driven Compressor, 16-inch Tight and Loose Pulleys and Fly Wheel	$125.00
1—65 Gal. 18x60-inch Seamless Air Tank (for 200 lbs. working pressure)	90.00
1—Model "B" Air Gauge	3.00
1—No. 70 Horizontal Check Valve, ¼-inch	5.00
1—No. 73 Safety Valve for Air Tank	2.50
1—No. 83—⅜-inch Needle Valve	2.25
1—No. 84—½-inch Needle Valve	3.25
1—No. 82—⅜-inch Needle Valve with Swivel Hose Connection	2.25
2—Specially Ground Brass Unions, ⅛-inch and ⅜-inch	1.70
1—Automatic Tire Connection	1.70
1—25 ft. Drop Line, ¼-inch "Resistoil" Air Hose	7.00
Complete Outfit	$248.65

COST OF OPERATION

The cost of operating Brunner Compressors of the more popular sizes has been carefully compiled; the following table gives absolutely true figures, allowing for current at 10c per kilowatt hour.

Model 932—$.064 per hour steady operation; .0006 per cu. ft. of air actually delivered.
Model 939—$ 083 per hour steady operation. .0007 per cu ft of air actually delivered.

In usual service a compressor will run about one hour per day. This allows for automatic controller to function six times. The above figures might therefore be considered the daily cost of Brunner units.

FLOW OF AIR THROUGH AN ORIFICE

This table is devised and verified to give flow of air through round orifice into the atmosphere. The figures given are confined to actual conditions that might involve a Brunner installation The answer in any case represents flow of free air in cubic feet per minute.

Diam of orifice	5 lbs.	10 lbs.	20 lbs.	30 lbs.	40 lbs.	50 lbs.	60 lbs.	70 lbs.	80 lbs.
1/16 in	.0597	.0842	.119	.156	.19	.225	.26	.295	.33
⅛ in	.242	.342	.485	.632	.77	.914	1.05	1.19	1.33
3/16 in	965	1.36	1.93	2.52	2 07	3.64	4.2	4.76	5.32
¼ in	3.86	5.45	7.7	10.	12.27	14.50	16.8	19.	21.2

HOT DOMES

DUNN, For Chevrolet Motor Manifolds.

Cast iron, black japanned. Easily installed no change in original controls, all necessary bolts and fittings furnished. Delivers mixture into cylinders in a highly gasified state making easy starting in cold weather. With first explosion a continuous stream of hot exhaust gas circulates through the dome cap. The manifold dome becomes hot and the spray direct from the carburetor nozzle is forcefully thrown against it, effectively broken up, and transformed into dry, highly explosive gas, which accounts for the gratifying increase in mileage.

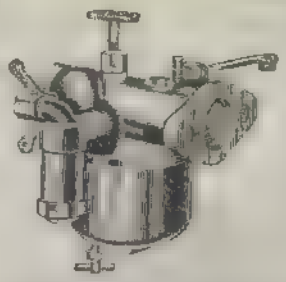
CARBURETORS

KINGSTON, For Ford Cars.
Model L-4-K



Designed and built especially for Ford Cars.

This is a combination of the famous model L-4 Kingston Ford Carburetor, and the New Kingston Fuel Cleaner.

Equipped with improved spray nozzle. This nozzle, which has compensating features throughout the entire range, is provided with an automatic accelerating jet, an improved, patented and exclusive feature, that creates a super carburetor. The added feature is the fuel cleaner, which insures a saving in fuel; functions perfectly under all conditions; means a more flexible motor with quicker pick-up and getaway and gives more power on the hills. Fitted with a new design float, by an improved patented process, and is much the superior of any other float in use. The compensating air valve is made of the best bronze, will not break and wear is reduced to a minimum. By a long series of tests it has been proven that this model will insure increase mileage in Ford Cars.

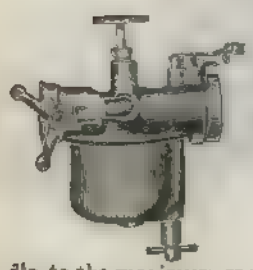
HOLLEY, Model NH—For Ford Cars.



The inlet needle seat is designed as a detachable part which, if damaged, can be easily removed or replaced in a few minutes.

Has a primary air passage so designed that the cold fuel is lifted off the nozzle into the main air stream, thus insuring ease in starting

This model enables to accelerate car from idle to the maximum speed in a few seconds.

The motor can be operated from idle to the maximum speed of 45 miles per hour. These speeds can be obtained without having to change adjustments of the needle valve. The inlet needle is made of special alloy, which is absolutely impervious to the effect of acids or other impurities.

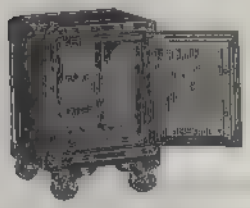
FIRE PROOF SAFES

COLUMBIAN SAFE AND LOCK CO.

The only one piece flanged front and back air chamber Safe in the market. The back and front is a solid one piece, formed by flanging a square steel plate on a powerful machine—the front is then died out, forming the door frame—the door is thus made from the part that has been cut out in making the frame. After this process the front and backs are electrically welded to a solid one piece of sheet steel, which forms the top, bottom and sides, eliminating rivets, etc., which makes as nearly a solid construction as is possible to make, after the filling and inside construction is put in.

An important feature, found in no other make, is an air chamber all around the inside, top, bottom, back and sides of the Safe. This air chamber is made of a double cabinet, one contained in the other, so there is a space of ⅜ of an inch all around. This is done to eliminate a common complaint to which all Fire Proof Safes are subject—that is, dampness, which causes the Safe to sweat, during which process this sweat will go toward the inside, causing the cabinet work to warp. This air chamber makes the Safe doubly strong and secure in case of fire, forming a vacuum, so to speak.

We Guarantee the Columbian Safes to be dry, and the locks and bolts to work smoothly, that the doors will fit—not too loose, not too tight, and that the contents will be protected from fire in any emergency for which a fire-proof safe is intended.



Single outside door fitted with combination locks unless key locks are specially ordered.

Customer's name painted on safes free of charge.

FIRE PROOF SAFES

COLUMBIAN SAFE AND LOCK CO.

With Burglar Chests.

Same general construction as safes [illegible] pages with the exception of being fitted with burglar chests.

The chests are of five-ply steel, the door is hung on crane hinges, closed with lever eccentric pressure. Door and frame is made a tenon and groove style, asbestos packed. The bolt work is double acting, made of 1-inch cold rolled round calendar steel, and securely locked with an unpickable combination lock. The dial and handle are so made that they cannot be driven in or out.

"C-P" Belt Driven Air Compressors

Simplate Concentric-Disc Independent Plate Valve.

Liberal Bearing Surfaces.

Automatic Lubrication.

Automatic Three-Step Capacity Regulation.

Advanced features of design—representing highest development in construction; frame completely enclosed—counter-balanced crankshaft on machines over 6-inch stroke—valves set radially in cylinder which is completely water-jacketed. The extreme light weight and small lift of the Simplate valve results in little wear and long life—rapid and silent operation—high mechanical and volumetric efficiency.

Two Stage Duplex
Two Stage Compound

Quoted upon request.

"C-P" Portable Vertical Gasoline Driven Compressors

The demand for this type of Portable Air Power Plant has grown tremendously amongst Contractors of all kinds, steel Erectors, Bridge-Builders, Public Utility Companies and the like.

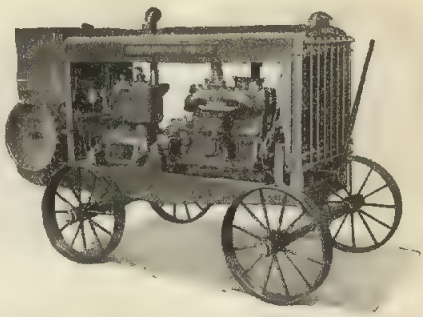
Can be brought to the job quickly and set in operation as soon as the tools can be attached to the hose.

Simple and easy to operate—Skilled attention is not required—Any one who knows how to run an Automobile or truck engine can operate this Compressed air plant.

Will operate Rock Drills, Concrete Breakers, Riveting, Chipping, Scaling or Calking tools, Sand Blast, etc.

Each Unit is Complete in itself—with Compressor, Gasoline Engine, Cooling System, Fuel tank, Air tank with Connections etc. all ready to run.

The Compressor is of the Vertical, Single-acting Duplex type and self-oiling with Simplate flat disc air valves.



100 Cu. Ft. Machine Mounted With Steel Wheels. Note—Frame is a rigid one-piece steel casting has canopy top and steel sides which lock in place.

The Engine is a heavy duty four cylinder with speed governor and starting lever of the ratchet type for easy starting—has more leverage than a crank.

Flexible Coupling between Engine and Compressor except on largest size which has a Clutch.

Cooling—Water, circulated by the engine pump through a cellular radiator of large capacity cooled by a fan, serves to cool both engine and compressor. The radiator core is built in several sections, and is protected by steel bars as shown in the accompanying illustrations.

Regulation -The air supply is regulated by means of the Differential Unloader acting in conjunction with Simplate Unloading Inlet Valves. When the pressure in the receiver reaches a predetermined point the Differential Unloader allows air from the receiver to pass to the Unloading Inlet Valves holding them open and causing the compressor to operate unloaded. When the pressure in the receiver has dropped sufficiently, the Differential Unloader operates, venting the air from the valves and causing compression to be resumed.

An ingenious device, the Auto-Pneumatic Throttle, operating in conjunction with the Differential Unloader, slows the engine down to an idling speed during the unloaded periods and causes the engine to speed up just prior to loading up of the compressor so that the load is picked up by the engine without stalling. Such operation results in an appreciable saving of fuel and increased life of the machine.

Standard equipment includes Differential Unloader with Three-Way Valve, Auto-Pneumatic Throttle, Speed Governor for engine, complete set of wrenches and receiver for maximum working pressure of 125 lbs per sq in. Standard Receiver is satisfactory everywhere except in Massachusetts.

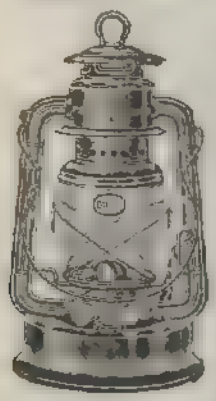
*CP Trailers are regularly provided with springs, solid rubber tires, Timken Roller Bearings and Alemite Lubricating System; also, on all sizes except the 5½x5, with internal drum brakes on the rear wheels.

†When mounted by customer on Ford or other truck, the skids are omitted List price, same as for semi-portable.

LANTERNS

DIETZ
D. Lite.

The short globe type of lanterns with the exposed wick directly accessible for cleaning, trimming and lighting. They can be filled, lighted and regulated without removing globe. Dome shaped solderless oil founts; heavy gauge cross wire globe guards; polished steel bail hooked into patent brass eyelets.



D. Lite, Large Fount.

Bright tin finish; No. 2 Dietz special burner; 1 inch wick; side lift; upright bail.

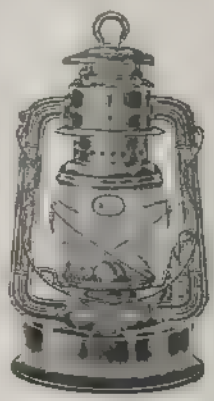
Special features of this lantern are the extra large fount and the patented "Loc-Nob" globe. The globe actually locks fast, and will not drop out when globe holder is tipped back.

Per Doz

No. 2DDL—Height over all with bail down 13½ ins; oil fount capacity 32 ozs; 10 candle power $47 25

(**Sold in full carton lots only.**)

Half doz in carton; wt per doz 42 lbs.



DIETZ

VEHICLE LANTERNS

DIETZ

JUNIOR—WAGON

Used on the side of vehicle, lighting road ahead and showing red danger signal to rear. Black enameled with bright corrugated tin reflector, 2¾ inch magnifying lens in front, 2¼ inch red ruby rear lens, flat side bracket, solderless oil fount; safety wing-lock burner; Dietz Junior globe. Capacity of fount, 13 hours. Gives light of 10 candlepower. In ordering, specify right or left-hand. Fits either flat or round bracket. Flat furnished.

Per Dozen

No. JW—Height, 12 Inches; Size of Wick, ⅝ Inch, Weight per Dozen, 60 Lbs. **$26.85**

One-half Dozen in a Case

ROADSTER—WAGON

A handy driving lantern of the cold-blast type. Equipped with a Little Wizard short globe which admits of easy cleaning; 2¼ inch ruby rear lens. Strongly constructed of tin, black enameled. It has a large oil fount and burns 20 hours on a filling. Throws a 10 candlepower light ahead and complies with the law by showing a red danger signal to the rear. Regularly furnished with a flat bracket, but will also fit round lamp bracket; made left-hand only.

Per Dozen

No. RW—Height, 11½ Inches; Size of Wick, ⅝ Inch, Weight per Dozen, 60 Lbs. **$28.25**

One-half Dozen in a Case

EUREKA—DRIVING AND PARKING

For light vehicles. Highly dependable small lantern with a ruby rear lens. Also used as an automobile parking lamp to save battery. The bail makes this lantern a convenient portable lamp for reading sign posts or in case of mishap on the road. Made of cold-rolled steel, black enameled with nickeled door rim; plain lens. Fount capacity, 10 hours. Specify right or left-hand.

Per Dozen

No. ED—Height, 7¼ Inches, Weight per Dozen, 26 Lbs. **$26.85**

One Dozen in a Case

OCTO—DRIVING AND PARKING

Medium size, sturdy cold-blast type. Insures steady burning of powerful white light, despite jars and jolts. Has 2¼ inch ruby rear lens and 2⅝ inch plain, door lens, positive locking oil fount and nickel plated brass burner, handy bail for portable use. Fitted with double sockets for right or left hand use. Cold rolled steel body is enameled black with nickeled door rim. Fount capacity of 10 hours and 30 candlepower light.

Per Dozen

No. OD—Height, 10¼ Inches; Size Wick, ¾ Inch, Weight per Dozen, 32 Lbs. **$56.30**

Type-Registering Beam

Warehouse Pattern

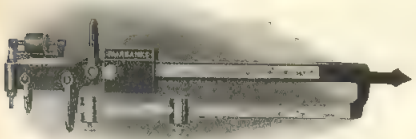
For some conditions of service it is often necessary or desirable to have one or more printed records of weights taken on a warehouse scale. Such records may be of great value throughout the various departments of a business, in figuring manufacturing or transportation costs, or in checking incoming shipments, their importance lying in the fact that the figures must be accurate and authentic, for any error of the weighman in reading or recording is positively avoided with this beam.

The beam is graduated to 1,000 x ½ lbs., up to which capacity it may be used by itself. For higher capacities, a registering counterpoise is used with 1,000 pound weights to make up the full capacity of the scale. This combination gives a complete and authentic record of the weight at any point up to the full capacity.

A special type registering ticket is provided to be inserted first in the counterpoise slot, where it receives the "thousands" figure, and then in the beam slot, where the record is completed giving the entire weighing as one figure. These slots are designed so that the ticket must always show this complete figure in proper sequence without chance of error.

The beam is of the *arrow-tip* pattern, handsomely finished with brass parts all nickel plated, making an attractive and durable outfit.

It may be furnished on any Fairbanks Warehouse Scale at an extra charge of $200.00. Type-registering beams may also be furnished for scales of higher capacity, listed upon other pages.



Full Capacity or Compound Beam

for Dormant Warehouse Scales

In some locations it is especially desirable to be able to weigh up to the full capacity of a scale without the use of loose weights. The time lost in handling such weights along with the possible error in computing their value often suggests the use of a full capacity beam as illustrated above.

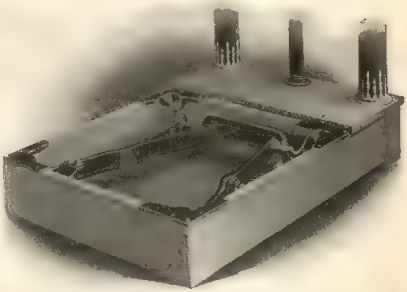
This beam has an upper bar with inlaid brass plate graduated according to the full capacity of the scale. The lower bar, entirely of brass, consists of a tare beam on the right, graduated to 350 x 2 lbs. and a fractional beam on the left graduated to 100 x 1 lbs. for all capacities. This design allows of the utmost accessibility for convenient weighing and gives any desired weight to one pound.

The beam is carefully made and each notch individually sealed with great precision. The graduated brass face is highly polished, the lower beam having brass poises with set-screws. Beam is of the *arrow-tip* pattern.

This beam may be furnished on any Fairbanks Warehouse Scale at an additional list price of $40.00.

Warehouse Scales

Regular Construction of Self-contained Scale



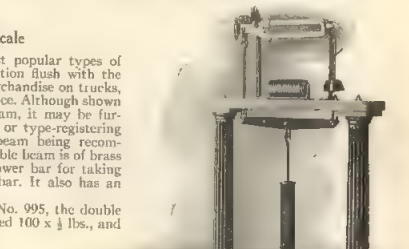
Special care has been taken to make this scale conform in every detail to the specifications and requirements of all government regulations relating to weights and measures. These features include the mechanically operated balance ball, *arrow-tip* beam, steel pivots and hardened bearings, marked nose-iron position, platform check, and a number of other special details.

In the illustration above may be seen the manner of completely enclosing the scale mechanism in a wooden box which makes this scale *self-contained* and adapted to being set directly in the floor, with its platform on the floor level. The original Fairbanks lever system is here used, the levers being suspended by means of staple loops from corner irons firmly held on top of the box.

The bearings are all of finely tempered steel especially hardened to meet the diamond-like hardness of the pivot edges, and thus to form an ideal bearing contact. The body of the pivot under Fairbanks treatment becomes a softer and tougher mass, backing up the bearing surface with a resilient cushion that absorbs the hard shocks of everyday use and thus helps to retain the fine accuracy of this scale.

This system of suspension, coupled with the easy lines of the levers themselves, the natural rest of the platform upon them, the high quality of materials used throughout, and the fine care with which all parts are made and fitted makes this a scale that is dependable because built to anticipate and overcome the effects of the hard usage of heavy weighing. All scales are finished durably and attractively and well varnished for protection.

Regular Self-contained Scale



This scale is one of the most popular types of self-contained scales for installation flush with the floor, to weigh heavy, bulky merchandise on trucks, grain in sacks, or for similar service. Although shown above with *arrow-tip* double beam, it may be furnished with full capacity beam or type-registering beam as desired, the double beam being recommended for general use. The double beam is of brass with brass set-screw poise on lower bar for taking tare and plain poise on upper bar. It also has an index counterpoise.

On all of these scales except No. 995, the double beam has the upper bar graduated 100 x ½ lbs., and the lower bar 200 x 1 lbs. On No. 995 the upper bar is graduated 100 x 1 lbs., the lower bar 200 x 1 lbs.

Durable and attractive finish, well varnished for protection.

No.	Capacity	Platform	Platform to Beam Support	List Price with D. B.
995	6,000 x 1 lbs.	60" x 54"	21"	$365.00
1035	5,000 x ½ "	48" x 49"	23"	260.00
1039	3,500 x ½ "	42" x 44"	12½"	195.00
1041	2,500 x ½ "	42" x 37"	12"	176.00
1043	1,500 x ½ "	43" x 33"	15½"	169.00

Note.—In the platform sizes above, the first figure is the dimension parallel with the beam.
Extra for Compound Beam **$40.00** Extra for Type Registering Beam **$200.00**

Warehouse Scales

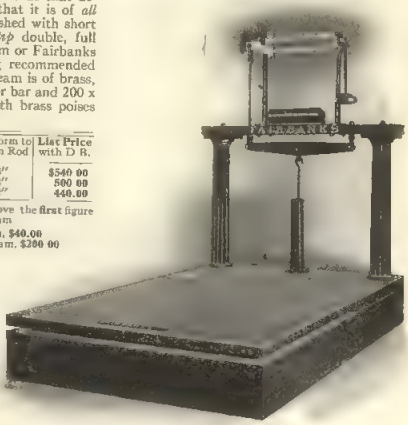
SELF-CONTAINED, ALL-METAL, SUSPENDED PLATFORM SCALE WITH SPIDER AND REMOVABLE PLATFORM

This scale is exactly the same as that described on page 25, except that it is of *all metal* construction. It is furnished with short iron pillars and with *arrow-tip* double, full capacity, type-registering beam or Fairbanks Dial, the double beam being recommended for general use. The double beam is of brass, graduated 100 x ½ lbs. on upper bar and 200 x 1 lbs. on lower bar, fitted with brass poises and index counterpoise.

No.	Capacity	Platform	Platform to Beam Rod	List Price with D. B.
10694	5000 lbs	48" x 49"	23"	$540 00
10695	3500 "	42" x 44"	12"	500 00
10696	2500 "	47" x 37"	12"	440.00

Note.—In the platform sizes above the first figure is the dimension parallel with the beam

Extra for Compound Beam, $40.00
Extra for Type Registering Beam, $200 00



SELF-CONTAINED PORTABLE SINGLE WOOD PILLAR

The above scale in addition to being portable, combines every practical feature required for the weighing of heavy bulky loads for warehouse, factory, or similar service. It is, in fact, a regular Fairbanks Self-contained Scale with single wood pillar, built strong, and with large platform to accommodate the average warehouse loads.

Wheels are regularly furnished. The *arrow-tip* beam is regularly single, of brass, graduated 100 x ½ lbs. with brass set-screw poise.

Finish, durable and attractive in blue and gold, all well varnished for protection.

No.	Capacity	Platform	Platform to Beam Support	List Price
1018	5,000 x ½ lbs.	48" x 49"	23"	$268.00

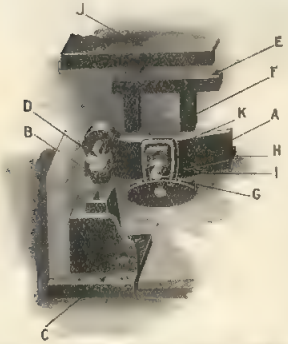
Note.—In the platform sizes above, the first figure is the dimension parallel with the beam.

Warehouse Scales

SELF-CONTAINED SUSPENDED PLATFORM SCALE WITH SPIDER AND REMOVABLE PLATFORM

This design of self-contained scale embodies the most modern, practical and desirable features ever offered for accurate and convenient weighing of heavy, bulky merchandise. The illustrations below show how the main levers (A) are supported from castings (C) built in at the corners of the box. Self-aligning bearings (B) insure the knife-edge (D) having a contact always its full length.

Over the main bearing knife-edges (I) are imposed bearing blocks (K). Encircling and suspended from bearing block is link (H), from which is suspended rocker casting (G), designed to receive the corner lugs (F) of sub-frame or spider (E). The platform proper (J) rests on sub-frame and the manner in which the parts assemble and the load is applied to knife-edge is apparent from illustration. The platform is, therefore, *suspended from* and not *imposed upon* the main knife-edges, insuring all lateral motion being absorbed before reaching the knife-edges.



The extreme platform movement is controlled by limit checks, the suspension principle of construction preventing any scraping of the bearings. A view of the assembled lever system is shown here.

The platform merely rests upon the spider (E) and may be easily lifted off for cleaning or inspecting the lever system.

This scale is adapted for installation directly in the floor, with the platform flush with the floor level. It is furnished with short iron pillars regularly and with *arrow-tip* single, double, full capacity (see page 28), or type-registering beam (see page 28) or Fairbanks Dial, the double beam being recommended for general use. The double beam is of brass, graduated 100 x ½ lbs. on upper bar and 200 x 1 lbs. on lower bar, fitted with brass poises and index counterpoise.

No.	Capacity	Platform	Platform to Beam Support	List Price with Double Beam
10080	5,000 x ½ lbs.	48″ x 49″	23″	$325 00
10081	3,500 x ½ lbs.	42″ x 44″	12″	270.00
10082	2,500 x ½ lbs.	47″ x 37″	12″	245.00
10083	1,500 x ½ lbs	43″ x 34″	13″	225.00

Note.—In the platform sizes above, the first figure is the dimension parallel with the beam.

Extra for Compound Beam	$40.00
Extra for Type Registering Beam	200.00

FIREWORKS

Our fireworks are absolutely the best and most profitable you can handle, every piece of the very highest merit.

CHINESE FIRE CRACKERS

These crackers are imported direct from China, and extraordinary care is taken to maintain the highest standard of quality possible for popular priced fire crackers so much in demand.

LAWN MOWERS

COLDWELL, DEMOUNTABLE, HORSE DRAWN

Frame construction is reinforced at each end with heavy steel bars. All parts are accurately machined and fitted. Equipped with double triple pawl rachets between rollers, adjustable split bronze bearings and a simple mechanism which throws the revolving cutters in and out of gear. Cutter section is made into a unit which is independent and removable from frame of mower. This unit itself consists of a frame containing the revolving cutter, bottom knife and adjustments, all this is attached to main frame and held securely in place by four locking screws.

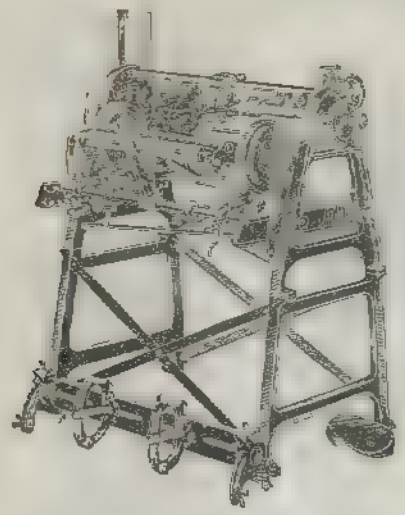
LAWN MOWER SHARPENERS

IDEAL



Angle iron frame construction. Aluminum grinding wheel carried on a ball bearing hub by an arm with bearings on the main shaft. The arm is counterbalanced by a weight at rear of machine and the grinding wheel is free to move up and down, carried along main shaft by feed screw and sliding head. The main driving shaft is special steel, ground and polished, key seated so as to drive the hub mounted between the bearings of arm. Hub carries a sprocket which drives grinding wheel by means of a steel chain. ¾ inch feed screw carried on babbited bearings, driven by a round leather belt over large sheave pulleys. The feed is thrown in and out by means of an improved belt shifter which locks itself in either position.

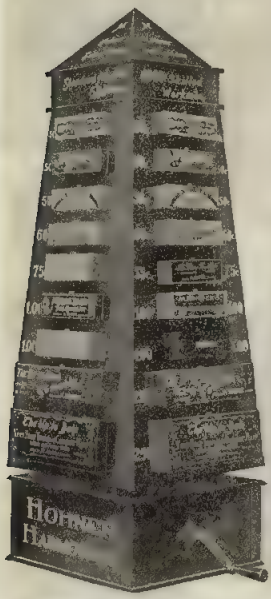
ASSURED SATISFACTION

Your orders are appreciated and will be handled with greatest care.

Every Retail Store Should Have This Harmonica Assortment!



This is just the assortment You need

Here is a Big, Beautiful Revolving Display Stand that will sell Harmonicas for You. Solidly Constructed of Wood, Finished in Dark Mahogany, it will Lend Dignity to Any Store. In the Base Compartment is a Well Constructed Motor that Revolves the Obelisk for 3½ Hours with one Winding.

The display or obelisk stands 32 inches in height and measures 10¾ inches square at the base. It is neatly decorated with attractive silver pressings and stenciled with the number and retail price of the Harmonicas which it carries. By means of steel clamps and supports, 36 genuine Hohner Harmonicas in the keys of A, B, C, D, E, F, and G to retail at from 50 cents to $2.00 each, are fastened to the obelisk. These instruments are in a variety of twelve different styles, each one of them being an excellent seller.

You secure the complete stand and 36 of the world-famous Hohner Harmonicas as follows:

16 Asst. Harmonicas retail	$0.50	$8.00
4 Asst. Harmonicas retail	.60	2.40
8 Asst. Harmonicas retail	.75	6.00
2 Asst. Harmonicas retail	1.00	2.00
4 Asst. Harmonicas retail	1.50	6.00
2 Asst. Harmonicas retail	2.00	4.00
Total Retail Value		$28.40

The New-Day Jewett Sedan

HERE is the car you sell—the remarkable New-Day Jewett Sedan at only $995. Truly a new-day car for new-day needs.

Built into this car is typical Jewett performance—typical Jewett power and speed and safety—with an economy of operation almost 20% greater than any former Jewett.

It has Paige Hydraulic 4-wheel brakes and it is the only car selling at or near its price that offers hydraulic brakes as standard equipment.

The New-Day Sedan is the roomiest car of its type in the world—its steel body provides maximum safety and maximum visibility. The deadly "blind spot" has been almost completely eliminated. And a wide expanse of clear glass affords unobstructed vision in every direction.

Finished in durable, long-lasting lacquer—in two beautiful shades of color—here is a car that could readily be sold on any one of its many New-Day features. It could be sold on its appearance—on its quality—on its performance—or on its price.

Think—then—of the unparalleled opportunity that awaits the dealer who can sell a car that so fully and completely embodies each *and every one* of these desirable and essential qualities!

You Can

a More Sound, More Permanent with the New-Day

JEWETT'S SEVENTEEN-YEAR SUCCESSFUL HISTORY INSURES PERMANENCY; JEWETT QUALITY AT NEW LOW PRICES INSURES VOLUME—AND VOLUME INSURES LARGER PROFITS.

RELENTLESS WAR wages in the motor car industry.

It is the age-old fight for survival—for life!

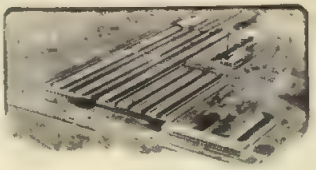
Every year, this fight takes new toll of the weak and the struggling, and business re-concentrates itself in the hands of fewer and fewer makers.

Think of it—today 94% of all the world's motor cars are built by only 14 manufacturers. And the other 6% are split up among 53 builders.

Look you, then, first to the organization—to its history, its prestige, its reputation, its soundness, and its permanency—you who would establish a sound and permanent business of your own.

The financial strength of the Paige-Detroit Motor Car Company is unquestioned. Its assets today total more than $17,000,000. Its cash resources (Sept. 25, 1925) were $4,800,000.

It has never built an inferior car—never known an "off year"—never suffered a financial reverse. It has never been reorganized—and never refinanced.



A veteran, unchanging personnel has from the beginning directed Paige and Jewett policies. President Harry M. Jewett, as well as the heads of every important company division, have been on their respective jobs since this organization was founded seventeen years ago.

So much for Paige-Jewett *permanence*—for Paige-Jewett *personnel*—and for Paige-Jewett *policies*. Paige-Jewett has also a *plant* that surpasses any in the industry.

In its great new factory at Detroit, 1,100,964 square feet of floor space is scientifically planned, adequately equipped and skillfully manned to produce normally 500 quality cars per day.

No other manufacturer of motor cars today can offer a franchise backed with a *prestige*—a *permanence*—a *personnel*—a *plant* and a *product* that equals those of Paige-Jewett.

Scores of automobiles have come and gone in the seventeen years of Paige-Jewett growth. But Paige-Jewett deal-

Establish
and More Profitable Business
Jewett Franchise!

ers have made money during these seventeen years.

This year and next, Paige-Jewett dealers are going to do a better business and a more profitable business than they have ever done before. For Paige has built a new car. Not only a new car, but an entirely new type of motor car—the New-Day Jewett.

So widespread is the interest in this New-Day motor car that it seems needless to refer to it at great length in this message. Surely there is not a motor car dealer in all America who does not now know how completely and satisfyingly this New-Day car meets and masters every new day need.

And surely there is not one of these dealers who does not appreciate what a tremendous widespread demand will everywhere be created for this remarkable new car. Priced at only $995—this New-Day Jewett instantly appeals to a much wider market than any earlier Jewett. On price alone, it bids for business among those to whom price is a matter of major consideration. And on quality alone—on its adaptability to new-day driving needs—it appeals to those to whom price is of no consideration.

Note the wide, unobstructed vision from the driver's seat; the roomy comfort everywhere!

And we who have watched the motor car industry with microscopic care for 17 years—we who are vitally concerned not only with our own success but with the individual success of each and every one of our dealers—we honestly believe that the new Paige-Jewett line will offer the dealer fortunate enough to secure the franchise, an unparalleled and unequaled opportunity to establish not only a sound and permanent business—but about the most profitable kind of business possible to establish in motor cars.

$20,000,000 have been spent in advertising to make the Paige and Jewett names well and favorably known wherever cars are sold and driven. This year new millions will be spent!

And last — but not least — Paige-Jewett offers this year a "Time Payment Purchase Plan" with rates as low as any other in the entire industry—and with many unique and desirable features not found in any other plan.

The Paige-Jewett dealer has back of him a prestige and permanence without equal—he has a product that can meet and conquer any competition—and he can sell this car on a payment plan as desirable and as inexpensive as any other in the industry.

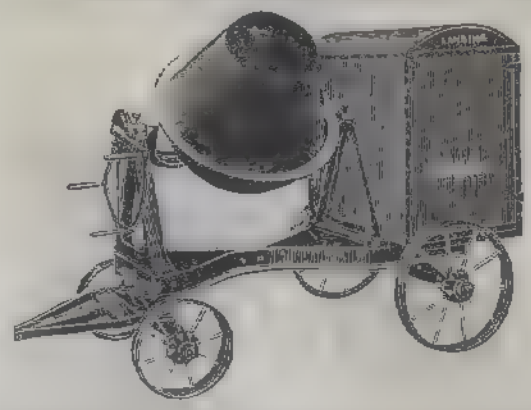
CONCRETE MIXERS

LANSING, BRONCHO SPECIAL



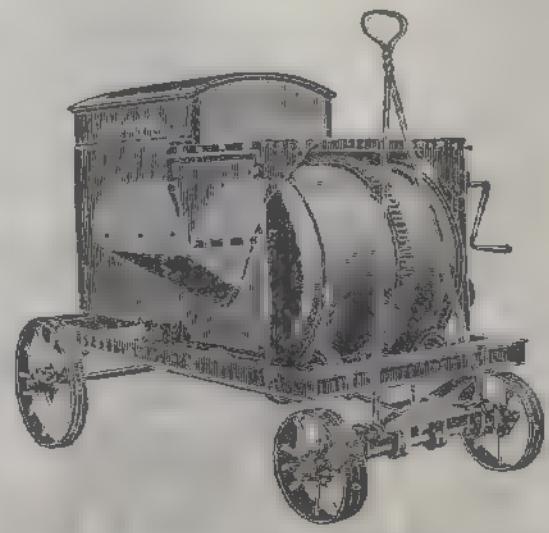
The Broncho Special is a popular mixer which can easily be moved about from one job to another. It is a general utility machine and suitable for mixing common concrete, cinder concrete, top dressing or cement or lime mortar. The cost of operation is very small

The engine and all sprockets and chain are completely housed in steel. With every mixer is included a 2 H. P. engine, steel housing and draw pole.

For Data see Page 371.

	Each
No. 5BS Wt each about 1500 lbs	✣$849 00

LANSING, WITH STANDARD WHEELBARROW HOPPER



The compact, sturdy, substantial construction of this mixer insures against its being racked to pieces in long hauls over country roads or city pavements.

All bearings supplied with compression grease cups. Guards over exposed working parts. Trucks finished in black paint, balance of mixer two coats gray. A complete set of necessary tools furnished with each mixer

For Data see Page 371.

	Each
No. 5WSWH—Wt each about 1800 lbs	✣$1125 00

✣**F. O. B. Michigan Factory Only.**

CONCRETE MIXERS

LANSING, WITH POWER SIDE LOAD AND WATER TANK

This mixer is a great labor and time saver. It nearly doubles the output, as one batch is prepared while the other is mixing. There is no lost time, no waiting, as one batch follows another through the drum in quick succession.

The water tank is of the open type and 11 gallons capacity. It automatically measures the amount of water required for each batch.

The side loader is of the improved pivoted type. Open end skip, 36 in. wide. Skip lifted by double line cable, running over two steel pulleys at top of mixer frame. Skip bale drops back out of way when loading.

The drum is non-tilting type, gear driven and provided with splash rings to prevent spilling. Mixing blades, seven. Discharge buckets, five.

All bearings supplied with compression grease cups. Guards over exposed working parts. Trucks finished in black paint balance of mixer two coats gray. A complete set of necessary tools furnished with each mixer.

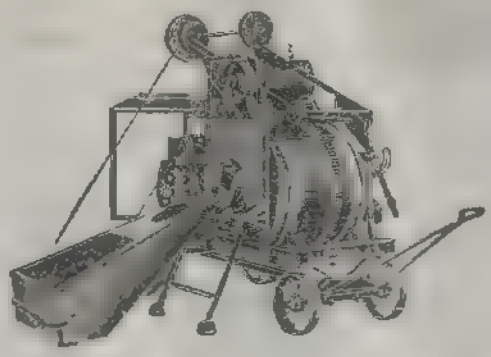
For Data see Page 371.

Each

No. 5PSL—Wt each about 2000 lbs ..... +$1584 00

CONCRETE MIXERS

LANSING, WITH POWER SIDE LOAD AND WATER TANK



This mixer is well balanced and handles a bag of cement at each batch. It is deservedly popular on small and medium sized jobs, where the expense of moving and operating a larger mixer is prohibitive. For convenience of operating, the levers are grouped. One man, without changing his position, readily attends to the charging, discharging and water supply.

The mixer drum is of the non-tilting type, gear driven; cast semi-steel heads joined by heavy boiler plate steel,

Pivoted type discharge chute, No. 10 gauge carbon steel. Discharges 10 to 12 seconds.

Improved pivoted type side loader. Closed end skip, 37 inches wide.

Water tank is positive measuring; capacity 12 gallons.

All bearings supplied with compression cups. Guards over exposed working parts. Trucks finished with black paint, balance of mixer two coats gray. A complete set of necessary tools furnished with each mixer.

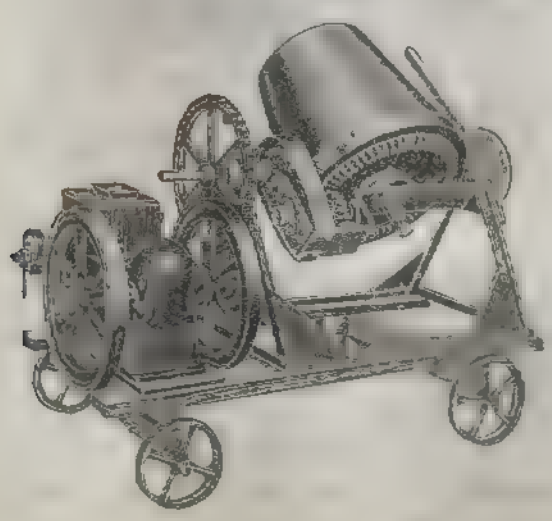
For Data see Page 371.

Each

No. 7-S—Wt each about 3000 lbs ..... +$2250 00

CONCRETE MIXERS

LANSING, BRONCHO JR.



A popular mixer that can be easily moved from one job to another. Suitable for mixing common concrete, cinder concrete, top dressing or cement or lime mortar.

Can be easily cleaned.

The three mixing wings are raised from the surface of the drum, doing away with the sharp angles that would catch concrete. A pail of water at the end of the day cleans the mixer.

A 1¾ H. P. engine, magneto and draw pole or tongue is included with each mixer.

For data see page 371.

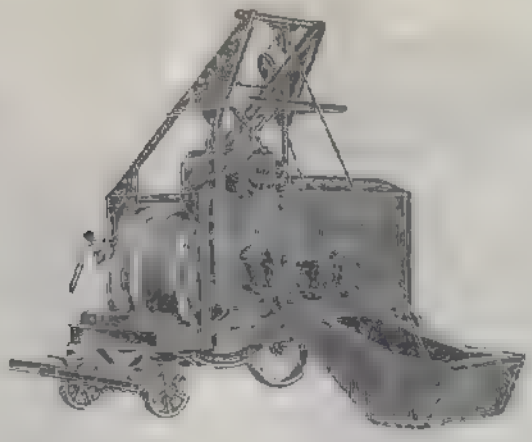
Each

No. 3BJM—Wt each about 650 lbs..... +$480 00

+F. O. B. Michigan Factory Only.

CONCRETE MIXERS

LANSING, WITH POWER SIDE LOADER AND WATER TANK



A single cable draw operates the loader. This increases speed of charging, reduces friction and eliminates multiplicity of cable and pulleys.

Pivoted type discharge chute of 10 gauge carbon steel; 10 gauge blue annealed steel batch charging hopper; 10 gauge blue annealed steel side loader, heavily reinforced.

Automatic closed pressure type water tank, 20 gallon capacity; tested under 125 lbs. working pressure.

All bearings supplied with compression grease cups. Guards over exposed working parts. Trucks finished in black paint, balance of mixer two coats gray. A complete set of necessary tools furnished with each mixer.

For Data see Below.

Each

No. 10—Wt each about 4000 lbs ..... ✦$3030 00

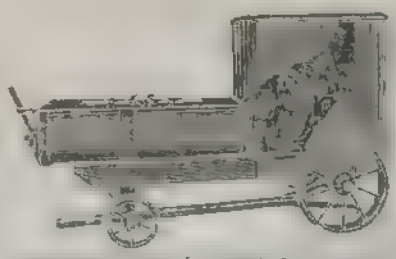
MORTAR AND PLASTER MIXERS

LANSING



Architects, contractors and builders are realizing that hand mixed mortar is a thing of the past. Where economy and quality are important, the mortar mixer has taken the place of the hoe and the old wooden mortar box. The product is improved, [illegible] is avoided and [illegible] per cent of the cost is saved.

Powerful I. H. C. engine is furnished, with machine cut gears, friction clutch, driving chain, etc. All bearings babbited, insuring a smooth running machine, engine and transmission suitably housed.

The trough is of large capacity so as to provide for plenty of storage space for accumulation of mortar when not being taken out.

The method of mixing mortar is to shovel in three or four shovels of sand at the head of the trough, a shovel of lime [illegible] to [illegible] and all the cement. This operation is continued as long as material is called for. The quantity of water can be gauged by the valves on the spray [illegible] The proportions of material can of course, be changed to suit any work.

Justrite Carbide Lamps

For Campers, Miners, Contractors, Hunters, Etc.

No. 407

Carbide Cap Lamps

Nos. 407 and 661

Made of brass. Height, 3 inches. Have self-lighter attachment. Burn 2½ hours on 2 oz. charge of carbide. Weight, 5 oz. each.

Price, each $1.25

No. 661

Hand Lamps

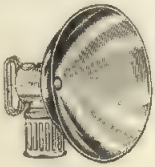
Justrite hand lamps are very useful for inspection purposes as well as for campers. They have folding handles and reflectors which throw a large volume of light. The No. 39 lamp has a 7-inch, highly nickel plated reflector and the No. 95 has a 3-inch nickel plated reflector. Both lamps are all nickel plated and are packed one each in a cardboard box.

No. 39 Lamp

Burning capacity, 4 hours on 3 oz. charge of carbide.

Height, inches	7
Diameter of reflector	7
Weight, ounces	9

Price, each $3.00



No. 39

No. 95

No. 95 Lamp

Burning capacity, 4 hours. Equipped with No 170 flame protector. Charge, 3 oz. carbide. Height, 4¾ in. Weight, 7 ounces.

Price, each $2.50

No. 12 Carbide Lantern

This lantern is dependable in every way and is a great favorite with sportsmen. Gives a bright, penetrating 20 candle power light, burns 3 to 4 hours with 3 ounces of carbide, flame is controlled by valve and can be turned high or low or extinguished as desired. Highly nickel plated, equipped with detachable bull's eye lens and reflector. Equipped also with self lighting attachment—no matches required, no complicated parts to get out of order and easy to operate.

Superior to any portable light in cleanliness, safety and candle power, no smoke or grease, will not blow out.

It has proven its efficiency and has no peer for lighting the camp, motor boating, canoeing, hunting, fishing and going thru the woods and in fact for all outdoor lighting it is invaluable.

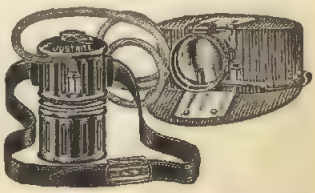
Can be packed with the camping outfit or in the trunk without danger of spoiling food or clothing.

Price, each $6.00

Justrite Headlight

The perfect light for general out-door work at night. The light, being worn on the cap, leaves both hands free for any work. It is one of the most practical head lights made. The light weighs only 5 ounces and having a self-lighter attachment, no matches are required. It has a strong rubber hose, steel generator, and a burning capacity of 5 to 6 hours. The belt is included with the outfit, but cap and special concentrating lens must be purchased extra.

Price, each $6.00



Carbide

For use in all lamps. Put up in 2-pound cans.

Price, per can $0.40

100-pound drums. Price, per drum 7.00

"Nulite" Gasoline Lanterns

Make and Burn their own Gas from Common Motor Gasoline Generate and Light with a Common Match

It produces a 400 candle-power light (equal to twenty ordinary kerosene wick lanterns) continually for 13 hours on one filling—one quart of common motor gasoline—costs only one cent a night for 3 hours' burning.

Lantern is the highest development in a portable outdoor light. Built as it is to withstand the hardest use and under the most trying weather conditions it is really a lighting marvel for city, town and country.

Unaffected by high wind, rain, snow and sleet, it can be carried right through the fiercest storm.

Ideal for the farmer, ranchman, planter, dairyman, poultryman, and truck-gardener for night and early morning choring in the barn, milk-shed and feed lot used extensively by warehousemen, night-watchmen, liverymen and hotel-keepers just the thing for campers, travelers, hunters and sportsmen—popular for chautauquas, camp-meetings, shows, carnivals—splendid for street lighting in small towns and summer resorts.

Price, Each $10.00

"Oliver" Motor Driven Saw Bench

No. 2807

Will cut 2" deep with a 7" diameter saw, dado heads 3/16" wide can be used, which should be 6" diameter.

Table is of cast iron 21" x 24", with metal throat piece easily removable; has grooves on either side of saw for cut-off gauges and milled out slide in front for ripping gauge; tilts up to 45 degrees and is instantly locked by hand knob.

Saw arbor is of crucible steel, machine ground, 1/2" diameter where saw is applied, runs in **ball bearings.** Speed about 5,000 R.P.M. Is carried in a vertically adjustable yoke.

1/2 h.p. motor, about 1,800 R.P.M. mounted on a swinging bracket and has arrangement for keeping the proper tension on the belt

"Combination" Wood Frame Saw Bench

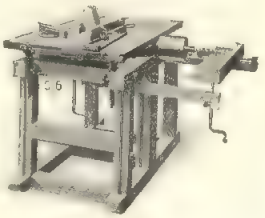
Our "Combination" Wood-frame Saw Bench shown here is intended for ripping and cutting off and may be fitted with a boring attachment also when desired.

The Frame is made of 3 1/8" x 3 1/8" seasoned hardwood, accurately fitted and securely bolted together, insuring rigidity and durability. The top is 54" x 30" and is made of iron. It is hinged at the rear and may be raised and lowered by the hand screw and firmly clamped in any position.

The ripping gauge tilts to any bevel, and has rapid, fine adjustment. The cut-off gauge slides in a groove the entire length of the table and can be set to cut square or angles up to 45 degrees.

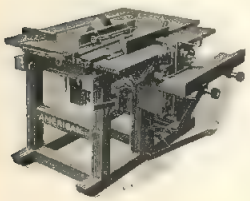
Regularly furnished with one each 14" rip and cut-off saws; but saws up to 20" can be used

Boring attachment has a travel of 6" in line with spindle and 3 1/2" vertical adjustment, and weighs, alone, 50 lbs.



No. 2808
With Iron Top

Contractors' Portable Variety Woodworker



No. 2809

With Self-Contained Gasoline or Electric Power

It's a rip saw, a cut-off saw, a mitre saw, a dado machine, a gaining machine, a jointer or planer, a boring machine, a matcher, a molder, a sander—all self-contained with jig saw attachment.

Frame is made of 3 1/8" x 3 1/2" seasoned hard wood; top is iron, 54" x 30", accurately planed, and raised by hand screw. It is independent of the jointer table and neither interferes with the other.

Adjustable ripping and cut-off gauges are provided

Boring table travels 6" in line with the spindle, with 3 1/2" vertical adjustment.

Sawing, jointing or planing, boring and scroll sawing, can all be done at once by four different persons, without interference or making any change in the machine.

"Oliver" Variety Saw Bench

Front View of Belt Driven Machine with Mortising and Boring Attachment

No. 2804-80

Meets modern demands in production of variety woodwork, wood patterns, furniture, automobile bodies, carriage bodies, agricultural implements, and other high grade wood work. It is a favorite in technical and manual arts schools. It will rip, cross cut and dado. It will cut a perfect mitre, measure any angle instantly and accurately, cut off to length or rip to width —all without the operator doing any previous calculating or referring to a rule. All parts are interchangeable.

Machine will rip to 23" wide and cut-off 32" wide by use of universal ripping table; will rip 27" wide and cut-off 15" wide by use of plain table; will cut up to 3" thick with 14" saw, or 4" thick with 16" saw. Will work dados up to 4" wide and carry saws to 18" diameter. With mortising and boring attachment will bore holes 6" deep up to 2" diameter, will mortise holes up to ¾" square and 4" deep.

Variety Saw

No. 2805-275

The great variety of work to which this machine can be adapted, the precision and accuracy with which it can be handled, the convenience of adjustment, strength and durability of all its parts, particularly recommend it.

The table is 48" x 38". A removable wood throat plate 9" x 23" surrounds the saw.

To tilt the table the sliding gauge is clamped to the bar with index pointer at the required degree, the lower clamp released, and the table when tilted will stop at the desired angle. Table tilts 45 degrees.

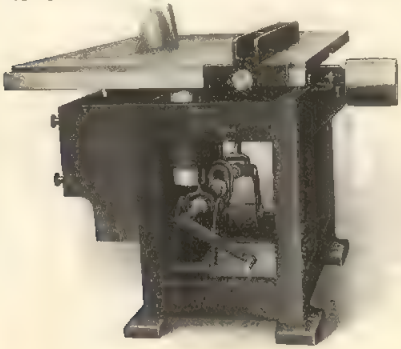
The rip gauge can be set 20" from the saw.

The cross cut gauge is graduated to cut from 0 to 45 degrees either way and can be securely clamped. A 14" saw will cut stock 4" thick. 18" saws can be used.

One 14" saw, either rip or cross cut, one rip and one cross cut gauge supplied with each machine.

Tight and loose pulleys 10" x 6". Speed 650 R.P.M.

H.P. 5 to 7½.



"Oliver" Hand-Feed Rip Saw-Table

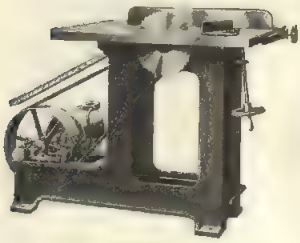
No. 2806-45

This machine has been designed especially for general utility purposes. Its adaptability for either light or heavy work is its main feature.

Will take a saw 26" diameter that will saw to 9" in thickness. A 18" saw projects 5¼" through the table. Extreme distance between saw and fence, 26½"

H.P. 5 to 10.

Saw-Table



No. 2800-1

A machine that is well suited for shop and factory use. Being very compact, it is also well suited for use in packing-room of mercantile establishments for sawing box and crate material.

The ripping fence will tilt to any angle to 45 degrees for bevel sawing.

It opens 19" from the saw, and a scale is provided showing width to be ripped.

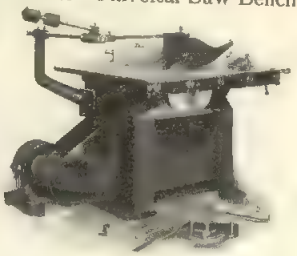
The cut-off fence adjusts for any angle.

The table is of cast iron 30 x 38". It is hinged at back, and has wooden throat-piece to suit for grooving.

Saws up to 14" may be used.

A 12" saw will saw through a piece 2½" thick.

"Oliver" Universal Saw Bench



Universal Saw Bench Showing Self Contained Motor Drive

No. 2801-60

A modern and efficient double arbor rip and cross-cut Saw Bench

Capacity: Will rip to 26" wide, will cut off to 36" wide up to 1½" thick, 16' Saw projects through the table 4¾", can use saws 20" diameter but only one at a time. 16" Saws are sent with machine, table throat opening 14½", horse-power does not exceed 5.

No. 2802-90

This Saw Bench fills a demand for a somewhat smaller machine than our **No. 60** saw bench. The two principal points of difference being a smaller table top and 14" instead of 16" saws.

Capacity: Machine will rip 26" wide, cut off 34" wide up to 1½" thick. 14" saws project through the table 4". Can use one saw 18" diameter not revolving the yoke. Will work a dado 4" wide. Table throat opening, 4". Horse-power does not exceed 5.

Combination Saw-Table

No. 2803-2

This machine is excellent as a rip-saw table; it is equally handy for grooving, rabbeting, beveling, cutting off, etc

The table tilts to any angle up to 45 degrees by means of a handwheel and worm-gear.

The fence opens 20" from saw, and a graduated scale on front edge of table shows width to be ripped

The fence can be used on either side of the saw, when used on right side of saw, it will tilt to 45 degrees, when used on left side, the fence will not tilt

An adjustable cut-off fence with scale is also provided for cutting off square, or to any desired angle

A 12" saw will cut through a piece 3" thick. Saws larger than 14" cannot be used. A groover-head 2" wide can be used, and it requires a head 8" in diameter to groove 1" deep.

Boring attachment with wood table and self-centering chuck can be furnished with this machine.

POPE-MADE BICYCLES

The "Pope-made" Line of Bicycles have Several Outstanding Features Making for Unusual Strength and Durability. The Steering Head is Possibly Subjected to More Severe Strain than Any Other Part of the Frame Unusual Strength is Secured at this Point by Means of a Spun Head Construction Eliminating Two Joints. The Main Frame Tubes are Cut to Correct Lengths and the Ends are "Spun" Directly into the Frame Head. The Hanger Bracket is "Drawn" by Special Process so as to Retain Correct Frame Alignment The Pope One-piece Hanger, Used Without Change for More than a Generation is Still Used. All Bearings are Subjected to Rigid Inspection and so Treated as to Give Them the Greatest Wear-Resisting Qualities.

WILLIAM PENN

Roadster

FRAME—22".

FORK—Forged Crown.

GUARDS—Wide Drop Side with Special Flare on Front. Riveted Braces. Red Jewel Reflector on Rear.

RIMS Standard Wood Rims, Enameled to Match Frame

SPOKES Rustproof Spokes with a Tensile Strength of 160,000 Lbs. to the Square Inch.

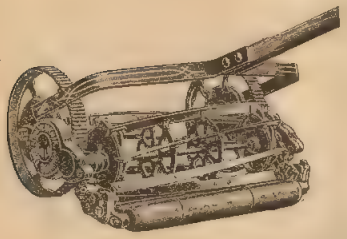
PENNSYLVANIA LAWN MOWERS

PENNSYLVANIA GOLF

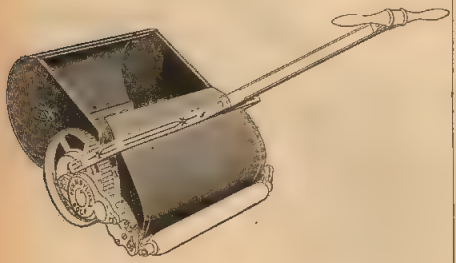


The Pennsylvania Golf is a high grade, high wheel, ball-bearing mower especially adapted for golf links, tennis courts, bowling greens and cricket creases. Can be adjusted to cut ⅜ of an inch, practically shaving the lawn. Runs smoothly and does not tip up. It is equipped with 9½-inch wheels, seven blades, made of crucible tool steel, oil hardened and water tempered. Has double train of gears and extra length of wheel base. Bottom knife has raised edge of tempered crucible tool steel. The iron roller shown in the illustration is regularly supplied with this mower.

	Size	Wt each	Each
Pennsylvania Golf	17 in.	100 lbs.	**$51.00**
	19 in.	103 lbs.	**57.00**

One in a case; handle separate.

GRASS CATCHERS FOR PENNSYLVANIA GOLF MOWERS



This grass catcher is made of sheet metal, with wood ends and is the only style suitable for Pennsylvania Golf Mowers. There are two parts, the box or catcher and the shield or deflector. It is easily attached and detached.

	Size	Wt each	Each
Golf Grass Catcher	17 in.	31 lbs.	**$12.00**
	19 in.	32 lbs.	**12.00**

PENNSYLVANIA PUTTING GREEN

This mower is unexcelled for cutting undulating or wavy greens, also tennis courts, cricket creases and other lawns requiring an exceptionally close and smooth cut. Can also be used as a border trimmer for other lawns. Equipped with six crucible tool steel blades, oil hardened, triple gears insuring power and speed, and cast iron roller seven inches in diameter. The bottom knife is of the improved curved pattern, tempered crucible tool steel, bolted rigidly to the frame, making the adjustment entirely with the cylinder. Height of cut ⅛-inch to 1¼ inches. The journal boxes or cylinder bearings are of bronze bushing, self-aligning and insuring a perfect cutting edge the entire length of the blade. The hardwood roller in front can be easily taken off and the mower supported on caster wheels, if preferred. The illustration shows a side view with the Putting Green Grass Catcher. The catcher is made of sheet metal, with wood ends and is the only style suitable for the Pennsylvania Putting Green Mowers. It consists of two parts, the box or catcher and the shield or deflector.

	Size	Wt. each	Each
Pennsylvania Putting Green	16 in.	85 lbs.	**$48.00**
	18 in.	94 lbs.	**54.00**

One in a case; handle separate.

NOTE—Above price does not include grass catcher.

LAWN MOWERS

PENNSYLVANIA JUNIOR

The "Pennsylvania Junior" Lawn Mowers have a train of gears on each side, also dust-proof ball-bearings on each side, adjusted by a single screw in the cone with an eccentric point which fits into the cylinder axle. These mowers have a patented stationary or dead knife of crucible steel, the construction making it positively self-sharpening until entirely worn out. The cylinder has five crucible steel blades hardened and tempered in oil. Ball-bearings of latest improved pattern.

PYREX

TRANSPARENT OVEN WARE

A clear tough glass, scientifically made to withstand the sudden changes of temperature incidental to baking. Easily cleaned and the most sanitary of cooking utensils.

Will not absorb odors or flavors; discolor, glaze or flake and has a smooth hard surface.

Pyrex dishes have a large capacity for absorbing heat, which means economy of fuel. The food may be baked and served in the same dish. Very durable and if handled with reasonable care will last for years.

PENCILS COST LESS — SHUR-RITE The Quality Pencil — PENCILS LAST LONGER

SHUR-RITE is a well known make. Choose any pencil you like from the handsome **SHUR-RITE** line and you are sure it's right. Only 4 parts—no chance to get out of order. Uses fine lead, always ready for use. The long pencils have attached clips. The short pencils have ring for attaching cord or chain.

All pencils which retail for 1.00 and over have eraser under cap magazine and extra leads.

SILNI METAL has a silver finish and is far more durable and satisfactory than silver or nickel plate.

One in carton; wt each 12 lbs.

MECHANICAL TOYS

STRAUSS

JACKIE, THE HORNPIPE DANCER

Sheet metal substantially constructed. This minature boat runs along mechanically with the jolly sailor atop doing a typical sailor's hornpipe dance.

Per Doz

No. 651—Length 9½ ins; height 9½ ins **$14 25**

One twelfth doz in cardboard box; wt per doz 10 lbs.

BALKING MULES

Jenny.

Sheet metal handsomely finished. Goes forward and backward; stubbornly balks with forelegs set-out, throws hind legs in air.

Per Doz

No. 655—Length over all 8¾ ins **$14 25**

One twelfth doz in cardboard box; wt per doz 5 lbs.

YELLOW TAXI

Sheet metal, enameled black and yellow. Runs in circle or straight away.

Per Doz

No. 659—Length over all 8 ins **$15 00**

One-twelfth doz in cardboard box; wt per doz 9 lbs.

PRIZE FIGHTERS

Sheet metal, box beautifully lithographed in colors. The boxers battle like real prize fighters; bout lasts over one minute with each winding.

Per Doz

No. 652—Height 6½ ins **$15 75**

One-twelfth doz in cardboard box; wt per doz 10 lbs.

JAZZ BO JIM

Sheet metal, beautifully lithographed, portraying a southern scene of a happy darkey's home Jazz Bo Jim dances in real coon-like fashion on top of log cabin roof.

Per Doz

No. 660—Height over all 10½ ins. **$15 00**

One-twelfth doz in cardboard box K. D; wt per doz 18 lbs.

TEXAS PETE

Sheet metal, substantially constructed, attractively lithographed. With lasso in hand he goes on a wild rampage driving his bucking steed in typical Texan style.

Per Doz

No. 649—Length 6½ ins; 5¾ ins high **$16 50**

One twelfth doz in cardboard box; wt per doz 4½ lbs.

MECHANICAL TOYS

STRAUSS

SANTA CLAUS

Sheet metal, substantially constructed, attractively lithographed in Xmas colors. A jingling of sleigh bells and away goes the prancing reindeers gliding merrily in realistic fashion in a wide circle.

Per Doz

No. 699—Length 12 ins; height 7 ins **$24 00**

One-twelfth doz in cardboard box; wt per doz 8 lbs.

HAM AND SAM

Sheet metal beautifully lithographed. Represents an almost human-like performance of Sam dancing a vertical minstrel jig while his partner plays piano in perfect unison.

Per Doz

No. 695—Length over all 6⅝ ins; height 7½ ins **$25 50**

One-twelfth doz in cardboard box; wt per doz 20 lbs.

BUCKING BRONCO

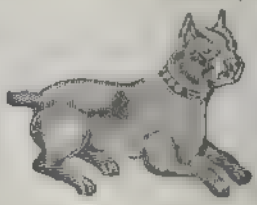
Sheet metal, substantially constructed, attractively lithographed. This is realistic to the point of thrilling. When the bronco throws the cowboy off the saddle but by means of the unusual construction the cowboy is brought back to the saddle only to be thrown off again, continuing until the spring runs down.

Per Doz

No. 685—Length 6½ ins; height 7½ ins **$24 75**

One-twelfth doz in cardboard box; wt per doz 7 lbs.

FLIPPO, THE JUMPING DOG



Sheet metal, substantially constructed. By winding up he will jump high in the air, turn a complete somersault and come down properly on all fours, only to crouch down again in real dog like fashion and duplicate this stunt until spring is run down.

Per Doz

No. 690—Length 5½ ins **$25 50**

One-twelfth doz in cardboard box; wt per doz 8 lbs.

SPARK PLUG AND BARNEY GOOGLE

Sheet metal, substantially constructed, attractively lithographed. This toy pictures Barney riding Spark Plug to victory, going through all the motions of an expert rider as Sparky bobs his head and wags his tail.

Per Doz

No. 605—Length 7½ ins **$27 00**

One twelfth doz in cardboard box; wt per doz 4 lbs.

NIFTY AUTOMATIC DUMPING TRUCK

Sheet metal, substantially constructed, attractively lithographed in green and red. So designed that after a small run the truck stops automatically dumping its load and again goes onward.

Per Doz

No. 606—Length 10 ins **$27 00**

One-twelfth doz in cardboard box; wt per doz 4½ lbs.

MECHANICAL TOYS

STRAUSS WHATSAMATTER TRAIN

Sheet metal, substantially constructed, attractively lithographed. Without warning the train stops and the engineer sticks his long necked head through the top of cab to see whats the matter and then the train goes on. Complete with four pieces of circular track.

Per Doz

No. 607—Length over all 15 ins **$30 00**

One-twelfth doz in cardboard box; wt per doz 6 lbs.

TOONERVILLE TROLLEY

Sheet metal, beautifully lithographed red and yellow. Go's forward, stops, starts, bouncing along—the Old Skipper working hard all the time. No track needed.

Per Doz

No. 615— Length 6¼ ins **$34 50**

One-twelfth doz in cardboard box, wt per doz 10 lbs.

BUTLER BROTHERS, 1ST AVE. NORTH & 6TH ST., MINNEAPOLIS

GARDEN CULTIVATORS

TRUE TEMPER

SPECIAL

No. G-1

A high grade forged steel cultivator, equipped with adjustable handles, which fit the hand. Solid forged tool steel teeth hoes and plows, all polished and tempered. Rigid attachments, with long bearings. Structural steel arch, which gives rigidity and stiffness. The wheels run true on the axles and have dust protected machined bearings, with adjustment for wear.

The arch is sufficiently high to straddle the rows until plants are well grown, and the tool attachment plates are far enough apart to allow close cultivating and yet not interfere with the growing plants. Double and single wheels, having 14-inch steel oval spoke wheels, with 1¼-inch tires, complete with equipment, including two 6 inch scuffle hoes, four cultivator teeth, two plows, a steel wrench and a special attachment plate for using the Midget Seeder. Finished in red, meadow-green and black, and then varnished. Weight complete, 25 lbs.

No.	Each
G-1	$14.50

SPECIAL

No. G-1-A

The No. G-1-A cultivator is identically the same as the No. G-1, except that the two plows and the Midget Seeder attachment plates are not included in the equipment. Weight complete, 23 lbs.

No.	Each
G-1-A	$13.00

All the above metal parts packed in a wooden box, handles wired in pairs and papered.

SPECIAL

No. G-1-B

This cultivator is exactly the same as the Nos. G-1 and G-1-A, except it is equipped only with two forged steel scuffle hoes. The scuffle hoes are most universally used of all wheel cultivator attachments and are considered the most useful by gardeners. Weight complete, 21 lbs.

No.	Each
G-1-B	$11.50

Metal parts packed in wooden box, handles wired in pairs and papered.

FAIRY

No. G-5

A single wheel cultivator, having 14-inch steel oval spoke wheel, a strong steel frame, with selected ash handles, easily adjusted to the height of the operator. Five cultivator teeth forged from tool steel, and can be adjusted as to width by moving backward or forward, as each tooth is bolted separately and will thus cultivate rows from 6 inches to 24 inches apart.

Finished in red, meadow-green and black, and then varnished. Weight complete, 13 lbs.

No.	Each
G-5	$4.00

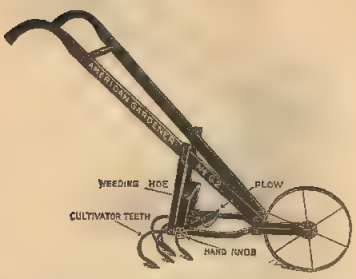
Knocked down, one in a bundle.

Directions for assembling accompany each machine.

GARDEN CULTIVATORS

TRUE TEMPER

AMERICAN GARDENER

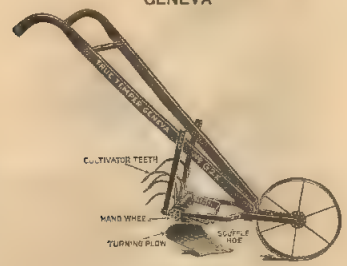


No. G-2

The American Gardener is a single wheel cultivator with permanent attachments, having a 14-inch steel oval spoke wheel with 1¼-inch tire. Equipped with a thin blade scuffle hoe 1 inch wide, a drill or trenching plow and five strong and heavy adjustable cultivator teeth, all of which are permanently attached to revolving center casting. A combination of three tools. With a few turns of the hand-wheel, releases one tool and allows another to be revolved and securely locked into working position. Finished in red, meadow green and black, and then varnished. Weight complete, 20 lbs.

No.	Each
G-2	$11.25

GENEVA



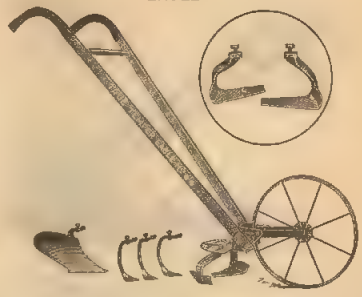
No. G-2-X

The Geneva No. G-2-X is exactly the same as the No. G-2, except in the place of the drill or trenching plow it is equipped with a large moldboard turning plow with landside, which will turn a furrow 4 inches to 6 inches wide and 1 inch to 3 inches deep—deeper, if needed, by going through a second time. Weight complete, 22 lbs.

No.	Each
G-2-X	$12.25

All the above metal parts packed in wooden box, handles wired in pairs and papered.

EAGLE



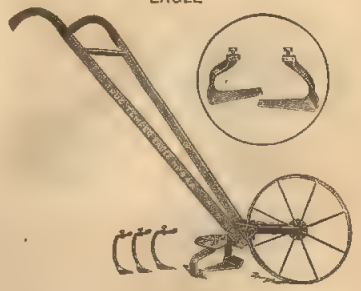
No. G-4

The Eagle cultivator is not only light, but strong and durable. Has a single 16-inch steel oval spoke wheel, with 1¼-inch tires, which is supported on both sides by arms riveted to the one-piece forged steel body.

The plow grip handles are strong and comfortable, and are easily adjusted to height, as the handle attachments are midway between the wheel and the tools. By means of the wheel arm adjusting bolts the body can be raised or lowered and the tools made to work at any depth desired. Equipped with two 6-inch scuffle hoes, three cultivator teeth, a large moldboard plow with landside and a steel wrench. Finished in red, meadow-green and black, and then varnished. Weight complete, 13 lbs.

No.	Each
G-4	$9.00

EAGLE



No. G-4-A

The Eagle No. G-4-A is exactly the same construction as the No. G-4, except it is minus the large moldboard plow. The scuffle hoes are reversible as in the G-4, so as to work toward or from the rows, as desired. Weight complete, 11 lbs.

No.	Each
G-4-A	$7.50

All the above metal parts packed in wooden box, handles wired in pairs and papered.

Directions for assembling accompany each cultivator.

GARDEN CULTIVATORS AND SEEDERS

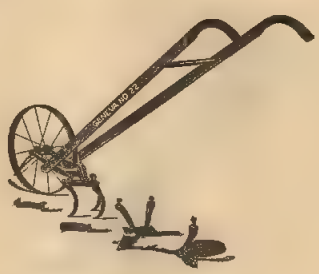
TRUE TEMPER

No. 13

This cultivator fills the needs of any gardener. It is equipped with single and double wheels, four shovels, one pair of hoes, one pair of diamonds. All oil tempered and finely polished. The wire wheels are 16 inches high and are adjustable up and down to gauge the depth attachments are to run. This cultivator can also be set up with one wheel, if desired.

No.	Wt. each	Each
13	40 lbs.	$13.50

One in a crate; handles bundled separately.



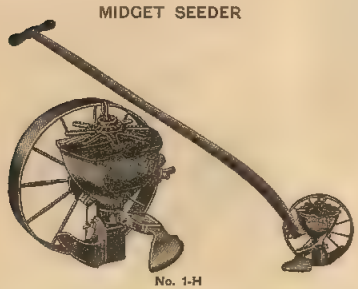
No. 22

This cultivator is one of our best tools for fine work. Can be used between rows, or with the extension bracket furnished the attachments can be set to one side and used on both sides of the row. It is equipped with three steel shovels, one pair of steel hoes, one large diamond or moldboard, with landside of special design.

No.	Wt. each	Each
22	30 lbs.	$10.00

One in a box; handles bundled separately.

MIDGET SEEDER



No. 1-H

The Midget Seeder is of all metal construction, extremely light and easy to lift about. It will handle accurately almost any kind of garden seed from the smallest up to peas and beans. The hopper holds one pint, yet it will drill out clean a five-cent package of seed just as well as a hopper full. The adjustments for different seeds are easily made, as the index on top names the seeds and regulates the opening for their varying sizes. The shoe is adjustable for any depth. Can be easily attached to either the Nos. G-1, G-1-A or G-1-B cultivators shown on page 342.

Equipped with 4½-foot handle for use in close quarters, in beds or against a fence, or wherever it is inconvenient to operate it when attached to cultivator frame. Set up ready for use.

No.	Each
1-H	$0.25

Six in a crate, weight 43 lbs ; or one in a carton, weight 6 lbs.

TRUE TEMPER

No. 9

The No. 9 combination fills all the needs of any gardener or farmer who has not sufficient work to justify buying separate implements. It is easily changed from a double to a single wheel cultivator. It is equipped with single and double wheels, four shovels, one pair of hoes, one pair diamonds, two leaf guards and wrench. All attachments oil tempered and finely polished. The seeder not only delivers seed in drills, but by shifting one part only without the use of drillers it will drop in hills 4, 6, 8, 12 and 24 inches apart. The index is in plain view and very easily adjusted with a brass thumb screw to give required amount of seeds. A special shape shoe is provided which will open up a clean furrow, and is adjustable in depth up to 2 inches. An extra shoe made of tin is also furnished. It fits inside the regular shoe to distribute seed in a very narrow row. This allows for close cultivation after the plants are up. The coverer is hinged to the seeder and does its work well. A concave roller wheel finishes the job in proper shape. Directions with each machine shows how to set up and operate.

No.	Wt. each	Each
9	56 lbs.	$24.00

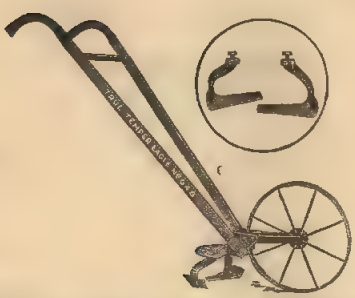
One in a carton; handles bundled separately.

Full directions accompany each cultivator or seeder.

GARDEN CULTIVATORS AND SEEDERS

TRUE TEMPER

EAGLE



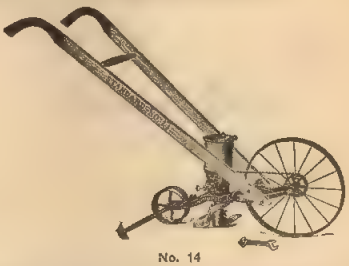
No. G-4-B

The Eagle No. G-4-B is the same cultivator in all respects as the Nos. G-4 and G-4-A, described on page 343, except it is equipped with only the two scuffle hoes It will do a large variety of work and will cultivate clean all the ground between 12-inch and 14-inch rows. Weight complete, 9 lbs.

No.	Each
G-4-B	$6.25

Metal parts packed in a wooden box, handles wired in pairs and papered.

HILL AND DRILL SEEDER



No. 14

A single wheel hill and drill seeder, which has less parts than any similar tool and will plant seed in hills 4, 6, 8 and 24 inches apart, or will drill in a continuous row. The drill spacer is very simple, being made of one piece and has no extra parts to get lost. The seeder can be changed from hill dropping to drilling by slightly moving one part only. The seed is fed through the plate by a rotary brush, which gives a constant and steady flow without injury to the seed. The flow of seed can be cut off entirely by pulling the seed slide out until it latches. The shoe is adjustable for depth and entirely open in the rear, so the seeds falling are in plain view of the operator.

A convenient marker is provided that can be removed or replaced instantly, simply being hooked over a lug on the frame. The entire frame and all parts liable to be broken are made of malleable iron. Has 16-inch steel wheel with 1½-inch tire. Weight complete, about 36 lbs.

Finished in meadow-green and black, and then varnished.

No.	Each
14	$19.00

One in a crate, handles bundled.

GARDEN PLOWS

TRUE TEMPER

No. 20

This is the handiest and most efficient cultivator. By reason of the special patented shape of the shank and upright, the attachments always set at the same angle whether used for deep or shallow work. The bend of the handles may be instantly adjusted to suit the height of the operator or to regulate the depth for tools. The machine runs easily, steadily and in perfect balance on the light, strong 24-inch steel bushed wheel. Special care is taken with the grinding and polishing of the attachments. They are first oil tempered and then polished smooth and bright. Equipped with one double-end steel shovel, one moldboard with landside and combined rake and sweep. Knocked down flat for shipping.

No.	Wt. each	Each
20	18 lbs.	$7.00

One in a crate.

No. 40

A very good cultivator, does good work and works easily. Equipped with one shovel 4 inches wide, 8 inches long; one shovel 2 inches wide, one moldboard or diamond, one malleable three-shovel weeder. Steel attachments are oil tempered and polished bright and smooth.

No.	Wt. each	Each
40	19 lbs.	$6.00

No. 30

Attachments same as on No. 40. Handles same style as on No. 20.

No.	Wt. each	Each
30	16 lbs.	$5.50

CIDER MILLS

BELKNAP SPECIAL

Adapted for grapes and small apples—large apples must be cut or quartered. Hopper enclosed and grinding mill made heavier than other mills of this style. Painted red with japanned castings. Height over all 46 ins; tub 11x11 ins inside; hopper 7 x 9 ins at top; press screw 1¼ x 19½ ins; diam of crank wheel 16 ins; uprights 5x1¾ ins at bottom, 3¼x1¾ ins. at top; floor space 20x24 ins.

Each

No. 0BS—Capacity ½ to 1 barrel per day $42 00

Shipped loose; wt each 115 lbs.

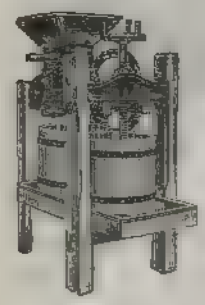
—CYCLONE—

Frame nicely finished, tub natural wood stave, riveted to japanned iron band; height over all 46 ins; tub 11x11 ins inside; hopper 7½x9 ins at top; press screw 1¼x25½ ins; diam fly-wheel 16 ins; uprights 5¼x1¾ ins at bottom, 4¼x1¾ ins at top; floor space 20x23 ins.

Each

No. 10C—A first class single tub cider mill and wine press for family use; capacity 2 to 3 barrels per day; wt each 136 lbs $51 00

Shipped loose.



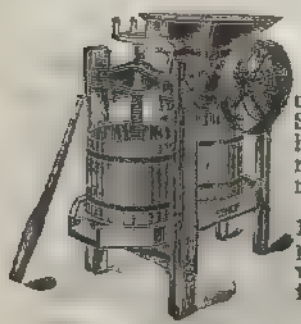
Frame varnished, natural wood finish with neat red stripes; tubs natural wood; castings japanned finish.

An excellent mill for family use. Substantially built of first quality material throughout and a high grade mill in every respect.

No. 1BS—Belknap's Special Junior, Steel Roll; capacity 2 to 4 barrels per day; height over all 42 ins; tubs 10x10¾ ins; hopper 12 x 13½ ins; press screw 1¼ x 18½ ins; diam fly-wheel 18¼ ins; posts 36x3 ½x2¾ ins; floor space 34x20 ins; wt each 130 lbs ..... Each $66 75

No. 2BS—Belknap's Special Medium, Steel Roll. Capacity 3 to 6 barrels per day; height over all 48 ins; tubs 10x10½ ins; inside hopper 14x14 ins at top; press screw 1½x21 ins; diam of fly-wheel 19 ins; post 40x3¾x2¾ ins; floor space 35x22 ins; wt each 260 lbs 79 50

Shipped loose.



BELKNAP SPECIAL SENIOR

Steel Rolls.

Hardwood frame, varnished natural wood finish with black stripes. Steel rolls and press screw; large hopper; gearing heavy and easy running; tubs natural wood staves riveted to japanned iron bands.

Height over all 48 ins; tubs 17x14¼ ins; hopper 17x15 ins; press screw 2 x 22 ins; diam fly-wheel 23 ins; posts 46x5x2¾ ins; floor space 45x30 ins.

COMBINATION CUTTER AND GRINDING MILLS

KELLY-DUPLEX

The Kelly-Duplex combination cutter and grinding mills are of the same high grade construction throughout as are all other Kelly-Duplex mills.

These mills enable the feeder to grind alfalfa, corn fodder, clover hay, pea-vine hay, kaffir corn and milo maize in the head, with a portion or all of the stalk either alone or mixed in varied proportions with wheat, shelled corn, rye, oats or other small grain. Gears can be changed to cut fine, medium or coarse.

Height over all 44 in.; width 27 in.; outside distance between sills 37 in.; length of main shaft 61 in.; diam. of pulley 10 in., width face 10 in.; diam. of grinding plates 12 in., speed 800 to 1100 revolutions. Four extra plates furnished with each mill.

Power required to operate 12 to 20 H. P. gasoline engine or electric motor.

Each

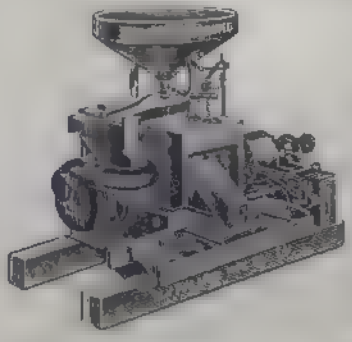
No. 404—Capacity 4 to 8 tons per day. ..... ✣$435 00

Crated; wt each 1000 lbs.

BURR GRINDING MILLS

These mills have especially designed ball-bearing to prevent heating. They are well lined with babbitt and fitted with compression grease cups. The mill stones or burrs used are of the pearl flint grit which is the best burr known for grinding grain for table use. The burrs are very hard and flinty, yet they are of a fine, tough, even texture, which will dress or sharpen to the best degree of evenness, thereby rendering them very much suited for fine, soft grinding.

WILLIAMS IMPROVED



With Blower.

Designed with special care, so as to leave as little meal as possible in the mill after grinding. This is obtained by two fans being attached to the runner stone. These fans draw a current of cool air between the bed and the runner stones while the mill is in operation, keeping the meal cool and cleanly blown out.

CANE MILLS

—BLUE GRASS—Three Roll.

Held together by four main bolts, which make them more rigid than a mill with three bolts.

The cog gearing is cast separate from the rollers, and is made very heavy, with two clutches on each wheel, which fits into two corresponding ones in each roller.

Both top and bottom journals run in brass boxes, making the mill work smoothly and easily

All steel shafts with turned bearings, rollers turned with serrated faces, enabling a regular and constant feed to be maintained.

The main rollers are flanged at top and bottom, preventing the cane from passing either up or down. Feed-guide furnished with each mill, made so that the full length of the roller can be used.

The gearing is encased preventing it from being clogged, and making it entirely safe to the operator.

Angle or incline yoke can be supplied as desired. With the angle yoke bolts are furnished to attach to sweep. Bows are furnished for the incline yoke.

The oiling is done by means of horizontal oil ducts for the lower journals, avoiding the mixing of oil with the juice.

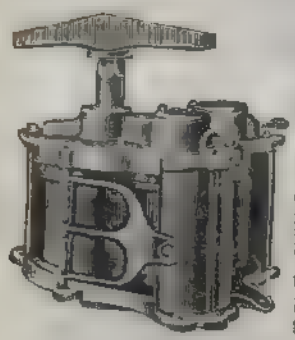
—CYCLONE—Three Roll.



All parts are made strong and of the best material. The shafts are made of selected steel. All boxes have brass linings of ample thickness, and when properly oiled should last for years.

Top plates are made with a wide flange, which strengthens the plate and covers the gear. This effectually prevents cane, etc., from getting between the cogs and insures safety to the operator. The cog wheels can be oiled through a small hole in the top plate, and there is no danger of oil getting into the juice.

Nos. 0C, 1C, 2C and 3C are held together by three bolts, No. 4C has four bolts.

The feed guides are made reversible to be worked on either side of the mill.

The main shaft is very heavy and strong, and there is no danger of it twisting or bending.

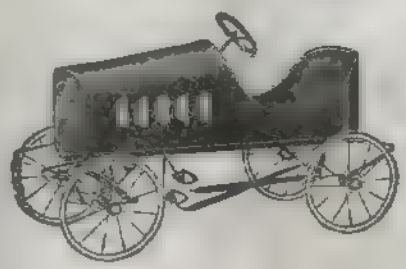
CHILDREN'S AUTOMOBILES

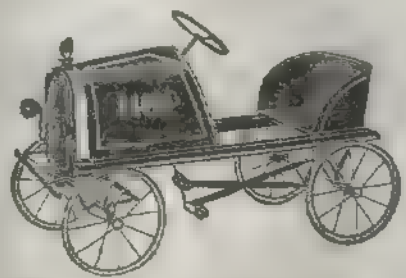
FORD



Body is of sheet steel and hardwood; wrought steel gearing, rigid front axle with forged knuckle joints; equipped with ratchet, starting crank, 6 inch steering wheel and nickeled hub caps. Red body, striped with yellow and black; gears and wheels black enameled.

	Each
No. 500—Body 13x30 ins; diam wheels 10 ins; fitted with ⅜ in. rubber tires	$14 25

One in carton. K. D.; wt each 55 lbs.



STAR

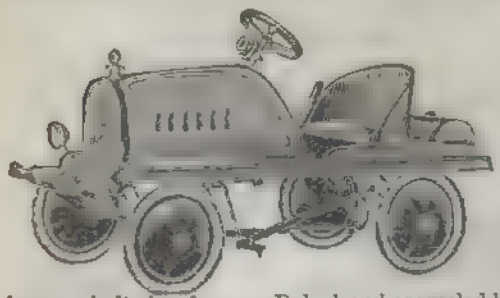
Body, seat, gears and bumpers made of steel. Radiator cast and girders made of selected hardwood; girders reinforced with steel cross members, supporting body and gears. Imitation head lamps, gas and spark control, motometers; 7 inch steering wheel, nickle plated hub and starter caps. Red body and seat striped in yellow and green; gears and wheels black enameled.

	Each
No. 700—Body 13x30 ins; diam wheels 10 ins; ⅜ in. rubber tires	$15 75

One in carton K. D.; wt each 25 lbs.

CHILDREN'S AUTOMOBILES

Ball-Bearing, Red Disc Steel Wheels, Rubber Tires.

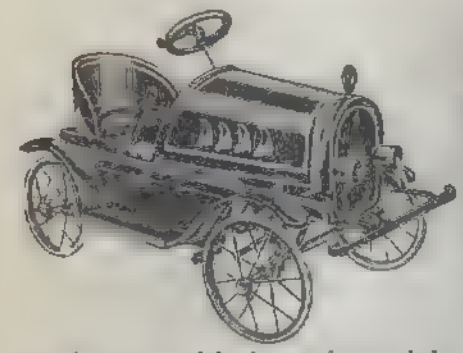


Hardwood frame and seat; sheet steel hood and seat trim; knuckle joint steering gear 7 inch wood steering wheel; ball bearing double disc steel wheels; bumper bolted to frame. Baked, red enameled body, hood and wheels striped, and decorated; nickel plated hub caps. Imitation head lamps, aluminum motor meter, gas and spark throttle, gear shift, license number and instrument board.

Each

No. 606—Body 12x48 ins; 10 in. wheels; ½ in. rubber tires **$25 50**

One in carton; wt each 42 lbs



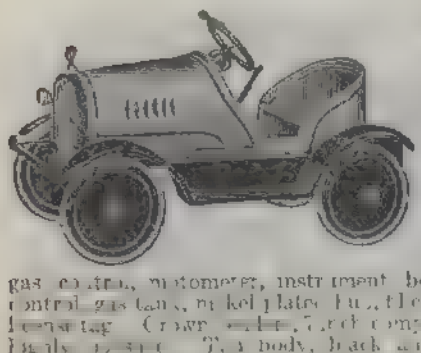
Hardwood frame, seat and running boards; sheet steel hood, seat back and fenders; steel gear 7 inch wood steering wheel; ¾ inch bumper, bolted to frame.

Baked, rich red enameled body and hood, handsomely striped in yellow; black enameled gear, bumper and fenders; red enameled wheels; nickel plated hub caps and gas throttle. Imitation head lamps, gas throttle, emergency brake, speedometer, motor-meter and self-starter.

Each

No. 603—Body 12x36 ins; 10 in. wheels; ½ in. rubber tires **$25 50**

One in crate; ship wt each 56 lbs.



Ball-Bearing, Disc Steel Wheels.

Body, seat, gears and bumper made of steel. Radiator, dash and girders made of selected hardwood; girders reinforced with steel cross members, supporting body and gears. Imitation head-lamps, spark and gas control, motometer, instrument board, gear shift control, gas tanks, nickel plated hub, tire and starter caps and fastenings. Crown fenders, 7 inch composition steering wheel. Highly polished body, black and vermilion striping, steering quadrant front, vermilion striping; gas tank fenders and gears black enameled, wheels vermilion with yellow striping.

Each

No. 770—Body 13x33 ins; diam wheels 10 ins; ⅝ in. rubber tires **$30 75**

One in carton; wt each 88 lbs.

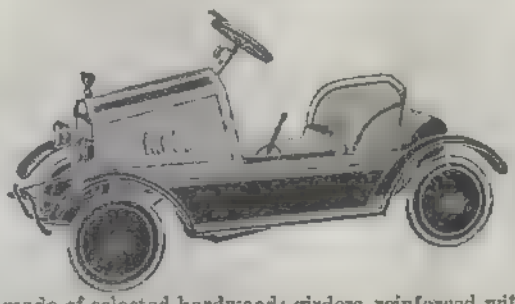
CHILDREN'S AUTOMOBILES

Hardwood frame, seat and running boards; sheet steel hood, seat back and horn; knuckle joint steel gear 7 inch wood steering wheel, ¾ inch, bumper bolted to adjustable frame; windshield and spotlight. Baked, orange enameled body and hood, handsomely striped in yellow; black enameled gear, bumper and fenders; red enameled wheels; nickel plated hub caps, gas throttle and windshield frame. Imitation head lamps, spotlight, gas throttle emergency brake, speedometer, motometer and self-starter.

Each

No. 604—Body 12x36 ins; 10 in. wheels; ½ in. rubber tires **$33 00**

One in crate; ship wt each 64 lbs.



Ball-Bearing, Disc Steel Wheels.

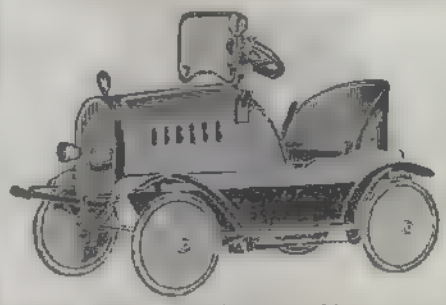
Body, seat gears and bumper made of steel. Radiator, dash and girders made of selected hardwood; girders reinforced with steel cross members, supporting body and gears. Imitation head-lamps, spark and gas control, motometer, instrument board, horn, gear shift control, gas tanks, nickel plated hub, tire and starter caps and fastenings. Crown fenders, 7 inch composition steering wheel, highly polished; upholstered seat. Body seat and gas tanks, gold stripe and vermilion striping, radiator front vermillion trimmed; fenders and gears black enameled; wheels red with yellow striping.

Each

No. 840—Body 13½x40 ins; diam wheels 10 ins; ⅝ in. rubber tires **$43 50**

One in crate; wt 70 lbs.

Ball-Bearing, Red Disc Steel Wheels, Rubber Tires.



Hardwood frame, seat and running board sheet steel body; hood and horn, ball-bearing double disc wheels with corrugated rubber tires; knuckle joint steel gear; bumper bolted to frame; 7 inch wood steering wheel; adjustable windshield and spotlight; baked red or blue enameled body, striped in yellow, black enameled gear and bumper, nickel plated hub caps. Imitation head lamps, motometer, gas and spark throttle, self-starter button and gear shift.

Each

No. 720—Body 12x36 ins; diam of wheels 10 ins; ⅝ in. rubber tires **$39 00**

One in crate; wt each 68 lbs

CHILDREN'S AUTOMOBILES

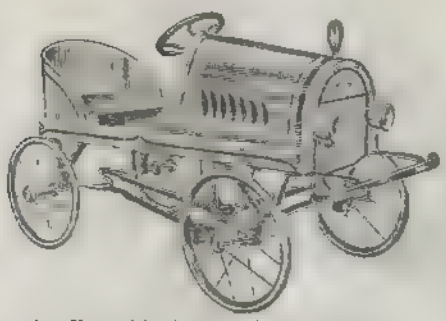
REO

Hardwood frame and seat; sheet steel hood and seat back; steel gear and iron rim steering wheel. Baked, rich red enameled body and hood, handsomely striped in gold and black; black enameled gear and steering wheel; red enameled wheels; nickel plated hub caps. Imitation speedometer, moto-meter, clock and self-starter.

Each

No. 599—Body 11x30 ins; front wheels 8 ins; rear wheels 12 ins; ⅜ in. rubber tires $14 25

One in carton; ship wt each 26 lbs.



MAXWELL

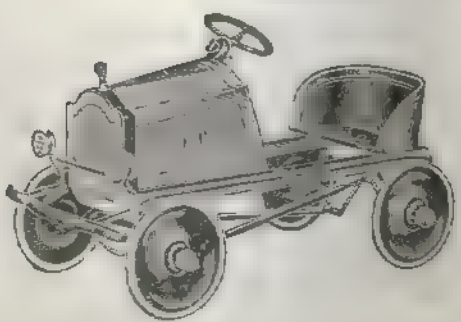
Hardwood frame and seat; sheet steel hood and seat back; knuckle joint steel gear and iron rim steering wheel, ¾ inch bumper bolted to frame. Baked, blue enameled body and hood, handsomely striped in black and yellow; black enameled gear, bumper and steering wheel; red enameled wheels; nickel plated hub caps. Imitation head lamps, speedometer, moto-meter, clock and self-starter.

Each

No. 600—Body 11x30 ins; 10 in. wheels; ⅜ in. rubber tires $15 75

One in crate; ship wt each 27 lbs.

BUICK
Disc Wheels.



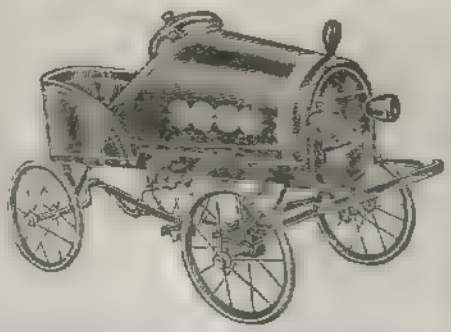
Hardwood radiator, dash and girders, reinforced with steel cross members supporting body and gears; steel body, seat and gears. Equipped with steel bumper, drum type road lamps, moto-meter, 7 inch steering wheel; spark and gas control, horn, nickel plated hub caps and starter cap, license plate and gear shift control. Body and seat dark blue, with vermillion striping, black enameled gear, brilliant red enameled disc wheels.

Each

No. 730—Body 13x30 ins; 10 in. wheels; ½ in. rubber tires $18 75

One in carton; wt each 25 lbs.

CHILDREN'S AUTOMOBILES



DODGE

Hardwood frame and seat; sheet steel body and hood; knuckle joint steel gear; 7 inch wood steering wheel; ¾ inch bumper bolted to frame. Baked, rich red enameled body and hood, handsomely striped in yellow; black enameled gear and bumper; red enameled wheels; nickel plated hub caps and gas throttle. Imitation head lamps, gas throttle, emergency brake, speedometer, moto-meter, clock and self-starter.

Each

Hardwood frame and seat; sheet steel hood and seat back; knuckle joint steel gear; 7 inch wood steering wheel; ¾ inch bumper bolted to frame. Baked, orange enameled body and hood, handsomely striped in yellow; black enameled gear and bumper; red enameled wheels; nickel plated hub caps and gas throttle. Imitation head lamps, gas throttle, emergency brake, speedometer, moto-meter and self-starter.

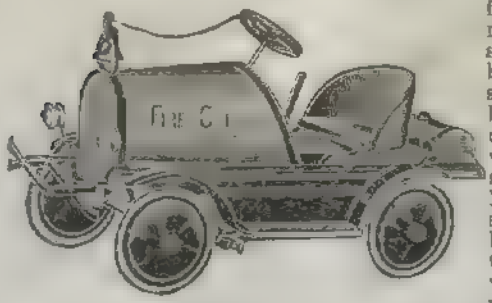
Each

No. 601 -Body 12x36 ins; 10 in. wheels; ⅜ in. rubber tires $21 00

One in crate; ship wt each 36 lbs.

CHILDREN'S AUTOMOBILES

Ball-Bearing, Red Disc Steel Wheels, Rubber Tires.



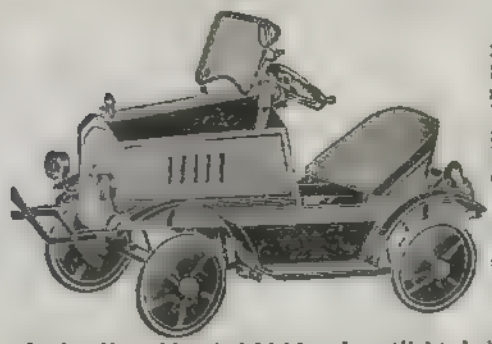
Hardwood frame seat and running board; sheet steel body, hood and seat back; ball-bearing double disc wheels with corrugated rubber tires; knuckle joint steering gear; bumper bolted to frame; 7 inch wood steering wheel; baked red enameled body, striped in gold; black enamel gear and bumper; nickel plated hub caps and bell. Imitation head lamps, tail lamp, gas and spark throttle, license number, instrument board and gear shift.

Each

No. 607—Body 12x47 ins; diam wheels 10 ins; ⅝ in. rubber tires.....**$37 50**

One in crate; wt each 67 lbs.

Ball-Bearing, Red Disc Steel Wheels, Rubber Tires.



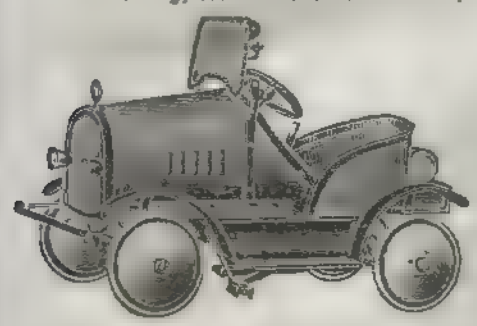
Hardwood frame, seat and running boards; sheet steel body, hood and seat back; ball bearing double disc steel wheels, with corrugated rubber tires; knuckle joint steering gear; bumper bolted to frame; 7 inch wood steering wheel; adjustable windshield and spotlight; baked red enameled body, striped and decorated; black enamel gear and bumper; nickel plated hub caps. Imitation head lamps, tail lamp, gas and spark throttle, motometer, gear shift, license number and instrument board.

Each

No. 724—Body 13x48 ins; diam wheels 10 ins; ⅝ in. rubber tires.....**$46 50**

One in crate; wt each 75 lbs.

Ball-Bearing, Red Disc Steel Wheels, Rubber Tires.



Hardwood frame, seat and running board; sheet steel body finished in assorted colors with striping and decorating in fancy colors; black enameled knuckle joint steel gear; gear-shift; wood rim steering wheel; self starter button; two imitation wood lamps; nickel plated gas lever attachments and motometer; bumper bolted to frame; nickel plated hub caps; gas tank; black enameled crown fenders; nickel plated form fitting windshield; spotlight and horn.

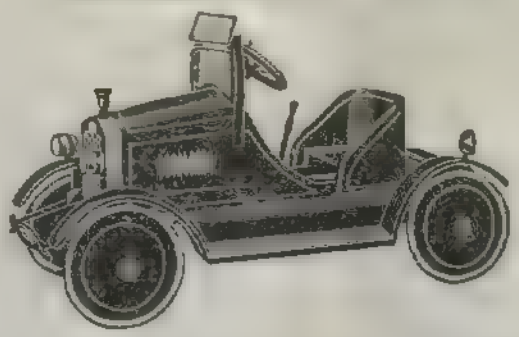
Each

No. 722—Body 13x48 ins; diam wheels 10 ins; ⅜ in. rubber tires.....**$45 00**

Crated; ship wt each 73 lbs.

CHILDREN'S AUTOMOBILES

Ball-Bearing, Disc Steel Wheels.



Body, seat gears and bumper made of steel. Radiator, dash and girders made of selected hardwood girders reinforced with steel cross member supporting body and gears. Imitation head-lamps, spark and gas control, winged motometer, adjustable windshield; instrument board, horn, gear-shift control, gas tank, trunk rack, tail light, license tag, nickel plated hub, filler and starter caps; upholstered seat; crown fenders; 8½ inch composition steering wheel, highly polished. Maroon body and seat, yellow and gold striping; stenciled radiator front, yellow and white trimmings; gas tank, fenders and gears black enameled; trunk rack, black enameled, aluminum trimmings; maroon wheels, gold striping.

Each

No. 850—Body 13½x40 ins; diam wheels 11 ins; ¾ in. rubber tires.....**$51 00**

One in crate; wt each 75 lbs.

STUTZ

Ball-Bearing, Disc Steels Wheel.

Body, seat, gears and bumpers made of steel. Radiator, dash and girders made of selected hard-wood; girders reinforced with steel cross members, supporting body and gears. Imitation head-lamps, spark and gas control, winged motometer, adjustable windshield, instrument board, horn, gear-shift control, gas-tank, stop signal, tail-light, nickel plated hub, filler and starter caps. Crown fenders, 8½ inch composition steering wheel polished. Red body and seat, yellow striping; stenciled radiator and front, black and yellow striping; gas tank, fenders and gears, black enameled; red wheels, yellow striping.

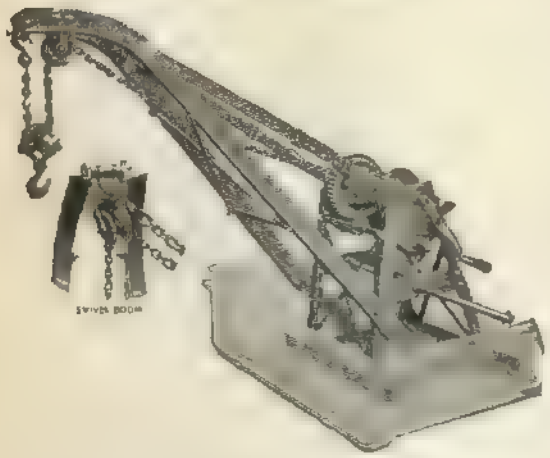
Each

No. 870—Body 13½x40 ins; diam wheels 11 ins; 1 in. rubber tires.....**$66 00**

One in crate; wt each 80 lbs.

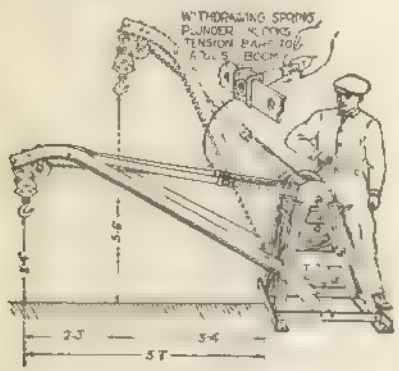
WEAVER GARAGE AND SHOP EQUIPMENT

WEAVER AUTO CRANE



Weaver Model G Auto Crane. Compact strength, without unnecessary weight or bulkiness, is an outstanding feature of the new Weaver Model G Auto Crane. It is amply strong to handle loads to 6,000 pounds.

The boom is hinged at the bottom. One man can easily raise or lower the boom, even with the car suspended, after unlocking tension bars and blocking boom, as illustrated. The boom has been lengthened, affording an increased range of height and overhang.



The compound gears afford two distinct leverages and speeds (using the crank handle in the position shown in the accompanying illustration) and enable mechanic to conveniently operate the crane from the ground or service car. The extreme leverage ratio of 114 to 1 enables the heaviest loads to be lifted with ease.

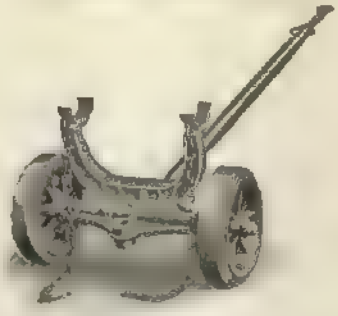
The sheave wheel at the end of the boom is swiveled, permitting a direct side pull without the chain bending.

The large diameter of the drum prevents excessive wear on chain or cable due to tight winding as well as kinking of cable or twisting of chain. Drum is mounted on roller bearings which greatly facilitate operation. 35 feet best quality chain regularly supplied; 50 feet 7/16-inch cable supplied in place of chain at same price. Base, 36 inches wide by 29½ inches long.

Shipping weight, 470 pounds.

No. WG13 Weaver Model G Auto Crane.complete **$110 00**

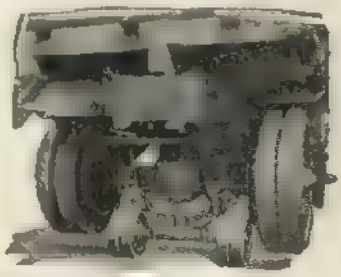
WEAVER AMBULANCES



Weaver Model C Auto Ambulance. The wide, cast steel yoke provides a two-point support for car axle, 18¼ inches between centers. Can readily be applied to front or rear axle of any car.

Heavy telescoping tongue is adjustable from 7 feet to 13 feet and can readily be detached for carrying ambulance in service car. Regularly equipped with solid rubber tires, 3½x16 inches. Cast steel wheels, rubber tired.

No. WB13. Rubber tired. Shpg. wt., 265 lbs..each **$85 00**
No. WB12. Cast steel wheels. Wt., 195 lbs.. " **65 00**

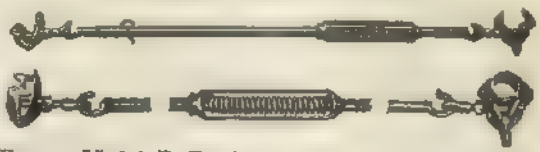


Weaver Truck Ambulance. Designed to answer the demand for a quicker, easier and safer means to tow in disabled trucks, busses and other commercial cars.

Strong and simple in construction. Load is supported by 2½-inch steel dead axle. Wheels, 8½ inches wide and 16 inches in diameter. Extreme width of ambulance, 43¼ inches. Telescoping pole adjusts from 7 to 13 feet.

No. WB14. Shipping weight, 580 pounds...each **$250 00**

WEAVER TOWING POLE



Weaver Model D Towing Pole. Supplies a rigid connection between towing and disabled car, which prevents jamming on sudden stops or on down grades.

Special attention is called to the two jaw clamps and hooks which fasten into them. The two clamps enable the pole to be rigidly clamped to front or rear of any car. The clamp on the left end (see illustration) is especially designed to attach to front axle or bumper, avoiding splash apron.

The two hooks form simple and effective universal joints which allow ample play in any direction when turning corners, towing over rough roads, etc. They cannot become unhooked in towing when both are fastened.

Pole is of double strength steel tubing in two sections, one telescoping within the other. Length adjustable from 5 feet 6 inches to 8 feet. Shipping weight, 47 pounds.

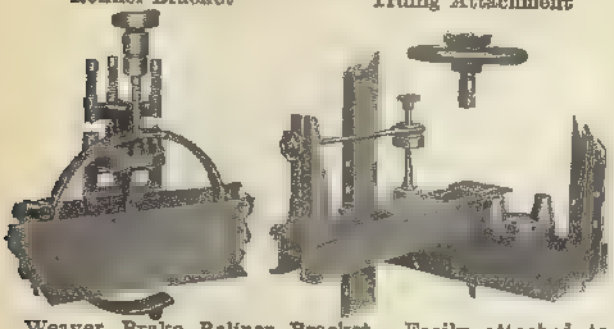
No. WC10 Weaver Towing Pole.....each **$15 00**

WEAVER GARAGE AND SHOP EQUIPMENT

WEAVER FORCING PRESS ATTACHMENTS

For Hi-Speed and Regular Presses

Reliner Bracket Truing Attachment



Weaver Brake Reliner Bracket. Easily attached to press bolster and supplies a base for mounting reliner in order to bring plungers of reliner under press screw.

Hi Speed lever can be used to operate plunger to press out old rivets, punch holes in lining, and head and countersink rivets.

No. WD34 Reliner Bracket. Shpg. wt., 17 lbs..each $3 00

Weaver Disc Wheel Truing Attachment. This attachment is especially designed to straighten Hayes disc wheels of light cars having hubs riveted to disc.

No. WD26 Disc Wheel Truing Attachment. Shipping weight, 110 pounds.....each $40 00

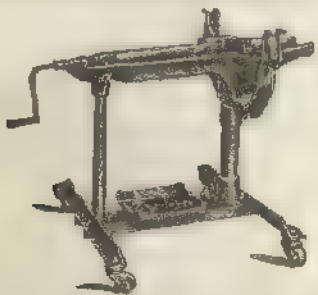
No. WD30 Special Attachment for Truing Disc Wheels with Detachable Hubs. Shipping weight, 110 pounds ..... each 40 00

WEAVER UNIVERSAL AXLE STAND

Weaver Model F Universal Axle Stand. 100 per cent efficient for handling passenger car and light truck axles. Jaws are adjustable to any position.

No. WH11 Model F Universal Axle Stand.complete $50 00

WEAVER FORD MOTOR ASSEMBLY STAND



Weaver Ford Motor Assembly Stand. Designed for supporting Ford engines in a convenient position for the mechanic to unbolt the oil-pan and flywheel housing and remove other parts preparatory to placing the engine in the engine stand and to replace these parts when reassembling the engine.

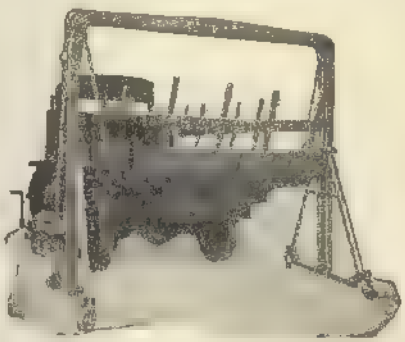
The stand affords an absolutely safe three-point support for the engine, the rear end of the engine being held by a U-Shaped yoke. Shipping weight, 92 pounds.

No. WK10 Weaver Motor Assembly Stand....each $20 00

WEAVER AUTO AND TRUCK HOISTS

Weaver Auto Hoist. Has a leverage of approximately 200 to 1. Height of arch can be increased 20 inches by raising the braces on either side by means of the worm hoist, enabling raising of rear end of either limousine or touring car with top up, for removing the rear system. Carried upon four ball and roller bearing casters, 5 inches in diameter, insuring easy transportation. The extremely wide base provides a safe and substantial foundation which insures the hoist always standing erect. Height, 7½ to 9 feet 2 inches. Shipping weight, 545 pounds.

No. WG10 Weaver Auto Hoist.....complete $120 00



Weaver Truck Hoist. A special extra heavy hoist for truck service; lifting leverage, 400 to 1. Width between frame, 8 feet 4 inches. Minimum height, 8 feet 4 inches; maximum height, 10 feet. Shipping weight, approximately 940 pounds.

No. WG11 Weaver Truck Hoist.....complete $200 00

WEAVER SAFETY STANDS

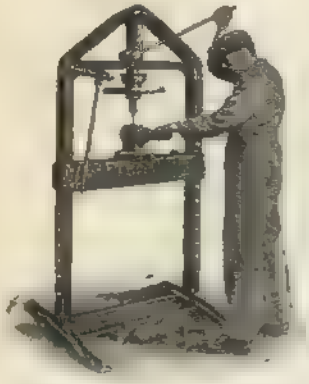
Weaver Safety Stands afford a simple, compact means of supporting the heaviest passenger cars and light trucks in an elevated position to insure the absolute safety of the mechanic while making repairs. They also free the hoisting equipment for use elsewhere in the shop. The top plate is shaped to fit the tire of car and as a further precaution against slipping, a chain is provided for securely clamping the wheel to the stand. Constructed of the best material and have a combined capacity of 10,000 pounds. Shipping weight, 35 pounds.

No. WI10 Weaver Safety Stands .....per pair $15 00

WEAVER GARAGE AND SHOP EQUIPMENT

WEAVER FORCING PRESSES

Hi-Speed Type



Regular Type

Hi Speed Type Forcing Presses. The new rack and pinion construction enables work requiring pressure up to 2,000 pounds to be handled with unusual speed. Also preferable for handling delicate work. Pressure up to 28 tons can instantly be exerted without moving the work. Screw always in direct contact with work. Pressure is quickly released. Easily moved about shop. Two pressure blocks, two vise blocks and two sections of 6-inch channel steel are regularly furnished with this press. Special attachments, including the Weaver Puller Clamp, Truing fixtures, Riveting Tool and Rear Axle Attachment, illustrated elsewhere on this page, at additional cost.

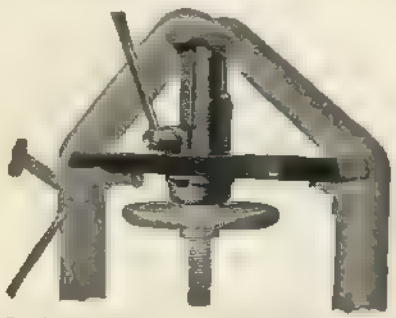
No. WD12. 32-inch width; 460 pounds..complete **$100 00**
No. WD13. 42-inch width; 545 pounds.. " **115 00**

Regular Type Forcing Presses. These presses are designed for straightening shafts or axles; pressing bearings or hubs in or out of wheels; forcing gear rings or bushings on or off, or many other such operations.

Two sections of 5-inch channel iron blocking 8 inches long; two extension arms to attach to either end of bolster and vise block is equipment furnished.

No. WD10. 32-inch width; 435 pounds..complete **$80 00**
No. WD11. 42-inch width; 520 pounds. " **95 00**

Note: In ordering it is necessary to specify which press, whether Hi-Speed or Regular, as well as size of press desired.



Weaver Rack and Pinion Attachment. For regular type forcing press. Adds to the Weaver presses now in service all the advantages of a speedy ram press for quickly handling work requiring great accuracy and comparatively light pressure (up to 2,000 pounds) at a fraction of the cost of a separate press. With this attachment any work requiring pressure from one pound to 28 tons can be handled to the best advantage without removing it once it has been placed properly in position under the screw.

No. WD27. Weaver Attachment for 32-inch press; 90 pounds .....complete **$32 00**
No. WD28. Weaver Attachment for 42-inch press; 110 pounds .....complete **$36 00**

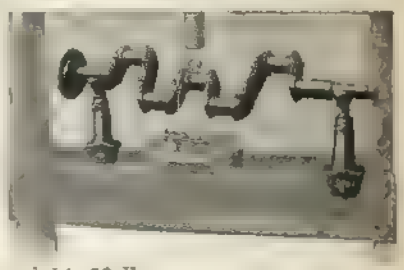
WEAVER FORCING PRESS ATTACHMENTS

For High-Speed and Regular Presses

Weaver Vertical Chuck. Designed to firmly support shafts, etc., in an upright position while pressing on and off sleeves, gears, etc. Note that as greater pressure is exerted, the tapering cones are wedged into the circular block, thus holding the shaft more tightly. Especially useful for pressing sleeves on Ford drive shafts and pinions on Ford and Chevrolet rear axles. Shipping weight, 17 lbs.

No. WD29 Weaver Chuck..each $8 00

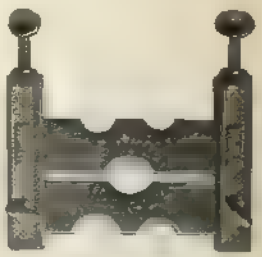
Weaver Truing Fixtures. Enable operator to test alignment of shafts, axles, etc., and straighten them on the same equipment without wasting time moving them. Fixtures can be set wherever desired on bolster. Height adjustable. Shipping weight, 10 lbs.



No. WD24 Weaver Truing Fixtures.....complete $10 00

Rear Axle Attachment

Puller Clamps



Weaver Rear Axle Attachment. Indispensable in the shop doing any amount of Ford repair work. The side rods are of [illegible] light rubber hose, 36 inches in length. Shipping weight, complete with face plate, 35 pounds; less face plate, [illegible] pounds.

No. WD20 Weaver Rear Axle Attachment complete **$9 00**
No. WD21 Less Face Plate ..... " **4 50**

Puller Clamps [illegible] set to securely clamp and support ball races or similar parts which can only be successfully supported by being securely clamped from the side.

No. WD22 Weaver Clamps, 9 in. plate 7 lbs each **$5 50**
No. WD23 Weaver Clamps, 16 in. plate 24 lbs " **9 50**

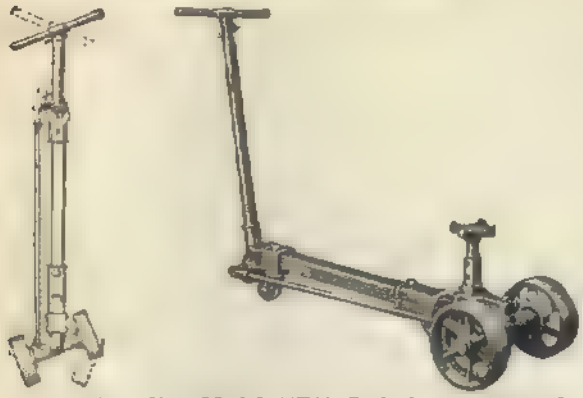
Weaver Ring Gear Riveting Tool. Designed for attaching to any Weaver Forcing Press for riveting ring gears. Rivets cannot get out of line when pressure is exerted.

No. WD25 Weaver Ring Gear Riveting Tool.....each $12 00

Balance attachments on next page.

WEAVER GARAGE AND SHOP EQUIPMENT

WEAVER NEW-WAY JACK



Weaver New-Way Model "B" Jack is an extremely compact, easily operated and efficient jack for lifting and transporting cars in the service station, repair shop or on the curb.

An important and exclusive feature lies in the fact that the wheels can be pivoted by turning the handle, as shown on left, enabling the operator to guide the jack quickly and accurately under the car in a limited space as well as guide the car while transporting it on the jack.

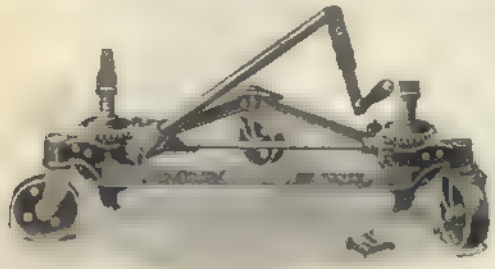
The telescoping standard provides a range of lift from 8 to 17½ inches.

Jack operates on ratchet principle and will lift burdens up to 5,000 pounds with ease. Load lowered quickly and easily by tripping latch under handle and reversing action of the handle.

No. WA16 New-Way Jack, metal wheels. Shipping weight, 100 pounds .....each **$36 00**

No. WA17 New-Way Jack, rubber tired. Shipping weight, 100 pounds.....each **$48 00**

WEAVER GARAGE SIZE AUTO TWIN JACK



Weaver Twin Jack. For handling complete and dismantled cars in the garage, repair shop, wash room, auto livery, etc., and unloading automobiles.

When applied to the car this jack takes up no more room than the car itself and thus it can be manipulated in a very limited space. With one of these jacks under each axle, the car can be pushed directly sideways or turned completely around within its own length.

Will fit both front and rear axles. Extension blocks, which will not interfere with truss rods, are furnished to reach unusually high axles.

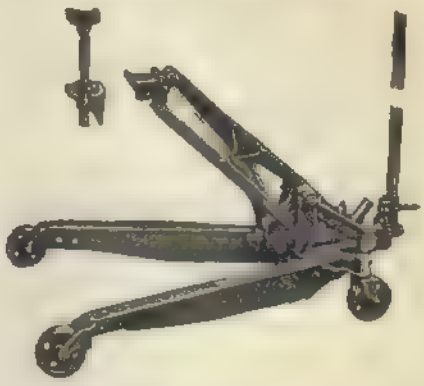
The dependable screw hoisting mechanism, broad base and two-point support provide a safe foundation.

Caster sockets equipped with two sets of steel balls and wheels with roller bearings. Extension crank handle makes it easy to place and hold jack in position while elevating screws. Capacity, 6,000 pounds.

No. WA12 Jack, metal wheels. Shipping weight, 100 pounds .....each **$24 00**

No. WA13 Jack, rubber tired..... " **36 00**

WEAVER HI-LIFT JACK



Weaver Hi-Lift Jack offers an extreme range of lift which enables the mechanic to work comfortably and efficiently under the car and is invaluable in handling countless jobs that come into the shop every day.

The saddle of the jack can be lowered to a minimum height of 6 inches and raised to a maximum of 33½ inches.

The extension screw standard gives an additional height of 7 inches and permits the lift to be applied to the frame bolster of the car in spite of low running boards, gas tanks, etc.

The saddle is always level, so there is no danger of the load sliding off.

The ball and roller bearing construction of the rear casters enables the operator to guide the jack into any desired position by the lever handle.

Jack is strongly built of steel and malleable iron. Lifting capacity, 8,000 pounds. **Maximum width, 40 in.;** ample to straddle the largest truck wheel and narrow enough to go between the front or rear wheels of any car.

No. WA18 Weaver Hi-Lift Jack. Shipping weight, 240 pounds .....each **$55 00**

WEAVER TRUCK WHEEL ATTACHMENT

Weaver Truck Wheel Attachment. For Weaver Hi-Lift Jack is supplied at a slight additional cost for removing and transporting truck wheels. The two clamps which grip the tire are adjustable to handle tires of any size. The attachment can be attached instantly without tools. Note ample space between arms to use wheel puller. Shipping weight, 32 pounds.

No. WA19 Truck Wheel Attachment.....each $10 00

The "Stainless De Luxe"

WITH BLADES OF STEEL
THAT LOOK LIKE SILVER

HERE—at last—are knives it will pay to feature most aggressively. Stainless blades of rare beauty that gleam like polished silver—blades that have keener cutting edges—that are more impervious to rust, stains and tarnish—COMMUNITY DE LUXE.

Hence these stainless knives are *all-purpose* knives. They take the place of plated knives for breakfast and luncheon, and are ideal for dinner use when meat courses are served.

And the attractive silver finish is part of the steel blade itself. Its lustre never dims—even when sharpened.

COMMUNITY DELUXE STAINLESS KNIVES mark an advance over ordinary stainless knives as important as was stainless over the plated steel.

These are knives that women must have to complete their COMMUNITY PLATE sets—that they are insisting on as essential pieces of their sets.

ICE CREAM FREEZERS

WASHINGTON

Better Cream, Less Time, Less Work

The Washington freezer's greatest characteristics are perfect simplicity of construction, ease of operation and the "one motion" required to work it. The dasher has two rows of leaves on opposite sides of the stem, and set at right angles to them are four arms carrying two hardwood scrapers. Each turn of the crank gives the cream four distinct motions, mixing it perfectly and leaving no soft spots or hard lumps when frozen. All gearing is encased in a box-like frame. Guaranteed to be the simplest and most durable cream freezer

Selling Helps—Neat, colorful posters to attract attention to your Westclox display will be furnished free on request.

Now is the time to Buy Your Radio Set

Satisfied with the Airline

We are in receipt of your letter stating that your Radio Receiving Set is still giving entire satisfaction. We have been operating this set for a period of 18 months and it has given very little trouble during that time.

We have had Lightning storms in this section of the country and the set has withstood them very well.

Yours truly,

Saved $50 at Ward's

Gentlemen:

I bought a Radio Receiving Set from you last year and saved $50 by buying from Ward's. I have had no trouble with it and it has given me perfect satisfaction.

Yours truly,

TO BE without Radio NOW is depriving yourself and family of the benefits of the most wonderful discoveries that science has given to mankind. Anyone anywhere can enjoy radio without fee or license, and without any great expense for equipment. It requires no particular knowledge or skill. Radio brings into even the most isolated homes a wealth of information, instruction and entertainment that no other invention has made possible.

Radio has been highly perfected. A good Radio Receiving Set, bought from a reputable maker, is as safe an investment today as an automobile. The principle and design of the present day radio receiving set is well established. Millions of dollars have been invested in broadcasting stations, designed especially to work with present day radio equipment. Present day radio receiving sets will be standard for many years to come.

Free Service

Our Experts Will Help You Gladly-Any Time

C. J. MANNING
Manager Radio Service Department.

ANY time you want to ask any questions about radio, just write us a letter, address it to "Radio Department" and send it to whichever of our seven big stores is nearest to you. We have radio experts at each place and will be very glad to help you and you will receive a prompt reply. We want you to feel free to write us whenever and as often as you please. You do not have to be the owner of an Airline set to get this service-it is free to all.

Sometimes a little advice, which our radio experts will cheerfully give at any time, may save you a lot of trouble. Do not hesitate to ask us any questions you wish. With every radio set we give an instruction book which explains every detail of the installation and operation. Our sets are especially designed to be easy to install and operate. No knowledge of radio or mechanical devices is necessary. Ward's Airline Receiving Sets will be found entirely reliable, complete and satisfactory in every way as you can buy at any price. They will cover distance as great, give as modern volume, clearness and selectivity and look as attractive in your home as most of the sets selling for double Ward's prices. Ward's radio equipments is the result of many years of experience in the radio field and the business built by Montgomery Ward has justly merited the confidence built in business for over 53 years.

C. J. MANNING.

How to Select the Airline Set Best Suited to Your Needs

Airline Radio Sets are of two general kinds: those that operate from the electric light socket and those using batteries. There are advantages to both these systems and by having a set using more than one kind, it pays to have a storage battery set, as it gives the most consistent good service. Where no facilities are at hand for charging a storage battery, dry cell sets can be used and will give splendid results. So far as clearness and distance are concerned, the results are about equal to those using storage battery sets. The storage battery outfits, however, give more volume and selectivity. Therefore, if you have no electricity and no battery you can use a battery charging station at a garage or automobile service station when necessary at small expense.

If you live in the country or a small town and are not near a big broadcasting station close by to interfere, you can get splendid results and cover great distance with any of our Airline Radio Sets. If you live close to a big broadcasting station, say within 15 or 20 miles, you will need a very selective set, such as our Airline Conqueror or Airline Explorer. These sets are made to tune through interference and bring in the stations that you want to hear, even when the nearby station is broadcasting. All Airline sets are guaranteed to bring in local broadcasting stations on the broadcasting wave. The following outline describes our different sets briefly, giving the characteristics of each.

Four Guaranteed Sets to Choose from All Fully Described in This Catalogue

Airline Junior. Uses our tube and head phones with dry cell equipment only. Covers moderate distances and gives good volume on stations up to 500 miles distant. Under favorable conditions, stations at much greater distances will be heard very clearly. A fine set to begin with and a favorite in thousands of homes. It is very easy to operate, can be used as a portable set and is sold at a low price. Same stations will always be found at the same dial setting on this set. See Page 494 for particulars.

New Airline De Luxe. Uses 7 tubes. Furnished with either dry cell or storage battery equipment. This set was especially designed by us for use on farms and in small towns, where there is no serious interference from nearby broadcasting stations. Gives remarkably fine tone and great volume. We do not know of any radio set better adapted for use in country homes. Tone quality is full and natural. Has three tuned stages of radio frequency amplification. With this set, under favorable conditions, you should hear all of the big broadcasting stations on the country, many on the loud speaker. See Page 492 and 493.

Airline Explorer. Uses 5 tubes and storage battery. Not adapted for dry cell use. This set is very selective and will give remarkable results anywhere. Gives clear tone and great volume. If you like to hear distant stations and the same station will always be found at the same dial setting. See Page 491.

Airline Conqueror. Our finest 7 tube set with the new simplified single dial control. Has the most powerful and selective radio frequency and receives way the finest radio set we can sell you. Furnished with either storage battery or dry cell equipment. No matter where you live this set will give you all the results you could expect from any set made. Fully described and illustrated in folders on the back cover of this catalogue.

This Guarantee Given With Every Airline Set

Airline Radio Sets Are Sold On 30 Days Trial

Radio equipment which gives satisfactory service over a 30-day trial will continue to do so indefinitely. Ward's liberal radio guarantee gives you an opportunity to try any of Ward's Airline Receiving Sets in your own home for 30 days.

Airline Radio Set Guarantee

We allow you 30 days in which to make this test and decide whether or not you wish to keep the set. If you do not wish to keep the set we will refund all you have paid, including transportation charges.

Satisfaction Guaranteed or Your Money Back

Radio Benefits

What Radio Brings Into Your Home

What You Can Hear

8:45 A.M. Cue for shipments and the weather report. Also market quotations. Time signals with early stock and grain quotations.
9:45 A.M. The weather forecast. Butter and egg market.
10:45 A.M. Latest market quotations. On Sundays the sermons from various churches.
12:30 P.M. The weather forecast repeated. Market quotations.
1:45 P.M. Markets and the weather report.
3:00 P.M. Music and good features. Butter, egg, poultry and cream markets. Club work for girls.
7:30 P.M. Musical entertainment.
8:00 P.M. Dinner music. News and market bulletins.
8:45 P.M. Bedtime stories.
9:00 P.M. to 1:00 A.M. Lectures, speeches, grand opera, news bulletins, band music, orchestrations, plays, etc.

THE Radio Program given above is an example of what you can hear over the radio almost any day. Clean, wholesome entertainment and important information is now broadcast daily from over 500 powerful broadcasting stations. What a relief! Receiving Sets can be tuned to the character of music you prefer to hear. You can select the program that suits you best. Instead of paying for a ticket to the theatre to remember the "movies" you want to hear the same stars in the real live at any time in the future.

Think of being able to tune in the latest stock and grain quotations every morning long before they'll hearing the voice of the broadcaster who'll tell you the price of rising corn or a big speedway or baseball or football game play by play direct from the field.

Radio fans who own one can hear these and many more interesting things as clearly as though they were in your own room. On Sundays when the weather prevents you from going to church, you can tune in the sermon you may prefer to any one of the city churches. Then there are the concerts, operas, band, singers, speakers and every whole theatre plus a hundred times as much direct from the big theatres.

For those who are crippled or ill, radio opens up a new world of information and entertainment. Wm. M. Jardine, Secretary of Agriculture, says: "The importance of radio on the farm can not be overstated. The farmer's receiving set is a new investment and efficient means of promptly acquiring information regarding the weather, crop conditions, market news and numerous other facts of value in his work, as well as a source of entertainment."

Long Distance 5-Tube Set "Airline Explorer"

Greatest Radio Value Offered Anywhere

Very Selective—Easy to Tune

LONG DISTANCE extreme selectivity, outstanding volume and brilliant clear tone quality with reproducing range unlimited, distinctive appearance all in such amazing low price make the Airline Explorer an outstanding radio value. New Airline DeLuxe

Our Best 3-Tube Radio Set Built Especially For the Farmer

Very Easy to Operate Stations Already Recorded

$72.00 Cash Price

Complete with All Equipment

Nothing Extra to Buy

EVERY farm home needs a good radio set. The new Airline De Luxe, which now contains the latest development of the radio industry, is a regenerative, non-interfering set combining great distance, volume, tone quality, simplicity of installation and tuning, and handsome appearance with low price and small operating cost. It is the most economical radio set we have ever had to offer. Will give very good results during the daytime for reception of market and weather reports and covers extremely long distances at night.

It is made to give exceptional results when used where large broadcasting stations are many miles away, and where ability to get distance and volume is especially important. Under these conditions it will give results equal to the larger and much more expensive sets used in cities like Chicago and New York.

Easy to Install
No Experience Needed

No mechanical or electrical experience is needed to install the Airline De Luxe. The entire installation can be made in about an hour. No soldered connections to make—the only tools you need are a screw driver and a pair of pliers. Simply read and follow the simple but complete directions. All battery wires are connected to the set before you receive it—all you have to do is erect your antenna in some convenient and proper location, attach your batteries to plainly marked wires, insert the tubes, turn the dials and immediately you are enjoying radio programs.

Thousands of Satisfied Users

In thousands of farm homes the Airline De Luxe is now giving valuable service. Bringing in market reports and weather reports and general news bulletins during the daytime and entertainment and educational features in the evening.

[illegible] clearer sound and than any radio set you ever heard, if you do not think it is the biggest 3-tube radio value ever offered, return it and the money you have paid, including transportation charges, will be refunded.

Beautiful Walnut Finish Cabinets

The De Luxe set is mounted in a beautiful ornamental Walnut finished cabinet which holds all dry cells and "B" batteries. All wire connections are made through the back of the cabinet—no wires or loose ends showing. Compact and attractive—no useless floor space required as with many other radio sets.

The particular model pictured at the left has a built in Airline Loud Speaker of the same guaranteed construction and design as the Airline Loud Speakers shown on page 497.

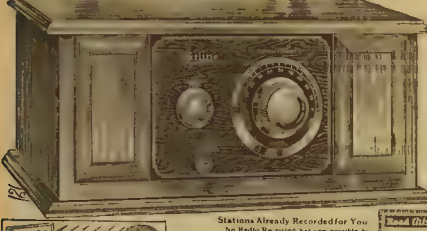
Airline 1-Tube Junior Set — Single Dial Control



$19.95 Complete With All Equipment Nothing Extra to Buy

A LONG DISTANCE one tube Airline Radio Receiving Set that will give excellent results. It combines handsome appearance, natural tone, low power use, small operating cost with extreme simplicity and within the cabinet it makes an ideal set for portable use. Take it with you on your auto or camping trip. It can be set up quickly. Just [illegible] pump or run it into a lake or stream, plug in the head phones and [illegible]. A splendid gift, and an exceptionally fine set for vacations or [illegible].

Radio and atmospheric conditions permitting the Airline Junior will receive from stations up to 1,000 miles distant.

Anyone Can Install It—No Experience Needed

We include with all Airline radio sets complete instructions plainly worded so anyone can understand them. In about an hour's time with the aid of our [illegible] and a pair of pliers, you can complete the entire installation. The battery wires are all connected to the set, when you receive it—all you need do is connect the aerial and ground wires to the plainly marked batteries and insert the tube. Then plug in the headphones and [illegible]. That's all there is to [illegible] operation. Nothing could be more simple. You can start enjoying broadcast programs the very first evening.

Programs Clear and Loud on Head Phones

If you do not feel that you can afford one of the larger Airline Radio Sets, there is no need to miss the benefits and pleasures of radio. The Airline Junior will bring them to you, no matter where you live. It requires the use of head phones and we include one set of Airline Special head phones, but two or more pairs may be used at the same time if desired. The programs are [illegible] over the telephone. If, later you wish to use a loud speaker, you may install a Airline [illegible] Amplifier.

All Equipment You Need Is Included with the Airline Junior

Nothing Extra to Buy

Stations Already Recorded for You

No Radio Receiving Set can possibly be easier to operate than the Airline Junior. All tuning has already been done for you and all morning only ONE dial you select the station you desire. Your receiving set we furnish includes list of all stations, showing the wave lengths on which they broadcast. There is also a chart showing the actual dial settings required to tune in each wave-length.

If you see in your local paper that a certain station will broadcast a program at 8 o'clock on a 400-meter wavelength, refer to your chart, turn the dial setting required for 400 meters, set your dial at that point and the station will come in strong and clear.

New Cars and Models

Jewett Announces New Smaller Six Chassis

Two Door Sedan With Hydraulic Brakes Lists at $995

THE Paige Detroit Motor Car Co., announce a new light six automobile in the smaller, lower priced edition of the present chassis bearing that name. One style, a steel two-door sedan offered either with standard or de luxe equipment — will be the first model available on the New-Day Jewett as the latest addition to the line is known. It is planned to have a touring car and another closed model ready for presentation at the Shows.

Listing at $995, the standard sedan becomes the lowest priced car of its type embodying hydraulic four wheel brakes as regular equipment. In the de luxe style, the price of the special sedan is $1,095. The engine is of four bearing L-head type having a 2¾ by 4¾ in. bore and stroke. Remy electrical equipment and a Johnson carburetor are fitted. A single dry plate clutch and three speed gearset in unit with the engine are connected with the semi-floating rear axle by two metal universal joints and a tubular propellor shaft. A standard gear ratio of 4.90 together with 29 by 4.75 in. balloon tires allows a maximum speed of nearly 60 m.p.h. The wheelbase is given as 109 in.

While the general layout of the new car has not departed from standard practice and also follows closely the design and appearance of the larger Jewett, it was developed to be adaptable to present-day driving conditions, especially in regards to high performance in congested city traffic. On the road the car demonstrated its easy handling and liberal reserve of power, the "get-away" or rate of acceleration and the effective braking were found to be unusual for a car of this type.

Murray Steel Bodies

By the use of steel bodies, products of the Murray Body Corp., the cross dimensions of the corner pillars, door posts and window frames have been considerably reduced, permitting of a wider and almost unobstructed range of vision. This type of construction together with a shorter overall length of the engine, allows an unusually roomy body to be fitted on the new chassis. While there is a difference of 6 in. between the wheelbase of the New-Day Jewett and its larger brother, it is surprising to note that the interior dimensions of the two-door sedans on both chassis are identical in every respect.

An unusual amount of development work has been undertaken by the Paige engineers in perfecting the new model, a fleet of which have been undergoing severe road testing for several months before being put into quantity production. In addition, the larger Jewett and the Paige car will continue to be part of the dealer's line.

The engine is especially built for the new car by Continental Motors Corp. With an N. A. C. C. horsepower rating of 18.15, a piston displacement of 169 cu. in., the new six develops 40 b. hp. at 2,400 r.p.m. while the maximum torque is 99 ft. lbs. at 800 r.p.m.

Power plant suspension is at four points through a spring pressing against its flat side.

The fan and water pump are combined in through a Bendix layout. On account of moving the flywheel housing to accommodate the rear engine support a slight departure

has been made from the standard S.A.E. method of mounting and a special armature shaft approximately 1 in. longer is necessary. A spring coupling provides the drive from the chain sprocket to the third brush type generator, the latter being carried on the separate support casting upon which the distributor is located. The ignition unit is provided with automatic spark advance and operated by spiral gears connected with the generator drive. Both the coil and the cut-out are mounted on the top of the generator close to the distributor, all four units being readily accessible. Manufacturer's model designation of the electrical units follow:

Generator	943-A	Distributor	537-A
Starter	711-E	Coil	525-A

High tension leads to the A-C make of ⅞ in. spark plugs are conducted through insulated brackets. A 5 amp. 25 volt fuse protects the generator field circuit while the lighting system is provided with a 20 amp. 25 volt fuse. Headlamps are of Corcoran manufacture and 6-8 single contact bulbs are used all round.

Rockford Plate Clutch

A single dry plate clutch of Rockford manufacture, model 9-HH, is employed. Four 90 deg. segments of friction material are applied to each face of the disk, the dimensions of the material being 8⅞ in. O. D., 5¾ in. I. D., by ⅛ in. thick. Throw-out bearing is of Nice make and oiled by pressure gun through a nipple in the throw-out sleeve.

The transmission is a product of the Warner Gear Co. and known as model T-68A. Annular single row ball bearings carry the main shaft while the lower shaft and spigot bearings are phosphor-bronze bushings. Gear ratios are:

Low	3.07 to 1	Reverse	4.00 to 1
Second	1.77 to 1	High	1.00 to 1

Except for minor changes the leverages on the transmission brakes are the same as those on the larger car, the dimensions of the drum being 6 in. diameter by 2 in. wide.

Two metal universal joints and a tubular propellor shaft, all of Mechanics Machine Co. make, transmit the power to the model No. 1593-E Salisbury semi-floating rear axle. Propulsion and torque is taken through the underslung springs while the axle housing is of pressed steel. The pinion is straddle mounted being carried at the front on a double row ball bearing and at the rear on an annular ball bearing while at the wheel ends of the 1 1/32 in. diameter axle shafts Bower roller bearings are used. The differential is supported on Timken roller bearings. Standard gear reduction is 4.9 to 1, the ring gear having 49 teeth and the pinion 10.

Front axle is also of Salisbury make, model 1592 and of reverse Elliott type. Ball bearings similar to those on the larger cars are employed at the knuckle joints while the king bolts are ¾ in. diameter. Bower inner and outer wheel bearings are employed. The worm and sector steering gear of Gemmer make, model No. 70, is equipped with a ratio of 10 to 1.

Coincidental Lock

A 17 in. diameter steering wheel is locked by a plunger located at the point where the post is secured to the dash. By depressing the plunger the ignition is also automatically shut-off.

The hydraulic four wheel braking system is virtually the same as that employed on the heavier Jewett except for the method of conducting the fluid to the rear wheels. Instead of the customary rubber hose leading to the cylinders at each of the rear wheels, only one flexible connection is employed. On the left side a hose of the usual type connects with a "T" joint placed just above the spring pad on the axle and from this point the fluid passes through a short copper tube to the left operating cylinder. For the other wheel, fluid is led from the remaining outlet of the "T" by copper tubing passing along and secured to the axle housing, connection being made directly with the right operating cylinder. This arrangement besides making for a simpler hook-up prevents the possibility of damage to one less flexible connection between the frame and the axles. All four brake bands are interchangeable and contract over 12 in. diameter drums. The width of the lining is 1½ in. and the thickness 3/16 in. Dimensions of the springs are the same as those on the larger car, the sizes on the front being 36 by 2 in. wide and on the rear 54 by 2 in. wide. All shackle bolts are ⅝ in. diameter except the front bolt of the rear spring which is ¾ in. diameter. The depth of the side channels of the straight tapered frame is 5½ in. pressed from stock ⅛ in. thick.

On the standard model 4 in. Jaxon rims carrying 29 by 4.75 tires are fitted to 12 spoke artillery wheels. Tuarc disk wheels are supplied on the special sedan. Chassis lubrication is by the Zerk pressure oil gun.

In addition to the usual instruments on the dash the following items are included as regular equipment. Dash gasoline gage, cowl ventilator, sun visor, coincidental lock and windshield wiper. De luxe models also have nickeled radiator shell, front bumper, quarter rear bumpers, combination tail and

(Concluded on page 71)

Elliott steering heads. The front wheels are mounted on taper roller bearings.

Sixteen inch three shoe Bendix-Perrot brakes are carried on all four wheels, the effective surface of each brake, being 98 sq. in. The brakes are equalized in pairs. While the brake pedal applies the brakes on all four wheels, the brake lever, applies only the rear brakes, through a special equalizing mechanism.

Steering is by a Locomobile Ross cam-and-trunnion type steering gear, operated by means of an all wood hand wheel. Provisions are made whereby any looseness at the upper end of the steering column can be readily taken up.

A combined dash and instrument board construction is used similar to that much seen on European chassis and which is very handy where custom-built bodies are to be fitted. A cast aluminum supporting bracket is fastened to each side frame, and to these brackets are secured the plate aluminum (3/16 in.) dash and the cast aluminum instrument base. Thus all instruments can be mounted and all connections made before the body is put on.

The balloon tires are of the 33 x 6.75 in. size and are fitted to Firestone collapsible rims on artillery wood wheels.

The open models have hand-buffed leather upholstery and Pantasote tops while the closed models are all trimmed in broadcloth.

All bodies are of composite construction, with ash frames and sheet aluminum paneling. All doors are of the flush type, in both the open and closed types. All bodies were designed at the Locomobile plant.

One feature of the closed models is the windshield, which is divided along the vertical center line so as to make virtually two individual shields. Very light tongue and grooved frames of bronze are used for the glasses, so as to detract as little as possible from the field of vision.

On the closed models, instead of having the conventional vizor in front of the windshield, a movable vizor is provided back of the shield. This rolls up like a curtain when it is not needed, and a patent has been applied for on it.

All interior body hardware is of locomobile design.

General Motors Acquire Vauxhall Motors

Alfred P. Sloan, president of General Motors Corp., has announced that merger negotiations between his company and Vauxhall Motors, Ltd., of Luton, England, have been consummated through the approval of stockholders, and that the number of directors has been increased from four to seven, the three additional representing General Motors.

The New-Day Jewett

(Concluded from page 58)

stop light, automatic windshield wiper and shock absorbers all around.

Both front and rear seats are very low and when not required, the right forward seat folds completely under the dash. Doors are unusually wide making it possible for those in the rear to leave the car without disturbing those in front. The windshield is of the one piece type swinging from the top. Standard color for both closed cars is two-tone Killarney Grey lacquer.

New Eight-in-Line Elcar Model

The Elcar Motor Co., Elkhart, Ind., announces a new Eight-in-line for the New York and Chicago shows. The new model will be powered with a Lycoming engine of the same stroke as the present eight, but with smaller bore. The wheelbase is exceptional—124 in.—and the price in all probability will be lower than that of any eight of similar specifications.

New G. M. C. Car to be a Six

The General Motors Car, soon to be produced by the Oakland Motor Car Co. as an addition to the line and a companion to the Oakland Six, will have a six-cylinder engine. It is rumored the new car will be the lowest priced six-cylinder car in the General Motors line.

Locomobile Adds Jr. Eight Coupe

Locomobile Co. of America announces the addition of a coupe to the junior eight line. The new model, which was in production last month, will have extra wide straight seat inside and a rumble seat in the rear deck for two passengers.

New Landau Sedan by Oakland

The Oakland Motor Car Co. now has in production a new style Landau sedan with larger body, wider rear seat, larger rear quarter windows, new colors and many other refinements, the price remaining unchanged at $1295.

Correction

In the September issue the statement was made the Durant Star Salesmen's Course cost $10. The cost is $1.

Two New Devices Added to Chrysler

Two new devices, a fumer and a manifold heater, to facilitate starting in very cold weather, are now fitted on all six cylinder cars shipped from the factory of the Chrysler Corp.

These developments in combination bring the engine performance in winter up to practically the same standards of operation as during the summer months.

The primer or fumer is of simple construction, consisting of a double heating element and asbestos blocks enclosed in a brass sleeve. At the bottom of the sleeve there are two openings into which the gasoline is admitted. On the top is a perforated grid through which the gasoline fumes escape after contact with the heating element and from here escape to the body of the carburetor. The unit is placed in a well at the bottom of the carburetor.

Briefly, the action is as follows: When cranking the engine with the choke closed, there is a considerable amount of gasoline drawn from the carburetor jet. The suction at low temperatures, however, is insufficient to lift it up into the combustion chamber. Therefore, the gasoline drains back into the well in which the fumer is placed and fills it up to about half the height of the heating element. At this level the heating of the gasoline is most rapid, and a drain hole is provided to prevent its filling any higher. To give the heating element time to heat and vaporize the mixture gradually, the unit is so constructed that the gasoline attains its maximum level slowly. The fumer is operated by means of a switch on the instrument board.

The other device for heating the incoming gases consists of a valve controlling the flow of heat from the exhaust manifold to a jacket surrounding the intake manifold, providing a rapid, uniform heating of the mixture. A control on the instrument board operates the valve.

A New Studebaker

Studebaker is now in production on a 120 in. wheelbase Big Six chassis model which is offered in three five-passenger body styles: A sport phaeton listing at $1575; a club coupe at $1750 and a sedan at $1995. In addition, all Studebaker models now are fitted with oil filters and air cleansers as regular equipment.

The new 120 in. Big Six is exactly the same as the 127-in. wheelbase model, which is continued without change, except that it has 32 x 7.30 in. tires and a rear axle reduction ratio of 4 8/13 to 1.

Bodies on the short wheelbase Big Six are all finished in lacquer with the closed models upholstered in fabric and the open in leather. All three body models have artillery wheels, shock absorbers, automatic windshield wipers, sun visors, cowl ventilators, rear view mirrors, rear traffic signals, dash gasoline gages, cowl lamps, clocks, and locks on ignition, steering gear and spare tire. In addition, the closed models have smoking sets and door locks, and the club coupe has a trunk rack.

A five-passenger sedan model listing at $1395 has been added to the Standard Six line and the Berline body type on this chassis has been discontinued.

Gardner Adds Foursome Roadster

A new body model known as the Foursome Roadster mounted on the eight-in-line chassis has just been added to its line by The Gardner Motor Co., Inc., St. Louis, Mo. This new roadster has a two-tone exterior finish, nickeled radiator, large nickel trimmed lamps, cowl lamps and five Disteel wheels. A new touch is found in the steering wheel which can be adjusted to fit the individual driver. The top can be let down or completely removed if desired. Both the main seat and the rumble seat are upholstered in machine buffed Spanish leather in a color to harmonize with the body finish. Just back of the main seat is a handy compartment for tools, golf balls and other paraphernalia needed on short trips. All instruments, including gasoline gauge, and heat indicator, are grouped under a single glass panel on the dash, and indirectly lighted.

Additional items included as standard equipment are five full-size balloon tires, shock absorbers, bumpers front and rear, rear vision mirror, automatic windshield wiper, automatic stop light, and cover for spare tire. The new model lists at $1,995 f. o. b. the factory.

New Seat Feature in Kissel Car

The Kissel Motor Car Co. is presenting a new feature in the two-door closed type of car—sliding front seats, which makes entrance and exit to the rear portion of the car more accessible. The driver's seat can be readily adjusted for any distance from the steering wheel and pedals.

Diana Adds 7 Passenger Sedan

A seven-passenger sedan finished in Brewster green Duco below the belt and black above, has been added to the Diana line. The body is mounted on 135-in. wheelbase chassis with special springs. The price is $2695.

Due now to the great and increasing popularity of the new 90-degree Cadillac, as well as the lower Cadillac prices, the legitimate market for Cadillac is very greatly enlarged.

Therefore, there now exists a very real business opportunity for a dealer to sell Cadillacs in many cases where it never existed before.

You may be interested—and you may be rightly situated. If you feel that you are, write us fully. Your letter will be held confidential.

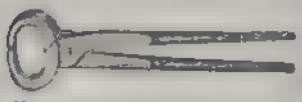
BLACKSMITHS' PINCERS
—PINE KNOT—

Special quality forged crucible steel. Oil tempered jaws, polished face, natural finish handles, heavy steel rivets.

Nos.	4910	4912	4914
Length, ins	10	12	14
Wt per doz, lbs	19	23	25
Per Doz	$24 00	25 50	28 50

Half doz in cardboard box.

FARRIERS' SHOEING PINCERS
CHAMPION

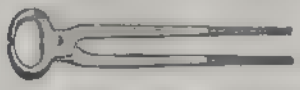


Solid hammered cast steel; steel rivet; oil finish; tempered and polished jaws.

Nos.	13	14
Length, ins	13	14
Wt per doz, lbs	28	30
Per Doz	$53 25	60 00

Half doz in cardboard box.

HELLER BROS.

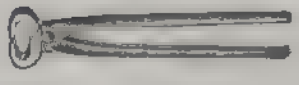


Solid cast steel, steel rivet; tempered, full polished jaws.

Nos.	21	20
Length, ins	12	14
Wt per doz, lbs	23	32
Per Doz	$51 00	63 00

Half doz in cardboard box.

FARRIERS' CUTTING NIPPERS
—PINE KNOT—

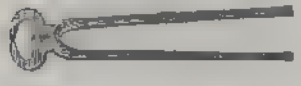


Solid steel, oil finish. Tempered polished jaws; steel rivet.

Nos.	40	42
Length, ins	10	12
Wt per doz, lbs	14	17
Per Doz	$27 00	28 50

Half doz in cardboard box.

HELLER BROS.



Crucible cast steel, full polished; tempered jaws; steel rivet.

Nos.	24B	24A	24
Length, ins	10	12	14
Wt per doz, lbs	12	20	30
Per Doz	$51 00	69 00	81 00

Half doz in cardboard box.

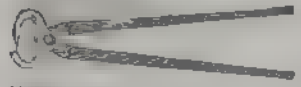
HOOF PARERS
—PINE KNOT—

Crucible cast steel, tempered; black finish handles; polished perfectly fitted jaws; heavy steel rivet.

Nos.	5012	5014
Length, ins	12	14
Wt per doz, lbs	20	[illegible]
Per Doz	$40 50	46 50

Half doz in cardboard box

HELLER BROS.



Crucible cast steel, tempered; full polished.

Nos.	23A	23
Length, ins	12	14
Wt per doz, lbs	20	29
Per Doz	$69 00	81 00

Half doz in cardboard box.

FARRIERS' KNIVES
JOHN PRIMBLE

Highest quality crucible cast steel blade, uniformly tempered and polished; 3½ inches long, sharpened ready for use; 4 inch white bone handle.

Nos.	50-⅝	50-¾
Width Blade, ins	⅝	¾
Per Doz	$27 00	27 00

Half doz in pkg; wt 2½ lbs.

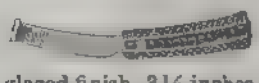
WOSTENHOLM'S I. X. L.
Bone Handle.

Extra quality crucible steel blade, highly tempered, glazed finish, 3½ inches long; solid bone handle, 4 inches long.

Nos.	7834-⅝	7834-¾
Width blade, ins.	⅝	¾
Per Doz	$31 50	31 50

One doz in pkg; wt per doz 2½ lbs.

POPE'S

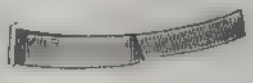


Detachable blade, first quality crucible steel, highly tempered, glazed finish, 3½ inches long; japanned iron pierced handle 4 inches long.

Nos.	1-1½	1-⅝	1-¾	1-⅞
Width blade, ins	⅛	⅝	¾	⅞
Per Doz	$20 25	20 25	20 25	20 25

Half doz in cardboard box; wt doz 4½ lbs.

POPE'S FARRIERS' KNIFE BLADES



First quality crucible steel, highly tempered, glazed finish; 3½ inch cutting edge. For Pope knives.

Nos.	1B-½	1B-⅝	1B-¾
Width, ins	½	⅝	¾
Per Doz	$15 75	15 75	15 75

Three doz in cardboard box; wt per doz about 1 lb.

BLACKSMITH'S APRONS

—BLUE GRASS—

Per Doz

No. 46—Mule skin; mule skin strings 34 ins long; size 28x38 ins [illegible] $142 50

One doz in bundle; wt per doz 22 to 24 lbs.

—BLUE RIBBON—

Per Doz

No. 48—Made of split leather, with bib, brass eyelets and leather strings 34 ins long; size 26x34 ins [illegible] $120 00

One doz in bdle; wt per doz 18 lbs.

BLACKSMITHS' APRONS

—CYCLONE—

Per Doz

No. 49—Made of split leather, without bib; brass eyelets and leather strings 26 ins long; size 24x30 ins..... $100 50

One doz in bale; wt per doz 21 lbs.

FORGES

LANCASTER

Pressed steel wind shield or hood; cast iron hearth; four bent tubular steel legs; encased fan and gearing.

With Shield.

Each

No. 45—Agricultural Forge. Hearth 22 ins in diam; fan 10 ins; height to top of hearth 31½ ins; wt each 115 lbs..... $48 75

One in crate.

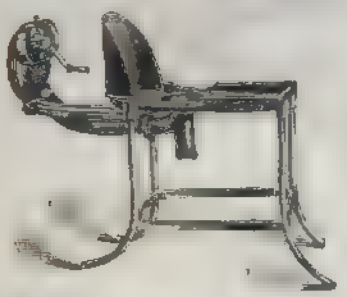
LANCASTER

With Half Hood.

Each

No. 46—Agricultural Forge. Hearth 22 ins in diam; fan 10 ins; height to top of hearth 31½ ins; wt each 120 lbs..... $54 00

One in crate.



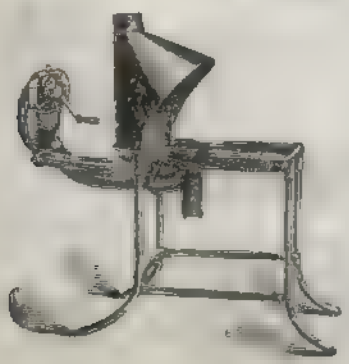
LANCASTER

With Shield.

Each

No. 42—Agricultural Forge. Hearth 23x35 ins; fan 12 ins, height top of hearth 30 ins; wt each 165 lbs $67 50

One in crate



LANCASTER

With Half Hood.

Each

No. 43—Agricultural Forge. Hearth 23x35 ins; fan 12 ins; height to top of hearth 30 ins; wt each 170 lbs $73 50

One in crate.

FORGES

CHAMPION

Operates exclusively by crank motion. The crank motion on these forges delivers the blast to the fire by being turned either way, which makes it a very valuable forge for boilermakers, bridge builders or for any purpose where a good, strong, heavy, substantial forge is wanted. By loosening two set screws the crank and bracket gearing can be lowered and turned out of the way under the forge hearth, making a very convenient forge for moving about.

CHAMPION

With Shield.

Cast iron hearth, pressed sheet steel wind guard; three bent tubular steel legs; incased fan, open gearing.

Each

No. 18—Champion Portable Rivet Crank Forge. Hearth 18 ins; height to top of hearth 33 ins; fan 9 ins..... $40 50

One in crate; wt 100 lbs.

CHAMPION

With Half Hood.

Cast iron hearth, pressed sheet steel wind guard; three bent tubular steel legs; incased fan, open gearing.

(Gear turned under for transportation).

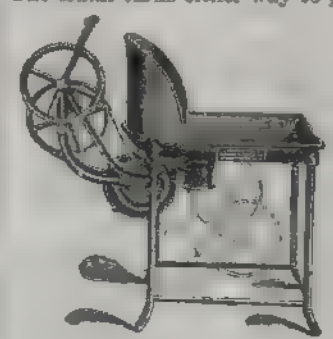
Each

No. 19—Champion Toolmakers' Crank Forge. Hearth 18 ins; height to top of hearth 33 ins; fan 9 ins... $46 50

One in crate; wt 110 lbs.

CHAMPION

Especially adapted to the use of boilermakers, machinists, ship and bridge builders, plumbers, railroad repair shops, etc. Gearing can be turned under arm for transportation as shown. The crank turns either way to produce the blast.



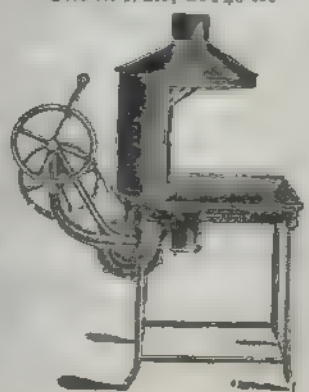
With Shield.

Cast iron hearth, pressed sheet steel wind shield; four bent tubular steel legs; encased fan; open gearing.

Each

No. 15—Champion Boilermakers' Crank Forge. Hearth 22x28 ins; height 30 ins to top of hearth; fan 10 ins..... $60 00

One in crate; wt 140 lbs



With Half Hood.

Cast iron hearth, pressed sheet steel half hood; four bent tubular steel legs; encased fan; open gearing

Each

No. 16—Champion Machinists' Crank Forge. Hearth 22x28 ins; height 30 ins to top of hearth; fan 10 ins..$67 50

One in crate; wt 150 lbs.

FORGES

CHAMPION

Heavy Pattern. With Shield.

Pressed steel hearth and wind shield; encased fan and gearing; four bent tubular steel legs.

Made from structural steel. Gearing is of the high speed Champion spiral gearing.

Strictly a high grade forge in every respect and is supplied with highest grade adjustable ball-bearings. The crank turns either way to produce the blast. Will weld 3½ to 4 inch iron in ten minutes.

Each

No. 401—Champion Steel Rivet Forge. Hearth 18 ins; height to top of hearth 30 ins, fan 9 ins **$75 00**

One in crate; wt 115 lbs.

CHAMPION

With Half Hood.

Reinforced stamped steel legs; stamped steel bowl and wind shield.

Ball-bearing throughout. Creates a strong, regular and positive blast, equal in every respect to a blast produced from a blower run by power. The machinery is all made from the best tool steel and phosphorus bronze; machined and cut from the solid metal and fitted with the precision and nicety of a watch, and all enclosed in an oil-tight casing. Has no belts or friction. Blast is produced by turning the crank in either direction, thus giving the operator any desired position. Blast is powerful enough for all kinds of light and heavy blacksmiths' work including the heaviest railroad work.

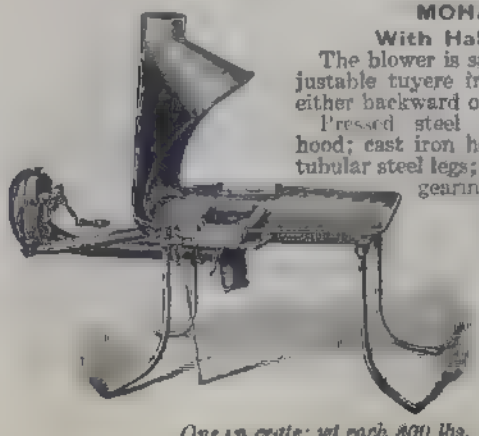
Each

No. 408—Champion Steel Horse Shoers' Forge. Hearth 30x36 ins; height to top of hearth 30 ins; fan 12 ins..... **$141 00**

One in crate; wt 600 lbs.

MOHAWK

With Half Hood.



The blower is supplied with adjustable tuyere iron, crank turns either backward or forward.

Pressed steel wind shield or hood; cast iron hearth; four bent tubular steel legs; encased fan and gearing.

Blacksmith's Direct Drive Forge. Hearth 32x45 ins., fan 12 ins., height to top of hearth 30 ins.

Each

No. 271 $90 00

One in crate; wt each 800 lbs.

FORGES

"HOT BLAST"

These forges are equipped with a cut-geared crank-driven blower, helical gearing being used to give smooth running and noiseless operation. The gear ratio gives 48 revolutions of the blast wheel to one turn of the crank, making a strong, steady, high pressure blast with smooth easy turning. Crank turns either direction. The gear case is oil-tight and dust-proof.

Cast iron hearth, pressed sheet steel windshield and hood; bent tubular steel legs; encased fan.

For general light and medium repair work, such as garages, farmers, or any place where a light portable forge is desired.

With Shield.

Each

No. 345—Diam hearth 18 ins; height 30 ins; fan 10 ins **$31 50**

Crated, wt each 87 lbs.

With Half Hood.

Each

No. 346—Diam hearth 18 ins; height 30 ins; fan 10 ins. **$34 50**

Crated; wt each 90 lbs.

With Shield. Each

No. 347—Hearth 22 ins; height 30 ins; fan 8 ins **$35 25**

Crated; wt each 105 lbs.

With Half Hood.

Each

No. 348—Hearth 22 ins; height 30 ins; fan 8 ins **$39 00**

Crated; wt each 110 lbs.

The large size hearth makes these forges very desirable for boiler makers, machinists, garages, farmers, etc.

With Shield. Each

No. 342—Hearth 23x30 ins; height 30 ins; fan 10 ins..... **$55 50**

Crated; wt each 135 lbs.

With Half Hood.

Each

No. 343—Hearth 23x30 ins; height 30 ins; fan 10 ins **$58 50**

Crated; wt each 140 lbs.

BLOWERS

CHAMPION

Ball-Bearing.

Three bent tubular steel legs, adjustable fan casing; counter balanced fan crank.

Made out of phosphor bronze and tool steel. Supplied with adjustable ball-bearings which are made of highest grade tool steel. The cups and cones are lathe turned, hardened as hard as glass and ground to the highest possible finish. Has the patented high speed spiral gearing.

Each

No. 400—Height over all 46 ins; 12 in. fan; complete with heavy nest whirlwind tuyere iron and piping.....$78 00

One in crate; wt 155 lbs.

MIDWAY

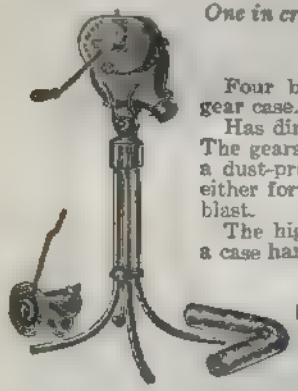
Cast iron base and standard. Adjustable fan casing, counter balanced fan crank; height over all 46½ inches; diameter base plate 17 inches.

The spiral gearing is simple in construction and without small gears or pinions. The gearing runs in oil in a dust proof casing. The crank turns in either direction to make the blast. Complete with a center blast, heavy nest ball tuyere iron; weight 50 lbs.

No. 70—12 in fan supplied with 50 lb. center blast, heavy nest ball tuyere iron and piping complete..... Each $70 50

One in crate; wt 170 lbs.

"HOT BLAST"



Four bent tubular steel legs, cast iron gear case. Painted green.

Has direct drive and strong steady blast. The gears are perfectly cut and enclosed in a dust-proof, self oiling case. Crank turns either forward or backward to produce the blast.

The high speed spindle is equipped with a case hardened end thrust ball-bearing.

Each

No. 60—Height over all 46 ins; diam of fan case 12 ins; complete with tuyere iron and pipe....$48 75

One in crate; wt each 140 lbs.

MOHAWK

Cast iron base and standard, adjustable fan casing; counter balanced fan crank; height over all 46 inches; diameter base 17 inches. Supplied with the Champion adjustable nozzle tuyere iron.

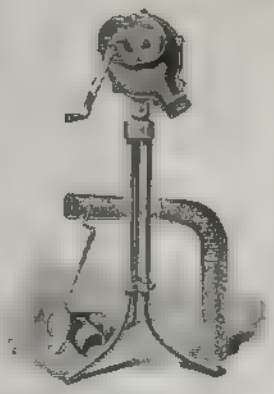
The high speed spindle is equipped with a case hardened end thrust ball-bearing.

Each

No. 40—12 in. fan with tuyere iron and piping complete.....$48 75

One in crate; wt 125 lbs.

BLOWERS



"HOT BLAST"

Built to meet the demands of the small blacksmith and farmer, who desires a low priced blower producing a blast sufficient for all needs. Built with high speed helical gearing, giving 48 revolutions of the blast wheel to one of the crank. The gearing is enclosed in a dust-proof, oil tight gear case. It is smooth running with crank turning either direction to make the blast.

Each

No. 340—Diam of fan 11¼ ins; mounted on three steel legs, with tuyere iron and pipe complete.....$40 50

Crated; wt each 67 lbs.

CHAMPION, ELECTRIC

The steel pressure blast feature on this type blower means that the blower or fan case is designed **Snail shape and built for high speed and high pressure blast.** Blower is furnished with Universal motor, wound for both alternating and direct current, either 110 or 220 volts, with detached rheostat with six speeds. The Universal motor is built with a hammered steel shaft, phosphor bronze bearings, self-aligning commutator of hard drawn copper with twenty four bars and large flat brushes and silk covered wire of the best insulation. All motors are designed and built with sufficient units of power guaranteed to run the blower at highest speed and highest pressure open and away from the fire for eight to ten hours without a single stop.

For both direct and alternating current, with detached rheostat for six speeds, and steel pressure case, for all kinds of general blacksmith work. Height over all, 12 inches; floor space occupied, 12x13 inches; diameter of outlet 3 inches.

Each

No. 50-110—110 volts, 1/10 H. P..... $111 00
No. 50-220—220 volts, 1/8 H. P..... 111 00

One in crate; wt each 55 lbs.

This motor is in all detail exactly the same as No. 50, the only difference is that it is built a half size larger in both the motor and the fan, thus giving at least half more blast. To meet the demands of such cases where an extra large blast is desired this blower has been designed, and this large blast can be reduced for the smallest work as easily as producing an extra heavy blast.

For both direct and alternating current, with detached rheostat for six speeds, for extra heavy fire. Height over all, 13 inches; floor space occupied, 12x15 inches; diameter of outlet 3 inches.

Each

No. 51-110—110 volts, 1/10 H. P..... ✦$144 00
No. 51-220—220 volts, 1/8 H. P..... ✦ 144 00

One in crate; wt each 80 lbs.

✦F. O. B. Pennsylvania Factory Only.

BELLOWS

STANDARD

Hardwood outside boards, cross cleated; japanned sheet steel cap and funnel, five leaf pattern with cowhide split leather sides or folds; trimmed with ⅝ inch wood mouldings; steel side pivots and japanned rear hook; painted red.

TUYERE IRONS

Cast iron, natural finish, bolted together.

DUCK NESTS

Per Doz

No. 5D—Single; round head, diam 7¼ ins; diam of hole 3½ ins; length over all 11 ins..... $33 75

Packed loose; wt each 12¾ lbs.

DUCK NESTS

Per Doz

No. 6D—Single; round head, diam 7¼ ins; diam hole 3½ ins; length over all 13½ ins.... $39 00

Packed loose; wt each 14½ lbs.

DUCK NESTS

Per Doz

No. 7D—Double; round head, diam 7½ ins; diam hole 3½ ins; length over all 14 ins.. $46 50

Packed loose; wt each 17½ lbs.

SUTTON'S BOWL

Each

No. 60—Best Dunbar pig metal, dipped in asphaltum, cast in one piece, bowl 11½x14 ins..... $16 50

Packed loose; wt each 40 lbs.

TUYERE IRONS

Cast iron, natural finish, bolted together.

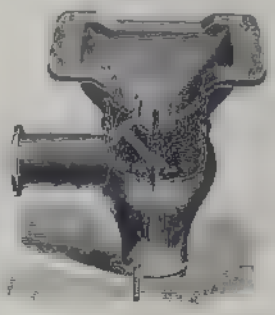
NORTON'S

Ball Valve, either right or left.

Each

No. 13—Round top; diam 6 ins; 3¼ in. hole; length of neck 6 ins; length of rods 26 ins..... $7 20

Packed loose; wt each 26½ lbs.



CHAMPION "WHIRLWIND" Anti-Clinker.

Heavy cast iron, japanned finish. Concentrates the blast and heat in the tuyere nest, thus makes a hotter fire.

This is the same Tuyere Iron as furnished with No. 400 Champion Blower.

Each

No. 400—Depth 5 ins; width 8¾ ins; length 10½ ins; over all 12¾x14¾ ins $21 75

Packed loose; wt each 60 lbs.

CHAMPION

Patent Adjustable Nozzle.

Cast iron, painted red. This is the same Tuyere Iron as furnished with Nos. 40 and 60 Blowers.

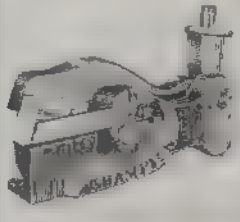
Each

No. PA—Diam head 8 ins; 3 in hole; length of neck 3 ins; length over all 11½ ins..... $9 75

Packed loose; wt each 12 lbs.

STEEL SHEARS

These shears have been in the hard service of hundreds of contractors, construction companies and blacksmiths, cutting all kind of steel, such as steel reinforcing bars for as long as eight to ten years and still show no sign of wear.



CHAMPION

Will cut ⅝ in round and 3x⅜ in flat steel.

Each

No. 1C—Length 24 ins; height 10 ins..... +$60 00

Crated; wt each 155 lbs.

ST. ANTHONY

A triple lever, back geared machine and very powerful.

No. 1—Will cut 1 in. round and 2x¾ in. flat steel; length 37 ins; height 18 ins; wt each 350 lbs... Each +$100 50

No. 2—Will cut ⅞ in. round and 4x½ in. flat steel; length 26 ins; height 14 ins; wt each 265 lbs..... Each +$87 00

Crated.

+F. O. B. Minnesota Factory Only.

TIRE SHRINKERS

AMERICAN

The jaws are made of hammered tool steel with machine cut teeth hardened to suit the work to be done. The jaws are worked by a mechanical lever and are thrown in and out instantly by a simple movement of the hand, which makes it a shrinker that can be handled by one man if so desired. The tire is gripped on its flat sides, both top and bottom, and the tire is held with a perfect grip until it is shrunk. Will shrink with one stroke of the lever 1¼ inches.

Each

No. 4—Will shrink up to 4x1 in. round or square edge tire, and 1¼ in. axles, has two steel jaws 4x2 ins wide, lgth base 28 ins; wth. 16 ins; wt each 325 lbs ✦ $118 50

Shipped knocked down.

MOLES

Without Anti-Kink Attachment.

Painted cast iron frame and bed; cast jaws; plain hardwood handle. The pin holes in the link connecting the jaws are so placed that the pin may be moved into different holes for different thickness of tire. No. 1 for slight work, No. 2 for medium work, No. 3 for heavy work.

Cement Finishers Long Handle Tools

Double Acting, Simple, Strong, Practical

The Long Handle feature of these tools eliminates a lot of back-breaking attitudes, but the **Double Acting device** is what accomplishes the big reduction in effort required to do a given amount of work. As the trowel is pushed the forward edge of the blade automatically lifts slightly; as it is pulled this action is reversed and the rear edge of the blade is raised. This double action absolutely prevents the blade from digging into the concrete. All work within reach is finished from one side and the position of this operator has to be changed much less frequently. It enables an inexperienced man, with an hour's practice, to do a first class job of finishing.

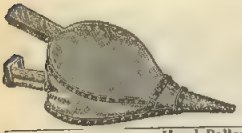
Bellows



Our Hand Bellows are made of lightweight kiln-dried lumber and sheepskin leather. They can be used in household, office or factory. Will remove dust from pianos, typewriters and other places difficult to reach.
Our Standard Moulders' Bellows have boards fastened together with steel hinge, which relieves the leather from strain. Covered with heavy sheepskin. Nozzle of galvanized iron reinforced to keep its shape.

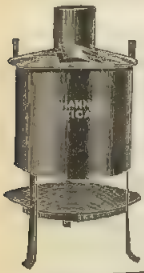
Salamanders

For Builders, Contractors, Shops, Etc.



These Salamanders are substantially designed and made for hard service. The pan, body and legs are of heavy steel, and the grates of cast iron. The ash pan is raised a good distance from the ground and projects past the edge of shell so as to prevent the coals dropping out. Fitted with handles for convenience in moving about.
For temporary heating in cold weather or for use in buildings where the regular source of heating is not available, these salamanders will be found extremely useful and economical. The fuel ordinarily used is coke.
Diameter of body, 16¼ inches. Height of body, 15 inches. Total height 28½ inches.

With body of 16-gauge iron, price each $4 00
With body of 18-gauge iron, price each 3.50
Hood for salamander, extra each 2 00
Extra grates, price each 1.00

GASOLINE LAMPS

COLEMAN, "QUICK-LITE"

These are the latest types of hydro-carbon gasoline lamps. They produce a very powerful, bright light (approx. 300 C. P.) at a minimum cost. The construction is such that they cannot explode under any circumstances, will not smoke nor smell, and are at all times perfectly reliable. Ideal for homes, yet can be used for stores and halls by suspending from ceiling by an extra wire and ring which are furnished with each lamp.

The gasoline feeds up the standard and is controlled by a valve. When it reaches the coil between the mantles it is turned into vapor. This vapor mixes with air entering through the larger tube, forming a gas that burns like any gas.

They have three features that make them different from all other gasoline lamps. The first and most important is that it lights with common matches instead of being generated with an alcohol torch. The second is the simplicity of maintenance. Instead of having to be cleaned the generators are cheap enough to throw away. An extra one is furnished with each lamp. Third is that the burner is supported by the air intake tube which takes the air below the mantles where it cannot be affected by heat.

Seamless brass fount. All lamps regularly furnished complete with mantles, pump, wrench, hanger, cleaning pick and extra generator.

COLEMAN, "QUICK-LITE"

Nickel Plated, Polished Fount.

Ornamental opal paneled glass shade.

Each

No. C329 (Old No. CQ329)—Capacity 3 pts, burns 15 to 18 hours; height over all 22 ins; diam shade 10 ins $21 00

PLANTATION HAND

Polished brass; burns without chimney; diameter of base 3½ inches; oil capacity 1 pint.

Per Doz

No. 2F Flat burner and wick; height over all 2½ ins..... $6 75

Half doz in cardboard box; wt per doz 5 lbs.

CONDULETS

VAPOR-PROOF—V SERIES

SCREW GUARD

Form 75 takes 75-Watt Mazda C Lamps, 60-Watt Mazda B Lamps, or any Lamp not exceeding 2⅝x6⅛ inches. Form 200 takes 200 Watt Mazda C Lamps, 100-Watt Mazda B Lamps, or any Lamp not exceeding 3⅝x8⅜ inches. Furnished with Receptacle, Sealing Plate, Gaskets, Globe and Guard.

TYPE V, SCREW GUARD, BROKEN-AWAY VIEW

TYPE V, SCREW GUARD, WITH REFLECTOR

TYPE VA, SCREW GUARD, WITH HOLOPHANE RE-FLECTOR REFRACTOR

TYPE VC, SCREW GUARD

Condulets of the V series, screw guard, are here illustrated and described, as they may interest users of vapor-proof Condulets

This series consists of eighteen types, although but eleven are here shown

The difference between the V series, screw guard, and the V and VH series, clamp guard, is that in the former the guard screws into the body, while in the latter, it clamps onto the body.

Two set screws are attached to the guard, either of which will secure it in position. A locking set screw, operated by a special key, can be substituted for either set screw to prevent theft of lamp and globe

Form 75 is regularly furnished with 6¾-inch globe, V-75. Form 200 is regularly furnished with a 9¼-inch globe, V-200.

TYPE VCA, SCREW GUARD

TYPE VL, SCREW GUARD

TYPE VT, SCREW GUARD

TYPE VTA SCREW GUARD

ELECTRICAL TOY TRAINS

IVES

Trains shown on this page will operate on 110 A. C. or D. C. when transformed 8 to 11 volts.

Trains shown below operate on "0" gauge track, 1⅜ inches wide.

Locomotive bodies are of sheet steel, enameled and ornamented in gold with hand rails, bells, headlights and other fittings of nickeled steel. All cars are handsomely lithographed; have removable roofs. Being made of heavy gauge steel, they are very durable. Trucks are flexible, enabling cars to stay on track at high speed. Track is rigidly constructed. Track ties are wide. Insulated third rail makes short circuits impossible.

Each

No. 504—Comprises one four-wheel reversible locomotive with headlight, 1 baggage car, 1 chair car and 1 parlor car, all equipped with electric lights; complete with 8 pieces curved track, 3 pieces straight track, 1 terminal section, 1 control switch and connecting wires; length of train 35¾ inches **$33 00**

One outfit in cardboard box; wt each 9¼ lbs.

Per Set

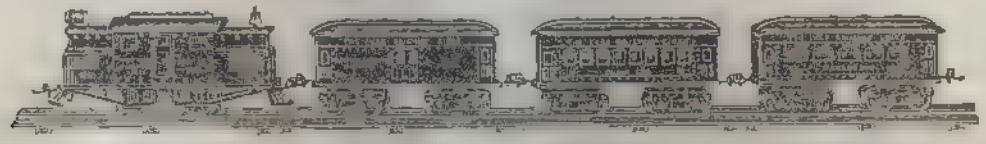
No. 611—Comprises one four-wheel locomotive with headlight, 1 baggage car, 1 chair car and 1 parlor car; complete with 8 pieces curved track, 6 pieces straight track, 1 station size 5¼x11¼ inches, 1 signal, 1 tunnel, 6 telegraph poles, 1 control switch and connecting wires; length of train 30 inches **$33 00**

One set in cardboard box; wt each 11 lbs.

Per Set

No. 610—Comprises four wheel locomotive with headlight, 1 baggage car, 1 parlor car, 8 pieces curved track, two pieces straight track, including terminal section, control switch and wires, passenger station, tunnel and signal; length of train 21½ ins **$24 00**

One set in cardboard box; wt each 8½ lbs.



Each

No. 502—Comprises one four-wheel locomotive with headlight and reverse, 1 baggage car, 1 chair car 1 parlor car; complete with 8 pieces curved track, 5 pieces straight track, 1 terminal section, 1 control switch and connecting wires; length of train 28 inches **$25 50**

One outfit in cardboard box, wt each 7½ lbs.

TOY TRANSFORMERS "Also Dept. 5."

IVES

For Alternating Current, 110 Volts, 75 Watts, 60 Cycles Delivers Up To 25 Volts.

Suitable for operating "0" and "2¼" gauge electric trains where a rheostat is used for speed variations. Mounted in black enameled steel case and immersed in an insulating compound which renders it indestructible and impervious to moisture. Complete with 7 feet of cord, attachment plug and diagram for connecting.

Each

No. M204 (Old No. 204) Size 4x3½ ins **$7 50**

One in cardboard box; wt each 4 lbs.

THORDARSON "DANDYTOY" "See Dept 5"

For Alternating Current 110 Volts, 60 Cycles.

Suitable for operating any of the "O" gauge train outfits.

Mounted in black enameled steel case and immersed in an insulating compound which renders it indestructible and impervious to moisture.

While primarily intended for operating electric toys of all kinds from the house lighting circuit, it can also be used to excellent advantage for many other purposes, such as operating annunciators, burglar alarms, induction coils, etc.

The range of voltage is from 2½ to 27½ volts in steps of 2½ volts each.

The rheostat which controls the various voltages is conveniently mounted in front of the apparatus.

Length 3¼ inches; width 3 ins; 2½ inches high. Complete with 7 ft of flexible cord and attachment plug.

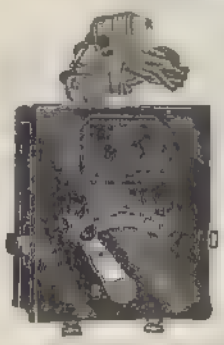
Each

No. D-T—Capacity 75 watts; wt each 4 lbs **6 75** *$3 00*

One in box, with complete directions for using, wt each 4 lbs

THORDARSON—Standard Type. "See Dept 5"

For Alternating Current 100 to 125 Volts, 60 Cycles.



Mounted in black enameled steel case and immersed in an insulating compound which renders it indestructible and impervious to moisture.

Designed to operate all classes of electrical toys such as miniature trains, small signs, motors, light small lamps, operate Ruhmkorff and other types of induction coils.

The range of voltage is from 2 to 28 volts in steps of 2 volts each. The constant voltages are 4, 6, 8, 10, 14 and 18 and any of these several voltages can be used simultaneously.

The rheostat which controls the various voltages is mounted in front of the apparatus.

Will operate all trains operating on "2" gauge track.

KRAEUTER PLIERS

SMALL DISPLAY CASE NO. 50

Very often customers for pliers and nippers do not know the exact name of the tool they need. Neither are they able to describe it so the clerk behind the counter understands—but it is a simple matter for such customers to select from a display case just what they want, without wasting valuable time.

This display case enables the dealer to show a line of staple numbers without investing a large amount of capital.

No. 50

No.	Length	Name of Tool	Each
2601	5 in.	Diagonal	$1.40
1596	4½ in.	Milliners'	1.40

50	Oak Display Case.		3.00
		List value of stock	$39.05

Size of case, 33x17x3 inches Green, weathered oak finish. Front door frame, with brass hinges.

NOTE—Case is always furnished without glass.

No		Per asst
50	**Display Case**, complete	$39.05

Many sales are lost in so far as the individual dealer is concerned if the public does not know he has the goods for sale in his place of business. Therefore, a most important link in the merchandising chain is the **Display of Goods.**

There is no better way to display **Pliers** than in handsome, attractive cases. They furnish an important link between seller and buyer. Very often, customers do not know the exact name of the tool they need. Neither are they able to describe it so the clerk understands—but it is a simple matter for customers to select just what they want from a **Display Case.**

This case ties up only a small amount of money, but the dealer is assured of his goods being constantly in view of customers, thereby insuring sales which perhaps would otherwise be lost.

HAY CARRIERS

DIRECTIONS FOR RIGGING HAY CARRIERS

Directions for reversing all our Swivel Carriers.

Pull the carrier to stop block or bumper, allowing the lifting pulley to drop out of the carrier. Take rope out of pulley at end of barn and while standing on the floor beneath the carrier give the rope a little slack from the hand to the carrier and give it a little throw to obtain a half turn in the swivel. Rethread the pulleys in the end of the barn you wish to operate in, then the carrier is ready for operation. Before pulling large rope out of pulleys tie a small rope to the end of it so the small rope will be through pulleys, for pulling up the large rope, the reverse, see cut above.

Directions For Putting Up Track.

Support track to every rafter by means of track eyes and rafter irons. Place stop block or bumper directly over unloading place, and to prevent carrier from running off track bolt carrier stop or pulley fastener to end of the track, tie a rope from one rafter to the other, letting rope hang four or five inches under the track, or nail a board to the rafters close to and over it.

Material Required for a Steel Track Outfit for Different Length Barns.

For a 40 Foot Barn—One hay carrier fork or hay sling with sling pulley, one reversable carrier, 40 feet steel track, 21 hanging hooks, 21 rafter brackets, 5 knot passing pulleys, 6 floor hooks, 110 feet ¾ inch manila rope, 50 feet ⅜ inch check rope, 40 feet ⅜ inch reverse rope.

For a 50 Foot Barn—One hay carrier fork or hay sling with sling pulley, one reversible carrier, 48 feet steel track, 25 hanging hooks, 25 rafter brackets, 5 knot passing pulleys, 6 floor hooks, 130 feet ¾ inch manila rope, 55 feet ⅜ inch check rope, 50 feet ⅜ inch reverse rope.

For a 60 Foot Barn—One hay carrier fork or hay sling with sling pulley, one reversible carrier, 60 feet steel track, 31 hanging hooks, 31 rafter brackets, 5 knot passing pulleys, 6 floor hooks, 160 feet ¾ inch manila rope, 60 feet ⅜ inch check rope, 60 feet ⅜ inch reverse rope.

Material Required for Wood Track Outfits.

Material required for wood track outfits for different length barns, same as for steel track, except hanging hooks. Use No. 71 wood track hanging hooks in place of these.

Different lengths of barn will use track, hanging hooks and rope in same ratio as above.

If required to take hay in at end of barn and have rope pass down at far end, figure same amount of draft rope. If draft rope be returned to same end of barn and then down, this requires about one fourth more draft rope.

HAY CARRIERS

—BLUE GRASS—

Swivel Reversible, For Double Angle Steel Track.

Made of malleable iron, finished in blue and gold. The travelers and sheaves throughout revolve upon bushings, thus reducing friction and wear. The lifting pulley is supplied with new patent hook, by means of which the fork can be easily removed without the use of a wrench, at the same time locking it in perfectly when in use.

The throat has an exceptionally large opening and the simple locking mechanism is so arranged that the lifting head or fork pulley cannot fail to enter and lock securely to the carrier under all conditions. The locks are operated without the use of springs and engage projections upon the lifting head practically in a line with the axis of the pulley. The lifting head is thus free to swing to a horizontal position very near to the track. This permits the load to drag over obstructions and enables the carrier to work under conditions where any other carrier would necessarily fail.

Diameter of track wheels 3¼ inches; 1 inch tread; height over all 11 inches, length 14 inches. Each

No. BG10—With trip block and lifting pulley, **less rope** $21 30

Packed loose; wt each 23 lbs.

Hay Carrier Outfits.

Hay carrier, track, track fixtures and hay fork pulleys included in this outfit. This does not include Hay Fork, Sling or Rope.

CLIMAX

Swivel Reversible, For 4x4 inch Wood Track.

With this carrier the fork can be carried within seven inches of the track, which makes it possible to fill the mow closer to the comb of the roof.

The throat has an exceptionally large opening and the simple locking mechanism is so arranged that the lifting head or pulley locks directly on the sides or frame of the carrier, not depending on separate dogs or lugs to hold the load.

Diameter of track wheels 5¼ inches; tread 1¼ inches; height over all 18½ inches; length 19 inches.

	Each
No. 115 With trip block and lifting pulley, less rope; wt each 16 lbs	$21 30

Packed loose.

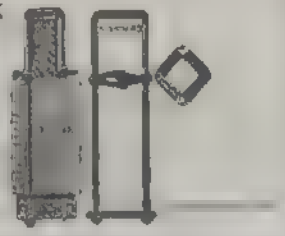
BRACKETS AND CLAMPS

FOR HAY RACK

Partial view of hayrack made with brackets and clamps



Section showing manner of construction.

These brackets make the strongest kind of hay racks, as the wood is not weakened by boring holes for bolts where strength is most essential. By their use lighter material can be used. A hay rack made with these brackets is stronger and much more rigid than one made in the old way.

Set consists of 8 steel clamps, 4 left and 4 right brackets, 8 upper grooved steel washers, 8 lower clips or washers, and 16 nuts.

Per Set

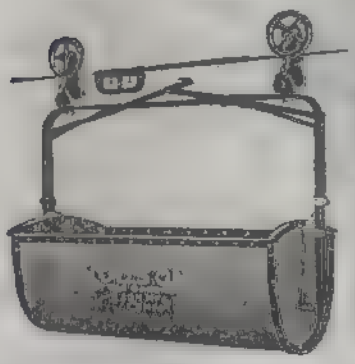
No. 1—With 14 in. clamps, for sills 2x8 ins, and cross pieces 2x4 ins; wt per set 15 lbs..... $4 20

No. 2—With 16 in. clamps, for sills 2x8 ins, and cross pieces 2x6 ins; wt per set 17 lbs..... 4 35

One set in wood box.

LITTER CARRIERS

HUDSON



20 gauge galvanized steel tub closely riveted to angle steel frame 1x1 inch. Ends reinforced at center by malleable pivot castings. All joints welded. Heavy angle iron reinforcement completely around top, bottom and sides. Latches at both ends of tub, lock and unlock simultaneously. The tub dumps automatically by means of a trip and is self-cleaning when dumped.

Track wheels made from gray iron, 5½ inches in diameter, roller bearings, steel axles mounted on swiveled wheel frame to permit wheels to take curves without binding on track.

This carrier can be used on 0000 rod track both inside and outside of barn. It can also be used on rigid track inside barn and rod outside track if so desired. **Price does not include track.**

Each

No. 70—Capacity tub 6 bu; length 40 ins; width 22 ins; depth 16 ins..... ✚$60 75

THE "PRIMBLE" TRADE MARK REPRESENTS THE BEST TO BE HAD IN CUTLERY.

RAZORS

—JOHN PRIMBLE—

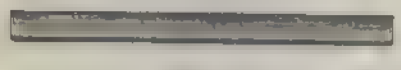

Fig. 1

Fig. 2

Fig. 3

Fig. 4

Fig. 5

Fig. 6

Fig. 7

Fig. 8

The Blade in the Making.

Fig. No. 1 represents the very finest quality of English bar steel, from which every Primble Razor Blade is made.

Fig. No. 2 represents the first forging of blade.

Fig. No. 3 represents the second forging of blade, including the marking of the rivet hole.

Fig. No. 4 represents Figure No. 3, but trimmed and shaped

Fig. No. 5 represents the blade after being hardened and tempered. It is impossible to show in an engraving an exact reproduction of No. 5, but the blade referred to shows the coloring of the steel after being tempered. The streak running through the center represents the test made to determine whether the blade has been perfectly tempered.

This is one of the most critical stages in the manufacture of the blade, as at this point the cutler is to determine whether he is to pocket a loss by throwing away a blade of imperfect temper, or look to the future for returns due to the honest manufacture, who produces only the highest type of goods sustained by finest material and skilled labor.

Between the processes represented by Figs. 4 and 5, the rivet hole is made, as it would be impossible to perform that operation after the razor is tempered.

Fig. No. 6 represents the first process of concaving.

Fig. No. 7 represents the blade fully sharpened and ground, and ready to pass to the purchaser. This, like Fig. No. 5, represents another critical stage in the manufacture of the blade.

Even in the process of grinding, the temper may be drawn and, therefore, the cutting quality spoiled, and as is the case with No. 5, the manufacturer must again determine as to whether he will incur a loss by discarding the blade rather than impair his reputation.

The Finished Blade.

Fig. No. 8 represents the full finished blade ready to be handled, after which the razor is honed, packed and boxed ready for the market. Primble Razors do not have to be rehoned before using, every blade being set ready for use before it is boxed.

It is only at this final stage that the moderate priced or still higher priced razor must be determined, the process of grinding being the most expensive of any.

Only those constantly connected with the manufacture of razors can accurately fix the value of the finished blade, the difference in the appearance of various forms of grinding being so slight.

"Hollow Ground" vs. "Full Concave."

The terms "Hollow Ground" and "Full Concave" are frequently confounded. Fig. No. 6 represents a blade that might be finished very quickly into a "Hollow Ground" razor. Fig. No. 8, however, represents a "Full Concave" razor requiring several times the amount of labor as would be necessary for a razor worthy of the term "hollow ground."

The same type of grinding may be produced in a different pattern of blade. For example, Full Concave razors may be had on either the "open heel" type, or "double heel" type, in either round, square or hollow point.

The Swedish pattern is not susceptible to full concaving. For some beards, however, the Swedish grinding is quite as satisfactory as full concave.

Figures 1 to 7 merely represent seven distinct stages in the converting of a bar of steel into a finished razor blade, whereas thirty operations are required to produce the finished blade as shown in Fig. No. 8.

How to Strop a Razor.

Many people spoil a good razor by using a poor strop. The majority of people strop a razor too much, and bear too hard on the strop. When you first get a razor from us, it is in perfect condition and ready to shave at once. It will shave you well the first time you use it, and if you keep it in the same condition, it will always shave you satisfactorily.

The first thing after buying a razor, is to get a good strop A cheap strop is dear at any price. They will ruin the best razor, made. To strop a razor always lay the blade flat, so that the back and edge rest on the strop, drawing from heel to point with a firm, steady stroke, turning on the back.

—A PRIMBLE RAZOR BLADE—

At each stage, every blade is subjected to a most rigid test and inspection, all blades not coming up to the standard being discarded. These illustrations are shown in order that Primble Razors will not be classed with goods made up under cheaper processes. We guarantee every Primble blade to be made in the manner described above.

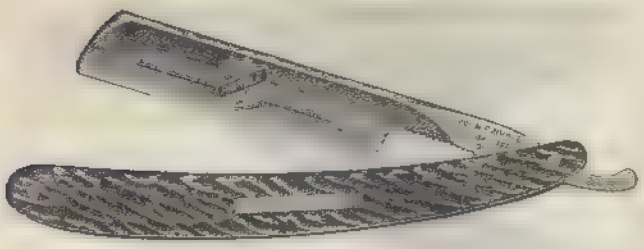
How to Use a Razor.

Use warm water and rub the lather well into the face to soften the beard. Draw the razor with an easy diagonal motion against the beard. Do not scrape with the razor, or hold it at almost right angles to the face, as you will spoil the cutting edge, irritate the skin and cause the best razor to fail.

People who know nothing at all about handling a razor are liable to condemn a good razor when they do not know how to use it.

RAZORS

—JOHN PRIMBLE—



Hollow Ground.

Crocus polished. Enclosed in a gold lettered folding leather case.

Patent Stag.

	Per Doz
No. 1021 —⅝ inch blade, oval point	$57 00

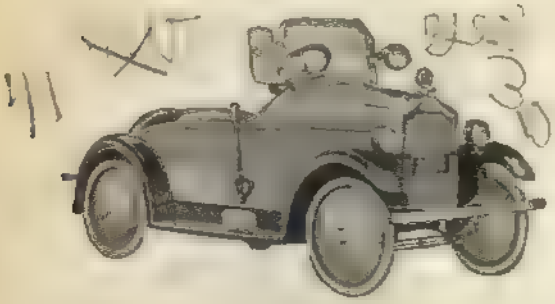
STEELCRAFT JUVENILE AUTOMOBILES

PACKARD STRAIGHT EIGHT

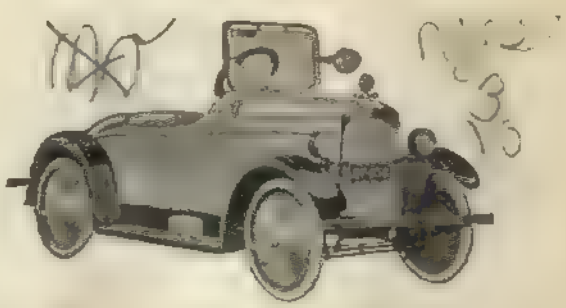


Packard Straight Eight. A De Luxe model, will accommodate children from 3 to 10 years of age. Size of car, 56½ inches over all by 25 inches wide. The body, hood, frame and wheels are entirely of heavy stamped automobile steel. The heavily nickel plated radiator conforms exactly to that on the latest type Packard car. The springs of a highly tempered steel extending from front to rear axle insure ease in riding. The body, hood and wheels are enameled liberty red and are attractively striped. The fenders, fender aprons, running board, running board shields and working parts are black enamel.

Equipment: Pedals, adjustable for from 3 to 10 years of age; fenders, double crown heavy steel with aprons; running boards and running board shields, heavy stamped steel; lamps, large De Luxe headlamps, spotlight and tail light, nickeled all over; steering wheel; brake assembly; windshield; bumpers, front and rear, nickeled bar; instrument board; spare wheel and tire; padded cushions, back and seat; wheels, 12-inch double disc with contained roller bearing and 1-inch rubber tires. Weight, 120 pounds.

Steelcraft Packard Straight Eight.....each $55 00

JORDAN PLAYBOY

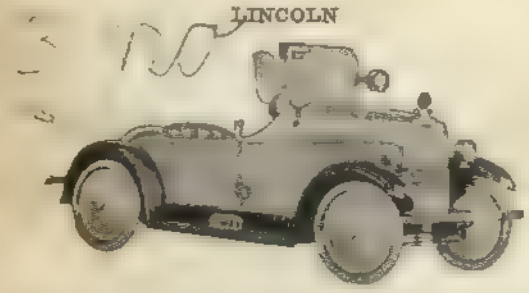


Jordan Playboy. A De Luxe model, will accommodate children from 3 to 10 years of age. Size of car, 56½ inches over all by 25 inches wide. The body, hood, frame and wheels are entirely of heavy stamped automobile steel. The heavily nickel plated radiator conforms exactly to that on the latest type Jordan car. The springs of a highly tempered steel extending from front to rear axle insure ease in riding. The body, hood and wheels are enameled light green and are attractively striped.

Equipment: Pedals, adjustable for from 3 to 10 years of age; fenders, double crown heavy steel with aprons; running boards and running board shields, heavy stamped steel; lamps, large De Luxe headlamps, spotlight and tail light; steering wheel, moulded rubber with control box and spark and gas levers; windshield; bumpers, front and rear; instrument board, with designed speedometer, clock, switches and gauges; spare wheel and tire, same as wheels on car; cushions, back and seat, padded. Wheels, 12-inch double disc with contained roller bearings and 1-inch rubber tires. Weight, one in a box, 120 pounds.

Steelcraft Jordan Playboy.....each $45 00

LINCOLN

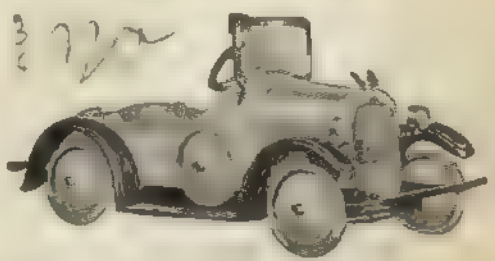


Lincoln. Will accommodate children from 3 to 6 years of age. Size of car, 56½ inches over all by 25 inches wide. The body, hood, frame and wheels are entirely of heavy stamped automobile steel. The heavily nickel plated radiator conforms exactly to that on the latest type Lincoln car. The springs of a highly tempered steel extending from front to rear axle insure ease in riding. The body, hood and wheels are enameled light blue and are attractively striped. The fenders, fender aprons, running board, running board shields and all working parts of car are black enamel. All enameled parts are hard baked.

Equipment: Pedals, adjustable for from 3 to 6 years of age; fenders, double crown heavy steel with aprons; running boards and running board shields, heavy stamped steel; lamps, De Luxe spotlight and tail light, nickeled all over; steering wheel; brake assembly; windshield; bumpers, front and rear, nickeled bar; instrument board; spare wheel and tire; padded cushions, back and seat. Wheels, 12-inch double disc with contained roller bearings and 1-inch rubber tires. Weight, one in a box, 120 lbs.

Steelcraft Lincoln.....each $55 00

CHRYSLER ROADSTER



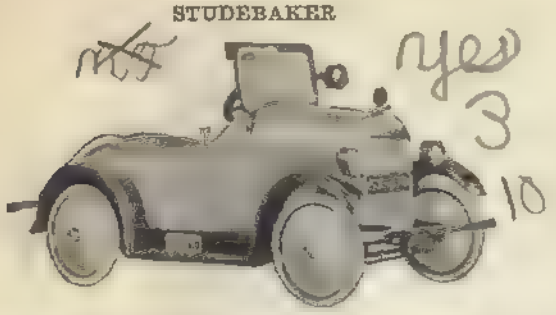
Chrysler Roadster. A De Luxe model, will accommodate children from 3 to 6 years of age. Size of car, 52 inches over all by 24½ inches wide. The body, hood, frame and wheels are entirely of heavy stamped automobile steel. The heavily nickel plated radiator with Chrysler winged radiator cap conforms to that on the latest type Chrysler. The springs of a highly tempered steel extending from front to rear axle insure ease in riding. The body, hood and wheels are enameled fawn and are attractively striped. Fenders, running boards, etc., black enamel. All enameled parts are hard baked.

Equipment: Pedals, adjustable for from 3 to 6 years of age; fenders, double crown heavy steel; running boards and running board shields, heavy stamped steel; De Luxe headlamps and tail light; steering wheel, large, good grip; brake assembly, with nickel plated handle; windshield, very solid; bumpers, front and rear; instrument board, with designed speedometer, clock, switches and gauges; spare wheel and tire, same as wheels on car; seat cushion, padded, and other items adding materially to the appearance of the car. Wheels, 12-inch double disc with roller bearings and ¾-inch rubber tires. Weight, 107 pounds.

Steelcraft Chrysler Roadster.....each $40 00

STEELCRAFT JUVENILE AUTOMOBILES

STUDEBAKER

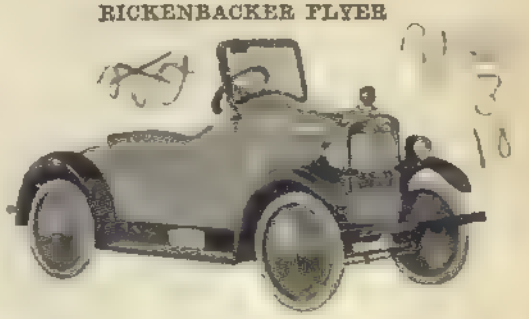


Studebaker A De Luxe model, will accommodate children from 3 to 10 years of age. Size of car, 52 inches over all by 24½ inches wide. The body, hood, frame and wheels are entirely of heavy stamped automobile steel. The heavily nickel plated radiator conforms exactly to that on the latest type Studebaker car. The springs of a highly tempered steel extending from front to rear axle insure ease in riding, operation and eliminate the possibility of tipping. The body, hood and wheels are enameled vermilion and are attractively striped. The fenders, running board, running board shields and all working parts of car are black enamel. Enameled parts are hard baked.

Equipment: Pedals, adjustable for from 3 to 10 years of age; fenders, double crown heavy steel; running boards and running board shields, heavy stamped steel; large De Luxe headlamps, spotlight and tail light; steering wheel, large size, affording good grip; hand brake with nickel plated handle; windshield, very solid; bumpers, front and rear; instrument board; spare wheel and tire; padded seat cushion. Wheels, 12-inch double disc with roller bearings and ¾-inch rubber tires. Weight, 109 pounds.

Steelcraft Studebaker .....each $40 00

RICKENBACKER FLYER

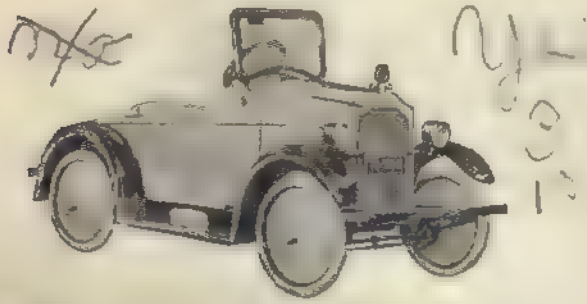


Rickenbacker Flyer. Will accommodate children from 3 to 10 years of age. Size of car, 52 inches over all by 24½ inches wide. The body, hood, frame and wheels are entirely of heavy stamped automobile steel. The heavily nickel plated radiator conforms exactly to that on the latest type Rickenbacker car. The springs of a highly tempered steel insure an ease in riding and operation. The body, hood and wheels are enameled red and are attractively striped. The fenders, running board, running board shields and all working parts of car are black enamel. All enameled parts are hard baked.

Equipment: Pedals, adjustable for from 3 to 10 years of age; fenders, double crown heavy steel; running board and running board shields, heavy stamped steel; large De Luxe headlamps; steering wheel, large, easy grip; windshield; bumpers, front and rear; instrument board; seat cushion, padded, and other items adding materially to the appearance of the car. Wheels, 12-inch double disc with contained roller bearings and ¾ inch rubber tires. Weight, one in a box, 104 pounds.

Steelcraft Rickenbacker Flyer..... each $35 00

BUICK SIX



Buick Six. Will accommodate children from 3 to 10 years of age. Size of car, 52 inches over all by 24½ inches wide. The body, hood, frame and wheels are entirely of heavy stamped automobile steel. The heavily nickel plated radiator conforms exactly to that on the latest type Buick car. The springs of a highly tempered steel insure an ease in riding and operation. The body, hood and wheels are enameled light blue and are attractively striped. The fenders, running board, running board shields and all working parts of car are baked black enamel.

Equipment: Pedals, adjustable for from 3 to 10 years of age; fenders, double crown heavy steel; running board and running board shields, heavy stamped steel; large De Luxe headlamps; steering wheel, large easy grip; windshield; bumpers, front and rear; instrument board; seat cushion, padded, and other items adding materially to the appearance of the car. Wheels, 12-inch double disc with contained roller bearings and ¾-inch rubber tires. Weight, one in a box, 105 pounds.

Steelcraft Buick Six..... .....each $35 00

FLINT SIX

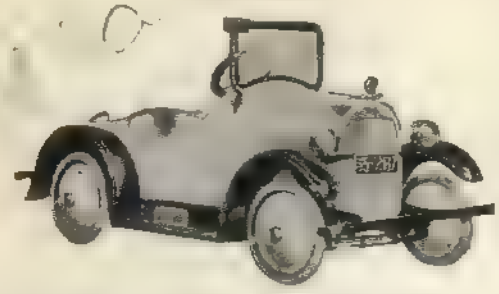
Flint Six. Will accommodate children from 3 to 6 years of age. Size of car 52 inches over all by 24½ inches wide. The body, hood, frame and wheels are entirely of heavy stamped automobile steel. The heavily nickel plated radiator conforms exactly to that on the latest Flint car. The springs of a highly tempered steel insure an ease in riding and operation. The body, hood and wheels are enameled vermilion and are attractively striped. The fenders, running board, running board shields and all working parts of car are black enamel. All enameled parts are hard baked.

Equipment: Pedals, adjustable for from 3 to 6 years of age; fenders, double crown heavy steel; running boards and running board shields, heavy stamped steel; large De Luxe headlamps; steering wheel, large size affording good grip; windshield, very solid; bumpers, front and rear; instrument board; seat cushion, padded, and other items adding materially to the appearance of the car. Wheels, 12-inch double disc with contained roller bearings and ¾-inch rubber tires. Weight, one in a box, 105 pounds.

Steelcraft Flint Six.....each $35 00

STEELCRAFT JUVENILE AUTOMOBILES

CHANDLER

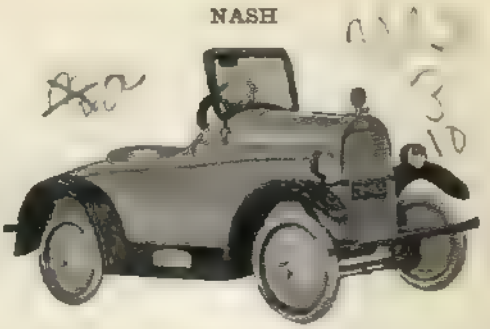


Chandler. Will accommodate children from 3 to 6 years of age. Size of car, 52 inches over all by 24½ inches wide. The body, hood, frame and wheels are entirely of heavy stamped automobile steel. The heavily nickel plated radiator conforms to that on the Chandler car. The springs of a highly tempered steel insure an ease in riding and operation. The body, hood and wheels are enameled light green and are attractively striped. The fenders, running board, running board shields and all working parts of car are black enamel. All enameled parts are hard baked.

Equipment: Pedals, adjustable for from 3 to 6 years of age; fenders, double crown heavy steel; running boards and running board shields, heavy stamped steel; large De Luxe headlamps; steering wheel, large easy grip; windshield, very solid; bumpers, front and rear; instrument board; seat cushion, padded, and other items adding materially to the appearance of the car. Wheels, 12-inch double disc with contained roller bearings and ¾-inch rubber tires. Weight, one in a box, 104 pounds.

Steelcraft Chandler .....each $35 00

NASH



Nash. Will accommodate children from 3 to 10 years of age. Size of car, 52 inches over all by 24½ inches wide. The body, hood, radiator, frame and wheels are entirely of heavy stamped automobile steel. The radiator conforms to the latest type car. The springs of a highly tempered steel insure an ease in riding and operation. The body, hood, radiator and wheels are enameled fawn and are attractively striped. The fenders, running board, running board shields and all working parts of car are black enamel. All enameled parts are hard baked.

Equipment: Pedals, adjustable for from 3 to 10 years of age; fenders, double crown heavy steel; running boards and running board shields, heavy stamped steel; large De Luxe headlamps; steering wheel, large size affording good grip; windshield, very solid; bumpers, front and rear; instrument board; seat cushion, padded, and other items adding materially to the appearance of the car. Wheels, 10½-inch double disc with contained roller bearings and ¾-inch rubber tires. Weight, one in a box, 105 pounds.

Steelcraft Nash .....each $30 00

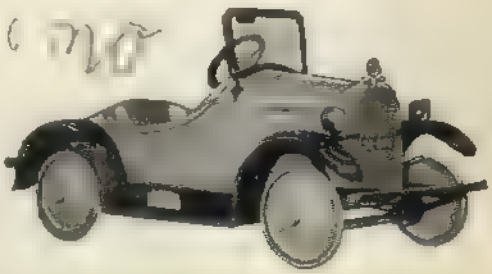
FIRE CHIEF

Fire Chief. Will accommodate children from 3 to 6 years of age. Size of car, 52 inches over all by 24½ inches wide. The body, hood, radiator, frame and wheels are entirely of heavy stamped automobile steel. The springs of a highly tempered steel insure an ease in riding and operation. The body, hood, radiator, wheels and fenders with running board and running board shields are enameled vermilion and are attractively striped. All working parts of the car underneath are black enamel. All enameled parts are hard baked.

Equipment: Pedals, adjustable for from 3 to 6 years of age; fenders, double crown heavy steel; running boards and running board shields, heavy stamped steel; large De Luxe headlamps; steering wheel, large easy grip; bumpers, front and rear; instrument board; seat cushion, padded; large brass bell on radiator with cord attached. Front and rear license tags, scuff plates and switch on instrument board. Wheels, 12-inch double disc with contained roller bearings and ¾-inch rubber tires. Weight, one in a box, 93 pounds.

Steelcraft Fire Chief.....each $31 35

JEWETT



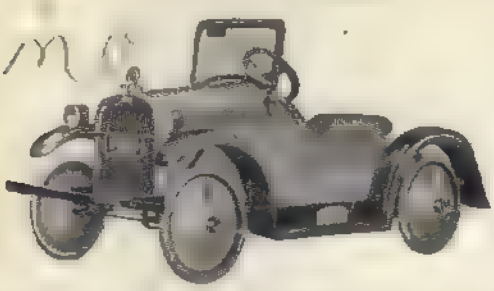
Jewett. Will accommodate children from 3 to 6 years of age. Size of car, 52 inches over all by 24½ inches wide. The body, hood, radiator, frame and wheels are entirely of heavy stamped automobile steel. The springs of a highly tempered steel insure an ease in riding and operation. The body, hood, radiator and wheels are enameled red and are attractively striped. The fenders, running board, running board shields and all working parts of car are black enamel. All enameled parts are hard baked.

Equipment: Pedals, adjustable for from 3 to 6 years of age; fenders, double crown heavy steel; running boards and running board shields, heavy stamped steel; large De Luxe headlamps; steering wheel, large easy grip; windshield, very solid; bumpers, front and rear; instrument board; seat cushion, padded, and other items adding materially to the appearance of the car. Wheels, 10½-inch double disc with contained roller bearings and ¾-inch rubber tires. Weight, one in a box, 96 pounds.

Steelcraft Jewett .....each $30 00

STEELCRAFT JUVENILE AUTOMOBILES

CLEVELAND RACER

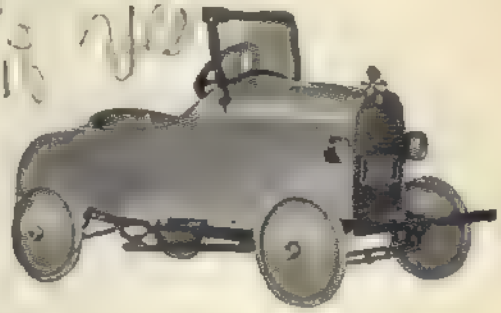


Cleveland Racer. Will accommodate children from 3 to 6 years of age. Size of car, 48 inches over all by 24½ inches wide. The body, hood, radiator, frame and wheels are entirely of heavy stamped automobile steel. The springs of a highly tempered steel insure an ease in riding and operation. The body, hood, radiator and wheels are enameled blue and are attractively striped. The fenders, running board, running board shields and all working parts of car are black enamel. All enameled parts are hard baked.

Equipment: Pedals, adjustable for from 3 to 6 years of age; fenders, double crown heavy steel; running boards and running board shields, heavy stamped steel; radiator, heavy steel stamped; large De Luxe headlamps; steering wheel, large size affording good grip; windshield, very solid; instrument board; seat cushion, padded, and other items adding materially to the appearance of the car Wheels, 12-inch double disc with contained roller bearings and ¾-inch rubber tires. Weight, one in a box, 93 pounds.

Steelcraft Cleveland Racer.....each $30 00

DURANT



Durant. Will accommodate children from 3 to 10 years of age. Size of car, 48 inches over all by 24½ inches wide. The body, hood, radiator, frame and wheels are entirely of heavy stamped automobile steel. The springs of a highly tempered steel insure an ease in riding and operation. The body, hood, radiator and wheels are enameled fawn and are attractively striped. All working parts of car are black enamel. All enameled parts are hard baked.

Equipment: Pedals, adjustable for from 3 to 10 years of age; large De Luxe headlamps; steering wheel, large size affording good grip; windshield, very solid; instrument board, with designed speedometer, clock, switches and gauges; other items adding materially to the appearance of the car; nickel plated motometer, horn, front and rear license tags, bumper, seat cushion, rear vision mirror, luggage bars and switch on instrument board. Wheels, 10-inch double disc with contained roller bearings and ¾-inch rubber tires. Weight, one in a box, 86 pounds.

Steelcraft Durant .....each $25 00

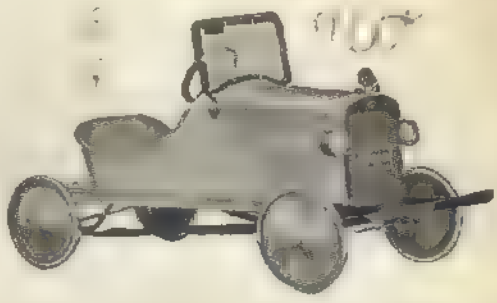
DODGE

Dodge. Will accommodate children from 3 to 6 years of age. Size of car, 48 inches over all by 24½ inches wide. The body, hood, radiator, frame and wheels are entirely of heavy stamped automobile steel. The springs of a highly tempered steel insure an ease in riding and operation. The body, hood, radiator and wheels are enameled light green and are attractively striped. All working parts of car are black enamel. All enameled parts are hard baked.

Equipment: Pedals, adjustable for from 3 to 6 years of age; Lamps, large De Luxe headlamps; steering wheel, large size affording good grip; windshield, very solid; instrument board; other items adding materially to the appearance of the car; nickel plated motometer, horn, front and rear license tags, bumper, seat cushion, rear vision mirror and switch on instrument board. Wheels, 10-inch double disc with contained roller bearings and ¾-inch rubber tires. Weight, one in a box, 81 pounds.

Steelcraft Dodge .....each $25 00

OVERLAND



Overland. Will accommodate children from 3 to 6 years of age. Size of car, 48 inches over all by 24 inches wide. The body, hood, radiator, frame and wheels are entirely of heavy stamped automobile steel. The radiator conforms to design on latest type Overland car. The springs of a highly tempered steel insure an ease in riding and operation. The body, hood, radiator and wheels are enameled vermilion and are attractively striped. All working parts of car are black enamel. All enameled parts are hard baked.

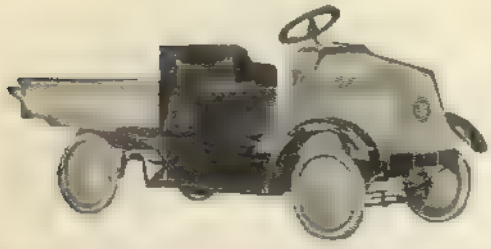
Equipment: Pedals, adjustable for from 3 to 6 years of age; large De Luxe headlamps; steering wheel, large size affording good grip; windshield, very solid; instrument board; other items adding materially to the appearance of the car; nickel plated motometer, horn, front and rear license tags, bumper, seat cushion, rear vision mirror and switch on instrument board. Wheels, 10-inch double disc with ½-inch rubber tires. Weight, one in a box, 80 pounds.

Steelcraft Overland .....each $20 00

STEELCRAFT JUVENILE AUTOMOBILES

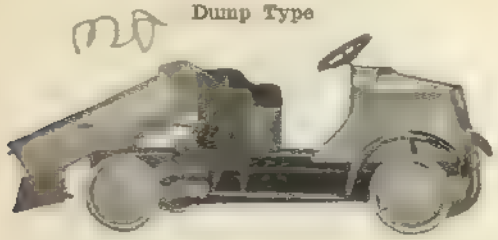
MACK BULLDOG TRUCK

Standard Type



Mack Bulldog Truck. Pedal propelled, for child 3 to 10 years of age. It is not a toy truck that is pulled with a string or cord. It is a pedal propelled truck that can be operated by children from 3 to 10 years of age. A boy can operate with ease this truck carrying a load of 200 pounds in the body. The construction of the truck is of the usual Steelcraft sturdy design. It will not fall apart It will sustain its maximum load with ease and in addition to this strength is provided with springs (of a real truck design) which permits exceeding ease of operation and riding for its owner. The design is that of the real Mack Bulldog Heavy Duty Truck and resembles exactly the famous Mack Truck seen daily on the streets. It is a car that is a source of pleasure to the boy as in it he can have the pleasure of running his own truck and can at the same time perform the numerous light delivery services required in the household. In operation a load of 200 pounds can be placed in the body and it is of a size sufficient to carry more than a bushel basket. The Standard type shown above is identical to that of the Dump type shown below with the exception that the body cannot be raised and lowered as on the Dump type.

Dump Type

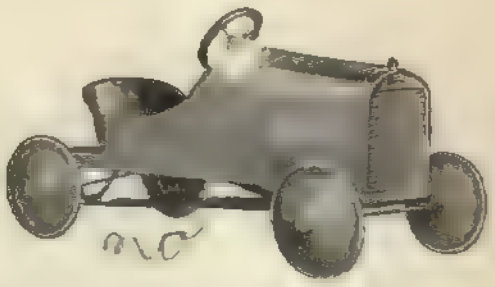


Specifications for both dump and standard trucks are as follows: Size of car, 2[illegible] inches wide by 41 inches long; size of body, 24 inches long, 14½ inches wide by [illegible] inches deep; capacity, one tenth of a ton, (200 lbs. Frame of heavy channel steel. Fenders, hood, radiator and cowl, seat and body of heavy stamped automobile steel. The special springs (of a real truck design) are of a highly tempered steel permitting exceeding ease in operation as well as ease in its riding qualities. The radiator, hood, cowl, seat, body, wheels and all working parts of truck are finished in hard baked enamel.

Equipment: The pedals are adjustable for from 3 to 10 years of age; fenders, double crowned heavy steel; radiator and cowl, heavy steel stamped in distinct Mack type; steering wheel, malleable iron; on dump type a special mechanism for raising and lowering body of truck; instrument board, with designed speedometer, clock, gauges and with an operating switch; tail gate of body, special design; furnished with horn. Wheels, 12 inch double disc with contained roller bearings and 1-inch rubber tires; enameled red with yellow stripings. Weight, one in a box, 117 pounds.

Mack Bulldog Truck, Standard Type. ...each $30 00
Mack Bulldog Truck, Dump Type. ... 32 65

FORD

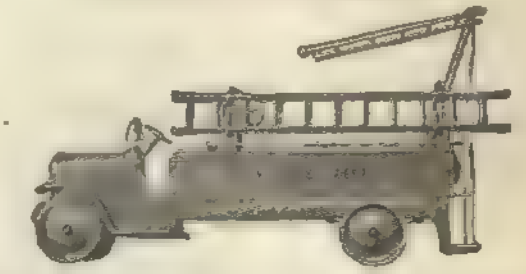


Ford. Will accommodate children from 3 to 6 years of age. Size of car, 42 inches over all by 24 inches wide. The body, hood, radiator, frame and wheels are entirely of heavy stamped automobile steel. The radiator resembling exactly a Ford. The springs of a highly tempered steel insure an ease in riding and operation. The body, hood are enameled black. All working parts of car are black enamel. All enameled parts are hard baked.

Equipment: Pedals, adjustable for from 3 to 6 years of age; radiator, heavy steel stamped Ford type; steering wheel, large size affording good grip; instrument board, with designed speedometer, clock, switches and gauges; other items adding materially to the appearance of the car; nickel plated radiator cap Ford type, horn, front license tag, seat cushion and switch on instrument board. Wheels, 9-inch double disc and ½-inch rubber tires. Enameled red with black striping and nickel plated hub caps. Weight, one in a box, 74 pounds. Comes completely assembled except for wheels and steering wheel.

Steelcraft Ford .....each $15 00

GMC HOOK AND LADDER TOY



GMC Hook and Ladder. Mounted upon the Steelcraft GMC chassis such attention has been paid to the details of construction and operation that it makes an instant appeal to the child Built of the highest grade heavy automobile steel and is reinforced and electrically spotwelded. The body, radiator equipment, hose, bell, etc., are very realistic and so constructed that they will defy the hardest usage. The mechanism which elevates the first two sections of the ladder from the base of the body is very ingenious, fool proof, and will be of exceeding interest to the child. The reel of hose is another added feature. It is painted in very attractive colors to hold his interest. Construction, disc wheels, extra heavy channel steel frame, large heavy steering wheel and baked enamel finish. The Firestone tires will not scratch or mar polished floors.

Specifications: Length over all, 26 in.; width, 14½ in.; total ladder length, 52 in., in four sections; frame, channel steel; wheels, double disc heavy steel; tires, Firestone solid rubber; finish over all, fire engine red, baked enamel; bell, bronze; steering gear, direct connected. Shipping weight, 14 lbs.

Steelcraft GMC Hook and Ladder.....each $9 00

The American flag is flying here, properly, from the gaff at a yacht club station. The club burgee is at the masthead

M Rosenfeld

at Custom-houses. The third paragraph of the act provided "that all such licensed yachts shall *use a signal* of the form, size and colors prescribed by the Secretary of the Navy." (This paragraph has been subsequently re-enacted as Sec. 4215 Revised Statutes of the United States.) The Secretary of the Navy acted promptly, and on August 26, 1848, he requested the New York Yacht Club to submit a design for this signal. The design they submitted on January 9, 1849, was the then adopted American ensign, which carried thirteen stars in a circle in the blue field and the thirteen red and white stripes (the Betsy Ross flag), in which they placed a fouled anchor in the center of the circle of stars. The Secretary of the Navy accepted the suggestion of the New York Yacht Club and authorized the adoption of the design.

It is the design of the yacht "signal" that has resulted in the present confusion because its similarity in appearance to the national ensign promptly led yachtsmen to fly the "signal" now known as the yacht ensign in place of the national ensign and the custom has grown until at present nearly all pleasure craft, from outboard speedsters up, are flying the "signal" as an ensign. The yacht ensign was created only as a signal for yachts enrolled and licensed (documented) and exempted them from entering and clearing at Custom-houses. Presumably it was to be flown in addition to the national ensign on documented yachts. To fly it from a club mast ashore signifies nothing.

Another interesting fact is that in law the ensign of a vessel does not reveal her nationality, as the Supreme Court of the United States has rendered a decision that only the documents and papers of a vessel, duly complied with, reveal her nationality so the ensign reveals nothing and protects nobody.

As no laws of our land specify what flags are to be flown or not flown or where, then we must look elsewhere to discover the basis of our present practices. Lacking laws or "official" regulations, perhaps the natural conclusion would be to allow custom to dictate the proper procedure. This would be proper if the existing customs were at all uniform or consistent. However, it does not need to be mentioned that the prevailing customs of the flying of flags on small motor craft are anything but uniform and consistent as we find them today. With the boats of the type which the Long Island sailing skippers affectionately refer to as the "Bronx Navy" so far outnumbering the craft which attempt to follow an orderly procedure in the proper display of colors, then "custom" is no longer a worth while factor.

Most Yacht Clubs and yachting organizations have flag regulations as part of their by-laws thus making these regulations official as far as the particular club is concerned. It becomes the duty of the members of such a club to follow this stated routine. Undoubtedly the first club to adopt flag routine was the New York Yacht Club. Probably 99 per cent of all clubs have lifted the New York Yacht Club regulations from their year book without change for their own. While in some instances the New York Yacht Club routine is not applicable to small present day craft, yet in this discussion if we follow the New York Yacht Club rules, we will be nearly correct. We will be following the only established routine and authority for the present day customs.

Flags are simply an outward and visible sign that this or that boat, (1) belongs to this or that country, (2) is enrolled in this or that yacht club or yachting organization and (3) is owned by so and so, who is or is not an officer of (2) this or that yachting organization. If we tell that story by the flags we fly, we tell the whole story almost.

If we should want to say whether the owner is or is not on board so that visitors might be governed accordingly, whether guests are being entertained, whether the owner or crew are dining—or similar frivolities, these can be shown by flags also but fundamentally these are incidental only.

The next step in the progression after determining "what" flags to fly is the question of "where." Boats, as we find them today, all have at least two places where flags may be flown. Most boats have three places and a few four or more places (disregarding yardarms, etc.).

As all boats have two "hoists" and as the national and club flags rank one-two in importance it naturally follows that the "hoists" on which to fly each of these flags is easily determined. On the boat where a third "hoist" is available it is allotted to the identification flag of third importance namely the own- *(Continued on page 242)*

The Flag of Your Country

THE flying of flags and colors on motor craft, sailing and other yachts is governed largely by custom. Few, if any, laws or government regulations have ever been enacted on this subject. Mention has seldom if ever been made by Congress in all of its years, of any requirements for the flying of any flag on numbered, undocumented or unlicensed vessels or yachts. Documented yachts are expected to fly the yacht ensign but the enforcement of even this regulation is questionable.

A review or a brief history of the United States National Flag should permit one to better understand some of the fundamentals on which many of the customs of flags and colors are based, especially their evolution for use on the water.

The origin and early history of the use of national flags is very indefinite. This is especially true of the national ensign of the United States. Early Colonial and American history makes very little mention of our flag or flags. Our Navy seems to have begun the use of the Stars and Stripes immediately after the Continental Congress had passed an Act in June, 1777, establishing the Stars and Stripes as the flag of this country. However, it was not until 1895 or some 30 years after the close of the Civil War, that the United States cavalry was given the right to carry the Stars and Stripes as the national standard. It was in 1841 that the infantry first used the national colors. Not until 1876 did the Marines carry the Stars and Stripes.

As the Navy made use of the national flag from the beginning and the other branches of the U. S. government were slow in adopting it, it emphasizes that the Stars and Stripes as the national ensign is a flag of the sea and its right to be flown from yachts is clearly established.

On the subject of the origin and development of the flag from which the Stars and Stripes has been evolved, accounts are too conflicting to warrant placing much credence in them. Prince Edward, afterwards Edward I of England, about the middle of the last half of the 13th century, adopted the Red Cross of St. George, on a white field, as the national flag of England. After James VI of Scotland ascended the throne of England in 1603, as James I, he was much annoyed by the wrangling between the masters of English and Scotch ships when they met at sea as to which one should dip its colors to the other. Therefore, in 1606, he stopped this annoyance and to help unite the two kingdoms into one country, combined the two crosses into a new flag, which subsequently became known as the Union Jack. This he required all vessels of both countries to carry at their mainmast. A century later when the two countries agreed upon their union, a national agreement required the union of the crosses to be used on flags, banners, standards, and ensigns both at sea and on land.

Near the beginning of the revolution, General Washington assigned to the various officers as a distinction of rank, ribbons varying in color and these were worn by them until something more formal was designed. There were practically no flags or colors although some of the individual companies of the Colonial Army are supposed to have brought with them those which they had previously used. Later General Washington urged the various Colonels to provide for their regiments colors of such design as might appeal to them. This was frequently done and in many instances, some designs of 13 units were used to represent the 13 colonies.

Some of the colonies adopted flags of their own. Massachusetts adopted the Pine Tree, with the motto An Appeal to Heaven. Rhode Island selected one having an anchor and the word Hope and within the canton a union of 13 white stars on a blue field, said to be the first flag on which the 13 colonies were represented by 13 stars.

South Carolina's flag has an interesting history. In September 1775, the Committee of Safety of Charleston instructed Colonel William Moultrie to take possession of Fort Johnson on James Island, which he did. The uniforms of their troops were blue with a silver increscent in the cap. Soon realizing that a flag was needed, he improvised one having a blue field with a white increscent in the canton. This was the flag which sergeant Jasper so gallantly rescued on June 28, 1776, when the fort of palmetto logs on Sullivans Island was attacked by the British Fleet under Admiral Sir Peter Parker. It was under this flag that the Declaration of Independence was read to the people of Charleston on August 8, 1776. When the state came to officially adopt a flag, it took the one which Colonel Moultrie had designed and in recognition of the good services of the palmetto logs, placed upon it a palmetto tree.

While our first flag act was adopted June 14, 1777, by resolution of the Continental Congress and reading as follows: "Resolved, That the flag of the United States be thirteen stripes, alternate red and white; that the union be thirteen stars, white in a blue field, representing a new constellation" yet there is nothing to show that the Revolutionary Army ever carried any flags furnished by the American Congress. Those which were carried were purely personal, each made by or for some officer, company or regiment, and represented the sentiments of the makers. However, the United States Navy began to use the flag immediately after it was authorized by the Continental Congress.

History records only one Stars and Stripes that was carried by the American Army during the Revolutionary War. It was carried by the North Carolina Militia at the Battle of Guilford Courthouse, March 15, 1781, but the stripes were blue and red and the union had a white field with 13 eight-pointed stars. There is also another flag hanging in the State House at Annapolis, which it is claimed was carried by the Third Maryland Regiment in 1781. It has 13 five pointed stars, one in the center,

"Nothing in my boating experience has given as much satisfaction."

SAYS MR. W. G. STUBER
PROMINENT ROCHESTER EXECUTIVE

WILLIAM G. STUBER
ROCHESTER N.Y.

September 19, 1939.

Mr. Caleb Smith
The Synchronizer Company
Seneca Falls, New York

Dear Mr. Smith:

I have now completed two months' cruising since you put the Synchronizer on my pair of six cylinder Gray Diesels. There is nothing that I have had in my boating experience that has given me as much satisfaction and pleasure as this Synchronizer, and I can highly recommend it.

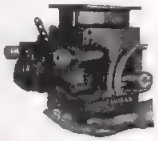
Yours very truly,
W. G. Stuber

• Other users of Synchro-Master are equally enthusiastic about this strictly mechanical device for keeping twin motors synchronized.

• Mr. Paul Myers, Washington, D. C.: "I want to tell you what a joy Synchro-Master is. I have used it eleven and twelve hours without stopping the engines in calm seas and in rough seas, and it has kept my matched Kermath Sea Kings humming in unison beautifully." Mr. John W. Stroh, Detroit: "The Skipper has always been pretty careful about this (synchronizing), but no matter how careful he might be, he could never come anywhere near accomplishing what the Synchro-Master does."

• Recommended by leading boat builders, for gasoline and Diesel engines. Easily installed in your boat. Not expensive.

WRITE FOR CIRCULAR



SYNCHRO-MASTER
DEPT. 201 . . . . . SENECA FALLS, N. Y.

frankly. "I worried all night for fear I'd caused you trouble, and this morning I telephoned your company, and took all the blame."

"Ha! Hence my suspended sentence!"

"And that disagreeable fellow you saw me with—I don't know how he ever got in the club. We're finding a way to get rid of him—and we didn't want him to turn up with that big flashy boat."

Further along the balcony, Toby's monitor man was waving to him from their new mike station. Toby waved back. He got Marilyn out of the crowd, into a little nook by a pennant and banner display. "I have to go on the air," he said. "Will you stand by until I finish? Then I could show you my favorite boat—"

She nodded, smiling. "I'd love to, Toby!"

"It's about the size of a wash-tub, with an outboard motor."

"We have a lot of out-board enthusiasts at Bowline Bay. Why, Toby, maybe I could interest you in a membership!"

Toby stepped nearer. "You're my favorite commodore—and a commodore rates a salute!" he said, and he kissed her.

Now her face was fiery but she still was smiling. "A commodore always returns a salute!" she said softly. "As they say in radio, take it away, Toby Milliken!" and she kissed him back.

Then she walked with him to the microphone, to stand by until they could look at boats together

THE FLAG OF YOUR COUNTRY

(*Continued from page* 45)

er's private signal. If the owner be a flag officer, his officer's flag is an even better means of identification and should be substituted for the private signal.

THE third part of the procedure is "when." Flags should be flown from 8 a.m. until sundown, during the period that the boat is in commission and manned. It is permissable when leaving or entering a harbor other than one's own anchorage to display flags during daylight before 8 a.m. or after sunset but they should be hauled down immediately upon coming to anchor.

We find in the New York Yacht Club rules that the Union Jack may be displayed while at anchor at the Jackstaff from 8 a.m. to sunset.

Note that this reads—(1) "at the Jackstaff" and (2) that nothing is mentioned about "only on Sundays or holidays."

The Yachtsman's Guide gives as the definition of the Jackstaff, "A short staff, raised at the bowsprit cap, upon which the Union Jack is hoisted."

It should be noted that the motor boat with one mast, quite obviously has no bowsprit cap and therefore, it might be said, can have no jackstaff. But what is more important is that in the definition of jackstaff, quoted above, it is specifically stated that it is a staff upon which the Union Jack is hoisted. The definition does not mention that any other flag is ever flown from this staff. The jack staff should not be confused with the "bow staff" of motor boats. They are not the same.

The New York Yacht Club rule in reference to the flying of the Club flag on a motor yacht with one mast and a staff at the bow specifies that the club flag shall be flown from the *bow staff*. Nothing is mentioned in this rule making an exception as "when at anchor" or "when at anchor on Sundays or holidays." In other words, the only flag to be flown at the bow staff of a motor yacht with one mast and staff at the bow is the Club flag according to the New York Yacht Club rule book.

The New York Yacht Club rules further provide that "the Club flag shall be displayed by yachts in commission, whenever the Ensign is hoisted." As the Ensign is prescribed to be hoisted from morning to evening colors, it must follow that the yacht club flag must never be lowered from the bowstaff and the Jack substituted therefore, while the Ensign is hoisted. In other words, it can never be proper to fly the Union Jack on a motor vessel with single mast and bowstaff.

CHRIS-CRAFT TO TURN OUT 1940 MODELS AT HOLLAND BRANCH

CHRIS-CRAFT started production today on 1940 motor boats in the newly completed Holland branch factory, it was revealed today by Harry Coll, local manager. The initial production schedule is for two hundred 15½-foot runabouts, the first to roll off the line about January 7, and two additional models to be completed every day thereafter

John Madigan

Rarely are the national colors flown at the stern staff of a yacht. Nevertheless, this practice is correct, even though the yacht ensign is commonly used

and 12 arranged in the form of a circle around it. In both of these cases, the flags were purely personal, not official.

The Stars and Stripes preserved in the State House of Boston is claimed to have flown over Fort Independence during the American Revolution but was not carried by the Army. In 1863 each battery of artillery and each company of cavalry was allowed to carry a small flag consisting of Stars and Stripes but that privilege was revoked at the end of the Civil War. The U. S. Marines did not carry the Stars and Stripes as national colors until 1876, yet those which they carried as such in the Mexican and Civil Wars had an eagle in the union.

In none of the three acts adopting the United States national flag is there any mention as to how the stars should be arranged or how many points they should have. In one of the first flags, the stars were sometimes arranged in a circle or with one star in the center and the remaining 12 either in the form of a circle or hollow square, or three horizontal rows of 4, 5 and 4 stars respectively. In a later flag, they were also arranged in several different orders, three horizontal rows of five each or three vertical rows of five each; sometimes in the quincunx order as was the flag that floated over Fort McHenry when Key wrote the Star Spangled Banner.

Apparently about 1841, when the United States Infantry was first given the right to carry the Stars and Stripes, there was a desire on the part of some to preserve their old national colors in the union of the new flag. One of these had an eagle with a bunch of arrows in one claw and the Indian pipe of peace in the other with 13 stars above and a like number below. During the Mexican War, the Fourth Indiana Volunteers carried a flag having in the union an eagle standing on a segment of the globe with a bunch of arrows in one claw, as though intending to conquer the earth.

Near the beginning of the 20th Century, the different departments of our National Government appointed representatives to confer and see if they could not bring order out of chaos. The proportions of Naval flags and Army colors were quite different, the former being much longer in proportion to its height, the latter being much shorter to avoid interfering with the color or standard bearer. It was decided to leave the Army colors alone but to fly the Naval flag from flagstaffs and from Government buildings. Accordingly, following the recommendations of this committee, on October 29, 1912, President Taft issued an executive order defining minutely the proportions and other details of the Stars and Stripes, at the same time approving a custom which had existed in the Navy of placing on their small boats flags having only 13 stars instead of the full complement. The use of only 13 stars on our small or boat flags, was discontinued by an executive order of President Wilson, dated May 29, 1916, and now all flags, colors, etc., used by the United States Government are required to have their full complement of 48 stars. In all of the discussion by the conference it does not appear that there was any mention whatsoever of the yacht ensign or the rights or duties of yachts or any other vessels to fly any particular flag.

From the foregoing it will be seen that the United States has only one flag. The use of the yacht ensign is misleading. England has, by law, created a flag for its navy, another for its merchant service, another for yachts and another for its land forces; each is a national flag and entitled to the position and courtesy due the colors of a nation. But, in the United States, wherever, whenever and for whatever purpose the national colors are flown, there is but one flag to fly.

The place of honor for the national colors on land and sea is as follows: on land on a straight mast, at the head, on a mast with a gaff, at the gaff. At sea and at anchor on a steam or motor vessel, at the flag staff aft; on vessels under sail, at the peak; and on vessels with a gaff, at this gaff when under way.

There has never been passed a law compelling boats to fly the national flag or none at all from the place of honor. It has probably never been contemplated that a loyal citizen would ever do otherwise. Yet, we are free to do as we like and in the use of this freedom there has grown the custom of flying the yacht ensign at the point of honor at shore stations and aboard yachts. There are today ardent yachtsmen in high places who believe this custom aboard yachts should be continued.

The yacht ensign had its beginning on August 7, 1848, when the Congress passed "an act to authorize the Secretary of the Treasury to license yachts and for other purposes" providing for the enrollment and licensing of yachts and exempting them from entering and clearing

GAGE SELF SETTING

Japanned smooth iron castings, polished face and sides; varnished rosewood handle and knob; brass screw adjustment. The self setting feature lies in the fact that the plane iron if taken out to be sharpened goes back in exactly the same position as before removal. Likewise the plane cap when taken out to allow removal of cutter goes back in its same position.

The plane cap is so designed that by slight adjustment it connects the cutter to either single or double iron. The plane iron consists of three pieces, cutter, adjustment slide and binder plate, all being fastened by one screw. The adjustment slide is machined on its sides to accurately fit the groove machined in the frog and is permanently fixed both sideways and endwise.

Smooth, Corrugated Bottom.

No. 203 Length 5½ ins; 1¾ in. cutter ..... Each $3 15

One in cardboard box; wt each 1 lb

Per Doz

Extra Cutters, 1¾ in $10 80

Half doz in cardboard box; wt per doz 1 lb

STANLEY, Iron Block.

Adjustable.
Low Angle.

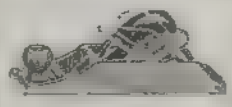
Hardwood handle and knob. Fitted with patent adjustable throat, which enables the user to work equally well on hard or soft wood.

Each

No. 62—Length 14 ins; 2 in. cutter $12 00

One in cardboard box; wt each 4 lbs.

STANLEY, Iron Block.



Double End.

Easily used as a block plane or cutter; may be reversed for planing in close corners not easily reached with other planes.

Not Adjustable, Hardwood Knob.

Each

No. 130—Length 8 ins; 1⅝ in. cutter $3 60

One in cardboard box; wt each 1¾ lbs.

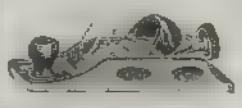
Per Doz

Extra Cutters—1⅝ in $8 25

Half doz in cardboard box; wt per doz 1½ lbs.

STANLEY, Iron Block.

Adjustable Double End.



Hardwood knob; has two slots and movable cutter seat. When it is desired to use it as a bull nose plane the cap and cutter can be removed and the adjustable cutter seat reversed.

Each

No. 131—Length 8 ins; 1⅝ in. cutter $5 85

One in cardboard box; wt each 1¾ lbs.

STANLEY, Rabbet and Block.

A detachable side will easily change this tool from a block plane to a rabbet plane or vice versa; the cutter is set on a skew.

Each

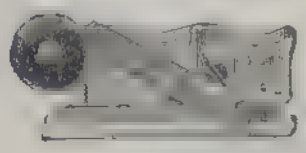
No. 140—Length 7 ins; 1¾ in. cutter $6 30

One in cardboard box; wt each 2 lbs.

PLANES

Japanned cast iron frame and caps, tool steel cutters, tempered and polished.

STANLEY, Side Rabbet.



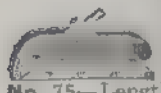
For side-rabbeting and trimming dados, mouldings and grooves of all sorts. A reversible nose piece will give the tool a form by which it will work close up into corners when required.

Each

No. 98—Length 4 ins; ½ in. cutter $4 65

One in cardboard box; wt each about ½ lbs.

STANLEY, Bull-nose Rabbet.



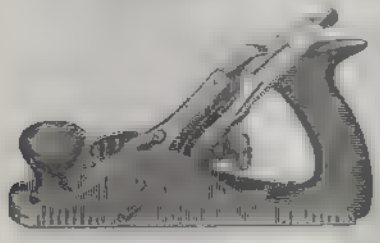
Non-adjustable, polished bottom, for general rabbeting and working into close corners.

Each

No. 75—Length 4 ins; 1 in. cutter $1 65

One in cardboard box; wt about ¾ lb.

STANLEY, Carriage Makers' Rabbet.



Varnished rosewood handle and knob; with screw and lever adjustments, adjustable throat.

Each

No. 10[illegible] Length 9 ins., [illegible] in. cutter. $11 40

One in cardboard box; wt each about 9 lbs

STANLEY, Scrub.

Japanned, cast iron frame; beech handle and knob. Designed for planing down to rough dimensions any board too wide to rip with saw. This is made possible by extra heavy cutter with rounded cutting edge.

Each

No. 40—Length 9¼ ins; 1⅛ in cutter $5 10

One in cardboard box; wt each 2⅛ lbs.

STANLEY, Improved Rabbet.

Japanned cast iron frame and handle. All fitted with detachable depth gauge. No. 190 with spur for working across grain.

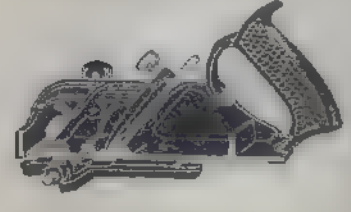
Each

No. 191—Length 8 ins; 1¼ in. cutter $5 85

No. 190—Length 8 ins; 1½ in. cutter 6 21

One in cardboard box; wt each 2½ lbs.

STANLEY, Duplex Rabbet and Filletster.



Japanned cast iron frame and handle, can be used as a bull nose rabbet. The arm to which the fence is secured can be screwed into either side of the stock, making a superior right or left hand filletster, with adjustable spur and depth gauge.

Each

No. 78—Length 8½ ins; 1½ in. cutter $6 90

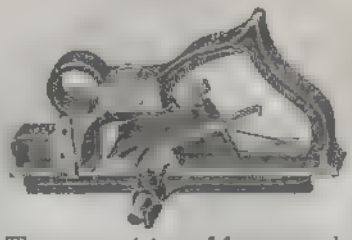
One in cardboard box; wt each about 3 lbs.

PLANES

D 1

Cast iron frame, tool steel cutters, tempered and polished.

STANLEY, Rabbet and Filletster.



Japanned cast iron frame, fence and handle. The arm to which the fence is secured can be screwed into either side of the stock, making a superior right or left hand filletster, with adjustable spur and depth gauge, allowing a groove to be cut any desired depth up to ½ inch. The screw at top of frame can be removed allowing the plane to be used as a bull nose rabbet. Plane is also equipped with spur for use in working across the grain.

Each

No. 278—Length 6¾ ins; 1 in. cutter $6 75

One in cardboard box; wt each 2 lbs.

STANLEY, Tongueing and Grooving.

Nickel plated cast iron frame and handle, rosewood knob. Has two plow cutters of the same width, and one extra wide cutter. When the guide or fence is set both cutters work and a tongue can be made. Fence hung on a pivot, can be swung around end for end. This movement covers one of the cutters.

Each

No. 48—Length 10½ ins; cuts 5/16 in. groove on boards ¾ to 1¼ ins; centers on ½ in. $10 95

One in cardboard box; wt each 3¾ lbs.

STANLEY, Double End Match.

Nickel plated cast iron frame, handle and cap. Provided with both tongue and groove irons, both governed by one permanent fence. With one side a tongue can be cut and by reversing ends the plane will cut a groove to fit. Tongueing tools made wide on one side for use on thicker stuff than plane will tongue and groove in the center.

Nos.	147	148
Length, ins	9	9
Size of cutter, ins	5/16	¼
For boards, ins	½ to ¾	¾ to 1
Centers on, ins	⅜	⅜
Wt each, lbs	2¼	2¾
Each	$9 00	9 60

One in cardboard box.

STANLEY, Adjustable Circular.

Japanned cast iron frames, caps and handles; polished bottom, can be adjusted to work on concave or convex surfaces; graduated scale on the gears, face can be set to work an arc of the same circle, both concave and convex.

Each

No. 113—Length 10 ins; 1⅜ in. cutter $15 75

One in cardboard box; wt each about 4 lbs.

PLANES

STANLEY, Plow, Dado, Filletster and Matching.

Nickel plated cast iron, rosewood handle and knob.

Has 8 plow and dado bits, 3/16 to 1¼ inch, one 1½ inch filletster cutter, 1 slitting blade, one ¼ inch tongueing tool. Is readily converted into a filletster, plow or matching plane. All the tools except the slitting blade are secured on the main stock askew.

	Each
No. 46—With 11 cutters; length 10½ ins.	$23 25

One in cardboard box; wt each 6 lbs.

STANLEY, Adjustable Beading, Rabbet and Matching.

Nickel plated cast iron, rosewood handle, knob and fence.

Fitted with an adjustable fence or guide and a depth gauge also with spurs for use when working across the grain.

Has one 1½ inch sash tool, one ¼ inch match tool, one slitting tool, one 1¼ inch filletster, eleven plow and dado tools, ⅛ to ⅞ inch, seven beading tools, ⅛ to ½ inch.

	Each
No. 45—With 22 cutters; length 11 ins.	$33 00

One in cardboard box; wt each 9½ lbs.

STANLEY, Adjustable. Beading and Matching.

Nickel plated cast iron stock and frame. For ordinary center beading. By adjusting fence, center beading can be done up to 6 inches from the edge of a board. Except for working across the grain, the spurs need not be used. Each plane furnished with ⅛, 3/16, ¼, 5/16, ⅜, 7/16 and ½ inch beading tools, ¼, 5/16, ⅜, 7/16, ½, ⅝, and ⅞ inch plow and dado bits, and a pair of ¼ inch, tongueing tools.

	Each
No. 50—With 15 cutters; length 9¼ ins.	$18 00

One in cardboard box; wt 8½ lbs.

STANLEY, Wood Workers' Handy Router.

Nickel plated, cast iron, beechwood knobs, open throat. Furnished with patented pointed cutters.

Perfectly adapted to smooth the bottom of grooves, panels or all depressions below the general surface of any wood work.

Bits can also be clamped to back side of upright post, and outside of stock. In this position will plane into corners, will router out mortises for sash frame pulleys, or will smooth surfaces not easily reached with any other tool.

	Each
No. 71—With one cutter each, ¼ and ½ in; length 7½ ins.	$8 55

One in cardboard box; wt each 2⅝ lbs.

PLANES

STANLEY, Patent, Universal.

Consists of a main stock with two sets of transverse sliding arms, a depth gauge adjusted by a screw and a sliding arm, and a sliding cutter with stop. The bottom is adjustable both vertically and laterally.

Has one 1½ inch sash tool, one 1¼ inch match tool, one slitting tool, one fillester, eleven plow and dado tools, ⅛ to ⅞ inch, nine beading tools, ⅛ to ¼ inch, foul fluting tools, ¼ to ¾ inch, four hollow cutters, ½ to 1 inch, four round cutters, ½ to 1 inch, two quarter hollow cutters, ½ and ¾ inch, two quarter round cutters, ⅝ and ⅞ inch, three reverse ogee cutters, ½ to 1 inch, two Roman ogee cutters, ⅝ and ⅞ inch, three Grecian ogee cutters, ½ to 1 inch, two ¼ round cutters with bead, ⅜ and ½ inch, three reeding tools, two beads, ⅛ to ¼ inch.

	Each
No. 55—Nickel plated, cast iron frame, rosewood handles, complete with 53 tool steel cutters tempered and polished, arranged in four separate cases	$64 50

One in cardboard box; wt complete about 15¼ lbs.

STANLEY

Adjustable Scraper.

Japanned cast iron frame, rosewood handle and knob. The blade is adjustable endwise and for angle and can be firmly locked in any position desired.

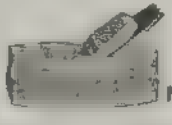
This tool is used for scraping and finishing veneers, cabinet work or hard wood in any form. Can be used equally well as a tooth plane and scraping off old paint and glue.

	Each
No. 112—Length 9 ins; 3 in cutter	$9 00

One in cardboard box, weight each 4 lbs.

WOOD BENCH PLANES

Selected seasoned beechwood, plain finish; extra quality cast steel cutters, tempered, polished starts.



Smooth.

Length 8 inches; width of cut 1⅝ to 2 inches.

	Each
No. 03—Double Iron	$3 90

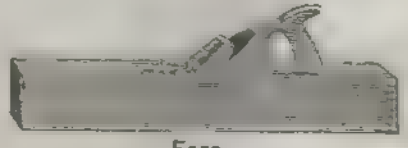
Packed loose; wt each about 2 lbs.

Jack.

Length 16 ins; width of cut 2⅛ to 2¼ inches.

	Each
No. 015—Double Iron	$4 50

Packed loose; wt each about 5 lbs.



Fore.

	Each
No. 021—Double Iron; length 22 ins; width of cut 2⅜ to 2½ ins	$7 35

Packed loose; wt each about 6 lbs.

PLANE IRONS

All orders for Plane Irons should specify the number of plane for which they are intended.

COMMON

Special steel bit, tempered and sharpened.

COMMON, Single.

For common wood bench planes.

Nos.	200-2	200-2⅛	200-2¼
Width cut, ins	2	2⅛	2¼
Wt per doz, lbs	6	6½	7½

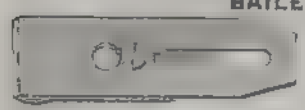
Nos.	206-2⅛	206-2¼	206-2⅜	206-2⅝
Width cut, ins	2⅛	2¼	2⅜	2⅝
Wt per doz, lbs	3¼	3¾	4	5
Each	$1 50	1 65	1 65	1 68

Half doz in cardboard box.

BAILEY, Double.



For iron and wood bottom bench planes.

Nos.	207-1¾	207-2	207-2⅛
Width cut, ins	1¾	2	2⅛
Wt per doz, lbs	4½	5½	6¼
Each	$2 10	2 40	2 46

Nos.	207-2¼	207-2⅜
Width cut, ins	2¼	2⅜
Wt per doz, lbs	7	7½
Each	$2 55	2 70

Half doz in cardboard box.

PLANE GAUGES

Gray cast iron, black japanned top frame; nickel plated fence connecting rod, thumb screw and nuts. For attaching to plane as shown in illustration and guiding it in planing bevels of any required angle, or in planing square joints entirely without the use of a try square or bevel.

Per Doz

No. 6—Wt per doz 18 lbs $43 50

One in cardboard box.

BEADERS

STANLEY UNIVERSAL

Nickel plated cast iron. For beading, reeding or fluting straight or irregular surfaces and for all kinds of light routering; square gauge for straight work; oval gauge for curved work; eight superior cutters go with each tool; both ends sharpened, embracing 6 ordinary sizes of beads ⅛ to ½ inch; 4 sets of reeds, 2 fluters, 1/10 and ¼ inch and double router iron, ⅜ and ½ inch and a ⅝ inch blank.

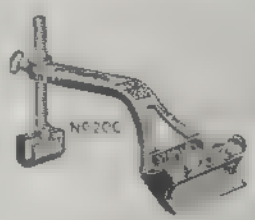
Each

No. 66—Length over all 10 inches; width of cutters ⅛ to 1 in assorted; wt each about 1½ lb $3 45

One in cardboard box.

CHISEL AND PLANE BIT GRINDERS

STANLEY



Made entirely of metal, nickel plated.

A device for holding plane irons, chisels and other similar cutting tools that they may be ground or honed to any desired angle or bevel.

Will take any size bit up to 2⅝ inches wide.

Each

No. 200—Lgth over all 8½ ins. *One in cardboard box; wt each about 1½ lbs.* $3 15

CABINET SCRAPERS

Warranted best cast steel.

Nos.	3-2	3-2½	3-3	3-4
Size, ins	2x4	2½x6	3x5	4x6
Wt per doz, lbs	1	2	3	4
Per Doz.	$2 16	2 52	3 00	3 90

One doz in pkg.

STANLEY, Wood Face.

Designed to do fine work, such as veneers, etc. The rosewood face reduces friction and also prevents the marring of the surface being worked upon. Face is detachable and can be removed, and either convex or irregular shaped blocks attached.

Per Doz

No. 81—Nickel plated; best English steel cutter, 2⅛ ins; length over all 10 ins $56 25

One in cardboard box; wt per doz 30 lbs.

No. 81B—**Extra irons** for No. 81 planes; 2⅛ in blade. $7 65

Half doz in box; wt per doz 1 lb.

CABINET SCRAPERS

STANLEY
Iron Face.

Per Doz

No. 80—Japanned cast iron, raised handles, tempered tool steel blade 2¾ inches; may be sprung to a slight curve by means of thumb screw in center of frame; length over all 11 ins $36 75
One in cardboard box; wt per doz 20 lbs.

Per Doz

No. 80B—**Extra Irons** for No. 80 planes 2¾ in blade . . $7 65
Half doz in box; wt per doz 1 lb.

STANLEY, Adjustable.

Japanned cast iron frame, polished maple wood handle, improved; adjustable to any desired pitch, works towards or from user; roller acts as a support to relieve the strain on the wrists; handles can be detached for working into corners.

Per Doz

No. 83—3¾ in. tempered tool steel blade; length over all 9½ ins $42 75
One in cardboard box; wt per doz 18 lbs.

No. 83B—**Extra Irons** for No. 83 scraper $7 65
Half doz in box; wt per doz 1 lb.

FLOOR OR CABINET SCRAPERS

—BLUE GRASS—

Best quality crucible steel blade, honed and burnished, ready for use. Front cap heavily nickel plated and polished, under cap blue enameled finish; handle made of birch, mahogany finish.

Handle works on ball and socket, and is adjustable to any angle, up and down, right and left.

Per Doz

No. 472—Length over all 9½ in; width blade 3 ins; height of head 3¼ ins $46 50
One in cardboard box; wt per doz 20 lbs.

Per Doz

No. 472B—**Extra Blades** for No. 472 plane; width 3 ins $15 00
One doz in cardboard box; wt per doz about 1 lb.

STANLEY

Cast iron frame and handle shank, japanned; tool steel blade sharpened at both ends, tempered and polished; hardwood handle securely fastened to shank. Can be used for all kinds of scraping. Especially recommended for scraping floors on account of its strength and form.

Each

No. 282—Width of blade 3 ins; length over all 13 ins $3 30

One in cardboard box; wt per doz 19½ lbs.

STANLEY

The tilting device permits the cutter to be easily and quickly adjusted to any angle required. The cutter stop screws can be adjusted to hold narrow cutters, and prevent their slipping back while working.

Per Doz

No. 82—Japanned cast iron frame and handle shank, polished maplewood handle and knob; length over all 14½ ins, 3 in tool steel cutter $50 25
One in cardboard box; wt per doz 20 lbs.

No. 82B—**Extra blades** for No. 82 scraper 7 65
Half doz in box; wt per doz 1 lb.

FLOOR OR CABINET SCRAPERS

BISHOP

Per Doz

No. 2—Plain beechwood handle, 12 inches long, tempered and polished, tool steel blade 3x3 inches, malleable iron clamp and screw $20 25
Half doz in cardboard box; wt per doz 9 lbs

ATKINS

Malleable iron frame and polished nickel plated cross-bar. 3 inch silver steel blade, length over all 11¾ ins

Per Doz

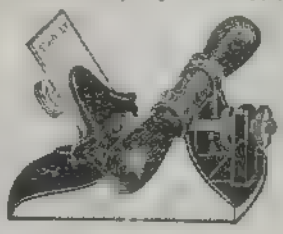
No. 86—**Perfection** $25 50
Half doz in cardboard box; wt per doz 11½ lbs.

Per Doz

No. 86B—**Extra Blades** for No. 86 scraper; width 3 ins $6 75
Half doz in box, wt per doz 1 lb.

STANLEY, Adjustable Veneer.

Japanned cast iron frame, face and clamp, steel adjusting screws, polished rosewood handles, tempered and polished tool steel cutter, adjustable to any angle, length 6¼ inches.



Iron Bottom.

Each

No. 12—Iron bottom; 3 in. steel cutter $10 50
One in cardboard box, wt each 3¾ lbs.

Rosewood Bottom.

Each

No. 12½—Rosewood bottom, suitable for fine work; 3 inch cutter $14 25
One in cardboard box, wt each 4 lbs.

FLOOR SCRAPER BLADES
For Nos. 12 and 12½ Scrapers.

Per Doz

No. 12B—Wt per doz 2 lbs $12 60

STEARNS
Lawn Mower Pattern.

Cast iron frame, finished in aluminum. The knife scrapes the floor when the machine is drawn towards the operator, and will therefore with the adjustable cross handle, which may be placed to one side or the other, work up to the wall and into the corners. Rubber tired wheels.

Each

No. 10—Width of blade 6 ins; diam of wheels 5 ins; length of handle and braces 38½ ins . $36 00
One in crate, handle wrapped; wt each 100 lbs.

EXTRA BLADES

Per Doz

No. 10B For No. 10 floor scraper $28 50
Packed loose; wt per doz about 2½ lbs.

AUTOMOBILE WRENCHES

BILLINGS & SPENCER DISPLAYBOARD

Display board 26 inches long, 9 5/16 inches wide. Hooks are premanently fastened and the board is ready for the dealer's immediate use. Set consists of 36 wrenches, 3 each as follows:

MINERS' CARBIDE LAMPS

JUSTRITE

With Matchless Reflector.

Drawn from seamless brass.

A new principle in water feed—a valve enclosed in a ¼ inch tube, so constructed that it increases or decreases the supply of water, enabling the user to burn the flame at any size desired.

The hook is riveted and soldered; fits all caps.

The clasp is made of spring brass, holds lamp secure to cap; will fit all standard cap shields.

The burner tip is made of imported lava, with 4 air holes, which prevents carbonizing. Will not clog and does not require agitation in order to obtain water as needed.

JUSTRITE—Lever Feed, With Sparker.

Valve is operated by a lever sliding back and forth over notches, and held firmly in place by a small spring. The sparkler on reflector completely eliminates the use of matches.

Height 4 inches; diameter reflector 2¼ inches; 13½ candle power. Furnished with one No. J77 carbide container.

	Per Doz
No. 85—Lamp only; polished	$33 00

One in cardboard box; wt each 6 ozs.

JUSTRITE—Polygon Feed, With Sparker.

Valve Control—Lighter Attachment.

The sparker or igniter on reflector completely eliminates the use of matches.

Height 4¼ inches; diameter reflector 2⅝ inches; 15½ candle power.

Lamp only; polished brass.

No.	707
Doz lots, Per Doz	$25 50
Gross lots, Per Doz	24 00

One in cardboard box; wt each 6 ozs.

JUSTRITE—Polygon Feed, With Sparker.

Drawn from seamless brass; polygon. Square valve threaded and soldered on the valve stem. It is set rigid and cannot get out of alignment, therefore it is a positive water shut off and will not leak. The sharp corners of the button break, also rip away the caked carbide, always insuring a study free water flow. Diameter of reflector 3 ins.

	Doz lots, Per Doz	Gross lots, Per Doz
No. 767—Lamp only; polished brass	$28 50	27 00
No. 769—Lamp only; nickel plated	35 25	33 00

One in cardboard box; wt each 6 ozs

VICTOR—Regulating Value Water Feed, Detachable Reflector and Brace With Sparker.

The water feed is a dependable regulating valve which can be adjustable to permit the water to flow freely. Reflector polished brass, with wire edge that fits snug to the reflector brace; fastened to lamp with a knurled nut. Height 3¾ inches; detachable reflector 2½ inches in diameter; 16 candle power. Polished brass.

Lamp Only.

No.	661
Doz lots, Per Doz	$25 50
Gross lots, Per Doz	24 00

One in cardboard box; wt each 4½ ozs.

MINERS' CARBIDE LAMPS

GUYS DROPPER

Drawn from seamless brass. Has 2½ inch deep brass polished reflector intended for miners working in wet places or where the roof is low. Fitted with Guys patented water dropper and valve cleaner. Height 4 ins.; diameter of reflector 2½ inches.

	Per Doz
No. 28SL	
Less than 6 doz, Per Doz	$27 00
6 doz or more, Per Doz	26 25

No. 280SL—Nickel plated, otherwise same as No. 28SL $36 00

One in cardboard box; wt each 6 ozs

HUNTERS' HEAD LAMPS "See Dept. 9."

JUSTRITE

For Carbide.

Head light made of brass, nickel plated, held firmly to cap shield by hook and clasp; lens 2½ inch diameter, ½ inch thick, set in hinged frame, equipped with a ¼ foot imported fish tail lava tip and self-lighting attachment. Nickel silver reflector.

Generator—consists of two parts, water tank and carbide container, made of No. 20 gauge lead-coated steel; non-corrosive and non-rusting lock seamed and soldered 4½ inches high, 4½ inches long and 1¾ inches wide. Finished in black enamel. Complete with generator, headlight, rubber tube, belt and pins.

Burns 10 Hours on one Charge.

	Per Doz
No. J44—Complete, less cap	$157 50

One in cardboard box; wt 2 lbs.

REPAIRS FOR JUSTRITE LAMPS

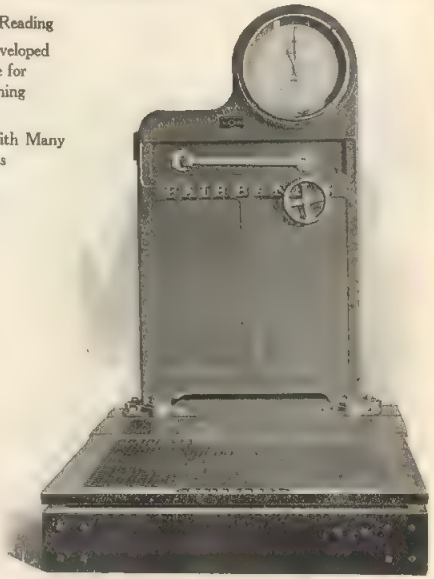
Fairbanks Full Capacity Dial

Full Capacity—Direct Reading

The Most Highly Developed Machine of its Type for Modern Quick Weighing Service

A Simple Construction with Many Exclusive Features

The Fairbanks Dial Scale is regularly made in two sizes, listed below, one for use with heavy duty scales, as required for freight and baggage service, and the other for regular warehouse duty as ordinarily found in business establishments. On account of its unique principle of obtaining full capacity on the dial, the scale may readily be made of any required capacity, upon order with dial and tare beam graduations to suit. The dial may be furnished with double face to be read from either side and an extended beam may be provided with bottle weight to increase the total scale capacity. The dial itself may be applied to any existing platform scale now in good working order



FAIRBANKS DIAL SCALE

No.	Capacity	Dial	Tare Beam	Dial Size
10742	2 000 x 1 lbs.	200 x 1 lbs.	200 x 1 lbs	15 in.
10743	10 000 x 5 lbs.	1,000 x 5 lbs.	1,000 x 5 lbs.	15 in.
10762	4 000 x 2 lbs.	400 x 2 lbs.	400 x 2 lbs.	15 in.
10764	20,000 x 10 lbs.	2,000 x 10 lbs.	2,000 x 10 lbs.	15 in.
10765	40,000 x 20 lbs.	4,000 x 20 lbs.	4,000 x 20 lbs.	15 in.
10791	5,000 x 1 lbs.	500 x 1 lbs.	500 x 1 lbs.	20 in.

While any of the self-contained warehouse scales or built-in scales shown and listed in this catalogue, are adapted for the Fairbanks Dial Scale, those listed below are especially recommended for general service

SELF-CONTAINED SUSPENDED PLATFORM SCALES WITH SPIDER AND REMOVABLE PLATFORM (See page 26)

No.	Capacity	Platform
10694	5,000 lbs.	48" x 40"
10695	3,500 lbs.	42" x 44"
10696	2,500 lbs.	47" x 37"

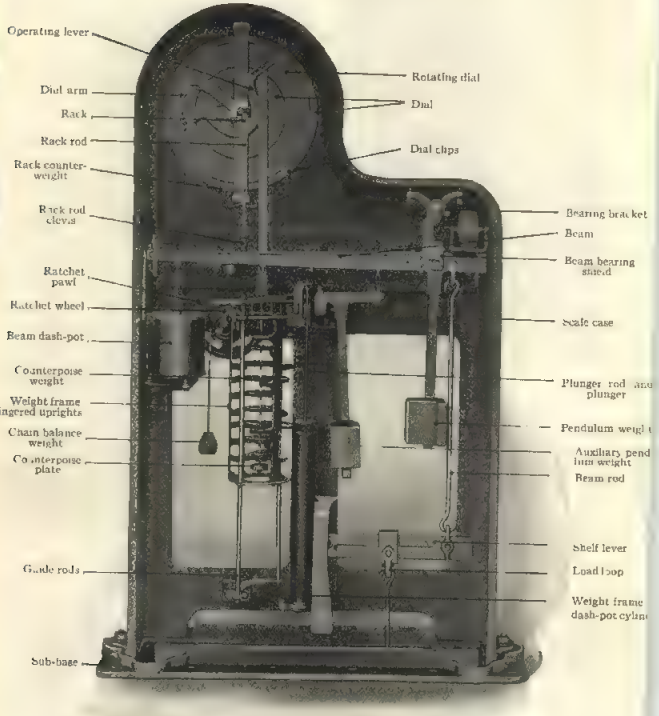
Heavy Duty Built-in Suspended Platform Scales (See Page 32)

No.	Capacity	Platform
2153	4 tons	6' x 4' 8"
2175	6 tons	6' x 4' 8"
2179	10 tons	6' x 4' 8"

Built-in Suspended Platform Scales (See Pages 31 and 32)

No.	Capacity	Platform
2278	3 tons	9' x 4' 6"
10099	4 tons	6' x 4'
10100	4 or 5 tons	8' x 6'
10101	4 or 5 tons	9' x 7'

Fairbanks Full Capacity Dial



Fairbanks Full Capacity Dial

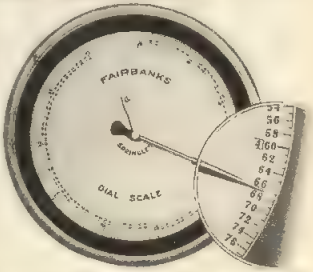
The Most Highly Developed Machine of Its Type for Modern Quick Weighing Service

A Simple Construction With Many Exclusive Features

The Fairbanks Dial Scale follows in general the same principles that years of weighing experience have proven successful in the Fairbanks beam scale. It is in reality but a refinement of this well-known machine, the weights being read directly from a dial instead of from a beam. The construction is remarkably simple, using no springs nor tapes in any way, no complicated or delicate parts. A distinctive feature of this scale is the full capacity direct reading dial which makes unnecessary any additions or calculations of any kind in the reading of the correct weight

The standard primary dial for all capacities is 15 inches in diameter with 200 graduations approximately ½ inch apart. Supplementing the graduated dial is the weight frame, and counterpoise, carrying nine weights each of which has the same value as the initial dial capacity, so that the total capacity of the indicator is ten times the capacity of the primary dial. Connected to the weight frame is a supplementary rotating dial arranged in such manner that when the weight frame descends, the rotating dial makes a proportionate part of a revolution. Through openings in the primary dial, the correct figures are then shown, to indicate the amount of weight deposited upon the counterpoise, which must be balanced upon the platform before the hand begins to travel around the dial.

When a load exceeding the initial dial capacity is placed upon the platform, the hand travels beyond the last graduation and comes to rest in the blank space, that position of the hand indicating to the operator the necessity for depositing one or more weights upon the counterpoise by pressing the button in the front of the case. The weight frame is entirely separate from and does not interfere with the weighing mechanism at any time. The pressing of the button merely releases a ratchet pawl permitting the frame with its weights to descend by gravity as far as necessary to deposit weights upon the counterpoise until the hand begins to move out of the blank space. As soon as this is done, pressure on the bottom is released and the hand comes to rest at the figure, showing the true weight of the load upon the platform.



Fairbanks Full Capacity Dial. 2 000 lbs capacity with dial position to 6 000 lbs by 1 lb. Note magnified portion indicating clearly a direct reading of 467 lbs.

AUTOMOBILE WRENCHES

FRANK MOSSBERG CO.

CONNECTING ROD WRENCH, For Ford Cars.

After removing the pan under the engine of a Ford, the three front connecting rods are fairly easy to adjust, but the fourth is back from the opening and a special wrench is necessary to adjust. This wrench is designed to meet these conditions and its use will many times obviate the necessity of taking down the engine. Thoroughly hardened; satin nickel finish.

Length over all 13 ins.; size socket ⅝ inch.

No.	A-623
1 to 10, Each	1 17
10 or more, Each	1 05

GASOLINE OUTFITS

WESTERN VISIBLE DISPENSING UNIT

Visible Glass Cylinder, made of heavy flint glass; can be furnished with either 5 gal., 10 gal. or 15 gal container, the figures being in bright red with indicating arrows in black outlined in red. Inside the container are the fill, overflow and return pipes, all 1¼ inch. All pipes and casting inside container are finished in a pure white gasoline resisting paint.

Cabinet—The cabinet or pump housing is built of sheet steel, made in two parts making it a simple matter to take down should this be necessary. A swing door fitted with brass padlock allows access to parts. Door is fitted with slotted opening to receive discharge end of hose which is locked inside of pump.

Hose and Filling Nozzle—10 foot of 1¼ inch metal hose, rubber and cotton covered, having adjustable brass couplings.

Shut Off Cock—The shut-off cock is located at outlet point of pump.

Electric Lamp—12 inch canteen shaped, semi-indestructible globe, the word Gasoline being etched into the glass. One socket is located on top of pump for light globe and two on sides of glass container, all sockets are made of weather-proof fibre.

Finish—Cabinet is finished in bright vermillion and black, treated with a finishing coat of highest grade of clear spar varnish.

Dimensions of Pumps—Height 10 feet 4 inches, base casting 20 inches square, shipping weight 475 pounds.

AIR AND WATER STATIONS

WRIGHT

The air and water station meets the demand for a cleaner and better service. Its neat appearance with its quiet and efficient operation attracts the free air and water customers.

Sturdily constructed throughout of best materials; main pipe stand tightly screwed in heavy cast base. The counterweights are adjustable thereby returning the air pipe to a vertical position. The air hose is tested to 200 pound pressure and the water hose to 100 pound pressure. The valve in the water hose line automatically closes when released. The upper frame turns on the pipe stand to a full circle, however a lug is provided to prevent twisting the air hose in the pipe stand. The aluminum swivel at the end of the air pipe turns a full 360 degrees. So constructed as to permit removal to replace air hose or to tighten clamps to stop air leaks.

GASOLINE OUTFITS

WESTERN 10 GALLON VISIBLE AIR PRESSURE PUMPS

Visible glass cylinder, made of heavy clear flint glass, the figures being in bright red and black arrows indicate liquid level line. Cylinder is protected by a removable metal screen. Should the glass container become broken in any manner, the pump is not put out of use, with each pump is furnished a brass by-pass valve which screws into the intake and out-let pipes and gasoline may be pumped thru this by-pass directly to meter and dispensing hose.

Cabinet—The cabinet or pump housing is made of 16 gauge steel, made in two parts making it easy to take apart should it become necessary. A slide door allows access to control lever and filter cock, the door having a slot just large enough for the hose, the nozzle end of the hose being securely locked inside the cabinet when door is closed and locked. Bottom, center and top castings are made of heavy cast iron, making cabinet very strong and rigid throughout.

Gallon Meter—Keeps an accurate check on all gasoline drawn up to 99999 gallons at which point it reverts to 00000 making it a continuous meter. On the face of the meter is a discharge register dial the hand of which shows every gallon discharge up to 10 gallons.

Filter—The filter is located on the intake line and all gasoline is strained and filtered from water and other impurities.

Hose and Filling Nozzle—10 foot metal hose having a rubber and braided cotton cover, fitted with adjustable brass couplings

Shut Off Cock—Pump is equipped with an instantaneous shut off cock, by merely raising or lowering the lever the supply line is opened or closed.

Electric Lamp—19 inch semi-indestructible globe, galvanized steel frame, removable sides made of heavy vitralized glass The word Gasoline being etched into the glass. One socket is located on top of pump for light globe and two on sides of glass container, all sockets are made of weather proof fibre

Finish—Cabinet is finished in bright vermillion and black, treated with a finishing coat of highest grade of clear spar varnish.

Dimensions of Pump—Height 10 feet 8 inches, base casting 20 inches square, center casting 15 inches square, top casting 22½ inches square, shipping weight 550 lbs.

"THE NATIONS STANDARD OF QUALITY"

GASOLINE OUTFITS

WESTERN 5 GALLON VISIBLE CURB OUTFIT

With Combination Piston and Visible Pump.

(Open)

(Closed)

Visible Glass Cylinder, made of heavy clear flint glass, the figures being in bright red and black arrows indicate liquid level line. Cylinder is protected by a metal screen which is removable. Cylinder is fited to top and bottom castings by six stay rods and by removing the nuts from bottom of stay rods, cylinder may be taken down at any time inside should require cleaning.

Cabinet—The cabinet or pump housing is made of sheet metal, the door being lowered to open cabinet, when door is raised it automatically fastens and is locked by a brass pad lock.

Pump—Long distance piston type, adjusted to measure 1, 2, 3, 4 or 5 gallons at a stroke; 9 inch seamless brass cylinder; ¾ inch brass piston rod; heavy brass valves and stuffing box; cut steel gears, bronze bushed and protected by gear guard; case hardened bearings and spindles. The pump measures the exact amount desired into the glass container, the latter merely acting as a check on the Pump and to show customer just what he is receiving.

Gallon Meter—Keeps an accurate check on all gasoline drawn up to 99999 gallons at which point it reverts to 00000, making it a continuous meter. The figures are large and legible, stamped into the metal.

Filter—Is mounted on pump plate and all gasoline is filtered and strained from water and other impurities before it enters glass cylinder.

Automatic Hose Drain—An automatic drain valve is attached to pump which allows hose to drain out clean as soon as flow stops.

Hose and Filling Nozzle—Furnished with each pump 10 feet of 1 inch metal hose, rubber and cotton covered and having adjustable brass couplings, the filling nozzle is fitted with fine brass removable strainer.

Shut-off-Cock—Pump is equipped with an instantaneous shut-off cock, by merely raising or lowering the lever the supply line is opened or closed.

Electric Lamp—A 12 inch canteen shaped globe is furnished, fitted with socket inside for lamp and two weather-proof fibre sockets are located on top on either side of glass cylinder wire are ready for connecting to local circuits No lamps furnished.

Removable Pump Handle—Handle may be lipped off and carried in side of the building, making pump fool and meddler proof.

Quantity Stop —For 1, 2, 3, 4 or 5 gallon are located in front on pump standard; to change measurment it is necessary to push in the nickeled disc stamped with the quantity desired, turn pump handle and the exact amount is discharged into glass container above.

Finish —Pump and cabinet are highly finished in vermillion enamel, with nickel trimming and gold lettering.

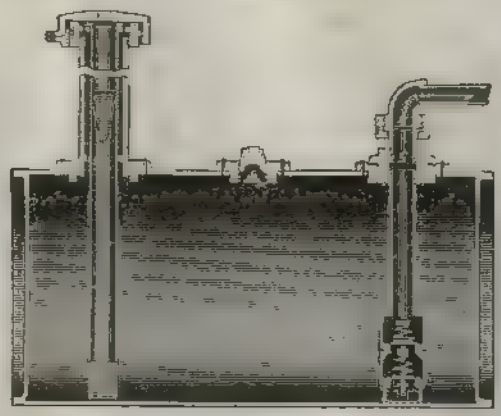
Dimensions of Pump—Height 9 ft. 9 inches; diameter 15 inches; 2 inch suction pipe.

(Continued in next column).

GASOLINE OUTFITS

WESTERN 5 GALLON VISIBLE CURB OUTFIT

With Combination Piston and Visible Pump.



(Sectional view of tank).

Tanks—Galvanized steel, welded throughout except the flanges which are riveted and welded to tank, this making a leak-proof tank. Furnished complete with double brass foot valves, suction pipe in tank, 3½ inch by 2 inch reducing plug; double fill pipes with strainers, lock cap, lock and keys with measuring stick. Each tank is fitted with three flanged openings, 2 inch for fill pipe, 1 inch for overflow return pipe and 3½ inch for reducing plug and 2 inch suction pipe. Tanks are inspected and bear the approval label of the National Board of Fire Underwriters.

Base and top crated separately; shipping wt each 344 lbs.

—BLUE GRASS—ALL STEEL

White Enameled.

The structural frame is of heavy angle steel, cut and formed on special machines; securely welded into proper shape causing every drawer and door to fit perfectly. The enamel is applied similar to that on white-enameled steel beds. A number of coats are applied by an air brush and each coat baked on. The result is, a surface that will not chip or peel off. The entire body is of heavy sheet steel with all joints electrically welded, enameled a snow white. The base is fitted with tin lined bread or cake box, one large linen drawer, one towel drawer, one partitioned cutlery drawer, large utensil compartment with removable shelf, and pan rack on inside of door. A white maple bread board is also furnished.

The top contains a tilting flour bin with flour sifter, glass sugar container, seven crystal glass spice jars and a crystal glass measuring cup.

Height over all 70 inches; width 40 inches; top 40½x26 inches; extending to 37 inches when drawn out. Each

No. BG2S—With porcelain sliding top **$157 50**

Base and top separately; shipping wt each complete 320 lbs.

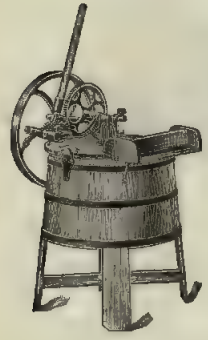
WASHING MACHINES

KNOXALL



Combined pump handle and upright lever washer so arranged that the change from one position to the other can be made instantly and with ease.

Made of Louisiana red cypress, finished in the natural color of wood, castings are painted in gold bronze, the fly wheel is green.

Each

No. H-5 — Capacity 20 gal., height over all 27 inches, width of tub at top 21 in., bottom 24 in., depth 12 in., weight each 94 lbs. $30 00

One in a Crate

O. K. HAND

Roller gearing rotary washer, thoroughly kiln dried Louisiana red cypress tub, inner surface corrugated, double thick lid, solid driving shaft with extra heavy driving pinion, double gear with roller cogs throughout, tub finished in natural color, hoops and gearing in gold bronze, fly wheel hard enameled green color.

Each

O. K. Hand—28 in. high over all, tub 24 in. diameter at the bottom and 21½ in. at the top, length of stave 14⅝ in., weight each 100 lbs. $23.00

The most important feature of a washing machine, however, is the gearing which operates the dasher in the tub. Let us dissect the gearing of the O. K. Note first the solid driving shaft, no knuckle jointed affair to get out of adjustment after being subjected to hard usage. To the one end of this shaft is attached an extra heavy driving pinion, which meshes with a double gear or head. This pinion and double gear, working in conjunction with guides cast solid with frame, make a combination for reverse motion unequalled for simplicity and strength.

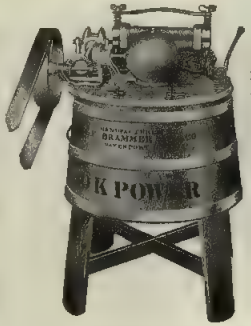
WASHING MACHINES

O. K. POWER



Tub is made from Louisiana cypress and finished in natural color. Bottom and sides of tub are corrugated, giving the utmost in washing efficiency, strong durable lid, solid stave legs, aluminum bronzed hood and mechanism.

Wringer attached to the washer and works with it. Has a metal frame, is ball bearing, rolls are vulcanized to the shafts. Has enclosed cog wheels and well tempered spring.

Each

No. P1—28 in. high over all, tub 24 in. in diameter at the bottom and 21½ in. at the top, length of stave 14⅝ in., weight each 138 lbs. $60 00

One in a Crate

O. K. ELECTRIC

Large kiln dried Louisiana red cypress top, corrugated sides and bottom, tongued and grooved staves, strong durable lid, solid stave legs, natural finish, aluminum bronzed hoops and mechanism.

Motor is of special design and capable of operating both the washer and wringer at the same time. Motor is splash proof, so that dampness or water cannot injure it. The sprocket wheel which operates the dasher block is equipped with roller bearings which greatly reduces friction and gives the washer an easy free movement.

O. K. Electric is constructed on the same principles as the O. K. Power described above, with the exception that it is fitted with motor for electric power, complete with metal frame wringer.

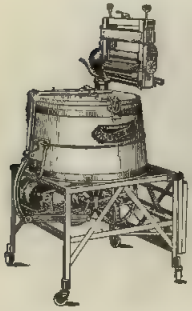
Each

No. E1—For alternating current, 110 volt, 60 cycle, unless otherwise specified but can be furnished with direct current motor or any voltage motor desired. Dimensions 28 in. high over all, tub 24 in. in diameter at the bottom, 21½ in. at the top, weight each 176 pounds $108 00

One in a Crate

WASHING MACHINES

O. K. SWINGING WRINGER, ELECTRIC



Tub made of kiln dried Louisiana cypress with smoothly cut corrugations on sides and bottom on the inside; outside varnished natural finish. Frame is built of angle iron, solidly braced. The electric motor and driving mechanism are mounted on the frame under the tub, out of the way. The folding tub bench, also made of angle iron, is hinged to the metal frame. A permanent frame of galvanized steel, which is rust resisting and gives a rigid support for washer and tubs. The bench when opened gives ample space for two large tubs. The wringer has 12 in. rolls, with adjustment for any desired tension. Safety release at top which instantly releases rolls should occasion arise.

Each

No. E7 One quarter H. P. electric motor for alternating current, unless otherwise specified, dimensions 54 in. high over all, tub 24 in. in diameter at the bottom and 21¼ in. at the top; weight each 176 lbs. .$150.00

No. E8—Same as No. E7 but with 16 oz copper tub, highly polished on outside, tinned on inside, with brass outlet 170.00

One in a Crate

Tub made of kiln dried Louisiana cypress with smoothly cut corrugations on sides and bottom on the inside. Outside varnished natural finish, mounted on a full size steel bench, with folding bench for one tub, all gears are cut and noiseless, mounted on a cast iron base. The machine is equipped with 12 in. roll swinging wringer with adjustment for tension. Safety release at top instantly releases rolls should occasion arise

Each

No. E3—One-quarter H. P. electric motor for alternating current unless otherwise specified. Dimensions 54 in. high over all, tub 24 in. diameter at the bottom and 21¼ in. at the top, weight each 160 lbs. $134 00

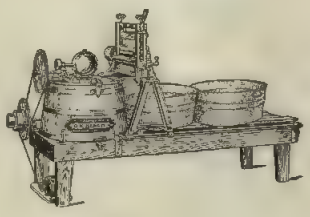
WASHING MACHINES

O. K. BENCH ELECTRIC



Electric Driven

Tub—The most select seasoned Louisiana cypress (the wood eternal) is used in making the O. K. Bench Tub. This wood is the best known for the purpose. Lid is made double thick to prevent the escape of heat and steam. Sides and bottom of tub are corrugated to increase its washing efficiency

Frame—The frame is made of hardwood and strongly bolted, making it rigid and durable. The extension tray for holding the clothes basket slides out of the way when not in use.

Dasher—The dasher makes a long, powerful sweep, which carries the clothes swiftly through the suds. This long sweep of the dasher prevents the wadding and tangling of clothes.

Motor—The motor is of special design and capable of operating the washer and wringer at the same time. This motor is a sturdily built, smooth running motor, splash-proofed to protect it against damage from water or dampness.

Wringer—Extra large specially built safety wringer, having full 12 in. rolls. The control lever is so arranged that the wringer may be stopped instantly or run forward or backward at will. By simply touching the safety lever the rolls are instantly spread, releasing garment.

Built heavy and strong and will stand the wear and tear. Recommended for use in small hotels, restaurants and institutions, as more work can be done with this machine in a given time than with any other household washing machine. Will outlast any other. The galvanized tubs and basket are not furnished with machine.

The O. K. Bench Washer is a great saver of unnecessary footsteps. A careful study of the design will reveal the practical convenience of having the washer, rinse tubs and basket on a straight line, with a sliding wringer. No extra steps and no tubs or bench to walk around or set in place. Everything required for washing is ready and in place

You are relieved of all the work involved in washing—you simply oversee—no lifting or unnecessary handling of clothes. The clothes are washed in a methodical, continuous process. Only a portion of your time is required to oversee the work. If you choose, the balance of your time can be employed in other household duties while the washer is doing its work.

Each

No. E4—Electric, ¼ horse power electric motor, for alternating current, 110 volt, 60 cycles, unless otherwise specified, 52 in. high over all, tub 24 in. in diameter at the bottom, 21¼ in. at the top, bench is 6 ft. long and 30 in. wide, weight each 308 lbs..... .$182.00

REGO WELDING AND CUTTING EQUIPMENT

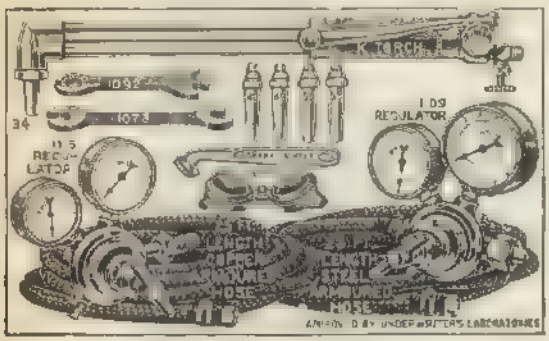
REGO WELDING AND CUTTING OUTFITS

Rego Welding and Cutting Equipment. Quality in workmanship and material are basic principles of Rego equipment, insuring economy of operation, safety, long life, and a perfect flame quality.

Completeness is an outstanding feature of the Rego line. There is a definite equipment for every kind of gas used in the industry, for every class of work and for every price requirement.

Strong, welded steel carrying cases, with compartments to hold torches, regulators, etc., make Rego outfits easily transported from place to place, and protect the equipment from damage when not in use.

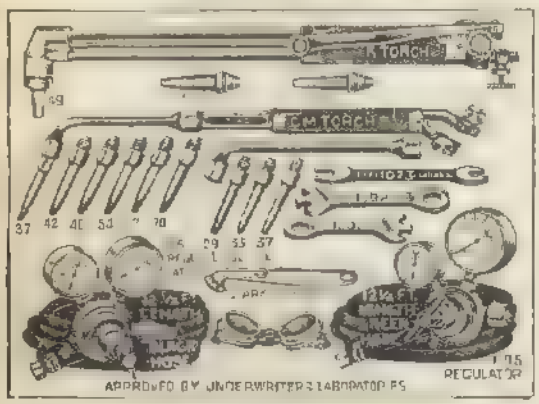
REGO GENERAL CUTTING OUTFIT



Rego No. 1 General Cutting Outfit. For use with medium pressure oxy-acetylene; all cutting up to 12-inch steel. Used in steel mills, foundries, ship yards and general industrial work. Contains all equipment illustrated above. Packed in a strong, welded steel carrying case. Weight, 38 lbs.

Rego No. 1 General Cutting Outfit ....complete **$132 00**

REGO GENERAL CUTTING AND WELDING OUTFIT



Rego No. 1GK General Cutting and Welding Outfit. Contains two separate torches, GM for Welding and K for Cutting. For use with medium pressure oxy-acetylene; range: all welding and cutting up to 3-inch steel. Especially fitted for work in metal lumber mills, machine shops and other places where a two-in-one outfit is desired. Furnished complete as illustrated and packed in handy welded steel carrying case. Weight, 36½ lbs.

Rego No. 1GK General Cutting and Welding Outfit ....complete **$157 00**

REGO GENERAL WELDING OUTFITS

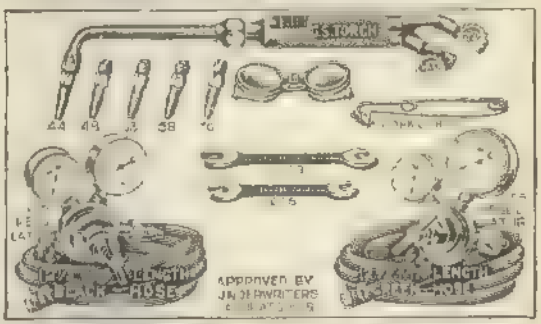
Rego No. 5GMX General Gooseneck Welding Outfit. For use with medium pressure oxy-acetylene; range: general welding up to 3 in. Furnished complete as illustrated.

Rego No. 5GMX General Welding Outfit ..complete **$112 00**

Rego No. 5GM Medium Welding Outfit. Similar to above outfit except GM Torch comes with only 6-inch extension and 6 tips instead of 6 and 12-inch extensions and 9 tips. Welds up to 1-inch steel.

Rego No. 5GM Medium Welding Outfit ..complete **$100 00**

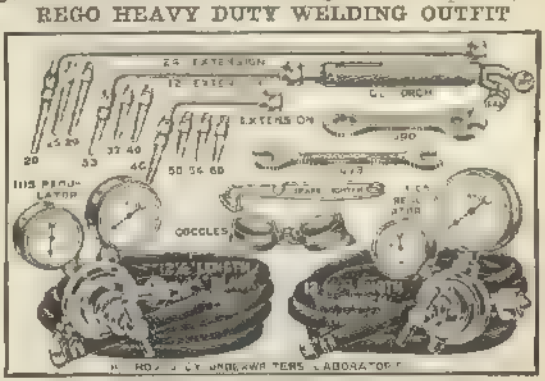
REGO SHEET METAL WELDING OUTFIT



Rego No 5GS Sheet Metal Welding Outfit. For use with medium pressure oxy-acetylene, and for welding up to 3/16 inch thickness. Large regulators give steady, constant supply of gas necessary for production work. Furnished complete as illustrated and packed in welded steel carrying case. Weight, 31 lbs.

Rego No. 5GS Sheet Metal Welding Outfit ..complete **$90 00**

REGO HEAVY DUTY WELDING OUTFIT

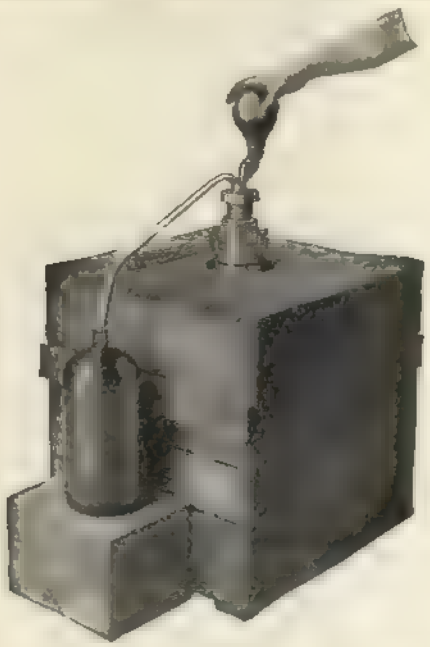


Rego No. 5GL Heavy Duty Welding Outfit. For use with medium pressure oxy-acetylene, and for all welding within the limits of the process. Using the GL torch with 24-inch extension gives a torch 36 inches long, which enables the operator to work on the heaviest preheated jobs with comfort. Outfit contains complete equipment as illustrated above, and packed in steel carrying case. Weight, 37 lbs.

Rego No. 5GL Heavy Duty Welding Outfit ....complete **$132 00**

BATTERY ACID PUMP AND REPAIR TOOLS

THOMPSON'S PNEUMATIC ACID PUMP



Thompson's Pneumatic Acid Pump. Is easily transferred from one carboy to the other. Bracket furnished for hanging up pump when not in use. By use of hand bulb it is impossible to generate a dangerous air pressure.

To operate, the bulb is squeezed, forcing air into the carboy through the valves; this in turn forces the liquid out through the lead pipe which reaches to the bottom of the carboy. When it is desired to stop the flow, the relief valve is pressed upward, which permits the air to escape. Lead overflow pipe has no connection with the valve body, and when withdrawn no acid remains in it. It also serves as a gauge. Fully guaranteed

Thompson's Acid Pump .....complete $7 50

PELICAN PLIERS

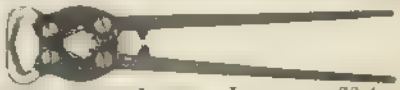
Pelican Pliers. These pliers are not limited to the single operation of lifting the terminal clamp. The wrench on the end of the handle will loosen the clamping nut; the screwdriver on the other handle will spread the terminal clamp; the jaws will grip hexagon nuts, and square and round headed terminal bolts.

Pelican Pliers..... each $0 50

HELLER STORAGE BATTERY REPAIR KIT

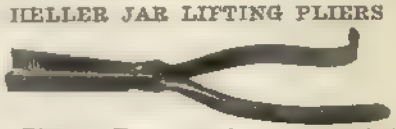
Heller Storage Battery Repair Kit. Consists of one each of the following tools, which are also sold separately.

HELLER E-Z CUTTING BATTERY NIPPER



Heller Nipper. [illegible] Jaws. Leverage, 20 to 1. Special steel forging. Jaws hardened. Lgth., 14 in..each $4 50

HELLER JAR LIFTING PLIERS

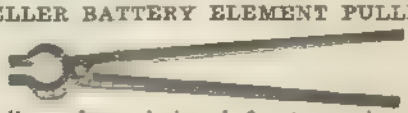


Heller Jar Pliers. For removing storage battery jars. Serrations on inside face of each jaw. Curved handle prevents hand slipping .....each $1 50

HELLER BATTERY TERMINAL TONGS

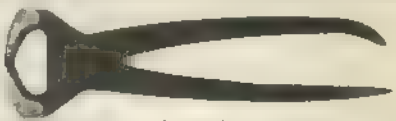
Heller Tongs. Removes corroded cable from terminal. Forged from special tool steel. Lgth., 18 in..each $1 10

HELLER BATTERY ELEMENT PULLER



Heller Puller. Jaws designed for tremendous gripping power on connection post. Lgth., 18 in.....each $0 85

HELLER STANDARD BATTERY PINCERS



Heller Battery Pincers. Length, 8 inches.....each $0 75

HELLER BATTERY KNIVES

Heller Battery Knife. Combines putty, jack knife and other scraping and cutting tools..... each $0 55

Heller Separator Knife. Hook on end of blade grabs separator. Blade sharp on both sides.....each $0 40

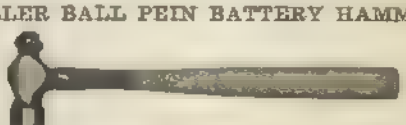
HELLER BATTERY FILE

Heller Float Cut Battery File. 12-inch.....each $0 55

HELLER BATTERY RASP

Heller Flat Battery Rasp. 10-inch .....each $0 85

HELLER BALL PEIN BATTERY HAMMER

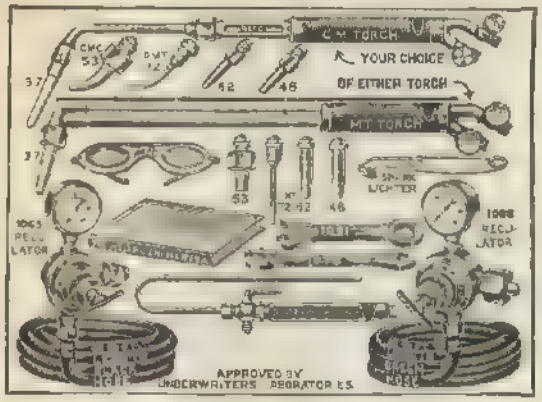


Heller Ball Pein Hammer. Weight, ¾ pound..each $0 95

Heller Battery Repair Kit. Consists of one each of the above tools.....complete $12 00

REGO WELDING AND CUTTING EQUIPMENT

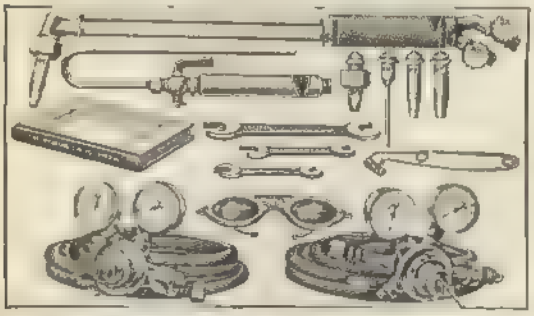
REGO LITTLE SIX AUTO REPAIR OUTFIT



Rego Little Six Auto Repair Outfit. For medium pressure oxy-acetylene. Range: medium welding; cutting up to 1 inch. For small garages and repair shops. Made up of standard Rego equipment. Either the MT tip mixing torch, with 5 tips, or the GM gooseneck torch with 5 tips may be had with this outfit. The MT torch with 5 tips is standard and will be included unless otherwise specified. Furnished complete as illustrated, in steel carrying case. Weight, 17 pounds.

Rego Little Six Auto Repair Outfit.....complete $85 00

REGO LITTLE SIX OUTFIT



Rego Little Six Outfit. Furnished with double gauge regulators (Nos. 1063 and 1086). The same choice of torches is offered as with the Single Gauge Outfit listed above.

Rego Little Six Outfit. (Dble. Gauge. Reg.).complete $74 50

REGO LEAD BURNING OUTFIT

Rego No. 8B Lead Burning Outfit. A complete portable outfit for shops in which the lead burning is not done at a bench, but where the outfit and tanks are taken wherever the job happens to be. Outfit comes complete as illustrated. Weight, 9 pounds.

Rego No. 8B Lead Burning Outfit .....complete $32 00

REGO CARBON BURNING OUTFITS

Rego Carbon Burning Outfits. Burning carbon from engine cylinders by use of oxygen is much quicker and more efficient than the old scraping method, because it is not necessary to remove the cylinder head. Complete as shown. No. 9 Outfit furnished with DS torch; weight, 7 lbs. No. 9A Outfit is same as No. 9 Outfit, except D petcock torch is furnished in place of DS spring valve torch; weight, 7 lbs.

Rego No. 9 Carbon Burning Outfit.....complete $16 50
Rego No. 9A Carbon Burning Outfit.... " 18 00

REGO ACETYLENE SOLDERING OUTFITS

Rego Acetylene Soldering Outfits. For use with acetylene or hydrogen only. The sleeve controlling the air supply makes it possible to adjust size and heat of flame. This is a distinct Rego feature.

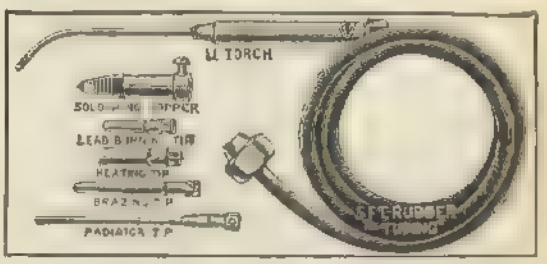
Rego No. 11 Soldering Outfit. Contains large Z-1 torch, 10 feet of corrugated hose, 1065 acetylene regulator. Weight, 4½ pounds.

Rego No. 11 Soldering Outfit.....complete $17 50

Rego No. 11A Soldering Outfit. Contains Z-2 torch, 6 feet corrugated hose and connection for acetylene lighting tank. Weight, 1½ pounds.

Rego No. 11A Soldering Outfit.....complete $ 6 00
Rego No. 11B Soldering Outfit, as illustrated ..... " 20 00

REGO TORIT OUTFIT

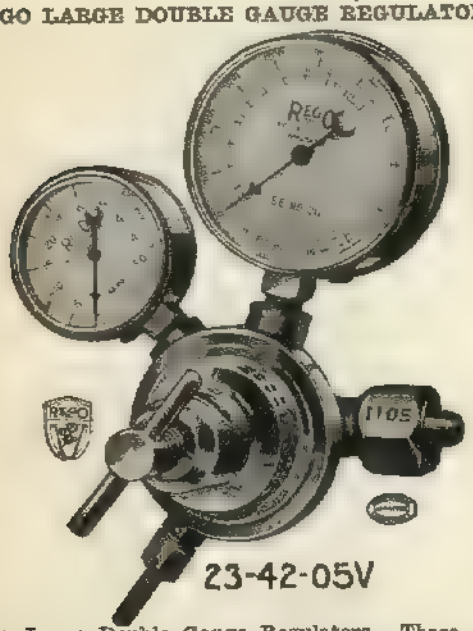


Rego No. 13 Torit Outfit. Uses acetylene only; for soldering, light brazing and similar work. No air pressure required. All of the numerous small heating, soldering and light brazing jobs can be accomplished with this outfit with surprising speed and accuracy. Clean, safe, portable and extremely economical in operation. Furnished complete as illustrated. Weight, 1½ pounds.

Rego No. 13 Torit Outfit..... .....complete $7 50

REGO WELDING AND CUTTING EQUIPMENT

REGO LARGE DOUBLE GAUGE REGULATORS



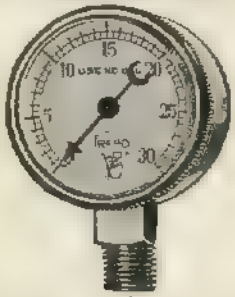
Rego Large Double Gauge Regulators. These gauges deliver an ample supply of gas at a constant, even pressure day in and day out and stands up under the severe demands placed upon them in production shops, job welding, etc. Inlet connections furnished as follows, unless otherwise specified: Oxygen—standard oxygen cylinder; acetylene—P. O. L. welding cylinder; hydrogen—½-inch left hand.

No.	Gas	Capacity, Pounds	Weight, Pounds	Each
1105	Oxygen	0-40	7	$29 50
1109	Oxygen	0-200	7	29 50
1115	Acetylene	0-30	6	21 50
1150	Hydrogen	0-40	7	29 50

When ordering specify tank connection required.

Special regulators for individual installations, and special types of work will be furnished on request.

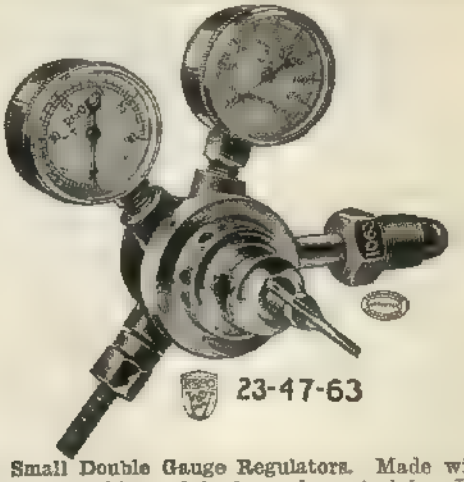
REGO PRESSURE GAUGES



Rego Pressure Gauges. Of best material and workmanship obtainable. Connections are all ¼-inch pipe thread. Heavy beveled plate glass covers are secured to the gauges with coarse thread retaining rings. Safety back and solid face construction on the high pressure gauges prevent accident to the operator.

No.	Pounds	Size, Inches	Weight, Pounds	Each
923	50	2½	15/16	$ 4 60
930	300	3	1	4 90
932	3000	3½	1 13/16	13 20
934	3000	2	9/16	6 25
935	30	2	½	2 50
947	500	2	½	2 50
948	300	2	½	2 50
990	500	3	1	4 90

REGO SMALL DOUBLE GAUGE REGULATORS

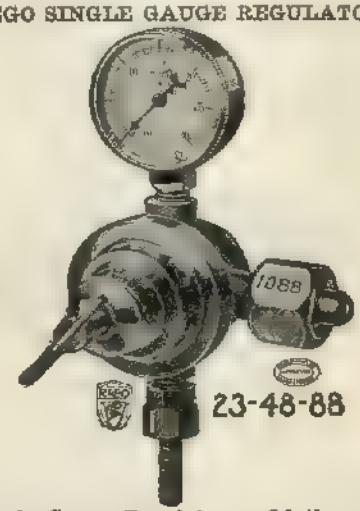


Rego Small Double Gauge Regulators. Made with accurate workmanship and high grade materials. Perfect equipment for the shop that does only occasional or light work. The following inlet connections are furnished, unless otherwise specified: Oxygen, standard oxygen cylinder valve; acetylene, P.O.L. welding cylinder; hydrogen, ½-inch left hand.

No.	Gas	Capacity, Pounds	Weight, Pounds	Each
1086	Oxygen	0-25	3¼	$18 25
1019	Oxygen	0-150	3¼	18 25
1063	Acetylene	0-25	3¼	14 25
1054	Hydrogen	0-25	3¼	18 25

When ordering specify tank connection required.

REGO SINGLE GAUGE REGULATORS



Rego Single Gauge Regulators. Of the same general construction as the double gauge types. The high pressure gauge is omitted. Many operators do not have to consider the amount of gas in the cylinder or the amount of gas used on a particular job. Inlet connections as follows, unless otherwise specified: Oxygen, standard oxygen cylinder; acetylene, P.O.L. welding cylinder; hydrogen, ½-inch left hand.

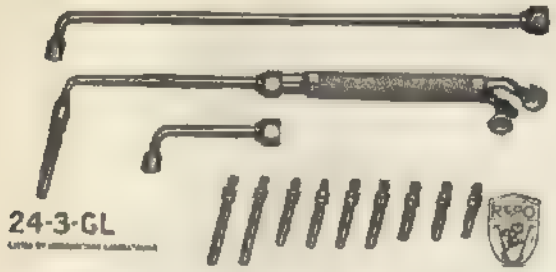
No.	Gas	Size, Inches	Capacity, Pounds	Weight, Pounds	Each
1007A	Oxygen	3	0-40	5	$16 30
1017	Acetylene	3	0-30	5	16 30
1088	Oxygen	2	0-25	2¾	11 80
*1065	Acetylene	2	0-25	2½	11 80

*Lighting cylinder connection.

When ordering, specify tank connection required.

REGO WELDING AND CUTTING EQUIPMENT

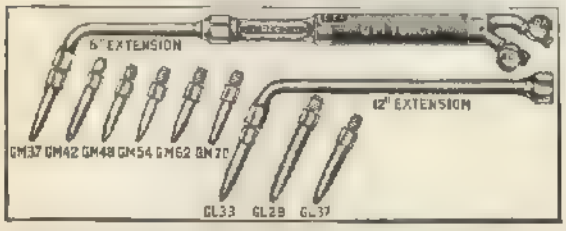
REGO HEAVY DUTY WELDING TORCH



Rego GL Heavy Duty Welding Torch. For heavy preheated castings, locomotive cylinders and frames, large pipe welds and general heavy repair and production work.

GL Torch. No extension or tips. Wt., 2¼ lbs. ..each $23 00
6-Inch Extension Only. For tips 60, 54, 50 and 46. Weight, ½ pound ..each $6 00
12-Inch Extension Only. For tips 40, 37and 33. Weight, ¾ pound ..each $7 65
24-Inch Extension Only. For tips 29, 25 and 20. Weight, 1⅝ pounds..each $9 60
GL Tips. Weight, ¼ pound.. " 2 25
GL Torch. Complete with 3 extensions and 10 tips. Wt., 7½ pounds..complete $68 50

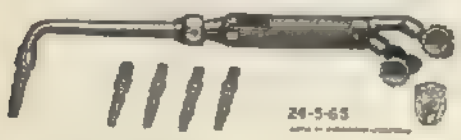
REGO GENERAL WELDING TORCH



Rego GM General Welding Torch. For medium work on iron, steel, copper, bronze and aluminum, such as pipe line welding, automotive repair and production, tank and other medium welding. Length, 20 inches; weight, 25 ounces.

GM Torch. 6-inch extension and 6 GM tips. Weight, 3 pounds ..complete $35 00
GM Tips. Weight, ¼ pound..each 1 95
Special 12-Inch Extension. For general welding. Weight, ¾ pound..each $7 25
GM Torch. 12-inch extension and 3 GL tips. Weight, 3¼ pounds..each $31 00
GL Tips. For use with 12-inch extension. Weight, ¼ pound .. each $2 25
GM Torch. 6-inch and 12-inch extension and 9 tips. Wt., 4½ pounds..complete $48 00

REGO LIGHT WELDING TORCH



Rego GS Light Welding Torch. A small handy torch especially popular for light production work, such as welding small tanks, electrical and auto parts up to 5/16 inch in thickness.

GS Torch, 5 tips. Weight, 1¾ pounds. (Weight of torch, only, 1 pound.)..complete $25 00
GS Tips, 5. Weight, 1/16 pound.. " 1 50

REGO MEDIUM WELDING AND CUTTING TORCH

Rego MT Torch. For use with medium pressure oxy-acetylene. Range: Welding and cutting up to 1 inch.

No. MT Torch, 5 tips. Weight, 2½ lbs..complete $28 50
No. MT Torch, without tips. Wt., 1½ lbs....each 18 50
No. MT Tips. Weight, 3/16 pound.. " 2 00
No. CMT Cutting Tips. Weight, 3/16 pound.. " 3 00
No. RMT Tips. For radiator repair work, etc. Weight, ⅛ pound..each $1 75

REGO SPECIAL PRODUCTION TORCHES

Rego "Special Production" Torches. With the special production torch the valves need be adjusted only once. When through with an operation a touch of the thumb releases the catch—and both gases are shut off simultaneously.

These torches use the same tips and extensions as the regular GM and GS models.

GMA Torch, with 6-inch extension and 6 GM tips. Wt., 2 pounds..complete $45 00
GMA Torch, with 6 and 12-inch extensions and 9 tips. ..complete $58 00
GSA Torch, with 5 tips. Weight, 1½ lbs. " 35 00

REGO LEAD-SHEET METAL WELDING TORCH

Rego Lead-Sheet Metal Welding Torch is a light, handy torch with an exceptionally wide range of flames. Any size flame from a wide, soft brush to an intensely hot needle point can be obtained with a touch of the thumb. The long taper-drilled tip gives just the kind of flame needed for fast work.

No. H Torch, with tips 76, 72, 65 and HR72 for oxy-acetylene. Weight, ¼ pound..complete $7 00
No. H Torch, with tips 65, 60, 55 and HR53 for oxy-hydrogen. Weight, ¼ pound..complete $7 00
No. H Torch, with tips 55, 45, 38 and HR53 for oxy-city gas. Weight, ¼ pound..complete $7 00
No. H Torch and HC45 Compressed Air City Gas Tip. Weight, ¼ pound..complete $6 30
No. H Tips, Nos. 72 and 38, inclusive. Weight, 1/64 pound..complete $0 25
No. H Tips, Nos. HR53 and HR72 .. " 35
No. HC45 Tips. Weight, 1/32 pound.. " 1 00
When ordering, specify gas to be used.

REGO WELDING AND CUTTING EQUIPMENT

REGO ACETYLENE GENERATORS

Rego Automatic Acetylene Generators are indispensable to the shop in localities in which a supply of tank or dissolved acetylene is not readily available.

The Rego Generator produces clean, cool acetylene for only 1¼c per cubic feet, which is about ⅛ of the cost of acetylene when purchased in tanks.

Absolutely Safe—Rego Generators have a 20% over water capacity, so that an overload up to 100% can be carried without overheating. When refilling the generator, the water goes in through the flash back chamber, making it impossible to forget to fill it, and insuring that no flash back can ever reach the generator proper.

Positive automatic and hand blow off valves are provided which are so connected that the vents can be run out of the building with one pipe. A locking device makes it impossible to refill without locking the carbide feed

After the Rego Generator is filled with carbide and water and the lock is released, no attention is necessary. The carbide is automatically dropped into the water, and the gas generated just as fast as it is used. The feed mechanism is operated by the most dependable device known—a weight motor.

The feed motor governor and diaphragm control are directly connected without the use of levers. The simplicity of the controlling devices and the accuracy with which they are made result in an absolutely uniform pressure being maintained at all times.

The Rego Generator uses the ¼x1 1/2-inch (pea size) carbide, which is the size that gives the highest gas yield per pound.

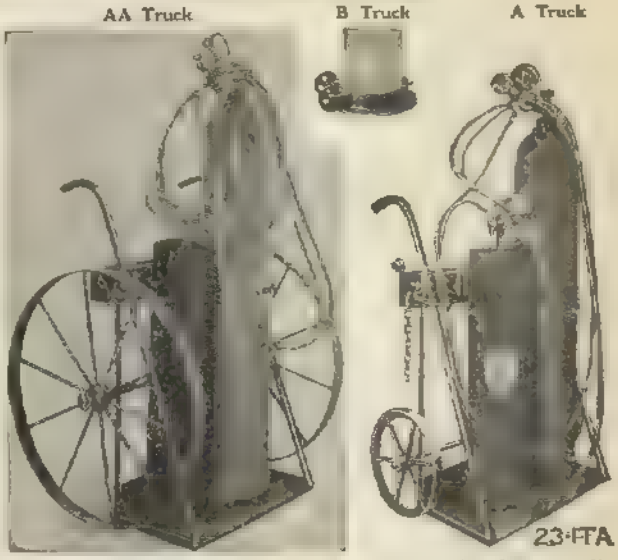
Capacity Lbs. Carbide	Gas per Hr.	Gas per Charge	Weight	Complete
25	25 cu. ft.	125 cu. ft.	196 lbs.	$175 00
50	50 cu. ft.	250 cu. ft.	225 lbs.	225 00
100	100 cu. ft.	500 cu. ft.	353 lbs.	350 00
200	200 cu. ft.	1,000 cu. ft.	850 lbs.	750 00
300	300 cu. ft.	1,500 cu. ft.	1,000 lbs.	900 00

REGO AIR-BLAST KEROSENE BURNER

Rego No. 10K Air-Blast Kerosene Burner. Develops a 10-inch flame which will heat an auto frame to a cherry red in five minutes, and is a splendid investment for reclaiming damaged and bent auto parts, such as axles, frames and shafts. Burns 3 quarts of low grade kerosene per hour. Tank capacity, 1½ gallons. Weight, 10 pounds.

Rego No. 10K Kerosene Burner.
Each $15 00

REGO TANK TRUCKS



Rego AA Two-Tank Truck is very popular because its large 30-inch wheels make transportation over rough ground a simple matter.

Rego AA Truck. Weight, 75 pounds.....each $22 00

Rego A Two-Tank Truck with wheels 13 inches in diameter is excellent where the outfit is used in a shop with a smooth concrete or board floor.

Rego A Truck. Weight, 57 pounds.....each $16 50

Rego B Tank Truck provides means of moving one 200 foot oxygen or hydrogen cylinder for carbon burning or balloon filling jobs.

Rego B Truck. Weight, 16½ pounds.....each $4 50

REGO AIR-BLAST KEROSENE BURNERS

Rego No. 9K Burner develops an intensely hot flame 3 feet long, with sufficient volume of heat to heat shafts, gears and castings of practically any size for welding, straightening or expanding. One hose is dropped into a pail of kerosene, the other connected to an air line of 90 pounds pressure. Uses about 2½ gallons of kerosene—or half and half kerosene and crankcase drainings—per hour.

Comes complete with burner, stand, 12½ feet air hose and 5 feet oil hose.

No. 9K Burner. Weight, 26 pounds... complete $30 00

No. 9K Burner Only, less stand and hose ..each 22 50

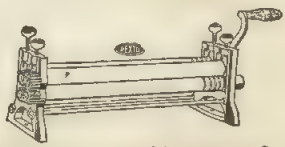
Gripping Rolls open, inches	½	½	½	½	½
Price	$67.00	$73.50	$86.00	$174.00	$160.00

Nos. 390A and 400A back geared 8 to 1.

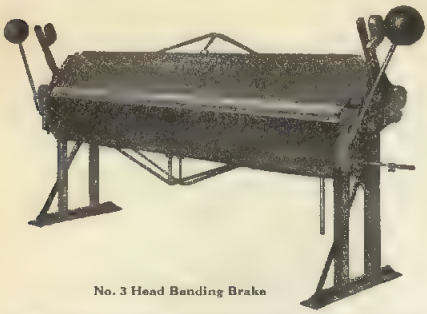
Forming Machines



With Machine Cut Steel Compensating Gears

Number	0372	372	373	380
Shipping Weight, approximately pounds	185	165	140	60
Length Rolls, inches	43	37	31	20½
Diameter Rolls, inches	2	2	2	1½
Price	$67.00	$60.50	$50.00	$46.00

Can also furnish No. 355 series plain Formers with 2 cast gears at a lower price than above machines.



No. 3 Head Bending Brake

Chicago Steel Bending Brakes

Hand Power

Constructed of steel throughout. These brakes are light weight but strong and rigid.

They are adapted to a large variety of work, such as Cornice, Gutter, Square and Octagon pipe. Skylights, flashing, ridge roll, roofing, ventilating, furnace, auto radiator, fender and body, soda fountains, tanks, corrugated drain board, etc. Steel castings and drop forgings are used for hinges and other parts subject to strain. They will stand continuous hard usage without breaking and will not spring or warp.

They embody such features as, one man operation, light weight, quick action, wide opening jaws, provision on ends for flanges and bending edge for forming as small as ¼ inch reverse bends.

Each end clamps independently on brakes over four feet long. Top jaw opens wide and adjustment is provided for clamping pressure. Bending leaf is perfectly balanced which affords easy operation. Provision is made on both ends for bending work on which a crosswise flange has been bent. Set screws provide adjustment of upper jaw forward and back for light or heavy material and sharp or rounding bends. Special manganese steel bending edges withstand wear and maintain extreme accuracy under continuous hard use. Bars on bending leaf are removable to allow for forming reverse bends as narrow as ¼ inch. This is unquestionably the most satisfactory and popular hand bending brake made.

Descriptions and Prices

Rated capacities are for mild sheet steel and for bending a flange of 1 inch or wider on sheets of full capacity. Narrower flanges are bent on lighter metal in proportion. Narrow flanges on heavy sheets, hard metals and special bending call for special consideration. It should be born in mind that narrow flanges cannot be bent on full length sheets of rated capacity.

Standard Equipment. The above sizes are regularly furnished with ¼ inch detachable steel bar on apron; angle bar for heavy bending; improved adjustable stop gauge for regulating angle of bends. Five moulding formers and clamps and wrenches to fit adjustable parts.

Special gauges, attachments or changes in construction will be charged extra. Foot treadle attachment can be supplied at the following extra prices on 3 and 4-foot brakes, **$30.00**; 5 and 6-foot, **$35.00**; 8-foot, **$45.00**; 10-foot, **$50.00.**

Chicago Steel Slitting Shear

The Easiest to operate, Strongest and most Durable Bench Shear.

Indispensable for slitting sheet steel and for cutting steel bars, band iron, brake band lining, belting, etc.

Pressed Steel Construction. Shear blades made of highest grade crucible steel. Equipped with adjustable hold-down. All parts interchangeable.

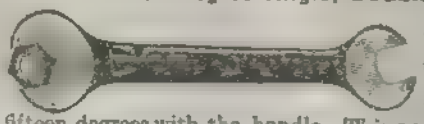
CHECK NUT—THIN

15 Degree Angle, Double Head.



Drop forged from bar steel; flat handle, semi-finished; milled openings. Each opening is at an angle of fifteen degrees with the handle. This permits turning hexagon nuts completely around when the swing of the handle is limited to thirty degrees.

Semi-Finished, Case Hardened.

IRON BENCH PLANES

BAILEY ADJUSTABLE

In the "Bailey" Plane the frog may be adjusted for width of throat opening after removing the cap and cutter and slightly loosening the screws which clamp the frog to the base. Cut opposite also shows the ribbed construction of the bottom and the machined surfaces which give great solidity and solid setting for the frog (A).

The cutters are made of a thin parallel steel of high quality. This cutter is easily kept sharp by honing, with occasional grinding, insuring little work and small possibility of stubbing the bevel. In the frog design the cutter is securely bedded clear to the heel. The cutters may be adjusted either endwise or sidewise

Note—All Bailey Planes have rosewood handles and knobs. The cutters are adjustable endwise and sidewise

IRON BENCH PLANES

BED ROCK ADJUSTABLE

Bottom of frog is machined so as to make it a tongue which fits into a groove formed in the bottom of the plane. This design insures great solidity and perfect alignment between frog and bottom. Movement of the frog in groove for widening or opening the throat and the loosening or tightening of the frog to base of plane is governed by screw adjustment which may be operated without removing the cap or the cutter.

The cutters are made of a thin parallel steel of high quality. This cutter is easily kept sharp by honing, with occasional grinding, insuring little work and small possibility of stubbing the bevel. In the frog design the cutter is securely bedded clear to the heel. The cutters may be adjusted either endwise or sidewise.

Note—All Bed Rock Planes have rosewood handles and knobs The cutters are adjustable endwise and sidewise

WOOD BENCH PLANES

BAILEY ADJUSTABLE

"Bailey" wood planes supply the demand for a wood plane of superior quality. The bottom, handle and knob are made from selected and well-seasoned beech. The cutters are the regular "Bailey" type and are adjustable both endwise and sidewise

The frog is held in place by two machine screws which pass through the top iron and screw into two brass lugs These lugs are screwed and securely pinned into the wood bottom. This is far superior to other methods of fastening, as it holds together firmly, the wood bottom, the top iron which strengthens the wood bottom, and the frog

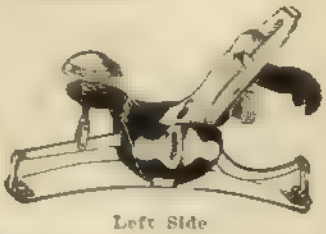
CIRCULAR PLANES

STANLEY ADJUSTABLE

Right Side



Left Side

This plane has an adjustable steel face for planing the inside or outside of circles. Cutters adjustable endwise and sidewise. Has graduated scale for setting the face

No. 113—Japanned; length 10 inches, 1¾ inch cutter; weight each 3½ pounds.....Each **$9.50**

One in a box.

CORE BOX PLANES

STANLEY

For making circular core boxes either straight or tapered. The sides of the Plane are at right angles, consequently the point of the Plane will always cut on the circumference of the circle when the sides rest on the edges of the cut.

No. 57—Nickel plated; length 10 in.; ⅞ in. cutter; beech handle and knob; complete with one pair of sections to work semi-circles from 1 to 5 in.; weight each 6¾ pounds .....Each **$11.50**

One in a box

ROUTER PLANES

STANLEY

Open Throat

For surfacing the bottom of grooves or other depressions parallel with the surface of the work. A wood bottom of any size can be attached, enabling the user to router on large openings. Cutters adjustable and can be held as shown in illustration for regular work or on the back of the cutter post for bull nose work.

No. 71—Nickel plated; length 7½ in.; complete with ¼ and ½ in. cutter, also a smoothing cutter and attachment for closing the throat for use on narrow surface and regulating depth of cut; weight each 2⅝ pounds. .....Each **$5.25**

One in a box

LIGHT COMBINATION PLANES

STANLEY

A small combination plane for light work Adapted for plow beading, matching and rabbet work. Fitted with spurs, depth gauge, and a fence with 5 inch adjustment.

No. 50—Nickel plated; length 9¼ in.; complete with 15 cutters as described below; weight each 1½ pounds .....Each **$10.25**

Plow and Dado—Width, inches ⅛, ¼, ⅜, ½, ⅝, ¾

Beading—Width, inches 1/16, ⅛, ¼, ⅜, ½.

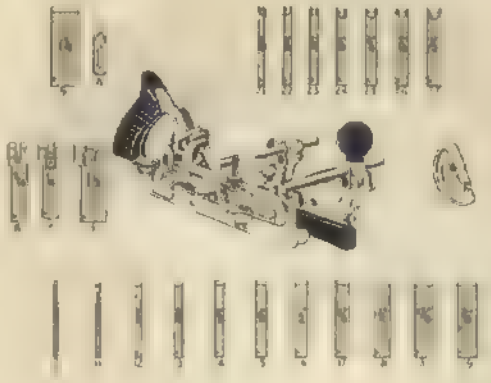
Touguing—Width, inches ¼

One in a box.

STANLEY "FORTY-FIVE" PLANES

Seven tools in one compact and practical form. 1—Beading and Center Beading Plane. 2—Plow. 3—Dado. 4—Rabbet and Filletster. 5—Match Plane 6—Sash Plane. 7—Slitting Plane.

The plane is fitted with spurs for use across the grain, and can be used either right or left hand.



With each plane are furnished twenty-two cutters, all of which are shown in the cut. The cutters, together with the plane, are packed in a neat, substantial box.

All metal parts are nickel plated. The handle, knob and fence are made of selected rosewood

No. 45—Nickel plated; complete with 22 cutters as described below; weight each 9½ pounds.....Each $20 00

One in a box.

SPECIAL BOTTOMS FOR No. 45 PLANE

To work Hollows and Rounds or a Nosing Cutter in the No. 45 Plane specially formed bottoms are furnished, called Hollows, Rounds or Nosing Tool. A Hollow and its Cutter will form a Round. A Round and its Cutter will form a Hollow. A Nosing Tool and its Cutter will form what might be called an Exaggerated Round as in shaping the edges of stair treads. Hollows and Rounds are made and sold in four sizes or sets, each set comprising one Hollow, one Round and two Cutters. A Nosing Tool includes one Cutter.

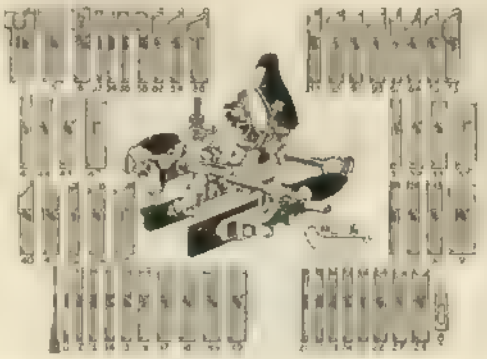
	Per Set
No. 6—Hollow and Round; ½ inch cutters; work ¾ inch circle	$2 80
No. 8—Hollow and Round; ⅝ inch cutters; work 1 inch circle	2 80
No. 10—Hollow and Round; ¾ inch cutters; work 1⅛ inch circle	3 00
No. 12—Hollow and Round; 1 inch cutters; work 1½ inch circle...	3 00
No. 5—Nosing Tool; 1⅛ inch cutters; work 1⅛ inch circle ...	2 00

Note—Special Bottoms for No. 45 Plane are not carried in stock but can be supplied promptly by shipping from factory

STANLEY FIFTY-FIVE PLANES

This tool, in addition to being a Beading and Center Beading Plane, a Plow, Dado, Rabbet, Filletster, and Match Plane, a Sash Plane and a Slitting Plane, is also a superior Moulding Plane, and will accommodate cutters of almost any shape and size. In fact, it is **"a planing mill within itself."**

The regular equipment sent with the plane comprises fifty-three cutters, all of which are shown in the illustration



These cutters together with the plane and all its attachments, are packed in a neat, substantial box.

A further line of forty-one cutters can be had from the factory. Cutters of practically any form can be used in the plane, which the owner can make from blanks or order from sketch.

All metal parts of the plane are nickel plated. The handle and fences are made of selected rosewood, and every part is well finished.

No. 55—Nickel plated rosewood handle and fences, complete with 53 cutters as described below; weight each 15¼ pounds **$42 00**

One in a box.
